EUREKA, Humboldt Co., Cal.—Until May 6, 5 P. M., bids will be received by John Griffith, city superintendent of public works, to paint 3 wooden tanks in Harris St. between E and F Sts. S. Sec. and further information obtainable from superintendent, 524 D St., Eureka.

OAKLAND, Cal.—Art Concrete Works, 21th and Adeline Sts., Oakland, at \$3500 awarded contract by East Bay Municipal Utility District to furnish 5000 concrete meter boxes.

SALES REPRESENTATIVES ARE APPOINTED

Heltzel Steel Form and Iron Company announces appointment of Kratz and McClelland, Inc., 322 Bryant St., San Francisco, as representative in the Northern and Central California section and Crook Company, 1220 S Grand Ave., Los Angeles, as representative in the Southern section of the state.

Engineering News Section

BRIDGES

CALAVERAS COUNTY, Cal.—Geo. J. Ulrich Const. Co., Modesto, at \$18,037 awarded contract by State Highway Commission to construct a reinforced concrete girder bridge over Calaveritas Creek, 3 miles south of San Andreas, consisting of one 60-ft. span on concrete piers and six 30-ft. spans on conc. bents and abutments with rubble masonry wing walls.

PLUMAS COUNTY, Calif.—A. T. Howe, Santa Rosa, at \$10,990 awarded contract by State Highway Commission to construct a reinforced conc. girder bridge over fork of Feather River at Chester, consisting of three 35-ft. spans on concrete pile bents.

OROVILLE, Butte Co., Cal.—Until May 6, 2 P. M., bids will be received by C. F. Belding, county clerk, to construct timber bridge with rubble masonry abutments over Chico Creek on Chico Canyon road. Certified check 10% required with bid. Plans obtainable from J. A. Baumgarner, county road engineer.

SAN CARLOS, San Mateo Co., Cal.—City defeats proposal to issue bonds of \$10,000 to finance construction of five bridges over Cedar, Chestnut, Elm Arroyo and Stanford Lane.

OAKLAND, Cal.—Until May 6, 10:30 A. M., bids will be received by Geo. E. Gross, county clerk, for repairs to Bay Farm Island Bridge, involving widening of eastern approach to span and replacement of piling and strengthening other portions of the structure. Estimated cost \$39,000. Certified check 10% payable to clerk required with bid. Plans on file in office of clerk and obtainable on deposit of \$25, returnable. Geo. A. Posey, county surveyor.

SANTA ROSA, Sonoma Co., Cal.—Until May 5, 12 noon, bids will be received by Geo. P. Sanborn, county clerk, to construct 90-ft. timber bridge over Hobson Creek at Hacienda, Fifth Supervisorial District, involving:
47 cu. yds. excavation;
25 cu. yds. concrete;
20-3 M.B.M. lumber;
2,000 lbs. structural steel;
5,000 lbs. reinforcing steel.
Plans obtainable from County Surveyor E. A. Peugh.

SANTA ROSA, Sonoma Co., Calif.—County Supervisors authorize \$85,000 appropriation as Sonoma county's share in the construction of the proposed \$355,000 bridge over the Russian river at Jenner. The money is available provided the Shoreline Highway District furnishes its share of the cost. J. B. Platt, Santa Rosa, is engineer for the district.

EUREKA, Humboldt Co., Calif.—County Surveyor Frank Kelly completes plans for proposed concrete bridge over Eel River at Redway and a call for bids will be issued in about 30 days. Will have two spans, each 140-ft. in length; estimated cost \$45,000.

EUREKA, Humboldt Co., Cal.—Until May 7, 10 A. M., bids will be received by Fred M. Kay, county clerk, to construct a concrete culvert over Quill Slough's in Road Dist. No. 3.

Certified check 5% required with bid. Plans obtainable from Frank Kelly, county surveyor.

EUREKA, Humboldt Co., Cal.—Until May 7, 10 A. M., bids will be received by Fred M. Kay, county clerk, to construct trestle bridge over Old River near Clausen's in Road Dist. No. 1.

Certified check 5% required with bid. Plans obtainable from Frank Kelly, county surveyor.

STOCKTON, San Joaquin Co., Cal.—E. R. Stokes, 933 South Sierra Nevada St., Stockton, at \$3300 awarded contract by county supervisors to construct bridge over Littlejohn Creek in Van Allen District. Complete list of bids follows:

R. Stokes	\$3200
Carl Nelson	3657
L. Uebel	3690
Robert Beryle	3992
F. E. Fitzsimmons	4100
Nelson Bros	4145
John Heckman	4400

MODOC COUNTY, Calif.—Following bids received April 23 by State Highway Commission to construct two timber bridges, one across north fork of Pit river, about 3½ miles NW of Alturas, consisting of seven 19-ft. spans with concrete deck on pile bents and the other across Shields creek channel change, about 4 miles NE of Alturas, consisting of three 19-ft. spans with concrete deck on pile bents. Project involves: Furnish 3000 lin. ft. creosoted Douglas fir piles; drive 33 creosoted Douglas fir piles; 53 M. ft. b.m. creosoted Douglas fir timber, select struc. grade; 7 M. ft. b.m. untreated Douglas fir timber, select struc. grade; 87 cu. yds. class A Port. cem. conc. (pave.); 9500 lbs. reinf. steel; one lot miscellaneous items of work:

Smith Bros. Co., Eureka	\$13,875
R. B. McKenzie, Red Bluff	15,402
M. B. McGowan, S. F.	16,772

SAN BERNARDINO CO., Cal.—Following bids received April 23 by State Highway Commission to construct a bridge across Mojave river, 3 miles north of Victorville, consisting of one 270-ft. through steel truss span, five 51-ft. concrete girder spans and one 48-ft. concrete girder span on cone piers and bents. Project involves: 5,900 cu. yds. rdwy. excav.; 50,000 sta. yds. overhaul; 148 lin. ft. 36-in. corr. metal pipe; 350 lin. ft. laminated timber guard rail; 294 mi. oiling detour; one existing bridge to be removed; 1400 cu. yds. struc. excav.; 1430 cu. yds. class A; 400 cu. yds. class B and 265 cu. yds. class C Port. cem. conc.; 260,000 lbs. reinf. steel; 750,000 lbs. struc. steel; 12,500 lbs. cast steel; 6,220 lbs. bronze expansion plates; 19,200 lbs. cast iron in railing; 62,000 lbs. struct. steel in railing; 870 cu. yds. riprap; one lot miscellaneous items of work. State will furnish corr. metal pipe.

J. F. Knapp, Oakland	\$118,460
Rocca & Colletti, San Rafael	126,704
Carpenter Bros., Beverly Hills	131,806
Whipple Eng. Co., Monrovia	132,300
H. W. Rohl Co., Los Angeles	136,203
Lynch-Cannon Eng. Co., L. A.	143,664
Gist & Bell, Arcadia	144,918
Torsen Const. Co., Long Beach	149,127
Lord & Bishop, Sacramento	152,700

DREDGING, HARBOR WORKS & EXCAVATIONS

OAKLAND, Cal.—A. W. Kitchen, 110 Market St., at \$846 awarded contract (informal) by City Port Commission to construct four 3-pile dolphins in Outer Harbor Channel.

RICHMOND, Contra Costa Co., Cal.—San Francisco Bridge Co., Nevada Bank Bldg., San Francisco, at 15.5c cu. yd. (\$22,124.65) awarded contract by E. A. Hoffman (city engineer) for dredging Ellis Slough. It is proposed to dredge a channel 4,000 ft. long and 300 ft. wide, with a depth of 30 ft. from the north terminal of Richmond inner harbor, and to construct a turning basin at the end. Only a portion of the channel will be less than 300 ft. wide, due to the failure of Procter & Gamble to join the agreement to do the dredging. The channel in front of the Procter & Gamble site, for a distance of 900 ft. will be only 200 feet wide. This is a private project and will be financed by the following property owners: Santa Fe Railroad Co., San Francisco Bridge Co., Duncanson & Harrelson, Richmond Navigation & Improvement Co., Richmond Investment Co.; Enterprise Foundry Co. and A. Banzoff.

ALBROOK FIELD, Canal Zone.—Until 11 A. M., May 15, bids will be received by war department office of Department Quartermaster, Quarry Heights, C. Z., for excavating 415,000 cu. yds. of earth, more or less, and placing same in embankment for aeroplane landing field, and for constructing 15 miles, more or less, of sub-surface vitrified tile drainage ditches at Albroom Field, Canal Zone. Plans obtainable on deposit of certified check for \$10, to order of treasurer of United States, at above office, or at office of constructing quartermaster, No. 39 Whitehall St., New York City, N. Y.

OAKLAND, Cal.—American Dredging Co., 255 California St., San Francisco, at \$0.33 cu. yd. submitted low bid to City Port Commission for dredging at oil wharf, outer harbor. Pacific Coast Dredging Co. only other bidder at \$0.35 cu. yd. Taken under advisement.

OAKLAND, Cal.—Until April 28, 4:30 P. M., bids will be received by G. B. Hegardt, Secretary, City Port Commission, 424 Oakland Bank Bldg., for repairing dredge. Plans obtainable from above.

STREET LIGHTING SYSTEMS

FRESNO, Fresno Co., Calif.—Until May 1, 10:30 A. M., bids will be received by H. S. Foster, city clerk (101-D) to install lighting system in Stanislaus St. bet. Van Ness Ave. and Point 75 ft. NE of O St., in O St. from Stanislaus St. to point 125-ft. NW from Stanislaus St., and in portions of Blackstone Ave., involving installation of 137 standards together with underground system. Comb. steel and cast iron standards. 1911 Act. Cert. check 10% payable to city required with bid. Plans on file in office of clerk.

SAN JOSE, Santa Clara Co., Cal.—City Engineer, Wm. Popp preparing plans for electrolite lighting system in Third St., bet. St. John and San Carlos Streets.

LOS ANGELES, Cal.—Until 2 P. M., May 12, bids will be received by the county supervisors to construct lighting system in Brooklyn Ave., between Record St. and Mednik Ave., Belvedere, C. I. No. 535, involving 48 Marbelite standards, type 2500. Estimate cost, \$21,075.

MACHINERY AND EQUIPMENT

SACRAMENTO, Cal.—Until May 13, 11 A. M., under Circular Proposal No. 30-347, Specification No. 1898, bids will be received by U. S. Engineer Office, California Fruit Bldg., to construct and deliver afloat one survey boat. Further information obtainable from above.

HAWTHORNE, Nevada—Until May 6, 10 A. M., bids will be received by Bureau of Supplies and Accounts, Navy Department, Washington, D. C., to furnish switching locomotive to Naval Ammunition Depot at Hawthorne. Specifications and further information obtainable from above office and on file in Navy Purchasing Office, 100 Harrison St., San Francisco.

SACRAMENTO, Cal.—Jenison Machinery Co., 58 Fremont St., San Francisco, awarded contract by Board of Education to furnish and install portable saw at \$276; portable band joiner at \$285 and three portable band saws at \$324 each. Equipment to be used in connection with school shop departments.

OAKLAND, Cal.—Until April 28, 4:30 P. M., bids will be received by G. E. Hegarct, Secretary, City Port Commission, 424 Oakland Bank Bldg., for repairing dredge. Plans obtainable from above.

FRESNO COUNTY, Cal.—Until Apr. 30, bids will be received by R. J. Carlisle, supt. of equipment, Shop No. 6, State Highway Department, 645 W. Olive St., Fresno, for the purchase of the following equipment no longer required by the commission:

CHC 34 Detroit Mower Attachment for Fordson Tractor.

CHC 121 Ingersoll Rand Jackhammer.

CHC 81 Fairbanks Morse 4x5 Typhoon pump unit gear driven type Z 3-hp. Gas Engine.

CHC 48 Fairbanks Morse 2 cyl. horizontal 4x6 Duplex force pump.

CHC 190 McCormick Deering Tractor rubber tired with a 85 Spearwell 8-ft. Grader Attachment CHC 35.

CHC 120 Georges 172 gal. Asphalt Heating Kettle.

One 3-yr. Dump Body Horizontal Hydraulic hoist.

Bidders may make offers for one or more items but must state price offered for each item. No lump sum bids will be considered.

All equipment may be inspected at the Division of Highways yards at 645 W. Olive Ave., Fresno.

SACRAMENTO, Cal.—Until April 30 2 P. M., bids will be received by W. H. Riechel, Superintendent of Equipment, Shop 10, State Highway Commission, 1802 34th St., Sacramento, for the sale of the following equipment no longer required by the commission:

CHC 35 Detroit Mower Attachment for Fordson Tractor.

CHC 30 Detroit Mower Attachment for Fordson Tractor.

CHC 24 Buffalo-Pitts 18-ton Steam Roller.

CHC 84 McLeod Pavement Burner—with hood, 2 wheeled.

CHC 187 Office Wagon (4 wheeled) Office Size 10-ft. 2-in. by 6-ft. 6-in.; located at Cordelia.

CHC 204 Office Wagon (4 wheeled) Office Size 10-ft. 2-in. by 6-ft. 6-in.; located at Stockton.

CHC 208 Office Wagon (4 wheeled) Office Size 10-ft. 2-in. by 6-ft. 6-in.; located at Twin Cities.

CHC 1703 Standard Truck Chassis Model 66-S with cab.

CHC 165 Royal 8-ft. Grader; located at Woodford, Alpine County.

CHC 1193 Liberty Truck Chassis with cab at Sacramento.

Bidders may make offers for one or more items but must state price offered for each item. No lump sum bids will be considered.

All equipment may be inspected at the Division of Highways yards at 1802 34th St., Sacramento, California, from 8:30 A. M. to 4:30 P. M., on any working day, except as noted above.

BREA, Orange Co., Cal.—Until 4 P. M., April 28, bids will be received by the Brea-Olinda Union High School District for furnishing one 1½-ton truck. G. W. Cullen, clerk.

RAILROADS

SAN FRANCISCO.—Bureau of Engineering, Department of Public Wks 3rd floor, City Hall, making surveys to extend Municipal Railway from its present terminus at 48th Ave. to Sloat Blvd. at a point near Fleishacker Playground.

SAN FRANCISCO.—United States Steel Products Co. (Columbia Department), Russ Bldg., awarded contract by Board of Supervisors to furnish and deliver 200 rolled steel car wheels for Municipal Railway System, at \$35.50 each. Diameter of wheel 34-in., hub diameter 9¼-in.; rim width 43-16-in., hub length, 6-in.; rim thickness, 2½-in., hub projection 2 15-16-in.; tread width 3-in., flange width 1 3-16-in.; flange height ¾-in., rough bore 5½-in.; four drilled holes in each plate; outside edge of rim leveled ¾%-in.; numbers stamped on plate. Delivery Pipe Yard, 6th and Hubbell Streets; Freight prepaid.

FIRE ALARM SYSTEMS

MONTEREY, Monterey Co., Cal.—Acme Traffic Signal Co., only bidder at \$1,775 awarded contract by city council to furnish and install traffic signals at intersection of Franklin and Alvarado Sts.

FIRE EQUIPMENT

VALLEJO, Solano Co., Cal.—American-La France Fire Engine Co. at \$1,350 awarded contract by city council to furnish and deliver one 750-gal. quadruple city service truck with booster tank equipment and hose body. Seagrave Corp. only other bidder.

HAYWARD, Alameda Co., Cal.—Second election will be called by city council to vote bonds of \$15,000 to finance purchase of a motor fire truck, previous election failing to carry by a slight majority.

MISCELLANEOUS SUPPLIES AND MATERIALS

BERKELEY, Alameda Co., Cal.—City Clerk Florence Turner instructed by city council to call for bids to furnish 158,000 gals. gasoline for mun-

icipal use for the fiscal year 1930-1931, also for fuel and lubricating oils. Specifications are on file in the office of the clerk, Harry Goodridge is city engineer.

RESERVOIRS AND DAMS

PALO ALTO, Santa Clara Co., Cal.—Minton Co., Mt. View, at \$3264 submitted low bid to Board of Public Works to construct a reinforced concrete reservoir in park opposite Mayfield Depot near Oregon Avenue and Alma St. Four low bids, of the ten submitted, follow:

Minton Company	\$3,264
Thermotite Const. Co., San Jose 3,274	
Collins & Martin, San Jose.....	3,395
W. P. Goodenough, Palo Alto.....	3,422

PIPE LINES, WELLS, ETC.

TULARE, Tulare Co., Cal.—Due to irregularities, city council rejects bids to drill well in connection with municipal water system. New bids will be asked at once by R. M. Berryhill, city manager.

OAKLAND, Cal.—Pacific Coast Engineering Co., Foot of 14th St., Oakland, submitted low bid to City Port Commission to furnish (a) 2000 ft. to 4000 ft. and (b) 500 ft. to 1000 ft. steel dredge shore pipe. Bids were:

Pacific Coast Engineering Co.—(a)	\$2.35; (b) \$2.30.
Western Pipe & Steel Co.—(a) \$2.42; (b) \$2.55.	
Montague Pipe & Steel Co.—(a)	\$2.47; (b) \$2.51.

SEWERS AND SEWAGE DISPOSAL PLANTS

FAIRFIELD, Solano Co., Cal.—Until May 5, 10 A. M., bids will be received by G. G. Halliday, county clerk, for the construction of vitrified sanitary sewer system, together with manholes, inspection holes, sewerage pumping plant, etc., in Acq. and Imp. Dist. No. 1. Work under Acq. and Imp. Act 1925. City of Vallejo will pay \$30,526.48 of total cost, which is estimated at \$150,000. Certified check 10% payable to county required with bid. Plans on file in office of clerk.

SANGER, Fresno Co., Calif.—Until May 6, 8 P. M., bids will be received by Frank Niles, city clerk, to furnish materials and extend sewer system for a distance of 3,335-ft. Bids will be considered for both concrete and vit. pipe. Spec. on file in office of clerk.

BERKELEY, Alameda Co., Calif.—Schnoor Bros., 5905 Claremont Ave., Berkeley, at \$1,813 submitted low bid to city to construct a conduit in Corporacion Creek at the Municipal Airport. Following is a complete list of bids, all taken under advisement:

Schnoor Bros.	\$1,813
Oakland Const. Co., Oakland.....	1,864
H. K. Henderson.....	1,997
Walter Todd, Oakland.....	2,007
Martin Murphy, Oakland.....	2,195
J. H. Fitzmaurice, Oakland.....	2,274
Paris Bros., Berkeley.....	2,280
Heafey-Moore Co., Oakland.....	2,400
City Imp Co., Oakland.....	2,656

HAWTHORNE, Nevada—Gladding, McLean & Co., have been awarded contract by the Thomas Haverly Co. for furnishing five miles of 3 to 12-in. sewer pipe to be used in connection with the installation of utilities at the Naval Ammunition Depot, Hawthorne, for the United States Government.

NEWPORT BEACH, Orange Co., Cal.—The city council has signed a contract with the Currie Engineering Co. to make a survey and prepare plans for a sewage disposal plant. The engineering firm will receive 8% of the total cost of the job and a fee of not less than \$1000 to be paid for the plans. If the city build the plant, the fee is to be deducted.

SAN FRANCISCO—J. J. Gartland, 1275 Guerrero Street, at \$53,362 submitted low bid to Board of Public Works to construct Geary St. and 23rd Ave. sewer from 27th Ave. and Geary St. to 23rd Ave. and Lake St.; estimated cost, \$61,000. Project involves in the main, 34,000 ft. 4x6-in. to 23x-ft. reinf. conc. sewers. Gartland claims error in compiling his bid and will request that he be permitted to withdraw same. Complete list of bids follows:

J. J. Gartland	\$53,362
P. McHugh	\$66,751
L. J. Cohn	68,759
McDonald & Kahn	69,491
E. J. Treacy	70,541
C. C. Haun	78,472

SAN FRANCISCO—L. J. Cohn, 117 Montgomery St., at \$112,031 submitted low bid to Board of Public Works to construct Section B of the Fillmore St. Sewer, involving in the main 3,000 ft. 6-ft. 9-in. circular reinf. concrete sewer in Tenth and Fell Sts. from Harrison St. to Van Ness Ave.

Complete list of bids follows:

L. J. Cohn	\$112,031
MacDonald & Kahn	116,272
P. McHugh	117,343
Rocca & Coletti	120,621
C. B. Eaton	121,595
C. C. W. Haun	124,531
Healy-Tibbitts Const. Co.	129,372

VALLEJO, Solano Co., Calif.—Until May 7, 11 A. M., bids will be received by Alf. E. Edgcombe, city clerk, to construct a 36-inch vitrified clay pipe sanitary outfall sewer with creosoted timber cradle and pile foundation on direct extension westerly of the center line of Ryder St., extending from City Bulkhead to Longitudinal Dyke of U. S. Govt. on east side of Mare Island Channel. The time for completion is set for 120 days with \$10 per day penalty. Certified check 10% payable to city required with bid. Plans on file in office of clerk and obtainable from T. D. Kilkenny, city engineer.

SAN FRANCISCO—J. Varano, 16 Gerke Alley, at \$20,105 submitted low bid to Board of Public Works to construct Bay View District Sewers, involving 369 lin. ft. 4-ft. 6-in. reinf. concrete sewer, exclusive of piles; 703 lin. ft. 2-ft. 6-in. x 3-ft. 9-in. reinf. conc. sewers, exclusive of piles; 1250 lin. ft. open ditch; 400 lin. ft. 6-in. V. C. E. underdrain covered with concrete or imbedded in broken rock; 700 lin. ft. V. C. E. underdrain underdrained with concrete or imbedded in broken rock; one reinf. conc. junction struc., exclusive of piles; one reinf. conc. taper struc., exclusive of piles; 4 brick or concrete manholes; 10,500 lin. ft. wood piles below cutoff, in place. Complete list of bids follows:

J. Varano	\$20,105
M. J. Lynch	20,866
P. McHugh	21,402
L. J. Cohn	31,947
C. B. Eaton	22,417
C. B. Cowden	23,260
M. B. McGowan	23,926
E. J. Treacy	24,650
Rocca & Coletti	24,742
C. L. Harney	26,710
McDonald & Kahn	28,105

ATWATER, Merced Co., Cal.—W. J. Tobin, 527 Balfour Ave., Oakland, \$54,673 awarded contract by city council

to construct sewer system and treatment plant. Contract awarded on basis of using vitrified pipe.

WATER WORKS

SAN FRANCISCO—Western Pipe & Steel Co., 414 Market St., awarded contract by Pacific Fruit Express to furnish 500 steel car underframes with accessories.

SAN DIEGO COUNTY, Cal.—Southern California Water Supply Co., San Francisco, has filed application with State Department of Public Works, Division of Water Rights, seeking to appropriate 18.6 cu. ft. of water per second from the Sweetwater River, a tributary of San Diego Bay, for an irrigation and domestic water system, involving an expenditure of \$1,500,000. The towns of National City, Chula Vista and Coronado and unincorporated areas in the vicinity will be served. Five thousand acres of land will be irrigated, in addition to the domestic supply for the cities mentioned.

BELLINGHAM, Wash.—Until May 1, bids will be received by city council to furnish 500 tons of pipe, as follows: 3000 ft. 8-in. class B centrifugal; 3000 ft. 4-in. do; 1000 ft. 12-in. do; 8000 ft. 6-in. do. Further information obtainable from city clerk.

CORRALITOS, Santa Cruz Co., Cal.—Engineer Arnold M. Baldwin, Leonard Bldg., Santa Cruz, is making surveys for a water supply system for which bonds of \$125,000 have been voted to finance. Details on this project will be given when the plans are further advanced.

SANTA BARBARA, Cal.—Until 2:30 P. M., May 1 (tentative date), bids will be received by city for all labor and material (except pump, motor and starter, which will be furnished by the city), for constructing salt water pipe line and pumping system for Los Banos Del Mar pool, located at West Cabrillo Blvd. and Castillo St. The work involves 947 ft. of 6-in. welded iron pipe, with valves, fittings, suction hose, buoy and pump foundations. Cert. check or bond, 10%. E. B. Brown city engineer.

SAN FRANCISCO—Until April 28, 3 P. M., under Proposal No. 582, bids will be received by Leonard S. Leavy, city purchasing agent, 270 City Hall, to furnish and deliver 10,000 ft. 8-in. and 10,000 ft. 6-in. bell and spigot cast iron pipe (made in U. S. A.) Specifications and further information obtainable from above.

VENTURA, Ventura Co., Cal.—Until 11 A. M., May 6, bids will be received by the Ventura county supervisors for furnishing and erecting a 125,000-gal. steel water tank at Moorpark. Bids for a concrete reservoir to serve this district were rejected. Bids will also be received at the same time for the necessary piping and the booster pump.

WHITTIER, Los Angeles Co., Cal.—The \$310,000 water bond issue carried at the election April 14. The estimate, as prepared several months ago, includes the following: (1) two wells, including motors, pumps, buildings and site, \$45,030; (2) 30-in. pipe line from wells to settling basin, \$21,600; (3) settling basins, booster plant and site, \$23,880; (4) 30-in. pipe line, settling basin to reservoir, including meter, \$37,780; (5) 10,000,000-gal. reservoir including site, \$75,095; (6) 6-in. pipe line from new reservoir to Rideout Heights reservoir, \$2130; (7) Rideout Heights reservoir, including

site and pipe line, \$3453; (8) 24-in. pipe line connecting 10,000,000-gallon reservoir and Greenleaf reservoir, \$22,526; (9) 16-in. pipe line from Greenleaf to Fainter reservoir, \$4530; (10) 2 boosters and building, new reservoir to Rideout reservoir, including meter, \$1734; (11) one booster, Greenleaf to Fainter reservoir, with building and meter, \$2924; (12) 1 booster to College Hills, including building, automatic control and meter, \$2924; (13) repairs to Corliss engines, signal system, power lines, including new buildings and derrick at present wells, \$10,000; (14) repairs to Greenleaf reservoir, \$5000; (15) 4-in. mains \$8400; (16) 6-in. mains \$4500; (17) 8-in. mains, \$6500; (18) miscellaneous, \$4295.

SANTA ANA, Orange Co., Cal.—U. S. Pipe and Foundry Co. awarded contract by city council to furnish cast iron pipe for water department, as follows: 15,000 lin. ft. 4-in. 39.7c; 11,000 lin. ft. 6-in., 57.9c; 4500 lin. ft. 8-in., \$1.5c; 3,000 lin. ft. 10-in., \$1.094; 6300 lin. ft. 12-in., \$1.43.

SAN FRANCISCO—U. S. Pipe and Foundry Co., Monadnock Bldg., at \$0.53 lin. ft. awarded contract by Board of Supervisors to furnish 10,000 ft. 6-in. cast iron (class 150) centrifugally cast bell and spigot pipe (made in U. S. A.) in 12- or 18-ft. lengths, f.o.b. docks, San Francisco; 45 days.

CLOVERDALE, Sonoma Co., Cal.—City votes to transfr. \$15,000 bond money from street paving funds to water fund to finance extensions and improvements to municipal water system.

TULARE, Tulare Co., Cal.—R. E. Rounsaville, Tulare, at \$5,168.35 awarded contract by city council to construct extension to water works system, involving 3700 ft. 6-in. and 8-in. water mains. Ajax Const. Co., bid \$5,568.39.

LOS ANGELES, Cal.—Consolidated Steel Corporation awarded contract by the Rio Grande Oil Company for fabrication and erection of four 123,000-barrel riveted steel tanks at Vinvale, near Downey, and two of similar capacity at Bakersfield. The company has also been awarded contract by Ohio Oil Company to fabricate and erect two 80,000-barrel tanks in the new Venice field.

PLAYGROUNDS & PARKS

SAN JOSE, Santa Clara Co., Cal.—City council contemplates purchase of Vendome Hotel grounds on which it is proposed to lay out a public park comprising 10 acres. Negotiations for the purchase are now under way.

SAN FRANCISCO—City Playground Commission seeks \$541,500 appropriation for operation during next fiscal year. The commission wants \$300,000 to buy 50 acres in the Lake Merced district for baseball diamonds, \$211,500 for four blocks in the Sunset district for playgrounds, and \$39,000 for a playground site in Visitation valley.

STREETS AND HIGHWAYS

REDWOOD CITY, San Mateo Co., Cal.—W. O. Tyson, 422 Jefferson St., Redwood City, at \$1363.36 awarded contract by city council (M-2) to improve Ebner Street from Roosevelt Ave. to Oak Ave., involving grading; cem. conc. curbs, gutters, walks.

Edgcombe, city clerk, (170) to improve Kissell alley from Butte to Branciforte Sts., involving grading; 3-in. by 12-in. r.w. curbs; 5-in. cem. conc. paving. 1911 Act. Bond Act 1915. Certified check 10% payable to city required with bid.

Plans obtainable from T. D. Kilkenny, city engineer.

CHICO, Butte Co., Cal.—Union Oil Co. at \$1,3208 per barrel, including freight charges, awarded contract by city council to furnish and deliver 100,000 gals. oil for street improvements.

LOS ANGELES, Cal.—Until May 5, 2 P. M., bids will be received by county supervisors to improve Main St. north of Wilmington, under Cash Contract No. 334, involving in the main 455,000 sq. ft. 10-7-7-10-in. conc. pavement; 340,000 sq. ft. 9-7-7-9-in. conc. pavement; 473,000 sq. ft. 2-in. asph. conc. surface pavement; 30 tons asph. conc.; 468,000 sq. ft. 6-in. asph. conc. base; 321,260 sq. ft. 5-in. D. R. pave and shoulders with oil and rock surface, etc. Plans on file in office of county clerk.

SAN BERNARDINO COUNTY, Cal.—Until May 14, 2 P. M., bids will be received by State Highway Commission to grade 0.8 mile at Mojave River. C. H. Purcell, state highway engineer. See call for bids under official proposal section in this issue.

RED BLUFF, Tehama Co., Calif.—County supervisors adopt resolution providing for organization of joint highway district comprising Butte and Tehama counties, to finance improvement of road, 6.4 miles in length, linking east and west side highways from Proberta to a point $\frac{1}{2}$ -mile north of Molinos. Will involve scarfing and surfacing 6.4 miles of road at a cost of \$350 per mile.

SACRAMENTO, Cal.—Until May 5, 5 P. M., bids will be received by Chas. C. Hughee, secretary, Board of Education, School Administration Bldg., 21st and L Sts., for approximately 15,000 sq. ft. of asph. conc. pavement; 324 lin. ft. 2-ft. concrete curb and gutter. Cert. check 10% payable to Board of Education required with bid. Plans obtainable from Business Manager of Board, School Administration Building.

SAN ANDREAS, Ca'averas Co., Cal.—Until May 5, 3 P. M., bids will be received by John Squellati, county clerk, to improve Valley Springs-Belota County Highway between town of Valley Springs and boundary line of San Joaquin county, involving furnishing and placing a light fuel oil. Cert. check 10% required with bid. Plans on file in office of county clerk.

OFFICIAL PROPOSALS

STATE OF CALIFORNIA

DEPARTMENT OF PUBLIC WORKS

DIVISION OF HIGHWAYS

NOTICE TO CONTRACTORS

SEALED PROPOSALS will be received at the office of the State Highway Engineer, Public Works Building, Sacramento, until 2 o'clock P. M. on May 14, 1930, at which time they will be publicly opened and read, for construction in accordance with the specifications therefor, to which special reference is made, of portions of State Highway, as follows: San Bernardino County, at Mojave River (VIII-SBD-31-D), about eight-tenths (.8) mile in length, to be graded.

Proposal forms will be issued to only those Contractors who have furnished verified statement of experience and financial condition in accordance with the provisions of

Chapter 44, Statutes 1929, and whose statements so furnished are satisfactory to the Department of Public Works. Bids will not be accepted from a Contractor to whom a proposal form has not been issued by the Department of Public Works.

Plans may be seen, and forms of proposal, bonds, contract and specifications may be obtained at the said office, and they may be seen at the offices of the District Engineers at Los Angeles and San Francisco, and at the office of District Engineer of the district in which the work is situated. The District Engineer's offices are located at Eureka, Redding, Sacramento, San Francisco, San Luis Obispo, Fresno, Los Angeles, San Bernardino and Bishop.

A representative from the district office will be available to accompany prospective bidders for an inspection of the work herein contemplated, and Contractors are urged to investigate the location, character and quantity of work to be done, with a representative of the Division of Highways. It is requested that arrangements for joint field inspection be made as far in advance as possible. Detailed information concerning the proposed work may be obtained from the district office.

No bid will be received unless it is made on a blank form furnished by the State Highway Engineer. The special attention of prospective bidders is called to the "Proposal Requirements and Conditions" annexed to the blank form of proposal, for full directions as to bidding, etc.

The Department of Public Works reserves the right to reject any or all bids or to accept the bid deemed for the best interests of the State.

DEPARTMENT OF PUBLIC WORKS, DIVISION OF HIGHWAYS.

C. H. PURCELL,

State Highway Engineer.

Dated April 16, 1930.

NOTICE TO CONTRACTORS

SEALED BIDS will be received by Geo. B. McDougall, State Architect, Public Works Building, 11th and P Streets, Sacramento, California, up until 2 o'clock P. M., Tuesday, May 13, 1930, thereafter on said day to be publicly opened and read for the erection and completion of Groups of Buildings at Three Maintenance Stations, District #7, Division of Highways, in accordance with plans and specifications therefor.

The sites for the proposed structures are located as follows:

1. At Big Sycamore Canyon in Ventura County on the Santa Monica-Oxnard Highway, 15.8 miles southeasterly from Oxnard.

2. In Las Flores Canyon in Los Angeles County, 0.6 miles north of the Santa Monica-Oxnard Highway, and 7.5 miles west of Santa Monica.

3. At Serra on the Los Angeles-San Diego Highway, 3 miles south of Capistrano in Orange County; all in the State of California.

Each group of buildings consists of one five-room cottage, one bunk house and garage building, one oil house, one septic tank. Separate bids will be entertained for one or more of the groups, and combined bids will also be taken for all three groups.

Plans and specifications are on file for examination in the office of the Division of Architecture, Public Works Building, Sacramento, and also at Room 1025 Associated Realty Building, Los Angeles, and at the principal California Cities Builders' Exchange Offices.

Plans, specifications and proposal form may be secured by licensed contractors who have qualified or who will qualify by furnishing a verified statement of experience and financial condition as required by the provisions of Chapter 444, Statutes 1929, and whose statements so furnished are satisfactory to the Department of Public Works. Questionnaire forms may be secured from the Division of Architecture.

Bids will not be accepted from a Contractor to whom a proposal form has not been issued and all bids must be on proposal forms supplied by the State.

Requests for plans shall be accompanied by a deposit of twenty-five (\$25.00) dollars. Check shall be made payable to the Department of Public Works, Division of Architecture. Deposit will be returned upon receipt of the set in good condition, at Sacramento Office of the Division within 30 days after opening bids, otherwise it will be forfeited to the State.

All bids must be filed at the office of the State Architect on or before the time heretofore stated and in accordance with the "Rules for Bidding" accompanying the proposal form.

No bid will be considered unless cash, a bidder's bond made payable to the State of California or a certified check made payable to the "State Engineer, Department of Public Works," in the sum of at least ten per centum (10%) of the amount of the bid is enclosed with the bid.

The Division of Architecture, State Department of Public Works, reserves the right to reject any or all bids and to waive any informality in any bid received.

NOTICE TO CONTRACTORS

General Work

SEALED BIDS will be received by Geo. B. McDougall, State Architect, Public Works Building, 11th and P Streets, Sacramento, California, up to 2 o'clock P. M., Tuesday, May 20, 1930, thereafter on said day to be publicly opened and read for the erection and completion of the General Work for the Ward Building and Shop Building, Whittier State School, Whittier, California, in accordance with plans and specifications thereof.

The Ward Building is a two-story brick structure with frame interior construction and tile roof. The floor area is approximately 8800 square feet. The shop building is a one-story brick structure with concrete floor, wood roof construction and tile roof. The floor area is approximately 11,200 square feet.

Plans and specifications are on file for examination in the office of the Division of Architecture, Public Works Building, Sacramento, California, and also at Room 1025 Associated Realty Building, Los Angeles, and at the principal California Cities Builders' Exchange Offices.

Plans, specifications, and proposal forms may be secured by licensed General Contractors who have qualified or who will qualify by furnishing a verified statement of experience and financial condition as required by the provisions of Chapter 644, Statutes 1929, and whose statements so furnished are satisfactory to the Department of Public Works. Questionnaire forms may be secured from the Division of Architecture.

Bids will not be accepted from a Contractor to whom a proposal form has not been issued and all bids must be on proposal forms supplied by the State.

Requests for plans shall be accompanied by a deposit of twenty-five (\$25.00) dollars. Check shall be made payable to the Department of Public Works, Division of Architecture. Deposit will be returned upon receipt of the set in good condition at Sacramento Office of the Division within 30 days after opening bids, otherwise it will be forfeited to the State.

All bids must be filed at the office of the State Architect on or before the time heretofore stated and in accordance with the "Rules for Bidding" accompanying the proposal form.

No bids will be considered unless cash, a bidder's bond made payable to the State of California, or a certified check made payable to the "State Engineer, Department of Public Works," in the sum of at least ten per centum (10%) of the amount of the bid is enclosed with the bid.

The Division of Architecture, State Department of Public Works, reserves the right to reject any or all bids and

to waive any informality in any bid received.

NOTICE TO CONTRACTORS

Mechanical Work

SEALED BIDS will be received by Geo. B. McDougall, State Architect, Public Works Building, 11th and P Streets, Sacramento, California, up to 2 o'clock P. M., Tuesday, May 20, 1930, thereafter on said day to be publicly opened and read, for the installation and completion of the Mechanical Work for the Ward Building and Shop Building, Whittier State School, Whittier, California, in accordance with plans and specifications thereof.

Mechanical Work includes Plumbing, Heating, and Electrical Work. Separate bids will be received for "Electrical Work" and for "Plumbing and Heating Work." Combined bids will also be received covering all three branches of the work.

Plans and specifications are on file for examination in the office of the Division of Architecture, Public Works Building, Sacramento, California, and also at Room 1025 Associated Realty Building, Los Angeles, and at the principal California Cities Builders' Exchange Offices.

Plans, specifications, and proposal forms may be secured by licensed General Contractors who have qualified or who will qualify by furnishing a verified statement of experience and financial condition as required by the provisions of Chapter 644, Statutes 1929, and whose statements so furnished are satisfactory to the Department of Public Works. Questionnaire forms may be secured from the Division of Architecture.

Bids will not be accepted from a Contractor to whom a proposal form has not been issued and all bids must be on proposal forms supplied by the State.

Requests for plans shall be accompanied by a deposit of twenty-five (\$25.00) dollars. Check shall be made payable to the Department of Public Works, Division of Architecture. Deposit will be returned upon receipt of the set in good condition at Sacramento Office of the Division within 30 days after opening bids, otherwise it will be forfeited to the State.

All bids must be filed at the office of the State Architect on or before the time heretofore stated and in accordance with the "Rules for Bidding" accompanying the proposal form.

No bids will be considered unless cash, a bidder's bond made payable to the State of California, or a certi-

fied check made payable to the "State Engineer, Department of Public Works," in the sum of at least ten per centum (10%) of the amount of the bid is enclosed with the bid.

B. D. MOSES IS HONORED BY ENGINEERS' SOCIETY

B. D. Moses, associate professor of agricultural engineering at the Davis Branch of the College of Agriculture, University of California, has been elected second vice-president of the American Society of Agricultural Engineers.

Professor Moses already was chairman of the Committee on Nomenclature and Standard Practices of the organization, and has taken an important part in its deliberations and findings in the last few years. He will attend the meetings of the Society, to be held in Moline, Illinois, June 14.

Preceding the meetings of this organization, Professor Moses will attend the sessions of the Committee on Relation of Electricity to Agriculture, to be held in Moline June 13 and 14. He is chairman of the project directors.

E. T. MCCLEARY OF REPUBLIC STEEL, PASSES

E. T. McCleary, president of the newly-formed Republic Steel Corp., died in Youngstown, Ohio, April 22, following an operation.

McCleary began his career in Youngstown as metallurgist for the Carnegie Steel Company's local plant. Twenty-two years ago, when Youngstown Sheet and Tube Company began building its blast furnaces and steel plant, he went with that company as chemist.

Leaving Sheet and Tube for the Republic Iron and Steel Company in April, 1928, McCleary became president of Republic, and when the new \$350,000,000 Republic Corporation was formed by a recent merger he became president of the new combination.

EXPANSION REPORTED

The National Equipment Corp., Milwaukee, Wis., announces the addition to its group of the C. H. & E. Manufacturing Co., Milwaukee, Wis., manufacturers of saw rigs, pumps, hoisting machinery, material elevators, and mortar mixers.

CONTRACT IS LET FOR

TERMITE PROOF RESIDENCE

The first residence in central California ever to be erected designedly to resist the attacks of subterranean termites, is to be built at once on Ashfield Road, Atherton, San Mateo County, by Mrs. Winfield Scott of San Francisco. A contract was signed yesterday with Charles M. Hinds, Redwood City contractor, and construction begins this coming week. The site is between the Southern Pacific Depot and the Highway.

The house itself will be of English style of architecture and will consist of seven rooms, a sun room, servant's room and garage. The roof will be of red cedar shakes.

The precautions against the subterranean form of termites are limited to the space between the foundation and the level of the first floor.

The foundation, of concrete, will be run up two feet above the level of the ground. Immediately above the foundation, heart redwood will be used. The nudsills will be 2 by 6, the underpinning 3 by 4, and the first floor joists will be 2 by 12. The sub-floor on the first floor will be tongue and groove redwood of the same grade. All of the redwood will be absolutely free from sap and from loose and large knots.

"I do not know so much about termites and what they will do or what woods they will attack and what they do not like," said Hinds yesterday, "but the construction idea comes from Mr. Scott. It amounts to just this:

That no wood other than heart redwood shall be presented toward the ground. Above the first floor, of course, the usual Douglas fir construction will be followed.

The plans include the construction of an open concrete terrace at one corner in the rear, and even here and at the front steps it is provided that there shall be no possibility of exposure to the attacks of the subterranean form of termites.

"There will be about three feet clearance between the unexcavated portion of the site and the first floor joists," Hinds continued. "I am told that subterranean termites, when they go up into wood, must have moisture from the ground and to get it they build runways or tubes upward. If these tubes are destroyed the termites literally die of thirst. Hence the provision for plenty of space below the first floor so that every portion of the sub-structure may be examined whenever desired. I am told that heart redwood has proved to be particularly resistant to the attacks of the insects and what Mrs. Scott will have is what amounts to an armor of this wood."

On account of the character of the wood and further on account of the ease with which every part of the sub-structure may be examined, inside and out, it has not been thought necessary to include the metal plates or shields under the nudsills which termites experts in southern California have recommended.

Many of the builders and architects of the peninsula district are already informed as to the termite-resistant feature of the specifications and operations from the foundation to the first floor will be closely watched by them.

Recommendation that the name of Southern California Chapter, American Institute of Architects, be changed to Los Angeles Chapter, has been presented by the committee on Institute and Chapter affairs. This change will not be acted on until the November meeting.

A "Pittsburg" Automatic Water Heater installed in the Home indicates high quality throughout.

Recommended and specified by all the leading architects, plumbers and builders.

Consider the high merit of the Pittsburg coupled with "Pittsburg Perfect Service."

"Hot water quick as a wink."

Pittsburg Water Heater Co.

Makers of "Pittsburg Automatic"—"Bungalow Automatic" Storage Systems and "Lyon" Tank Water Heaters.

SEEK COLLEGE MEN TO FILL RANKS OF INDUSTRY

The annual recruiting campaign to fill the ranks of industry with college-trained men is now in full blast, says the Business Week. Each spring, a surprisingly large number of industrial concerns visit the colleges of the country for the purpose of selecting from the spring graduating class individuals suitable for absorption in industry.

There are about 148 accredited engineering schools in the country with total enrollment of about 65,000. Some 10,000 men and women are being graduated each spring from engineering courses; about half in mechanical or electrical engineering. Last year, the demand for engineering graduates by industry was greatly in excess of supply. This year, reports indicate, the situation is better balanced.

J. E. Walters, of Purdue, president of the National Association of Placement and Personnel Officers, stated that the averaged monthly starting rate for engineering graduates of Cornell, Carnegie and Purdue has been \$137.50 for the past 3 years.

COMMERCIAL ART OFFERED BY U. OF C.

Public demand for new designs, streamline models and finer luster is responsible for the great demand for persons who can draw or design.

That is the observation of Leonard Gay Stevenson, who for the past several years has been engaged in teaching hundreds of University of California Extension Division students the principles of commercial art.

"Every American man and woman of today appreciates beauty and demands it is all his major possessions," states Stevenson, "and every manufacturer is beginning to realize this."

Stevenson's method of teaching is not academic and is not a series of lectures. In this regard he says, "I teach first the problem of anatomy, but also I try to teach the students that below the surface of things, his mind has arranged these facts he is looking for and that, as a result, he has a consciousness capable of recognizing certain forms. It is these forms that enter into the drawing. The idea in the mind is the pattern; pushed to a subconscious mind, and knowing it thoroughly gives the result in drawing. Therefore, the student has only to observe facts and then put them into action."

A new course in commercial art which will deal particularly with advertising needs will be started next Wednesday by Stevenson, Extension officials state. This class will be held at 540 Powell St., San Francisco

APRIL BUILDING IN SAN FRANCISCO TOTALS \$1,356,653

San Francisco building operations during the month of April, 1930, involved an expenditure of \$1,356,653, according to figures compiled by John B. Leonard, superintendent of the Bureau of Building Inspection of the Department of Public Works. During the month 587 permits were issued.

In April, 1929, Leonard's records show 659 permits for improvements valued at \$2,816,146.

During the past four months, Leonard reports, 2,276 permits were issued for developments involving an expenditure of \$7,435,010 as compared with 2,372 permits for the corresponding period in 1929 when the money expenditure registered \$10,609,692.

Following is a report of the April, 1930, activities:

Class	No. P'mts	Est. Cost
Class A	2	\$ 134,374
Class B	11	46,245
Class C	132	640,672
Frames	439	360,548
Alterations	1	79,525
Public Buildings	1	20,000
Harbor Buildings	1	75,289
Government Bldgs.	1	
Total	587	\$1,356,653

STANFORD UNIVERSITY PLANS 10-YEAR BUILDING PROGRAM

A 10-year building program, contemplating expenditures totalling \$1,035,000, to provide more extensive accommodations for the athletic activities of the university is outlined in the annual report of the Stanford Board of Athletic Control.

The 10-year building program, the report explains, was adopted provisionally, "with the understanding that no expenditures, except those already acted upon, are authorized by this action, and that each item of construction must be approved by the board in detail, and the necessary expenditures authorized, before construction can begin."

The 10-year building schedule as provisionally adopted follows:

1928-29—Golf course.....	\$ 100,000
1929-30—Women's gym.....	225,000
Swimming pools	105,000
Baseball diamond	15,000
Gold course facilities	25,000
1930-31—Golf Club House.....	30,000
1931-32—Stadium	125,000
1932-33	
1933-34—Stadium	150,000
Basketball	100,000
Playground	10,000
Handball	30,000
1934-35	
1935-36—Squash courts	60,000
1936-37—Tennis courts	25,000
Resurfacing old courts.....	10,000
Boxing, wrestling	25,000
1937-38	
Total	\$1,035,000

LUMBER EXPORTS FROM VANCOUVER TO U. S. SHOW INCREASE

Declared exports of manufactured lumber to the United States from the Vancouver, British Columbia, consular district for the first three months of 1930 totaled 110,297,000 board feet valued at \$1,971,782 as compared with 18,521,000 board feet valued at \$1,696,534 during the same period of 1929.

Shipments for March, 1930, exceeded those of March, 1929, by 4,395,000 board feet, valued at \$59,489. This information is contained in a report to the Lumber Division of the Department of Commerce from Vice Consul Sidney A. Belovsky, Vancouver.

Exports of fir, hemlock, pine and miscellaneous species of lumber for the first three months of 1930 exceeded those of the first three months of 1929.

Shingles shipped to the United States from this district in March, 1930, amounted to 100,518,000, valued at \$377,118, while shipments in March, 1929, totaled 158,322,000 valued at \$674,278. Exports of shingles to the United States in February, 1930, totaled 103,715,000 valued at \$361,326.

Shipments of lumber by water from Vancouver to Atlantic ports in the United States during March totaled 3,727,813 board feet, and from Canada as a whole 4,397,140 board feet, according to advices to the Lumber Division from Trade Commissioner E. G. Babbitt.

CONSTRUCTION HALTED ON PICKERING LUMBER PROJECT

Work on the Pickering Lumber Co.'s woods headquarters at Hacamore, in the western part of Modoc county, and on the big sawmill plant at Alturas will be suspended for a short time as the result of the recent death of W. A. Pickering, founder and president of the company.

This is according to an announcement by W. C. Garrett, Alturas, manager of the company, on his return from Kansas City, where Pickering died.

Garrett says the board of directors will meet in the near future to elect a new head of the organization, and that at that time plans will be made for the future operations in Modoc County.

The death of Pickering occurred at a time when the company's operations were going ahead rapidly. The big sawmill plant at Alturas is about 90 per cent complete, work is well under way on the woods town of Hacamore and many miles of spur railroad is in the course of construction through the immense holdings of the company.

Officials intimate there will be no radical change in the plans of the concern since the loss of its former head.

Pickering had a deep personal interest in the Modoc County operation and spent as much time as possible on the ground personally supervising the installation of the new \$3,000,000 plant at Alturas.

RIGHTS AND LIABILITIES OF THOSE CONCERNED IN EXCAVATIONS

An Interpretation and Explanation of Common and Statute Law Governing Liabilities and All Concerned in Excavations Affecting the Property of Others.

Reprint of this article was suggested by Felix H. Spitzer, Consulting Structural Engineer in the Bureau of Building Inspection of the City and County of San Francisco.

He calls special attention to the fact that local conditions relating to "Rights and Liabilities" in the case of excavations are governed by Common Law only, as expressed in California Code, Par. 832, under the heading "Lateral and Subjacent Support" and reads as follows:

"Each coterminous owner is entitled to the lateral and subjacent support which his land receives from the adjoining land, to make proper and usual excavations on the same for purposes of construction, on using ordinary care and skill, and taking reasonable precautions to sustain the land of the other, and giving previous reasonable notice to the other of his intention to make such excavations."

Neither San Francisco Building Code nor the Oakland Building Laws include any ordinances relating to excavations and therefore the limitations existing under the Statute Law of New York do not apply.

The Los Angeles Building Ordinances have provisions similar to the New York laws except that twelve feet is fixed as the "standard depth" to which the Common law applies, instead of ten feet. Any person excavating to a greater depth assumes all liabilities.

The legality of this latter ordinance though, in the absence of a similar State law, is being questioned.—Editor.

(By Nathan Young*, Member New York Bar, In Engineering News Record)

*Mr. Young is well qualified to discuss the important question of rights and liabilities of all concerned in excavation work, holding both civil engineering and law degrees, being a member of the New York Bar and having made a special study of contract and engineering law.—Editor.

Liabilities of Excavator

Under Common Law—The owner of adjacent land in its natural state (unburied by a structure) is entitled to lateral support of his property. Courts have generally held that excavator using reasonable care and precaution is not responsible for damages to adjoining structures.

Under Statute Law (New York)—In excavations more than 10 ft. in depth below curb, owner of land under excavation must underpin or protect adjacent structures. In excavations not exceeding 10 ft. in depth below curb, owners of adjacent structures must underpin or protect their own property.

Almost every construction job commences with an excavation. Many end in a lawsuit. The controversy frequently arises out of the violation by the excavator of the rights of neighboring landowners. The engineer who is in charge of the job will determine in the majority of cases whether his client, who may be either the owner or the contractor, will be precipitated into a lawsuit by the manner in which he prosecutes his work.

These lawsuits often involve heavy legal expenses, and sometimes substantial judgments against the owner or contractor or both. These the owner or contractor may avoid by the careful and intelligent observation on the part of the engineer of the rights of the adjoining owners. It is highly important, therefore, that the engineer know where the rights and liabilities of his client and those of the adjoining owners are.

Common Law

We derive from the English law, on which our common law is largely based, a fundamental rule that the owner of land in its natural state—that is, unburied by a superstructure—is entitled to the lateral support of his property. This is a right that

goes with the land and may not under any circumstances be violated.

Thus, if A should excavate on his property and thereby cause the adjoining land in its natural condition to slide into the excavation, he is liable for any damages his neighbor may sustain thereby, regardless of whether or not he is guilty of negligence in excavating on his own land.

This is a simple legal proposition covering simple facts. Under modern conditions, however, particularly in crowded cities where almost every inch of ground is covered by a building, a very different problem arises.

An owner desiring to excavate on his own land finds himself bounded on both sides by buildings. Does the right to lateral support of land in its natural condition apply as well to the building with which it is encumbered? If so, the excavator will find himself burdened with a heavy duty, for in that event he becomes the guarantor of the safety of the adjoining buildings and must properly underpin or protect them to avoid any possible damage. The courts have been very reluctant to impose such an obligation on the excavator, although in some decisions they approach it closely.

On the other hand, does the existence of a building on the land of the adjoining owner abolish entirely his right to lateral support and permit the excavator to proceed with his excavation within the boundaries of his land, disregarding absolutely any possible damage his neighbor may sustain? In our very early decisions we find judicial opinion sustaining such procedure for the reason that one who erects a building on his land may not thereby limit his neighbor, who should desire to improve his land, in the use thereof.

As we go down the line of American decisions we find the courts gradually adopting a far more reasonable attitude. They have very wisely applied to these cases an old maxim of law, "Sic utere tuo ut alienum non laedas," which means, "So conduct yourself as not to cause another injury."

How far does this limit the excavator? What obligations does this impose upon him?

A familiar expression of the courts is that the excavator must be reason-

ably careful and prudent in the prosecution of his work. This does not mean that he must support the adjoining building, but is rather in the nature of a restraint against wanton and reckless conduct on the part of the excavator.

Assuming, now, that the excavator is careful and diligent in the prosecution of his work but the adjoining land nevertheless is damaged, is he liable therefor? His liability depends on whether the adjoining soil slides by reason of the excavation or by reason of the weight of the superstructure. In the former case, the decisions almost uniformly hold that the excavator is liable for the injury to the land, but not for the injury to the building. In the latter, the excavator is liable for neither the damage to the land nor the damage to the superstructure.

Whether the adjoining land has subsided by reason of the excavation or by reason of the weight of the superstructure is very often difficult to determine and sometimes cannot be satisfactorily decided because of expert but conflicting testimony of engineers. Failure of the excavator to exercise reasonable care and diligence makes him liable for all damage to the adjoining land and superstructure provided the caving in of the adjoining soil was caused by the excavation and not by the pressure of the superstructure. This situation is stated before, often difficult to determine.

In the leading Michigan case of Gilderleeve against Hammond, decided in 1896, the court held that the jury in rendering a verdict against the excavator for damage to the adjoining land and building was justified in finding that the adjoining land fell by reason of the excavator's carelessness. The facts were as follows:

The plaintiff had erected on his land a building on a foundation which was 20 to 24 in. below grade. The wall of this structure was 4½ ft. from the line dividing the plaintiff's and defendant's lots. The defendant excavated to this division line about 7 or 8 ft. deep. The soil was a mixture mainly of sand and gravel. As the excavation proceeded downward, the adjoining soil between the division line and the building began to fall away from the foundation and into the excavation. This the excavator carried away as quickly as it fell into the foundation. The building, laid bare, caved in, carrying with it the wall and the entire building.

Rules Governing Liability

The court, in approving the verdict of the jury, suggested that the excavator in this case might have avoided the subsidence of the soil and the consequent damage to the building by excavating and building his wall in sections or by sheeting to keep the soil in place. The court formulated certain rules governing the liability of the excavator which in a general way cover the question very concisely and clearly. They are as follows:

1. While a landowner has the undoubted right to excavate close to the boundary line, he must take reasonable precautions to prevent his neighbor's soil from falling.
2. If he has taken such reasonable precautions and yet the soil falls from the pressure, he is not liable for the injury to the land, but not for any injury to the superstructure.
3. If the pressure of the superstructure causes the land to fall, he is not liable for injury to either the land or the superstructure.
4. If he fails to take such reasonable precautions to protect his neighbor's soil and to preserve it in its natural state, he is liable for the injury to both the land and the superstructure. If the pressure of the superstructure did not cause the land to fall and it fell in consequence of the

failure to take such reasonable precautions.

The next question that logically presents itself is, What is meant by reasonable prudence and care or reasonable precaution as the term is used by the court in the decision quoted above? This is a difficult question to answer, because the courts themselves, to whom we look for the solution, seem to be indefinite and uncertain about the matter.

In the recent case of Christensen against Mann, decided in Wisconsin in 1925, the court with reference to this matter said:

"The excavator cannot proceed with violent methods that will unnecessarily endanger his neighbor's building, nor can he use antiquated or disapproved methods." But the court finally concludes, "Degree of care in each particular case depends largely upon the peculiar facts and circumstances and physical conditions in each case."

This is not entirely satisfactory as a guide, and requires examining the law as to particular acts necessary to absolve the excavator from a charge of negligence.

First and most important is the manner of making the excavation. The methods that have apparently received approval of the courts in numerous opinions are either to excavate and build the foundation wall in sections or to erect a shoring to keep the adjoining soil in place. These are precisely the methods suggested in the Michigan case quoted above.

Under our judicial decisions, the courts almost uniformly have refused to impose on the excavator the burden of underpinning the adjoining walls and compelling to do so by statutes which are in force in some states.

Another element of prudence and care required of the excavator is to give timely warning to the neighboring landowner so that the latter may have an opportunity to protect his building, and the courts have upheld this requirement in a long line of decisions.

Knowledge on the part of the adjoining owner of the nature and extent of the excavation will be necessary to give notice. But mere knowledge of the proposed excavation is not sufficient, for it does not necessarily imply that the adjoining owner is aware of the nature and extent of the excavation, which he must necessarily know in order properly to protect his building.

A further point of which the courts frequently speak and which must be borne in mind is that the giving of notice does not relieve the excavator of the duty to use reasonable care and diligence in making the excavation.

The excavator, having completed his excavation in a careful manner, has not directly discharged his obligation, for in many cases damage has arisen out of the negligent maintenance of the excavation. In the early New York case of Austin against the Hudson River Railroad Co., decided in 1852, the excavator began operation in October or November, 1851. The evidence indicated that the excavation might have been completed in two or three weeks, but it was not completed until August, 1852. The excavation was carried to within 4 ft. of the plaintiff's warehouse, but was entirely confined to the land owned by the defendant. After the excavation was completed, work was suspended from time to time for considerable periods, leaving the plaintiff's building exposed without protection against water and ice. Piles were driven by the defendant after the excavation, but they were driven in such a manner as to crack the walls of the plaintiff's building. This, together with the action of the water in undermining the plaintiff's build-

ing, caused the wall to fall. The excavator was held liable for the negligent manner in which he maintained the excavation.

Condition of Adjoining Buildings

Another element that frequently enters into the question of the liability of the excavator is that of the condition of the adjoining building. It has happened that buildings injured by excavation of adjoining land were originally in a defective and damaged condition. What in such case is the liability of the excavator? In the case of Walker against Strossner, decided in West Virginia in 1910, the court speaks of the liability for injury to defective buildings as follows:

Defectiveness or weakness in it does not justify negligence or reckless conduct on the part of the adjoining owner in altering the condition of his property or excuse him from liability for injury occasioned thereby. He is governed by the condition of the building as he finds it, and must conduct his operations accordingly, for these conditions have been previously and rightfully made. To hold otherwise would give one adjoining owner the power to determine what sort of a building his neighbor should erect or in what state of repair he should keep it. Defects in the building may be such as contribute to this injury in case of the removal of the adjoining earth, but the act of constructing it in an unskillful manner or allowing it to become defective would not be the proximate cause of the injury if it could be deemed negligence. There would be two causes of injury in such case, but the negligence of the excavator would not take reasonable precautions for the safety of the building, however defective it might be, would be the last cause of the injury, the nearest in time and therefore the proximate cause. Defectiveness of the injured building may mitigate the damages, but it does not bar the action for the injury.

Who Is Liable?

Our discussion has thus far covered the acts which create liability. Let us now look into the question as to who is liable for such acts.

It is usual for the owner to employ a contractor to make the excavation. The work may result in damage to the adjoining land and building. Assuming that the circumstances are such as to create liability for this damage, it is important to know whether the owner is liable or not. The contractor, who caused the damage, is primarily liable. Generally, if the owner hires a skillful and careful contractor, who agrees to perform the work in a workmanlike manner, and if the work can be performed without injury to the adjoining property and there are no defects in the plans, he is not liable for any injury due to the contractor's negligence.

Many cases, however, arise in which not all of these conditions are present. In such cases we find that the owner is liable for the damage. The opinion written by the court in the case of Walker against Strossner, supra, quotes from other opinions the circumstances under which the owner becomes liable. Some of these are:

If the owner actually controls the manner of doing the work, he makes himself liable. If the injury results directly from the acts called for or rendered necessary by the contract and not from acts which are merely collateral to the contract, the owner is liable as if he himself had performed such acts. If the resulting injury was such as might have been anticipated as the probable consequence of his work directed to be done, the owner is liable whether he prescribed the mode of doing the work or not.

The owner is liable when the contract prescribes not only the thing to be done but also the manner in which

the work is to be executed and the contract does it in the manner so specified, for then the will of the owner controls, and he directs and orders the injurious and wrongful act, if it is wrongful.

Statutes Supersede Common Law

In many cities and states, ordinances and statutes have been enacted providing for stricter regulation of excavations and imposing heavier duties on excavators. This was a logical and natural development as a result of the erection of tall and costly buildings in very close proximity to one another in our crowded cities.

Most ordinances and statutes are very much similar to the New York City ordinances, which we shall here consider briefly. Paragraph 230 of the Building Code reads in part as follows:

1. **Safeguarding Generally**—Until provision for permanent support has been made, all excavations shall be properly guarded and protected so as to prevent the same from becoming dangerous to life or limb and shall be sheet piled, braced or shored, where necessary to prevent the adjoining earth from caving in, by the person causing the excavation to be made.

2. **When Retaining Wall Is Required**—When an excavation is made on any lot, and provision for the support of adjoining earth is not otherwise in accordance with law, the person making such excavation or causing it to be made shall, at his own cost and expense, except as may be provided in Art. XI of this chapter or as hereinafter provided in this section, build a retaining wall to support the adjoining earth, and such retaining wall shall be carried to the height of the adjoining earth and be properly protected by coping.

Art. XI of the Building Code referred to deals with partition fences and walls, and retaining walls in general.

In all other respects these sections are self-explanatory. We now come to the more important clauses covering the protection of adjoining buildings. The ordinance continues to read:

3. Support of Neighboring Walls.

(a) **When Excavation Exceeds 10 Ft.**—Whenever an excavation is intended to be or shall be carried to the depth of more than 10 ft. below the curb, the person causing such excavation to be made shall at all times, if afforded the necessary license to enter upon the adjoining land, and not otherwise, at his own expense, preserve and protect from injury any wall, building or structure, the safety of which may be affected by said excavation, and support the same by proper foundations, whether the said wall, building or structure is down more or less than 10 ft. below the curb. If the necessary license is not accorded to the person making such excavation, then it shall be the duty of the owner refusing to grant such license to make such wall, building or structure safe, and to support the same by proper foundations, and when necessary for that purpose, such owner shall be permitted to enter upon the premises where such excavation is to be made.

(b) **When Excavation Does Not Exceed 10 Ft.**—If such excavation is not intended to be or shall not be carried to a depth of more than 10 ft. below the curb, the owner of any wall, building or structure, the safety of which may be affected by said excavation, shall preserve and protect the same from injury and support the same by proper foundations, and when necessary for that purpose shall be permitted to enter upon the premises where such excavation is to be made. In case such wall, building or structure, however, is so located that the curb to which it is properly referred is at a higher level than the curb to which

the excavation is referred, such part of any necessary underpinning or foundation as may be due to the difference in curb level shall be made and maintained at the joint expense of the person causing excavation to be made and the owner of such wall, building or structure.

Since the enactment of this ordinance the judicial opinions in many New York cases have construed its meaning.

How Courts Have Construed Ordinance

The ordinance has been held to apply only to the owner of the land under excavation. The courts have construed the clause, "person causing such excavation to be made," in the property excavated. In the case of Gordon against Hedden Construction Co., decided in 1915, the court held that contractors and subcontractors are not liable under this section of the Building Code.

The common law, as developed by the judicial decisions which we have discussed in detail, still applies to the contractor and subcontractor who are liable if, by reason of negligence on their part, the adjoining land and building are injured.

In several recent decisions, the courts have construed the word "contiguous" in the ordinance to mean "near to" or "in close proximity to." The adjoining building therefore, which may be separated from the land excavated by a small strip of land, is nevertheless contiguous to the land excavated within the meaning of the ordinance.

Under the common law, the excavator was under no obligation to shore up or underpin the adjoining walls. Having received notice of the excavator's intent to excavate, the duty fell upon the owner of the adjoining building to underpin his own walls. The obligation of the excavator was merely to exercise reasonable care and prudence in making the excavation. The statute has radically changed the law in this respect. When the excavation is intended to be or is actually carried down more than 10 ft. below the curb, the ordinance requires the owner of the land excavated, when permitted to do so, to support the adjoining walls at his own expense.

The filing of plans for an excavation more than 10 ft. below the curb has been construed as the expression of an intention to carry the excavation more than 10 ft. down and is sufficient to create liability on the part of the owner of the land excavated in the event of damage to the adjoining building and failure to underpin the same, even though the excavation is actually 10 ft. or less deep. If the owner should decide to excavate 10 ft. or less, after having filed plans for an excavation of more than 10 ft., it is therefore advisable for him to file amended plans to that effect.

The reverse of this situation appears in the case of Rosenstock against Laue, decided in 1910, wherein the defendant entered into a contract with one Duffy to make an excavation on the defendant's land of 10 ft. below the curb. Duffy proceeded with the excavation and carried it to a depth lower than 10 ft. below the curb, injuring the plaintiff's adjoining wall, which the defendant had not supported. The defendant claimed that it was its intention to excavate only 10 ft. deep and if the excavation exceeded that depth the wrong was done by the contractor. The court held that the owner is liable if the excavation is carried to a depth of more than 10 ft. regardless of the fact that the work was done by the contractor.

In the case of Post against Kerwin, decided in 1909, the court held that liability of the person causing the excavation to be made, under this ordi-

nance, for damage to an adjoining wall because of failure to underpin and properly protect it, is absolute and entirely independent of any question of negligence.

Modern conditions make the provisions of this ordinance very wise and salutary. It is quite obvious that in cities where structures involving a cost of millions of dollars are erected, the law ought to place every possible reasonable safeguard about them. Such laws will doubtless in due time become universal in the United States. In those states, however, where such statutes have not yet been enacted, the common law still governs.

SETBACK BUILDING LINES FAVORED BY LOS ANGELES COUNTY

Los Angeles County is seeking the co-operation of various municipalities within the county in the establishment of setback building lines on all major and secondary highways in order to avoid costly condemnation proceedings in connection with street-widening projects in the future. This plan was recommended by the County Regional Planning Commission. The board of county supervisors has issued an order for the preparation of the necessary ordinances establishing setbacks in county territory, and several of the municipalities have signified their intention to pass similar ordinances applying within their limits. It is estimated that this method will effect a saving in street-widening operations varying from \$300,000 a mile on country highways to \$1,000,000 a mile on city thoroughfares.

NEW ORGANIZATION TO BACK INTERNATIONAL HIGHWAY

Plans for a permanent organization for the advancement of the proposed International Highway, which will traverse the western sections of both North and South America, were perfected at a recent meeting at Portland, Oregon, attended by delegates from all the coast states, Alaska and Canadian provinces, according to the California State Automobile Association, which is supporting this project. Arrangements were made for holding meetings at an early date in all the states, Canadian provinces, Alaska and South American countries of all parties and organizations interested in highway matters for the purpose of selecting three representatives from each district who will meet later in the summer and perfect the permanent organization.

For this purpose, Charles D. Garfield of the Chamber of Commerce, Seattle, Washington, was selected to arrange for the meeting in the state of Washington; Dr. E. B. McDaniel, president, Oregon State Motor Association, Portland, was appointed for Oregon; and Standish Mitchell, manager, Automobile Club of Southern California, Los Angeles, was appointed for California.

STONE-WEBSTER EARNINGS

For the nine months ended March 31, 1930, Stone & Webster, Inc., reports net consolidated earnings, including those of subsidiaries supplying engineering and construction service to utilities, of \$5,860,563. Of this sum \$2,027,516 was profit carried direct to surplus on securities acquired on organization from the predecessor Massachusetts corporation and sold within the period. These earnings were equivalent to \$4.65 a share on the 1,258,981 shares outstanding at the end of the period.

HERE — THERE — EVERYWHERE

Engineering students at North Carolina State College, Raleigh, have organized the Construction Engineering Society and have made application for a charter as the first student chapter of the Associated General Contractors of America.

Directors of the El Dorado Irrigation District have ordered surveys made with a view to increasing the height of the Weber Creek Dam in El Dorado County an additional 6 ft. above the present 80 feet. Construction will involve an expenditure of approximately \$350,000.

Advocating a guarantee against strikes in the building constructor industry as being of paramount importance in carrying out of the present program in effect in Boston, Mass., to reduce unemployment and stimulate industry generally, Mayor James M. Curley of that city recently stated that during 1923 the greatest building program ever fulfilled in Boston was possible only because of the existence of a labor-employer anti-strike truce in effect at that time. Municipal work included in the construction program for Boston during the present year will exceed \$10,000,000, according to figures published.

An endeavor to secure the repeal of the recently enacted Apartment House statute in the State of Florida is being made by the St. Petersburg Apartment Owners' Association. The law which is being contested in the courts of the state in at least one instance places a tax of 75 cents on each room in an apartment house which has more than two rooms, and a tax of 50 cents an each bath room in such house. It also levies a county tax of 50 per cent of the foregoing levies.

SANTA BARBARA COUNTY PLANS BUILDING CODE

A building code for all Santa Barbara county outside of incorporated cities and based on the one being compiled for all California by the State Chamber of Commerce is expected early next year by L. Deming Tilton, Santa Barbara, executive officer of the county planning commission.

Among the organizations cooperating with the state chamber of commerce in preparing the state building code are the American Society of Civil Engineers, the American Institute of Architects, the Associated General Contractors and the Pacific Coast Building Officials Association.

MORE GLASS BUILDINGS

An editorial appearing in the Chicago Evening American quotes Fran Lloyd Wright, Chicago architect, as saying that he will build a glass office building in Chicago and eight glass apartment houses in New York City. He declares that glass buildings, on the cantilever principle of construction, are three times stronger, one third lighter and at least a third cheaper than those of other materials. Opaque glass will give privacy and exclude surplus light. The ultraviolet rays of the sun will be admitted, bringing health to office workers and apartment house dwellers. He also predicts a revolution in construction methods, and by inference, thus not saying in as many words, a bright future for the glass blowing industry.

THE OBSERVER

WHAT HE HEARS AND SEES ON HIS ROUNDS

During the year 1929 there were 125 new grade crossings constructed in California, and 96 existing grade crossings were abandoned, leaving a net increase of 29 grade crossings for the year, according to a report compiled by Transportation Division of the Engineering Department of the Railroad Commission. The total number of class A grade crossings over main or branch line railroads at the end of the year was 12,340.

During the year 34 crossings were constructed as a result of main line railroad extensions, these being on the, new Southern Pacific line between Alturas and Klamath Falls. There were 41 crossings opened as the result of branch line construction, while 75 crossings of this class were abandoned because of discontinuance of branch lines. Abandonments thus practically offset new construction over main and branch line railroads. Second main tracks were constructed across four highways during the year, while 23 sidings were constructed, and three were abandoned. A total of 82 spur tracks were constructed across highways, while 15 were abandoned.

During the year 50 highways and roads were constructed across existing lines of railroad, while 10 such crossings were abandoned as the result of highway changes. In addition, 11 crossings were closed by reason of grade separations.

The number of grade separations constructed or reconstructed was 23. Of these projects five resulted in replacing 11 existing grade crossings. Eight were built as the result of new highway construction not eliminating existing grade crossings, and 10 were relocations or reconstruction of existing grade separations.

For the protection of new or existing grade crossings, there is installed during the year 186 automatic wig-wags. Many of these were installed at crossings heretofore unprotected; some were additional wig-wags at crossings already having one wig-wag, while others were replacements of the locomotive type crossing bell with wig-wags. One set of automatic gates was installed at Burbank for experimental purposes. Two sets of flood lights for illuminating train movements on spur track crossings and heavily traveled thoroughfares were installed, and one set of automatic traffic signals for the protection of a railroad crossing located at the intersection of two city streets was constructed.

New orders of fabricated structural steel in March, as reported to the U. S. Department of Commerce by the principal manufacturers were 62 per cent of capacity as compared with orders of 69 per cent of capacity in February, and 93 per cent a year ago. Shipments of fabricated-structural steel in March represent 69 per cent of the capacity of firms reporting this item as against 73 per cent in February, and 72 per cent a year ago.

Opportunities for developing home modernizing business are not confined to large towns. The lumber dealers in Sycamore, Ill., a town of 5000 population, undertook a campaign in 1929 in co-operation with the Home Modernizing Bureau. About 40 modernizing jobs, averaging approximately \$1,500 each, were completed last year.

"The rapid growth of building and loan associations in recent years and their excellent record of safety and achievement has no parallel in the financial history of this country," says J. M. Abbott, President of the California Building-Loan League. "Up to the time of the war the growth of these associations for the promotion of thrift and home ownership was slow but regular. Their growth since has been exceedingly rapid. The number of associations has increased 70 per cent of a total of 12,666; the membership has increased 200 per cent, reaching a total of 11,995,905; and the resources have increased 332 per cent to a grand total of \$3,016,034,327.

"The original motive for organizing building and loan associations was to promote home ownership by lending financial assistance. The methods by which this financial assistance is repaid is another reason for their increasing popularity.

"Just as the building and loan associations were the first to introduce installment buying of wealth through their system of monthly payments on shares and certificates, so they were the first to introduce the amortization plan of mortgage, under which a loan is paid off on monthly basis, part of the payment being applied to the reduction of principal and the rest to interest.

"It is estimated that of the 26,500,000 families in the United States, of which 46 per cent are home owners, 25 per cent have purchased their homes through building and loan.

"There are no institutions better equipped than building and loan associations to help carry out President Hoover's effort to stimulate a buying movement, creating employment, and developing more conservative outlets for safe investments. All associations have strongly endorsed President Hoover's modernization plan. This not only provides an outlet for an association's ready funds, but will greatly aid the business prosperity of the country, stabilize realty values, as well as adding to the comfort and happiness of hundreds of home owners."

The practice of paying a dismissal wage to workers discharged through no fault of their own is finding increasing application in industry according to an article in the April issue of the Monthly Labor Review. Although the principle of the dismissal wage has not yet gained wide acceptance, it has been adopted recently by a number of firms which were obliged to dismiss workers because of changes in production methods, curtailed production, plant mergers, or for other reasons over which the workers themselves had no control. While the dismissal wage does not contribute materially to the solution of the unemployment problem it is of very real assistance in giving the dismissed worker an opportunity to conduct a wider search for a new job or to adjust himself to his reduced income. It may also have the effect of reducing unemployment in the individual plant by curbing any tendency on the part of the employment manager or foremen to discharge employees for insufficient reasons.

A study of the modernizing opportunities for dealers in the attics and basements of old homes, made by the National Lumber Manufacturers Association, shows that in an average six-room house of about 23,750 cubic feet enclosed by walls and roof only about 15,000 cubic feet are given over to space used for such common domestic occupancy as resting, eating, sleeping, recreation, entertainment, cooking and the like. Of the remaining 8750 feet, 5600 are found in the average cellar or basement and about 3150 in the attic. This space in many houses is not fully utilized. Many home owners will be glad to convert the unused space in their attics and cellars into useable rooms.

According to word from Southern California, effective May 1 union painters in Los Angeles and several nearby cities will operate on the five-day week basis. The same will apply to Santa Monica, Long Beach and several other outside points, with negotiations on with employers in Pasadena that are reported to be looking very promising. There will be no change in the wage scale.

In the last ten years 49 new public schools were erected in San Francisco and recently the Board of Education approved plans for a 50th structure. The fifty buildings, fashioned from steel, stone and concrete, represent an investment of \$17,418,814. In the same period 22 old school buildings, representing an investment of \$800,000, were abandoned or wrecked and three other buildings, costing \$225,000, were remodeled at a cost of \$50,000, and converted to other uses.

Arc welding, instead of riveting, proved its worth during the construction of an addition to the Westinghouse Research Laboratories at East Pittsburgh, Pa. The original laboratory building is full of delicate recording instruments, fragile glassware used in tests and apparatus that is sensitive to the slightest shock. The constant thud of riveting hammers, engineers say, would have put much of this apparatus out of commission. While the steel beams and uprights were being welded together, tests and experiments were conducted in the laboratories without the loss of a single working day.

M. A. Diskin, attorney general of Nevada, says aliens are not allowed by the Nevada laws to hold a contract or sub-contract for the construction of highways. The opinion was asked by William Royle, state labor commissioner. The attorney general held the granting of contracts or sub-contracts on highway work to aliens is barred by the amendments to the state statutes approved by the 1929 legislature.

Highway construction throughout the country will be speeded-up to the extent of at least \$100,000,000 a year by the bill increasing Federal Aid appropriations from \$75,000,000 to \$125,000,000 annually, which has just been signed by President Hoover.

Hereafter bids will be taken on three types of paving under proceedings for improvement of city streets in San Bernardino, it is announced by Mayor John C. Ralphs Jr. Contracts will be awarded for the type of paving selected by the property owners after bids have been received. City Engineer A. H. Lowe is preparing specifications for concrete, asphalt and macadam pavements on which bids will be asked.

TRADE NOTES

The Byers Machine Co., Ravenna, Ohio, announces the appointment of Edward R. Bacon as its sales representative in San Francisco and Northern California. The Bacon Company will handle the entire Byers line.

Trackson Co., Milwaukee, Wis., has appointed the Edward R. Bacon Co. its distributor in the San Francisco territory, and the Olympic Machinery Co., Seattle, Wash., distributor for the State of Washington.

Pacatome Co., Kohl Bldg., San Francisco, has issued several bulletins dealing with the use of diatomite for increasing the plasticity, impermeability and uniformity of concrete.

R. F. Wells, formerly manager of the West Turlock Lumber Co., is now owner of the Ingewood Lumber Co. at Ingewood. He was former vice-president of the Northern District of the California Retail Lumbermen's Association.

The Metals Manufacturing Co., Ltd., makers of patented "Won-Piece" roof flashings, has completed a year of experimental work to make a one-piece roof flashing, and are now ready to put this new product on the market. This new concern is located at 912 Howard Street, San Francisco.

The Hild Floor Machine Company of Chicago, Illinois, manufacturers of floor machines, recently opened a branch office and warehouse at 557 Market St. A stock of floor machines and equipment is carried for distribution in this territory under the direction of Wm. J. Winter.

Braun-Steeple Co., affiliates with Braun & Company, manufacturers of ornamental iron products with headquarters in Chicago and New York, has leased property on Potrero Ave., between Eighteenth and Nineteenth Sts. on which will be erected a two-story reinforced concrete structure to house offices and plant.

W. E. Bear of W. E. Bear Company announces his concern has been appointed wholesale distributor for the Penn Metal Co. of Parkersburg, West Virginia, for California and Nevada territories. A complete line of metal products will be warehoused here. Bear states he intends opening a new warehouse in Oakland in conjunction with the Nephi Plaster & Manufacturing Company and the Utah Lime & Stone Company.

March orders for structural steel amounted to 238,000 tons or 92 per cent of capacity, against 276,000 tons or 19 per cent in February and 338,950 tons or 92 per cent in March, 1929, according to the Department of Commerce. Shipments during March totaled 276,000 tons, against 292,000 in February and 277,290 in March, 1929. For the first quarter structural orders totaled 772,000 tons, against 897,050 tons in 1929. Shipments totaled 812,000 tons.

ALONG THE LINE

J. C. Hewitt Jr., city engineer of Hawthorne, Calif., has submitted his resignation to the city council.

Test borings for the \$15,000,000 highway toll bridge between Pablo Point, Contra Costa County, and Eels Point, Marin County, have been started by the Duncanson-Harrelson Eng. Co.

L. M. Whitehouse, city engineer of Honolulu, T. H., is in San Francisco for an extended vacation and announces upon his return to the islands he will take with him a bride, Mrs. Ella Foster Watson. The time and place of the wedding are yet to be determined.

Chas. K. Mohler, 66, consulting and valuation engineer, died at his home in New York April 13. Death was due to a heart attack. Mr. Mohler was chief engineer of the Board of Public Utilities of Los Angeles in 1912 and assisted in the construction of many of the country's railroads and street railway systems.

George Wilhelm, former vice-president and general manager of the East Bay Water Company, has been named Commissioner of Public Works of Oakland, succeeding William H. Parker. Wilhelm's appointment came in a resolution introduced to the city council by Mayor John L. Davis and unanimously adopted. The appointment is effective May 1.

William T. Virgin, for a quarter of a century a lumber dealer and mill operator in Northern California and Nevada, died in San Francisco April 11. Virgin, at the time of his death was vice-president of the Clover Valley Lumber Company operating at Loyalton, Calif. He was formerly vice-president of the Verdi Lumber Company and was one of the organizers of the Tonopah Lumber Company.

NEW FORM OF STREET PETITION FOR SAN DIEGO

A new form of petition for street improvements in San Diego will be prepared by the city manager and city attorney under instructions voted by the city council as the result of an investigation of alleged irregularities in signing of petitions for certain street improvements. The new form will contain several columns in the blank spaces, one for the name of a record owner of property and the other for the name of a contract owner. The council decided that the property owner who is to pay for the improvement is the one to sign the petition.

The council also agreed that the engineer's office must furnish the estimated cost of the work. Should there be an improvement district, all property owners in the district will have a chance to sign the petition. The council also decided that a property owner who once signs a petition will not be permitted to sign a remonstrance. In other words, the owner's name on a petition will not be considered on a protest.

The heading of the petition will say: "Read carefully before signing." Also on the petition will be the notation, "the city engineer's office does not circulate petitions."

TRADE LITERATURE

A new handbook of "Maximum Spans for Joists and Rafters" has been published by the National Lumber Manufacturers Association for the guidance of architects, engineers and contractors and carpenters. Spans tables are given for joists of various sizes and spacing and with different live loads for plastered as well as unplastered ceilings, and for deflection limited to 1-360th of an inch and as determined by bending. There are also tables for maximum spans of ceiling joists and attic floor, joists, rafters and roof joists. A complementary table deals with the area of cross section, weight per lineal foot, moment of inertia and section modulus of American standard dressed sizes of normal timber sizes—from 2x4 up to 24x30 inches. A forward explains the use of the tables and shows how their application to species and grade of lumber may be determined by the local building code or by reference to the forthcoming "Working Lumber Manufacturers Association in its construction information series. Copies may be had upon application to the National Lumber Manufacturers Association, Washington, D. C.

BERKELEY PLANT PLANS HUGE EXPANSION

Announcement of plans to build a \$1,000,000 plant on the block bounded by 8th, 9th, Gilman and Camelia Sts., Berkeley, is made by the B. F. Sturtevant Company, manufacturers of ventilating equipment, now located at 2530 Sixth street, that city. The announcement followed a visit to the West Coast by E. N. Foss, head of the firm.

According to the plans made known by C. C. Hardy, Pacific Coast manager, the first unit of what will ultimately be a \$1,000,000 plant will be begun within the next three years, to be completed by 1933, when the lease on the present plant, which has proved inadequate to meet expansion needs, expires. The new factory is planned to cover 50,000 square feet of floor space and will employ between 100 and 150 men. Additions to the unit now under consideration will be made when increasing business warrants the expansion.

The B. F. Sturtevant Co. is a subsidiary of the V. B. F. Sturtevant Co., with headquarters in Boston.

P. C. McNEVIN DIES

Peter C. McNevin, general sales manager of the Pacific Lumber Company, died suddenly April 27 on the steamship California, enroute from New York to San Francisco. McNevin was president of The Pacific Lumber Company of Illinois and general sales manager of the Pacific Lumber Company, the parent company. He was born in San Francisco March 27, 1888. He was first employed by the Pacific Lumber Company, at the age of 15, in their San Francisco yard office. In 1907, he was moved to the Oakland yard, as order and shipping clerk and shortly after, he became assistant superintendent, then superintendent, and later rising to the position of manager.

VALUATION OF BUILDING PERMITS IN 22 CITIES*

	First 3 Months, 1930	First 3 Months, 1929	March, 1930	February, 1930
New York City.....	\$83,761,789	\$360,517,000	\$36,232,000	\$23,306,389
Los Angeles	20,053,841	27,600,403	7,045,931	3,897,054
Chicago	15,452,900	42,474,200	4,597,800	5,400,600
Detroit	12,802,260	23,508,329	5,230,050	3,578,291

*Compiled by F. W. Dodge Company.

QUANTITY SURVEYORS ELECT OFFICERS IN ST. LOUIS

C. L. Weeks of Los Angeles was elected first vice-president of the American Institute of Quantity Surveyors at the annual convention held in St. Louis, Mo., April 14th, 15th and 16th. The annual convention next year will be held in Cincinnati, Ohio, the last week of May or the first of June.

Other officers elected at the St. Louis meeting were: Oscar Euphrat, Cincinnati, Ohio, re-elected president; Mr. Irwin, second vice-president; F. E. Dischner, Detroit, re-elected secretary; F. Brofos, St. Louis, treasurer.

BUILDING TRADES FIND IT PAYS TO MODERNIZE

Figures recently compiled prove that home modernizing saved the building trades in Minneapolis from a loss in 1929. Had it not been for additions and repairs to old buildings, the total amount expended for building construction in that city would have fallen far below the 1928 figure. As it was, a gain over the preceding year is shown for 1929.

According to data gathered by the Builders' Exchange of Minneapolis there was an actual drop in the construction of new buildings of all types in the city in 1929 of \$1,557,315, as compared with 1928. On the other hand, there was an increase in additions and repairs, due to modernizing, of \$1,596,760, making a balance in favor of last year of \$39,445. The total spent for modernizing in 1928—\$2,207,055—grew to \$3,504,355 in 1929. So impressed are the building and material men with these figures, which have opened their eyes to the valuable service rendered by the Home Modernizing Bureau, that the board of directors have made the modernizing bureau an activity of the exchange.

AWARDS MADE FOR STEEL BRIDGE DESIGNS

Three students at the University of Illinois won the three cash prizes of \$130 offered by the American Institute of Steel Construction for the most beautiful design of a steel bridge submitted by architectural students. These prizes, amounting to \$500, \$300, and \$100 respectively, were made through the Beaux-Arts Institute of Chicago. A total of 160 students enrolled in the competition and submitted sketches in the preliminary judgment. The problem called for a design of a steel bridge of 650 feet total length and with a main arch span of 325 feet.

The prizes were awarded at the final judgment to George D. Reher, first; Russell O. Deeter, second, and Don P. Ayres, third, all of the University of Illinois.

U. S. STEEL WILL SPEND TWO HUNDRED MILLIONS

Myron C. Taylor, chairman of the Finance Committee of the United States Steel Corporation, informed stockholders at their annual meeting April 21 that the company had appropriated \$200,000,000 for plant improvement and extensions. The money will be expended during the current year.

Taylor said the financial and business situation "is basically sound and we can face the future with a feeling of assurance, confidence and safety."

"We witnessed last year very great readjustment in the securities market," he said, "which to an extent was bound to occur, but which ran beyond its proper point in readjustment."

He expressed the belief that most needed and inevitable readjustments had been completed.

TO LICENSE 3,000 ENGINEERS UNDER NEW STATE REGULATION

"Approximately 3,000 application forms, along with complete information designed to guide applicants in the correct procedure for becoming registered and licensed as civil engineers, have been mailed out by the Board of Registration for Civil Engineers. Additional forms are being sent out as names are received." It is stated by James F. Collins, director of the State Department of Professional and Vocational Standards, in his report to the Governor's Council.

"More than 300 bona fide applicants for registration and license have filed their formal applications, together with the required fees and additional application blanks, properly filled out, are being received daily. More than 200 applicants have been tentatively approved for certification, and the work is progressing satisfactorily. It was estimated that, with the completion of the task now confronting the board, approximately 3,000 civil engineers will be registered in California.

"Until July 1, 1930, all successful applicants for license will be registered without examination, except those who are unable to qualify under the one year's residence clause in the law. After that date it will be necessary for applicants to undergo such examinations as are prescribed by the board.

Contractors' Registration

"Under the contractors' registration act the machinery designed to care for all investigation activities is being developed rapidly and is functioning more efficiently as time and experience provide the necessary information on which to base forms of procedure.

"As a first step in the investigation of complaints lodged with this section against contractors and subcontractors, all parties to the complaint are called for preliminary conferences, at which time complete statements are obtained, together with all available data and evidence bearing on the case. All data so gathered is submitted to the Registrar of Contractors and, as evidence in the cases justify, official hearings are set.

"The registration of contractors in California under the act reached a total of 13,227 on March 15, 1930, with applications for registration and li-

cense continuing to flow into central office at a satisfactory rate.

"Of 22 cases involving complaints filed with the contractor's registration section, during a recent period, eight were dismissed for lack of cause, four were adjusted by agreement, two are pending for further investigation, one pending for decision, two pending for conference. Two have been deemed sufficiently serious to be set for official hearing by the registrar. In three cases, licenses were suspended for failure on the part of those complained of to appear for conference.

Architects' Registration

"Southern District—Four licenses issued to architects in the Southern District in February brought the total up to 706. Investigations resulting from complaints numbered four. Two additional investigations are pending. Conviction was obtained in one case.

"An end to the practice of nonprofessionals and unlicensed persons posing as architects when applications for building permits are filled out is seen in Los Angeles through the adoption by the building inspection department of that city of a policy of permitting the name of a licensed architect or licensed engineer only to appear in the space provided for that particular information. On the new application blanks of that department, the words, 'Not to be filled in unless with name of certificated architect or licensed engineer,' has been printed next to the space provided for that data. This action will, it is believed, reduce a certain phase of unlawful advertising forbidden by the act regulating the profession of architects.

"During the month the board, thru its attorney, assisted the Arizona state board materially by furnishing legal citations which were successfully used in the conviction of an offender in the neighboring state.

"Northern District—Activities of this board during February included the conducting of 13 investigations of complaints. No prosecutions were found necessary during that period, nor were any licenses suspended or revoked.

"With the issuance of one new license during the month the total number of licensees operating under supervision of the Northern District Board of Architectural Examiners was brought up to 517, the report of Secretary A. J. Evers reveals."

UNIT COSTS FOR BUILDINGS IN L. A. COMPILED BY A.G.C.

Unit Building Costs in Los Angeles*
Prepared by the Associated General
Contractors of America,
Southern California Chapter

"In using these figures, it should be remembered that application of an average estimate of cost to any given locality is always open to question, even where prices are uniform—which they never are.

"For these reasons, we have provided a range of costs in each item which should cover all ordinary conditions, but cannot be compared with cost estimates based upon a detailed study of plans and specifications, as regularly made by a general contractor.

Total Unit Costs Per Cubic Foot	
Class A Steel Frame Buildings	
Office buildings	\$.45 to \$.55
Hotels	.51 to .64
Apartments	.48 to .62
Lofts	.19 to .34
Warehouses	.18 to .29

Class A Reinforced Concrete Buildings	
Office buildings	\$.42 to \$.61
Hotels	.46 to .62
Apartments	.45 to .60
Lofts	.16 to .30
Warehouses	.15 to .25

Class C Brick Buildings	
Stores on ground, apart- ments above	\$.20 to \$.40
Apartments	.27 to .50
Hotels	.23 to .45
Lofts	.16 to .30
Warehouses	.15 to .25
1-story garages, per sq. ft. 1	1.46 to 2.00
1-story stores, per sq. ft. 1	1.75 to 3.20
2-story stores, apartments above, per sq. ft. 1	2.50 to 3.90

Note: Volume (cu. ft.) is average floor area times to total height from lowest basement floor to high point of roof.

Total Unit Costs Per Square Foot	
Frame Buildings	
California houses:	
Good	\$2.50 to \$3.25
Medium	2.00 to 2.75
Cheap	1.25 to 2.00
Residences, two-story*:	
Good	5.75 to 8.00
Medium	3.90 to 4.90
Cheap	2.20 to 3.25
Bungalows, special	4.75 to 5.90
Good	3.25 to 3.60
Medium	2.50 to 3.15
Cheap	2.10 to 2.60
Outbuildings, frame:	
Good	1.75 to 2.50
Medium	1.40 to 2.00
Cheap	.90 to 1.50

Bungalow Courts—Frame Apartments	
Special	\$4.75 to \$6.00
Good	3.80 to 4.75
Medium	3.30 to 4.25
Cheap	2.80 to 3.80
Four-Flat Buildings, 2-story*	
Special	\$4.75 to \$6.00
Good	3.80 to 4.75
Medium	3.30 to 4.25
Cheap	2.80 to 3.80

Corrugated Iron Buildings	
All kinds	\$.90 to \$1.20

*Note: Area (sq. ft.) is total floor space, including porches but not light courts.

*Footnote: In a careful study of unit building costs for the current period, the committee found practically no change in unit costs for buildings as compared with costs of one year ago. While several materials and labor advanced in price, certain materials were correspondingly reduced, thus rendering a very slight change in the unit costs.

"Use ground floor area for determining estimated cost."

ARCHITECTURAL CLUB PICNIC SET FOR NEXT MONTH

The fourth annual picnic of the San Francisco Architectural Club will be held May 11 in Mitchell's Canyon at the base of Mt. Diablo in Contra Costa county, according to W. B. Rue, a member of the committee in charge of arrangements.

The club, according to Rue, was fortunate in securing the canyon grounds due to the courtesy of the Henry Cowell Lime and Cement Company, which concern has already started providing every convenience for the annual outing of the world's future architects.

A feature of the outing will be a baseball game between the architects and the engineers, the prize being the Dickey Perpetual Trophy, donated by the W. S. Dickey Clay Manufacturing Company. Other events will include a horseshoe pitching contest, swimming and diving exhibits and golf. Special amusements will be provided for the kiddies. Ladies will be given an opportunity to show their art in the game of bridge.

LUMBER IMPORTS INTO U. S. FROM ALBERTA INCREASE

A reduction in the building of farm homes and grain elevators in Alberta, is the principal reason ascribed for an increase of 30 per cent in volume and 12 per cent in value in the spruce lumber exports of that province to the United States in 1929. The 1929 exports of this wood totaled 16,179,000 board feet, according to a report from Odin G. Loren, Vice Consul, Edmonton, to the Lumber Division of the Department of Commerce.

The secretary of the Northern Alberta and British Columbia Lumbermen's Association estimates the 1929 production of lumber at 250,000,000 board feet, and shipments at 200,000,000 board feet. About 90 per cent of the shipments by Alberta mills in 1929 were made to points in the Prairie Provinces and the rest to Eastern Canada and the United States. Practically all the lumber produced was spruce.

at a fixed price of \$1,500 each.
GEIGER ADDS NEW LINE

Manufacturing facilities of the Geiger Iron Works of Stockton are being enlarged to permit the production of Gilbert concentrators, a new gold mining machine, exclusive right for the manufacture of which in the San Joaquin territory, has been secured by the Geiger interests. The first finished machine, which, it is claimed, will separate approximately 98 per cent of gold from gravel instead of the 60 to 70 per cent of present machines, will be completed this week.

W. Y. ROWE, PAINTER, PASSES

William Y. Rowe, painting contractor of Sacramento, died in Stockton April 20. He was a native of Oakland and for the past seven years was engaged in the painting business in the capital city.

A bill prohibiting railroad consolidations unless the carriers agree to dismiss no employees as the result of the merger and pay their expenses if transferred has been introduced in the Senate by Senator Hawes of Missouri. The measure was provoked by reports that the Great Northern and Northern Pacific lines would discharge thousands of employees if their present merger plan is carried into effect. The potential loss of employment has lent strong opposition to the merger.

PROVIDE FOR FUTURE ON ELECTRICAL INSTALLATIONS

"The growth and expansion of industrial plants during the past few years has presented numerous electrical problems which have caused the owners inconvenience and additional expense to get the most efficiency out of their electrical equipment and to comply with governing safety requirements," says Ben C. Hill, supervising inspector of the Oakland Municipal Electrical Department, in Industrial Electric News, issued by the Pacific Electric Motor Co. "Many of these problems would not have occurred had some thought been given to future load and expansion when the original installation was installed.

"The information gained by the inspector because of his contact with widely varying conditions and the applications of electrical appliances and methods should place him in a position to criticize in a constructive way. If an example is made of one common mistake it can be realized how simple it is for one to be a 'penny wise and dollar foolish.' Take for instance the case of an owner calling for competitive bids on a given amount of work which is not covered by detailed plans and specifications. The electrical contractor, knowing he is estimating on a competitive basis, is obliged to take advantage of every loophole and select the most reasonable priced materials, devices and wiring methods. The result is the owner thinks he is accepting proposals of equal value but will soon learn that all of the materials, devices and wiring methods which are approved for a given purpose are not of equal merit or value. The cost of maintenance and expansion may not have been considered and, when the time arrives to add additional load, it is found the service, main feeders, and distributing centers are inadequate. If load is added without reinforcing the service, feeders, and addition to the distributing centers a hazard is brought into the plant and safety laws violated and disregarded which may bring about serious results. The cost of operation has increased as overloaded conductors cause voltage drop. Where there is a waste in the cost of maintenance and operation it does not take very long for this unnecessary leak to pay for its correction.

"It is urgently recommended that future extensions or increases of load be anticipated when possible, and that provision be made for them in the initial installation. The cost of making such provision in the initial installation is usually small as compared with the cost of future reconstruction or replacement. Numerous details which affect the design or quality of an installation should be included in the specifications. A certificate of inspection should invariably be required upon completion of the work. On existing installations a competent and qualified expert should check up conditions and where found faulty, correction should be made. Most appliances, devices and methods, substituted for old, may be effectively used. "The prime interest of the inspector is to endeavor to prevent electrical fires and accidents and in providing this service he represents and serves the public."

Damages for a grade crossing accident in which a motor truck caused the wrecking of a train must be paid by the owner of the truck to the railroad, according to a recent court decision in Illinois. The railroad sued the truck owner for \$30,000 damages and was awarded \$10,000. An appeal for a new trial has been denied.

\$1,500,000 WATER PROJECT IS PROPOSED NEAR SAN DIEGO

Application for a water project to cost \$1,500,000, diverting water from the Sweetwater River, a tributary of San Diego Bay, in San Diego County, for irrigation and domestic use, has been filed with the State Department of Public Works, Division of Water Rights, at Sacramento, by the Southern California Water Supply Company of San Francisco.

The towns of National City, Chula Vista, Coronado and unincorporated areas in the vicinity will be served, according to plans filed with the state department. Diversion of 18.6 cubic feet of water per second from the river is asked by the company. Five thousand acres of land will be irrigated, in addition to the domestic supply for the cities mentioned.

RENO PLUMBERS OPERATING CRANE BUDGET PLAN

New plumbing, including the cost of installation, on the monthly payment plan is the latest addition to the buying system by which one may use the articles while one pays for them. Announcement of a budget system for plumbing fixtures was made by the Crane Company, manufacturers, this week and has been extended to dealers at Reno, Nevada.

Under the plan home-owners may secure new plumbing fixtures for their old on a payment of ten per cent down, the balance, including both the fixtures and the cost of installation, to be met in monthly payments. The Crane Company is financing local dealers in the partial payment operations.

Announcement is made that the plan is in line with the national effort to increase construction this year.

BUILDING AND LOAN CHIEFS HERE FOR MEETING

Members of the Executive Committee of the California Building - Loan League are in San Francisco today from various sections of the State for an all-day session. Local officers attending are: Wm. E. Bouton, secretary, and Fremont Wood, treasurer. Bouton is secretary of the Standard Building and Loan Association and Wood, secretary, Citizens' Building & Loan Association.

The legislative program, recodification of building-loan laws and other projects to be presented before the Silver Jubilee Convention to be held in San Diego, May 22-23-24, are scheduled for discussion.

Committee members attending today's session include: J. M. Abbott, Santa Barbara, president; H. S. Wanner, Sacramento; C. H. Wade, Los Angeles; P. A. Oliver, San Mateo; S. M. Anderson, Inglewood; Harold A. Noble, Stockton, and Edwin M. Elnstrom, Fresno. Geo. M. Eason, Los Angeles, Chairman of the Taxation Committee, will make a report and Chas. H. Tucker, Long Beach, president of the recently created Building-Loan Federation of California, is also present.

PAINT MERGER

The management and corporate assets of the Bass Hueter Paint Company are being taken over as of May 1 by the National Lead Company of California, both organizations being subsidiaries of the National Lead Company, manufacturers of brands of pure white lead.

Bass Hueter products will continue to come under the B-H label, supplemented ultimately with additional lines.

FULLER TO INCREASE PLANT FACILITIES AT SACRAMENTO

W. P. Fuller & Company, paint manufacturers of San Francisco, are having plans completed for a two-story concrete and brick warehouse to be erected at Tenth and R Sts., Sacramento. The structure will involve an expenditure of \$30,000, according to Coffman, Sahlgren & Stafford, Sacramento architects, who are completing plans for the building.

PLANS EXPANSION OF LINES

Willamette Iron & Steel Works, Portland, Ore., announces its intention to expand its line of paper and pulp machinery, so that major equipment of such plants may be built in the Pacific Coast. Some arrangements have been made to manufacture pulp machinery on this coast for eastern companies, details of which are to be announced later.

The company recently completed shipment of a large order of screens, with vats and fastenings, to Olympic Forest Products Co., at Port Angeles, Wash.

SACRAMENTO TO VOTE BONDS

June 13 is the date set by the Sacramento City Council to vote bonds of between \$350,000 and \$450,000 to finance the construction of a new sedimentation basin and for minor repairs at the municipal filtration plant. At the same election a proposal will also be submitted providing for the issuance of \$150,000 in including hard-surfaced runways, drainage facilities and other improvements.

There was an increase of 50.6 per cent in the estimated expenditures for all building operations for which permits were issued in March compared with permits issued during February. Reports received by the Bureau of Labor Statistics of the United States Department of Labor from 232 cities having a population of 25,000 or over show the above increase.

The estimated cost of all building operations included in March permits in these cities was \$164,165,206, while the February indicated expenditure was \$109,009,775.

Residential building increased 35.8 per cent and nonresidential building, 68.2 per cent, comparing March with February.

There were 11,405 families provided for in the new buildings for which permits were issued in these cities during March, an increase of 32.6 per cent over the 8,599 provided for according to permits issued during February.

Increases were shown in new residential buildings in all of the seven districts. Increases were registered for nonresidential buildings for all districts except the East North Central.

Increases in families provided for and in total building operations were shown in all districts, comparing March with February permits. In the New England Division the increase in total building operations was 82.2 per cent. In the Middle Atlantic Division the increase was 54.3 per cent, in the East North Central Division, 20.8 per cent, in the West North Central Division, 41.3 per cent, in the South Atlantic Division 112.7 per cent, in the South Central Division, 47.3 per cent, and in the Mountain and Pacific Division, 44.8 per cent.

Permits issued for alterations and repairs show an increase in estimated costs in all districts except the West North Central.

BUSINESS OPPORTUNITIES

SAN FRANCISCO.—Names and addresses of the individuals or firms concerned in these opportunities will be furnished on request to the Business Opportunity Department of Daily Pacific Builder, 545-547 Mission Street, phone KEarny 1252:

D-3455—Representation. Aurora, Ind. Manufacturers of grinding and pulverizing machinery are interested in securing representation here.

D-3456—Agency. New York City. Concern anxious to establish an agency on the Pacific Coast for the distribution of various toiletries.

D-3457—Sales Connection. Tucson, Ariz. Party in substantial business district wants to establish sales connection for novelty line.

D-3458—Sales Execution. S. F. Seeking new affiliation with national concern to represent on Pacific Coast. Desires to make headquarters in this city or Los Angeles.

D-3459—Index Globe. Los Angeles, Calif. Manufacturers of an index globe are interested in securing manufacturers' agents in this territory to handle their commodity.

D-3460—Manufacturer. San Francisco. Party anxious to merge with established manufacturing concern interested in making a pneumatic shock absorber for airplanes.

D-3461—Distributor. East Orange, N. J. Well established manufacturing concern is desirous of securing a distributor for various lines on the Pacific Coast.

D-3462—Sales Connection. Toledo, Ohio. Party wishes to obtain an agency in Toledo for any manufacturers' line.

D-3463—Representative. Newark, N. J. Manufacturers of fire brick are seeking to obtain a representative in San Francisco to sell their commodity. Party connected with oil firm preferred.

D-3464—Pumps. San Francisco. Party anxious to make connections with a responsible manufacturing concern to handle pumps on contract or for distribution.

20056—Fibre. The Hague, Holland. Firm has a new fibre similar to coco fibre which they are interested in exporting to the U. S. A sample of this fibre is available locally.

20059—Art Iron Works. New York, N. Y. A Belgian firm desires to secure an agent who will undertake the representation in San Francisco, of all kinds of iron art works; rolling and tap-rooted doors, monumental iron gates, stair cases, railings, winter gardens, logias, marquises, etc.

20061—Crockery. San Francisco, Cal. A well-established local firm wants to get in touch with a direct distributor of crockery wares, inexpensive cups, saucers and plates such as are imported from Germany, Austria and Czechoslovakia. The crockery need not be imported from these countries provided it is competitive in quality and price was the wares coming from Central Europe. Please address all inquiries to Box 61, Foreign Trade Dept., San Francisco Chamber of Commerce.

20063—Waste Materials. Osaka, Japan. Firm that has been exporting roofing and wiping rags and all kinds of waste materials through commission men is now anxious to do business directly with local importers of these commodities. 31

Libbey-Owens Glass Co. officials on April 23 announced merging with Edward Ford Plate Glass Co. The new company is to be known as Libbey-Owens-Ford Co. The stockholders will meet in May to ratify the merger, which will involve an exchange of stock.

APARTMENTS

Preparing Plans
APARTMENTS Cost, \$175,000
LOS ANGELES, Cal. Fernwood St.
and St. Andrews Place.
Seven-story and basement Class A
reinforced concrete apartments
(50x158 ft. (140 rooms)).
Owner—Mr. Francis.
Architect—Arthur C. Le Brun and
Herbert Booth, Associated, Fay
Bldg., Los Angeles.

Contract Awarded—Site Clearing
Started.
APARTMENTS Cost, \$10,000
WILLIAMS, Colusa Co., Cal.
Two-story hollow tile (2) stores and
(two 4-room) apartments.
Owner—Mrs. Mary T. Ryan, Williams.
Private Plans.
Contractor—Julius Hofmeister, Colusa

Owner Taking Bids.
APARTMENTS Cost, \$40,000
OAKLAND, Alameda Co., Cal. NW
5th and Foothill Blvd.
Three-story and basement frame and
stucco apartments (reinf. concrete
basement).
Owner—C. R. Boyd, 448 Foothill Blvd.,
Oakland.
Plans by L. F. Hyde, 372 Hanover St.,
Oakland.

Sub-Figures Being Taken.
APARTMENTS Cost, \$125,000
OAKLAND, Alameda Co., Cal. 29th
St. bet. Fairmont and Broadway.
Six-story concrete and steel apts.
Owner and Builder—H. S. Butler, 5679
Oak Grove, Oakland.
Plans by L. F. Hyde, 372 Hanover St.,
Oakland.

Preparing Preliminary Plans.
APARTMENTS Cost, \$450,000
SAN FRANCISCO. Location With-
held.
Fourteen-story class A reinf. concrete
and steel apts. (50 3- 4- 5- and 6-
room apts.)
Owner—Withheld.
Architect—Albert H. Larsen, 447 Sut-
ter St., San Francisco.

Plans Being Figured.
ALTERATIONS Cost, \$40,000
SAN FRANCISCO. NW Bush and
Polk Streets.

After present apartments.
Owner—Estate of Louis Freidman.
Architect—S. Heiman, 605 Market St.
San Francisco.

As previously reported, refrigerators
awarded to Cyclops Iron Works,
(Norge Refrigerators, 837 Folsom St.,
S. F., at \$4000. There will be 47 re-
frigerators installed.

Work involves painting, electric
wiring, plumbing.

Contract Awarded.
APARTMENTS Cost, \$50,000
PALO ALTO, San Mateo Co., Calif.
Forest Ave.
Two-story part frame and concrete
apartments.
Owner—E. J. Cooksey, 538 S Hum-
boldt, San Mateo.
Contractor—Martin Petersen, Redwood
City.

It is expected construction will start
in two weeks.

Contract Awarded.
APARTMENTS Cost, \$75,000
BERKELEY, Alameda Co., Cal. Le-
roy and Virginia Sts.
Two- and three-story frame and stuc-
co apartments.
Owners—C. C. Dakin and Ben Pearson.
Architect—C. C. Dakin, 1443 Josephine
St., Berkeley.
Contractor—E. W. Larmer, 90 Fair-
view, Piedmont.

BONDS

CERES, Stanislaus Co., Cal.—Cham-
ber of Commerce backs proposal to
call election to vote bonds to finance
erection of a new grammar school for
the Ceres Grammar School District.

San Francisco.
Rock & Sand—Western Sand & Rock
Co., South San Francisco.
Electric Work—C. R. Beatty, South
San Francisco.
Painting—M. Minucciani, South San
Francisco.
Excavation—Baker Constr. Co., So.
San Francisco.

Plans To Be Prepared.
CHURCH Cost, \$60,000
MODESTO, Stanislaus Co., Cal. 12th
and M Sts.
Gothic type church, seating 500.
Owner—First Baptist Church (Rev.
C. A. Collett, pastor), Modesto.
Architect—Rollin S. Tuttle, Box C, Los
Gatos.

Preparing Preliminary Plans.
CHURCH Cost, \$50,000
PIEDMONT, Alameda Co., Cal.
One-story timber and concrete church.
Owner—First Church Christ Scientist.
Architect—Henry H. Gutterson, 526
Powell St., San Francisco.

Completing Plans.
CHURCH Cost, \$25,000
BAKERSFIELD, Kern Co., Cal.
One-story and basement frame and
stucco church (to seat 300).
Owner—First Nazarene Church.
Architect—First Nazarene Church.
Architect—First Nazarene Church.
Greer St., Pasadena.

WATSONVILLE, Santa Cruz Co.,
Cal.—Seventh Day Adventists, Rev.
C. F. Folkenberg, pastor, plans im-
mediate erection of a \$3000 edifice on
the former Davis Tract near Free-
dom. At present services are held in
the I. O. O. F. Hall at Watsonville.

Contract Awarded.
CHURCH Cost, \$350,000
SAN FRANCISCO. NE Ellis and Taylor Streets.
 Six-story and basement reinforced concrete, steel and terra cotta church, hotel apartments and stores building.
 Owner—Glide Foundation (Mrs. L. H. Glide), 162 Uplands Ave., Berkeley (Rev. P. W. Rollins, Pastor).
 Architect—James Plachek, Mercantile Bank Bldg., Berkeley.
 Contractor—Monson Bros., 475 Sixth St., San Francisco.

Plans Being Completed.
ALTERATIONS Cost, \$16,000
SANTA ROSA, Sonoma Co., Cal.
 Alterations and additions to present church building (erect social hall and general alterations)
 Owner—First Methodist Episcopal Church.
 Architect—Rollin S. Tuttle, Box C, Los Gatos.
 Mead Clark, E. A. Eymann and W. J. Necker are on the building committee.

- 906 lin. ft. 12-in. V. C. P. sewer;
- 8 21x6-in. Y or T branches;
- 4 15x6-in. Y or T branches;
- 23 12x6-in. Y or T branches;
- 690 lin. ft. 6-in. V. C. P. side sewers;
- 6 brick manholes.

Estimated cost \$6925.

HEALDSBURG, Sonoma Co., Cal.—City trustees plan to construct 300 ft. of sewer in section north of the railroad tracks to serve Oak Lawn Inn. Est. cost \$750. Archer B. Stuart, city engineer.

SAN MATEO, San Mateo Co., Cal.—Until May 5, 8 P. M., bids will be received by E. W. Foster, city clerk, (20-1) to construct 6, 8, 10, 12, 15, 18 and 21 inch vit. clay pipe sanitary sewers 4-inch cast iron pumping mains; brick manholes; vit. clay pipe sewer laterals; steel reinforced concrete sumps with sewage pumps, motors, piping, etc., in the Bessford Park District; estimated cost \$60,000. 1911 Act. Bond Act 1915. Certified check 10% payable to City required with bid. Plans on file in office of clerk.

LIVERMORE, Alameda Co., Cal.—Until May 12, 8 P. M., bids will be received by Elmer G. Still, town clerk, to construct extension to sewer system in North 1 St., bet. Railroad Ave. and Junction Ave. Certified check 10% payable to town clerk required with bid. Plans on file in office of clerk. L. E. Wright, town engineer.

LONG BEACH, Cal.—The city council has started proceedings for a storm drain project in the northeast and northwest sections of the city. The former will cost \$80,000 and the latter \$235,000. Herbert Paterson of the Long Beach engineering department, will have charge of the work.

SAN MARINO, Los Angeles Co., Cal.—Until 8 P. M., May 14, bids will be received by the city council for the construction of a sewer in La Mirada Ave., Euclid Ave., Hermosa St., Las Flores Ave. and other streets, under 1911 act, involving: 8850 ft. 8-in., 388 ft. 15-in., 3023 ft. 18-in., 1055 ft. 21-in., 652 ft. 27-in., and 45 ft. 30-in. vit. sewer; 54 manholes; 13 flush tanks. H. W. Joyce, city clerk. Wm. Chalmers, Braley Bldg., Pasadena, city engineer.

April 26, 1930
LONG BEACH, Cal.—The \$3,400,000 sewer bond issue of County Sanitation District No. 3 was defeated at the election April 21.

LOS ANGELES, Cal.—Ordinance of intention No. 66,392 has been adopted by the city council for construction

of a storm drain system in what is known as the Jefferson Storm Drain Section No. 3. The total length is about 37,474 lin. ft. and the system will involve cement pipe, of sixes from 12-in. for the pipe up to the box section of 4 ft. 6 in. by 7 ft. 6 in. The approximate cost is \$300,000. Martin Simonovich submitted the low bid in 1927 when bids were first taken, at \$402,727. The contract was awarded to him on April 14, 1927, but rescinded later. Protest hearing on the new proceedings has been set for May 27.

SAN FRANCISCO.—Municipal Bureau of Engineering seeks \$750,000 in 1930-31 budget to finance main sewer extensions in various sections of the city.

MODESTO, Stanislaus Co., Calif.—Following bids taken under advisement by city council until May 14 for sewer farm equipment:

(1) One sewage clarifier and mechanical skimmer to serve sewer area of not less than 2,950 sq. ft. Water Works Supply Co., 501

Howard St., San Francisco, \$4,560
Dorr Co., San Francisco, \$2,274

(2) One sludge digester, 30-ft. diameter, 18-ft. deep:

Dorr Company, \$4,727
Water Works Supply Co., 5,074

(3) One sewage sludge pump, 80 g.p.m.:

Industrial & Municipal Supply Co., 7 Front St., S. F., \$506
Water Works Supply Co., 540
Dorr Company, 1,640

MISCELLANEOUS CONSTRUCTION

SAN DIEGO, Cal.—E. M. Elliott, representing the American Bridge & Ferry Co. of New York, has announced that he is ready to present to the city council plans for a tunnel between Coronado and San Diego. A formal application for a franchise will be made. The San Francisco Bridge & Toll Co. has already been granted a franchise to construct a tunnel.

Specifications obtainable from city clerk.

LOS ANGELES, Cal.—Rich Mfg. Co. awarded contract by water and power bureau at \$6400 for fire hydrants under Adv. 1313, involving: 194 2 ½-in. single outlet fire hydrants at \$32 ea.; 6 2 ½-in. single outlet fire hydrants, each including 24-in. bury (middle section), at \$32 each.

LONGVIEW, Wash.—Stevens & Koon, consulting engineers, Spalding Bldg., Portland, Ore., commissioned by Washington Gas & Electric Co., operators of waterworks system at Longview, to prepare plans for waterworks improvements, involving gravity type filtration plant, additional reservoir, steel pumping main, intake, pumps, motors and auxiliary equipment for a complete new water supply. The work to be undertaken at once will consist of three million-gallon units of a plant which may be expanded to a total capacity of 12,000,000 gallons per day. The cost of the work to be done this year will exceed \$200,000.

BEVERLY HILLS, Los Angeles Co., Cal.—Until 8 P. M., May 6, bids will be received by the city council for furnishing and installing two deep well turbine pumps in accordance with plans prepared by Salisbury, Bradshaw & Taylor, 745 Petroleum Securities Bldg., Los Angeles. B. J. Firminger, city clerk.

BEVERLY HILLS, Los Angeles Co., Cal.—Until 8 P. M., May 6, bids will be received by the city council for furnishing waterworks brass goods in accordance with specifications prepared by Salisbury, Bradshaw & Taylor, 745 Petroleum Securities Bldg., Los Angeles. B. J. Firminger, city clerk.

PLAYGROUNDS & PARKS

ELKO, Nevada.—Elko Park Commission has approved plans for 15-acre public park on the China Ranch, just east of Elko. Lay-out plans have been completed by C. H. Healy, landscape artist of Salt Lake City.

STREETS AND HIGHWAYS

SAN FRANCISCO.—Until May 7, 2:30 P. M., bids will be received by S. J. Hester, secretary, Board of Public Works, to improve Section E of the Alemany Blvd. at Inter. of Sagamore St. and Orizaba Ave., under Contract No. 20, involving 31,800 sq. ft. asph. conc. pave. consisting of 1 ½-in. asph. surface, 1 ½-in. under course and 8-in. class E conc. base; 1900 sq. ft. 1-course conc. sidewalk; 2200 sq. ft. 4-in. macadam sidewalk; 215 lin. ft. armored concrete curb; 570 lin. ft. r.w. conc. curb, exposed surfaces painted; 60 lin. ft. r.w. heplers, 2x10-in., one 9-unit warming reflector section post. Est. cost, \$11,000. Certified check 10% payable to clerk of the Board of Supervisors required with bid. Plans obtainable from Bureau of Engineering, 3rd floor, City Hall, on deposit of \$10, returnable.

SALINAS, Monterey Co., Cal.—Granite Const. Co., Watsonville, at \$17,-

\$88.90 awarded contract by county supervisors to grade and surface portion of Salinas River road. W. A. Dontanville, Salinas, bid \$27,837.50.

SALINAS, Monterey Co., Cal.—Granite Const. Co., Watsonville, at \$20,368 awarded contract by county supervisors to grade and surface Toll road from Werner's Hill to Castrovilla. W. A. Dontanville, Salinas, bid \$24,275.

MODESTO, Stanislaus Co., Calif.—Proceedings will be started at once by city council to pave alley between Sycamore and Magnolia Aves., and Alice St. and Needham Ave. Frank J. Rossi, city eng.

MODESTO, Stanislaus Co., Calif.—Standard Paving Co., Modesto, at \$980 awarded contract by city council to pave tennis court in Maze-Wren Park.

REDWOOD CITY, San Mateo Co., Cal.—City council declares intention (M-7) to improve Minnie St. between Broadway and James St., and George St. bet. Minnie and El Camino Real, involving:

403 lin. ft. 6-in. vit. clay sewer;
12 4x6-in. sewer wyes;
464 lin. ft. 4-in. vit. clay sewer;
3 brick manholes with cast iron frames and covers.
1911 sq. ft. pavement to be removed;
1668 lin. ft. integral curb;
43258 sq. ft. cem. conc. pave.;
54692 sq. ft. rock cushion with 1-in. sand cushion;
3930 sq. ft. sidewalk with rock cushion 3-in. thick and 1-in. sand cushion;

1109 cu. yds. cutting;
483 cu. yds. filling;
2954 lin. ft. 3x7-in. headerboards;
1 reinf. cem. conc. culvert 5x4-ft. with two catchbasins with cast iron frames and gratings;
520 lin. ft. 12-in. storm water sewer with 3 catchbasins and c. i. frames
1 complete electrolier system, being 15 2-light electroliers and 18 single light electroliers, with conduit wiring transformers, etc.

1911 Act. Bond Act 1915. Hearing May 5. B. E. Myers, city clerk. C. L. Dimmitt, city engineer.

REDWOOD CITY, San Mateo Co., Cal.—City council declares intention (M-6) to improve portions of Maple St., etc., involving:

1465 sq. ft. 4-in. sidewalk;
3 cem. conc. catchbasins with c. i. frames and gratings;
80 lin. ft. 12-in. cem. conc. pipe;
135 sq. ft. cem. conc. gutter;
747 lin. ft. cem. conc. integral curb;
1314 sq. ft. asph. conc. pavement on bridge;
37141 sq. ft. 6-in. cem. conc. pave. 6-in. thick; 8-in. thick on center line tapering to 6-in.
39313 sq. ft. rock cushion, 3-in. thick and 1-in. sand cushion;
1420 cu. yds. cutting;
179 cu. yds. filling;
1911 Act. Bond Act 1915. Hearing May 5. B. E. Myers, city clerk. C. L. Dimmitt, city engineer.

SAN LUIS OBISPO, San Luis Obispo Co., Cal.—Irving L. Ryder, 205 Almaden Ave., San Jose, awarded contract by the city council at \$16,064 to improve Santa Rosa St., bet. Hathaway Ave. (Sycamore St.) and northeast city limits, involving 6-in. to 8-in. concrete pavement, corrugated iron culverts, walks and curbs; 1911 Act.

MARTINEZ, Contra Costa Co., Cal.—County supervisors declare intention (3) to widen Lowell Ave. from 36th St. to San Pablo Ave., and 36th St., bet. Lowell and Andrade Ave., involving grading; Durite asph. conc. pavement on broken rock cushion cem. conc. curbs, gutters; vit. iron

stone sewers; br. and conc. manholes. Acq. and Imp. Act 1925. Hearing May 19. Edw. A. Hoffman, engineer, City Hall, Richmond. J. H. Wells, county clerk.

MONO COUNTY, Cal.—Until May 7, 2 P. M., bids will be received by F. G. Sommer, division engineer, State Highway Commission, Bishop, to furnish and apply as dust layer, heavy fuel oil on 24 miles between the summit of Sherwin Hill and the Devil's Punch Bowl. Specifications obtainable from above.

MONO COUNTY, Cal.—Until May 7, 2 P. M., bids will be received by F. G. Sommer, division engineer, State Highway Commission, Bishop, to furnish and apply as dust layer, heavy fuel oil on 16.3 miles between Devil's Punch Bowl and Leeving and at Bridgeport. Specifications obtainable from above.

SAN FRANCISCO—Until May 7, 2:30 P. M., bids will be received by S. J. Hester, secretary, Board of Public Works, for grading Phelps St. bet. Jerrold and Evans Aves., including crossings. Estimated cost \$10,-800. Certified check 10% payable to clerk of the Board of Supervisors required with bid. Plans obtainable from Bureau of Engineering, 3rd Floor, City Hall.

SAN FRANCISCO—Until May 7, 2:30 P. M., bids will be received by S. J. Hester, secretary, Board of Public Works, to improve Utah St., bet. 15th and 19th Sts., and 19th St., bet. Utah St. and San Bruno Ave., including grading; conc. retaining walls; asphalt conc. pave., etc. Est. cost \$24,000. Certified check 10% payable to Clerk of the Board of Supervisors required with bid. Plans obtainable from Bureau of Engineering, 3rd Floor, City Hall.

OAKLAND, Cal.—Jones & King, Hayward, at \$118,904 awarded contract by county supervisors to improve East 14th St., bet. San Leandro city limits and Ashland, involving asphalt conc. pavement.

SALINAS, Monterey Co., Cal.—Until May 14, 10 A. M., bids will be received by C. F. Joy, county clerk, to construct asphalt macadam wearing surface on Carmel Valley road in Supervisor District No. 5. Plans obtainable from County Surveyor Howard Cozzens.

LYON & CHURCHILL COUNTIES, Cal.—Basalt Rock Co., Napa, at \$18,278.17 awarded contract by State Highway Commission to furnish and apply asphaltic fuel oil to crushed rock or crushed gravel surface between 1/2 mile west of Fernley and Fernley and from 3 m. east of Fernley to Leteerville, a distance of 17.35 miles. Engineer's estimate, \$24,583.02.

LYON COUNTY, Nev.—Dodge Bros., Fallon, Nevada, at \$62,297.80 awarded contract by State Highway Commission to grade; construct structures and place surfacing material on 22.47 miles bet. Towle Ranch and Fernley. Engineer's estimate \$70,812.87.

LYON COUNTY, Nevada.—Nevada Rock and Sand Co., Reno, at \$85,675.-25 awarded contract by State Highway Commission to grade; construct structures and place surfacing material on 11.73 miles bet. Yerington and Wilson's. Engineer's estimate, \$102,-247.80.

LOS ANGELES, Cal.—Until 2 P. M., May 5, bids will be received by the county supervisors for 3500 rail-

road ties, No. 1 and No. 2, treated and untreated, Oregon pine ties. E. C. Eaton, chief engineer, Los Angeles county flood control department.

HUMBOLDT COUNTY, Cal.—Until May 21, 2 P. M., bids will be received by State Highway Commission to improve 5.2 miles of highway between Loloita and 2 miles north of Beatrice, 2.6 miles to be graded and 5.2 miles surfaced with river run gravel. See call for bids under official proposal section in this issue.

SANTA CRUZ, Santa Cruz Co., Cal.—Earl W. Hepple, San Jose, at \$13,767 awarded contract by county supervisors to grade and pave 4000 ft. of Mount Hermon road, just west of that section of the road between Camp Evers and Felton. Complete list of bids follows:
E. W. Hepple, San Jose.....\$13,767
J. L. Connor, Monterey.....14,528
J. P. Holland, Inc., S. F.....15,987
Pacific Coast Constr. Co., S. F. 18,860
W. A. Dontanville, Salinas.....19,384
W. C. Colby, San Francisco.....20,698

MENLO PARK, San Mateo Co., Cal.—City trustees reject bids to improve portions of College Ave. and Cambridge Ave., involving grading; comb. hyd. conc. curbs and gutters; pave with 3-in. asphalt conc. surface on 4-in. waterbound macadam base; 4-in. vit. pipe sewer laterals; hyd. conc. conc. storm water sewer. Peninsula Paving Co., San Francisco, submitted the lowest of six bids at \$64,518.

VISALIA, Tulare Co., Cal.—County supervisors reject petition seeking construction of new road from Visalia municipal airport to Dinuba, on the grounds that it would be "too costly."

VALLEJO, Solano Co., Calif.—City council starts proceedings to improve Indiana St. between Amador and Colusa Sts. T. D. Kilkenny, city eng.

SAN FRANCISCO—Municipal Bureau of Engineering seeks \$200,000 in 1930-31 budget to finance extension of Castro St., and \$250,000 to finance widening of Army St.

MODESTO, Stanislaus Co., Calif.—City council declares intention (215) to improve alley through Block No. 534, from Needham St. to point 13.50 ft. north of Alice St., involving grading; cem. conc. pave.; O. P. headers. 1911 Act. Bond Act 1915. Hearing May 14. H. E. Gragg, city clerk. Frank Rossi, city eng.

WILLOW GLEN, Santa Clara Co., Cal.—City trustees declare intention (No. 55) to improve portions of Bird Ave. involving grading; 1 1/2-in. Durite asphalt conc. surface pavement on 3-in. asphalt conc. base; cem. conc. walks,

curbs, gutters; corr. galv. iron culverts; cem. conc. pipe culverts. 1911 Act. Bond Act 1915. Hearing May 12. Dana Thomas, city clerk.

SALINAS, Monterey Co., Cal.—Until May 14, 10 A. M., bids will be received by C. F. Joy, county clerk, to surface with asphalt macadam King City-Jolon, San Lucas-Lockwood, Lonoak, Bitterwater and King City-Metz roads, all in Supervisor District Nos. 3 and 4. Plans on file in office of County Surveyor Howard Cozzens.

TEHAMA COUNTY, Calif.—Until May 15, 2 P. M., bids will be received by C. H. Sweetser, district engineer, U. S. Bureau of Public Roads, 461 Market St., San Francisco, to grade 7.71 miles of Section E of Route No. 1, Loop Route, Lassen Volcanic National Park Highway, involving:
46 acres clearing;
90,050 cu.yds. unclass. excav.;
530 cu. yds. unclass. excav. for structures;
6,250 cu. yds. unclassified excav. for borrow;
25,000 sta. yds. overhaul;
7.71 miles finishing;
63 cu. yds. cem. rubble masonry;
2,126 lin. ft. corr. metal pipe (in place);
(Maintenance of existing road, extra work, est. \$500);
7,200 cu. yds. misc. hauling borrow;
Plans obtainable from District Engineer, U. S. Bureau of Public Roads, 461 Market St., San Francisco.

TEHAMA CO., Cal.—Until May 15, 2 P. M., bids will be received by C. H. Sweetser, district engineer, U. S. Bureau of Public Roads, 461 Market St., San Francisco, to surface 7.52 miles of Sections C-3 and C-4 and portions of Sections C-1 and C-2 of Route No. 1, Loop Section, Lassen Volcanic National Park Highway, involving:
3,000 cu.yds. unclass. excavation (borrow and slide removal);
752 mi. fine grading subgrade and shoulders;
14,900 cu. yds. crushed rock surfacing;
1,750 cu. yds. supplemental crushed rock;
2,100 cu. yds. additional binder;
6,000 cu. yds. miscellaneous hauling binder;
900 M. gals. watering;
341 lin. ft. 6-in. vit. tile underdrain (in place).
Plans obtainable from District Engineer, U. S. Bureau of Public Roads, 461 Market St., San Francisco. years.

SACRAMENTO, Cal.—A. Telchert & Son, 1846 37th St., Sacramento, awarded contract by city council (2299) to improve alley bet. D and E Sts., 10th and 11th Sts., involving c. i. drains; vit. pipe sewers; 1-in. water main connections; grading; hyd. concrete pavement.

SAN JOSE, Santa Clara Co., Cal.—San Jose Paving Co., Dupont St., San Jose, awarded contract by city council (5056) to improve Taylor St., bet. 13th and 19th Sts., involving grading 1 1/2-in. asph. conc. surface, 3-in. asphalt concrete base pavement; conc. curb, walks; 4-in. vitrified pipe house lateral sewers; cem. conc. storm water inlets; 6-in. vit. pipe san. sewers.

SAN JOSE, Santa Clara Co., Cal.—A. J. Raisch, 46 Kearny St., San Francisco, submitted low bid to city council (5070) to improve Garland Avenue bet. Race and Keeble Aves., involving grading 1 1/2-in. asph. conc. surface on 2 1/2-in. asph. conc. base; cement concrete curbs, gutters, walks taken under advisement.

SAN JOSE, Santa Clara Co., Cal.—A. J. Raisch, 46 Kearny St., San Francisco, awarded contract by city council (5039) to improve Vendome Ave., bet. Hobson and Polhemus Sts., involving grading; 1 1/2-in. asph. conc. surface, 2 1/2-in. asph. conc. base pave.; cem. conc. curbs; walks; 4-in. vit. san. house lateral sewers.

SACRAMENTO, Cal.—A. Telchert & Son, 1846 37th St., Sacramento, awarded contract by city council (2300) to improve alley bet. C and D Sts., Alhambra Blvd. and 32nd St., involving c. l. drains; vit. sewers; cem. manholes; 1-in. water main connections; grading; hyd. conc. pavement.

SAN MATEO CO., Cal.—Until May 20, 10:30 A. M., bids will be received by R. J. Martin, secretary, Joint Highway District No. 9, Room 235 City Hall, San Francisco, to grade and construct concrete structures in San Mateo county on the San Pedro Mountain Unit between Rockaway Beach and Parallone City, Section A, approximately 2.78 miles in length; and Section B approximately 1.86 miles in length. Certified check 10% payable to Secretary of Joint Highway District No. 9, State of California, required with bid. Plans obtainable from City Engineer, Room 385 City Hall, San Francisco and from George A. Kneese, county surveyor, Courthouse, Redwood City.

VALLEJO, Solano Co., Cal.—Louis Tagnon, Vallejo, awarded contract by city council (170) to improve Kessel alley, bet. Butte and Branciforte Sts., involving 236 cu. yds. grading (excavation), \$35 cu. yd.; 800 lin. ft. r.w. curbs, \$33 lin. ft.; 6,400 sq. ft. conc. pave., \$20 sq. ft.

SAN RAFAEL, Marin Co., Calif.—City council declares intention (496) to improve Sixth St. bet. Cottage Ave. and E St., involving:
13,552 sq. ft. 4-in. stone sub-base;
13,552 sq. ft. 4-in. asph. conc. pave.;
1,212 lin. ft. 3x6-in. redwood header board;
52 lin. ft. conc. curb and gutter;
2 catchbasins.
1911 Act. Bond Act 1915. Hearing May 8. Eugene W. Smith, city clerk. H. K. Brainerd, city manager.

SAN RAFAEL, Marin Co., Calif.—City council declares intention (493) to improve G and Ida Sts., and one unnamed street, involving:
1,812 cu. yds. excavation;
31,774 sq. ft. 5-in. asph. conc. pave.;
6,034 sq. ft. 4-in. do;
22,080 sq. ft. 3-in. do;
40 tons 2-in. do;
17 tons conform do;
59,883 sq. ft. 4-in. stone sub-base;
3,222 lin. ft. conc. gutter;
45 lin. ft. 3x6-in. r.w. header;
96 lin. ft. 4-in. I. S. P. sewers;
4 catchbasins
43 lin. ft. 10-in. corr. iron pipe;
30 cu. yds. conc. (shallow sewer protection);
430-in. corr. arch and conc. culvert (38 lin. ft. complete;
50 lin. ft. using existing metal)

1911 Act. Bond Act 1915. Hearing May 8. Eugene W. Smith, city clerk. H. K. Brainerd, city manager.

HUMBOLDT COUNTY, Cal.—As previously reported, bids will be received May 21 by State Highway Commission to grade 2.6 miles and surface with river run gravel, 5.2 miles, between Loleta and 2 miles north of Beatrice. Project involves: 86,000 cu. yds. rdwy. excav. without class; 1,220,000 sta. yds. overhaul; 400 cu. yds. structure excavation; 20,500 cu. yds. river run gravel surfacing; 1320 M gals. water applied to surfacing; 15 cu. yds. class A Port. cement concrete (structures); 500 lbs. bar reinf. steel (structures); 66 lin. ft. 12-in., 362 lin. ft. 18-in., 53 lin. ft. 24-in., 78 lin. ft. 30-in., 53 lin. ft. 36-in. and 120 lin. ft. 48-in. corr metal pipe; 200 lin. ft. 8-in. perforated metal pipe underdrain; 4 catch. move and reset concrete headwalls; 234 stations finishing roadway; 20 monuments complete in place. State will furnish corrugated metal pipe.

SACRAMENTO, Cal.—A. Telchert & Son, 1846 37th St., Sacramento, at \$9,-

299 awarded contract by county supervisors for asphalt macadam pavement on Market avenue in Fourth Supervisory District.

SAN FRANCISCO—Bureau of Engineering, Department of Public Works, completes specifications to improve Olney Ave., between 3rd St. and San Bruno Ave., involving:
416 cu. yds. excavation;
335 cu. yd. embankment;
390 lin. ft. armored concrete curb;
75 lin. ft. 6-in. V. C. P. side sewer;
72 lin. ft. granite curb (to be reset);
32 lin. ft. granite curb (to be constructed);
2,340 sq. ft. 1-course conc. sidewalks;
6,840 sq. ft. 6-in. Class "E" conc. pavement;
326 sq. ft. 2-course conc. conform sidewalks;
150 sq. ft. asph. conc. conform pavement;
2 brick catchbasins (to be reset).
Estimated cost \$2350.

SAN FRANCISCO—Bureau of Engineering, Department of Public Works, 3rd Floor, City Hall, completes specifications to improve 25th St., bet. Fountain and Burnham Sts., involving:
100 cu. yds. excavation;
100 cu. yds. embankment;
594 lin. ft. armored concrete curbs;
105 lin. ft. 10-in. V. C. P. culverts;
32 lin. ft. 12-in. V. C. P. sewer;
340 lin. ft. 6-in. V. C. P. side sewers
3 brick catchbasins;
660 sq. ft. 1-course concrete sidewalk;

OFFICIAL PROPOSALS

STATE OF CALIFORNIA

DEPARTMENT OF PUBLIC WORKS

DIVISION OF HIGHWAYS

NOTICE TO CONTRACTORS

SEALED PROPOSALS will be received at the office of the State Highway Engineer, Public Works Building, Sacramento, California, until 2 o'clock P. M. on May 21, 1930, at which time they will be publicly opened and read, for construction in accordance with the specifications therefor, to which special reference is made, of

portions of State Highway, as follows:

Humboldt County, between Loeleta and two miles north of Beatrice (I-Hum-1-G), about five and two-tenths (5.2) miles in length, two and six-tenths (2.6) miles to be graded and five and two-tenths (5.2) miles to be surfaced with river run gravel.

San Joaquin County, a bridge across Mokelumne River near Lodi (N-S-J-4-C), consisting of three 54-foot reinforced concrete girder spans on concrete piers with pile foundations and thirty-five 19-foot timber approach spans with concrete deck on pile piers.

Proposal forms will be issued to only those Contractors who have furnished verified statement of experience and financial condition in accordance with the provisions of Chapter 644, Statutes 1929, and whose statements so furnished are satisfactory to the Department of Public Works. Bids will not be accepted from a Contractor to whom a proposal form has not been issued by the Department of Public Works.

Plans may be seen, and forms of proposal, bonds, contract and specifications may be obtained at the said office, and they may be seen at the offices of the District Engineers at Los Angeles and San Francisco, and at the office of the District Engineer of the district in which the work is situated. The District Engineers' offices are located at Eureka, Redding, Sacramento, San Francisco, San Luis Obispo, Los Angeles, San Bernardino and Bishop.

A representative from the district office will be available to accompany prospective bidders for an inspection of the work herein contemplated, and Contractors are urged to investigate the location, character and quantity of work to be done, with a representative of the Division of Highways. It is requested that arrangements for joint field inspection be made as far in advance as possible. Detailed information concerning the proposed

work may be obtained from the district office.

No bid will be received unless it is made on a blank form furnished by the State Highway Engineer. The special attention of prospective bidders is called to the "Proposal Requirements and Conditions" annexed to the blank form of proposal, for full directions as to bidding, etc.

The Department of Public Works reserves the right to reject any or all bids or to accept the bid deemed to be the best interests of the State.

DEPARTMENT OF PUBLIC WORKS
DIVISION OF HIGHWAYS

C. H. FURCELL,

State Highway Engineer.

Dated April 23, 1930.

(Apr. 23; May 5-12-19)

COMPETITION CUTTING PROFIT AT SEATTLE

According to word from Seattle building material men in general are not enthusiastic over conditions at present, but assert that improvement should be in evidence before the summer is over. Competition is one of the factors in cutting profits on the big jobs that are open.

Opinion as to the amount of residence building that will offer sales opportunities is divided, some declaring that this work will be limited and others that it is due for a gain. Improvement is noted over last year although it is stated this section will be better off than other cities on the Pacific coast, still no enthusiasm is noted among home builders. Dealer declare that building is behind a compared with last year with but few large projects to offer sales.

Ironworkers have been most in demand during the past week in the Seattle building trades field with carpenters and building laborers next on the list. Conditions are quiet in the plastering line and plumbing and steamfitting is not as active as was anticipated.

A "Pittsburg" Automatic Water Heater installed in the Home indicates high quality throughout.

Recommended and specified by all the leading architects, plumbers and builders.

Consider the high merit of the Pittsburg coupled with "Pittsburg Perfect Service."

"Hot water quick as a wink."

Pittsburg Water Heater Co.

Makers of "Pittsburg Automatic"—"Bungalow Automatic" Storage Systems and "Lyon" Tank Water Heaters.

LICENSE ORDINANCE PASSED BY S. F. SUPERVISORS

An ordinance imposing license taxes on contractors and sub-contractors has been passed to print by the San Francisco Board of Supervisors. The proposed ordinance amends Ordinance 5132, Section 32 and reads as follows:

Section 32. (a) Every person, firm or corporation engaged in the occupation of and doing business as a contractor, sub-contractor, or as a builder, or engaged in the construction or repair of any building, street, sidewalk, sewer, engineering structure, or any engineering operation, or advertising himself as engaged in or superintending building construction, sewer construction, plumbing construction, street construction, or general construction where the cost or value of the job or the bid tendered exceeds one thousand dollars, shall pay a license fee of twelve and fifty one-hundredths (12.50) dollars per quarter.

(b) Every person, firm or corporation so engaged or advertising himself as so engaged in any business or job described as above, where the value or cost of the job or bid tendered is less than one thousand dollars, shall pay a license fee of five (\$5) dollars per quarter.

(c) Every person, firm or corporation engaged in the business of sign or general painting (except automobile painters) shall pay a license fee of twelve and fifty one-hundredths (12.50) dollars per quarter.

(d) Master electricians and master fixture electricians, as described under the provisions of Section 49 of this ordinance, shall pay the license fee provided for in Section 49, and shall thereby be exempt from the license fees imposed in Section 32 of this ordinance.

Section 2. This Ordinance shall take effect immediately.

PARTITION HANDBOOK ISSUED BY METAL LATH INTERESTS

Associated Metal Lath Manufacturers, 1821 Engineering Bldg., Chicago, has issued the Partition Handbook prepared by Erwin M. Lurie, civil engineer, which comprises complete discussion of various types of partitions from many standpoints. This information covers the subjects of Space Saving, Sound Insulation, resistance to Impact, Vibration, etc. It contains probably the most complete exposition of Sound Insulation that has been condensed into so few words, and yet which is so comprehensive in its treatment.

A. G. C. SELECTS S. F. FOR 1931 CONVENTION

The Associated General Contractors of America have selected San Francisco for their 1931 convention. The choice was made by the national executive board of the association meeting in Washington, D. C. The delegates will meet in January and it is expected that the convention will bring to San Francisco 2000 leaders of the building construction and engineering industries from all parts of the country. The association has branches in 128 cities.

McMILLAN HEADS SANTA ANA BLDRS. EXCHANGE

Exchange Features Annual Golf Tournament and Awards Prizes

R. C. McMillan, general contractor, was installed president of the Orange County Builders' Exchange at the monthly meeting of that organization held at the Newport Harbor Yacht Club last Tuesday evening. Other officers installed were W. F. Sorensen, painting contractor, first vice-president; C. M. Gilbert, electrician, second vice-president, and Jules W. Markel, general contractor, treasurer.

New directors are W. J. Tway, H. O. Ehlen, W. J. Kelly, R. C. McMillan, V. O. Kisner, W. F. Sorensen, Allison Honer, A. L. Foster, C. M. Gilbert, Roy Cavett, Jules Markel, N. E. Lentz, A. F. Schmid, S. F. Sorensen and L. R. Wilson. These men represent eight basic branches of the industry and five communities outside the city of Santa Ana.

The exchange recently featured its first annual golf tournament at the Santa Ana Country Club, more than fifty members turning out for the event. Handicaps were arranged for all.

R. G. "Bod" Holden, representative for Victor Cement, was winner of the first prize, the Builders' Exchange silver cup for the best Low Net Score. L. H. Robinson, representing Fuller Company, won first prize for the best Low Gross Score. D. E. Liggett of the Liggett Lumber Company, carried off first prize in the Blind Boxey, and Allison Honer and R. F. Flippes were tied for first prize, Matched Play against Par.

A special prize was awarded President McMillan, the newly elected president of the exchange.

Norb Lentz was general chairman of the tournament, assisted by E. Steffensen, S. C. Russell, G. N. Robertson, C. M. Gilbert, Chas. F. Mitchell and R. C. McMillan.

Frank F. Goodman, electrical contractor, 350 Waller St., has been admitted to membership in the San Francisco Builders' Exchange.

OAKLAND BUILDING APRIL TOTALS \$942,224

A. S. Holmes, city building inspector of Oakland, reports the issuance of 380 building permits in April for improvements valued at \$942,224. The following is a segregated report of the Oakland activities for April, as compiled by Holmes:

SACRAMENTO TO BE HOST TO STATE PLUMBERS

Master Plumbers of California will journey to Sacramento next week for their twenty-ninth annual convention.

The sessions open Monday and will continue throughout Wednesday. Late Wednesday night, the plumbers will board two special trains for Lake Tahoe, returning to Sacramento Friday for the annual golf tournament.

All sessions are to be held in the Florentine Room of the Hotel Senator. J. B. Hawley will call the meeting to order, and there will be the introduction of the state president, Fred W. High of Fresno, and the local association president, D. H. McAlpine. Governor C. C. Young is expected to deliver an address of welcome to the visitors.

Several speakers are on the program, including Coleman Cox, the lecturer; Charles M. Swinnerton of Los Angeles, national director of master plumbers; and James Collins, state director of vocational and professional standards.

The keynote of the convention will be the ethics of the business and the advancement of sanitation with the introduction of the most advanced sanitary methods.

ADVANTAGES OF WELDED STEEL FLOOR CONSTRUCTION REVIEWED

Address of Lee H. Miller, Chief Engineer, American Institute of Steel Construction, before American Welding Society, April 24, 1930

It is probable that the most important single accomplishment of the human race has been the attainment of a temperature that would melt large steel ingots on an economically commercial basis. This was accomplished somewhere in the neighborhood of 1830 and since that time there has been a greater change in the economic, industrial and scientific phases of human endeavor than all the rest of history combined. In fact it can be safely stated that our progress has been inversely proportional to the cost per pound of steel.

Last June in addressing the graduating class of Western Reserve University the speaker stated that 90% of the human knowledge has been acquired in the last fifty years. Even if this statement were discounted 50% it is still startling. Since that time every phase of our existence has been completely revolutionized or is still passing through such a condition, and all of it can be traced to the basic influence of steel on all other interests.

During such a period of revolution it is natural that many false starts and experimental undertakings would come into existence, and be subjected to the conservative attitude of those who are more influenced by the traditions of the past than the expectations of the future.

The basic requirements of existence are food, housing, and clothes. In connection with the problem of housing, steel has in the last fifty years, in the United States, been instrumental in developing a genius for architecture that has resulted in the most remarkable type of building construction that the race has ever known. Even in the last five years it is easy to detect a transition in the nature of our skyscrapers and the introduction of architectural treatment that never existed before.

The sole purpose for constructing a building is to provide floors which can be protected from the weather by walls, windows and roof covering. The only reason for building a floor is to provide supports for a live load. The floor of a building may be the ground itself, but it is usually a more intimate part of the structure.

When the skyscraper came into existence it provided multiple tiers of floors, one above the other supported on a steel skeleton frame consisting of steel columns, girders and beams. At that time the skeleton frame provided sufficient tonnage to satisfy the productive capacity of the steel mills, and the problem of installing floors in the panels between the main girders was left to the architect and the engineer. Originally these floors were made of brick arches, later of flat tile arches, and still later of other types of material such as wood packed floors, reinforced concrete and gypsum.

At the inception of the multiple story building the art of welding as it now exists was unknown, but progress in this field has made it possible to develop a type of steel floor which will meet every requirement that floor construction is called upon to perform.

Probably no part of a building structure under present conditions has

been more unsatisfactorily developed than the floor panel construction, and yet it is the one reason for having a building. Present methods of construction involve the use of materials in the floor panels which constitute a dead load that generally weighs considerably more than the live load which is to be supported. This excessive weight of the floor panel must be carried into the skeleton frame, girders and columns, and ultimately to the foundation. It is therefore evident that one of the conditions which limits the height of multiple story buildings will be the capacity of the foundations to carry the dead load of the structure, which is greater than the calculated live load.

Reference to the column schedule of a multiple story building will show the column stresses for dead loads are approximately two-thirds the total stress, the other third being live load.

Engineering practice and code requirements recognize that the probability of the contemplated live loads being simultaneously applied to all floors of a building is very remote, and therefore it is permissible to assume a very substantial reduction in the specified live load for designing the lower story columns and foundations of tall buildings. This permissible reduction does not apply to the dead load which is, of course, always present.

By the use of steel plates and beams it is possible to develop a welded steel floor that will be better than any other floor that has been used before, and will stand every service to which the floor may be subjected. It will be a floor in which it is possible to determine in advance the stresses in all parts of a floor which will recover 100% of its deflection due to live loads when those loads are removed.

Usually the first objection that is made to this type of floor is that it has not been used before, and is therefore without precedent. This objection, however, is not true since steel plate floors have been used for the charging floors of open hearth furnaces and for the decks of battleships, which are subjected to the most severe service that is known.

Probably the other extreme of floor service is that connected with our ocean liners, which have the most palatial environment that can be devised. Here again the floors are of steel.

Connected with our steel manufacturing plants there are always large bins for storing the heavy materials used in the manufacture of steel. Engineers experienced in the construction of these bins, with horizontal bottoms, have used $\frac{5}{8}$ " plates for bin bottoms 18' square, and do not use stiffeners on the plates until the dimensions exceed 18'. Such bin bottoms are carrying loads often in excess of 2000# per square foot. These floors are, however, securely anchored against both horizontal and vertical deflections at their edges. While such floors would satisfactorily meet the requirements of strength for building construction, they are obviously too flexible to serve as anything except the bottoms of bins.

For building construction the floor can be made of small I beams 3", 4" or 5" in depth, spaced approximately 24" apart, and supporting steel plates which have their edges over the cen-

ter line of the beam. For anything except extremely heavy loads, $\frac{3}{16}$ " or $\frac{1}{4}$ " plates 24" wide are sufficient to meet building requirements.

Automatic welding equipment has been devised that will travel along the seam between the edges of the plates and weld them together and at the same time weld them to the top flange of the beam over the center line of the web. The result will be a built up T section with the plates acting as the upper flange and the beam acting as the vertical part of the T. The neutral axis of the T section will be close to the top flange of the beam, and when the flange of the beam is stressed to 18,000# per square inch the plates and top flange will have a stress of only 3000 to 4000 pounds per square inch. The weld being immediately over the center line of the beam, provides a connection that is at the theoretically most efficient position.

By using a 3" 5-7/10# I beam spaced 24" centers, and a $\frac{3}{16}$ " plate, such a floor construction will carry a total load of 190# per square foot, on a 10' span with a deflection of .104". The same floor will carry a total load of 85# per square foot on a 15' span with a deflection of .235".

The weight of the steel work including the beams and plates for this floor, will be 10½# per square foot.

By a proper variation in the size of the beam and the space between them, together with the thickness of the plates, it is possible to develop a floor to meet almost any condition of loading with a dead load saving of from 25% to 50% of present construction.

It is assumed that this combination construction will be made continuous over the tops of the supporting girders or by framing the small beams into the girders flush on the top and having the plates continuous.

Inasmuch as any interior floor panel of a building is completely surrounded by the other floor panels, it is obvious that the calculations for the stresses in such panels can be properly based on the fact that the ends are fixed.

By the use of the flame cutting torch or the electric arc it is possible, at a very low labor cost, to frame this floor system into irregular panels more efficiently than any other type of floor now used.

Another question that naturally arises is, what will be the strength and deflection of the plates between the supporting I beams to which they are welded, and which are for the purpose of this paper, assumed to be 24" apart.

A $\frac{1}{2}$ " plate will carry a uniformly distributed load of 562# and have a deflection of .089" between the small beams. These plates will carry a center concentrated load between the small beams of 750# per linear foot, with a deflection of .119". Under the same conditions the $\frac{3}{16}$ " plate will carry a uniform load of 316# per square foot, and a concentrated load of 422# per square foot. These loads are far in excess of what the T section will develop and indicate that

the floor construction is really safe in both directions.

One of the features connected with the construction of such a floor is the possibility of getting plates sufficiently flat and free from camber. If the welding is to be done by the carbon arc method it is, of course, necessary that the edges of the plates be as close in contact with each other as possible, and that the distance between the edges shall not be excessive. If, however, the welding is to be accomplished by the weld rod electric arc it is advantageous to have a space of approximately $\frac{1}{4}$ " between the edges of the plates where the head is deposited.

In the practical construction of some of the floors that have already been made it has been found that an excessively large weld rod requires the generation of a heat that tends to cause the plates and beams to warp out of shape, but this has been overcome by reducing the size of the weld wire.

So much progress has already been made in the art of arc welding that there should be no difficulty in developing automatic machinery to take care of this floor system. In fact different manufacturers of welding equipment have already put on the market automatic traveling equipment that will weld the seam at the rate of approximately 90' per hour, and at a cost estimated to be approximately 3¢ per linear foot. These welding costs, however, are dependent on the conditions connected with the operation itself.

In construction it will be found necessary to weld the bottom flange of the I beam to the shelf angle on the main girder in order to provide continuity or a fixed end bending moment.

The actual amount of welding necessary to develop the strength of the T section is only about 25% to 40% of the length of the seam, but it will undoubtedly be more economical and satisfactory to make the welding continuous rather than attempt to develop the strength with the minimum amount of welding.

The floor construction itself generates a solid steel deck which will act as a girder to prevent any twisting distortion to the building when subjected to wind or earthquake. It will enable the engineer to select that part of the structure which is to carry the wind stresses to the foundations, and be assured that the deck flooring will deliver the stresses to the most rigid part of the vertical frame. The floor construction can be carried out into the walls to provide spandrel construction to support the outside walls. It will provide a working floor for other trades and in many places eliminate the necessity of temporary planked floors.

It will, of course, be necessary to insure such floors when the combustible contents may generate a heat that will produce a temperature in the steel in excess of 1000° F. This fire protection can be taken care of either by metal lath and plaster, or by precast blocks of fireproofing inserted or suspended on the lower flange of the small beams. Either type can be erected after the welding is completed, and there will be provided openings for conduits which may be carried along the main girders and transversely under the steel plates between the small beams. On the other hand if it is advisable to do so, it will be possible to lay all of the conduits on the top of the steel plates, and have them covered with a light weight fill, which will

also act as a top fireproofing in case it should be required.

At the present time, however, the specifications written to regulate the testing of floor construction for fire do not contemplate a fire on the upper surface. It has been assumed in the past that the fill on the top of ordinary floor panels to cover conduits acts as fireproofing for the top flange of beams and girders. On the other hand if grate bars and furnace construction is a precedent it should be possible to have a very considerable fire on the top of the plates without the temperature becoming dangerous. This is due to the fact that all heat generated from combustion will rise, and all air necessary to feed combustion must come from the floor. The evidence that this condition actually exists in fire is borne out by a recent fire which occurred in a wood working factory for manufacturing automobile bodies. An extremely intense fire existed immediately surrounding the automobile chassis with its rubber tires, but neither of these were destroyed, and the floor above which was considered fireproofed was completely destroyed from the heat on the ceiling side.

It is possible to provide any form of treatment for the top surface of these steel plates, either mastic finish, linoleum, cork tile or other forms of covering. A manufacturer of cork tile has stated that they recently took a contract for covering approximately 40,000 square feet of floor in the Cleveland Terminal Tower Building, at a price of approximately 42¢ a square foot. Such floors can be laid with a mosaic pattern in various shades of brown, and eliminates the necessity of rugs, except as ornaments. The total cost of a floor constructed of 3" I beams and 2 1/8" plates covered with cork tile and fireproofed on the under side will be a little more than \$1.00 per square foot. It should be remembered in this connection that the cork tile floor eliminates the necessity of any other floor covering, which is always a part of the tenant's expense when using an ordinary masonry floor. The cost of a good Chenille rug is from \$1.25 to \$1.50 per square foot and the above referred to floor system will cost complete, less than the carpet, and eliminate its necessity.

Some of the large department stores of the country have found that the dusting which takes place in ordinary masonry floors has a very serious effect on their delicate fabrics, and in one instance a large department store has installed steel checker plate floors without any covering whatever, and these floors are accepted by the building department as fireproof.

The floor for the addition to the Library of Congress at Washington is designed of steel plates bolted to angles and channels with $\frac{1}{2}$ " of cork tile floor on its top surface. I have been advised that the floor will be installed by welding instead of bolting. Here is a structure requiring both quietness and fire resistance.

Several floor panels have already been constructed and the results confirm the theoretical analysis as to strength and deflection. In fact the deflections indicate that the floor is actually stronger than the theory would indicate, based upon bending moments in the material.

For bridge floor construction a combination of steel beams with steel plates can be assembled that ma-

terially reduce the dead load of the structure, and provides a lateral rigidity more satisfactory than any floor diagonals now used. Several draw bridge spans have already been designed with this type of construction, and they have resulted in not only reducing the dead load, but also the cost of the structure.

Used in connection with multiple story buildings the saving in dead load is sufficient to enable the engineer to add 25% or more floors to the structure without increasing the load on the foundations.

From the standpoint of the welding equipment manufacturers and engineers, this type of floor construction offers an excellent means of promoting the general introduction of the art of welding for construction purposes. Whether we recognize it or not, there has been a very definite antagonism on the part of many engineers against the use of welded connections, but this floor system uses welding only for the development of the secondary stresses in floor panels, and provides an outlet for welding equipment and application on a scale so much greater than exists in welding the primary members of the frame together, that it should be possible to use it as the basis to overcome the general prejudice that exists against this very valuable tool. The A. I. S. C. has prepared several pages of tabulated data showing the allowable loads and deflections for various spans of floors constructed on this basis, and this data is available for distribution on request.

ABANDON DAY LABOR FOR CONTRACT METHOD

Inauguration of a policy that "all buildings shall be let to contract and awarded to the lowest responsible bidder" has been announced by H. N. Bradley, president of the State Board of Control of West Virginia, according to the United States Daily.

This is a "departure in part from the former custom relating to certain buildings which were erected by the State," Mr. Bradley's statement pointed out.

James S. Lakin, former president and now a member of the board, said that the principal State buildings erected directly by the board's employees were the structures for the school for the blind at Romney, the Gore and Conley hospital buildings at Hopewell and the Rutherford sanitarium at Beckley.

For these latter buildings the control board hired the labor, purchased the material and completed the project. It is this practice that will be eliminated.

The smaller buildings also will be let to contract, even those costing as little as \$1000, Mr. Lakin said.

Mr. Bradley's statement called attention to the "tendency" in recent years for the government to engage in certain lines of business in competition with its citizens and termed such competition "unfair."

Mr. Bradley said that the board's experience is that the new policy is the most expedient and the most economical method to be pursued. "The board feels," he continued, "that an outstanding saving is effected in the manner of the having to purchase, when engaged in construction, steam shovels, concrete mixers and other machinery which ordinarily becomes a liability after the work on the particular building is completed."

TRADE NOTES

Union Lumber Co. of Fort Bragg plans to establish a branch yard at Willits, Mendocino County.

Sims Neon Company has leased space at 372 Adeline St., Berkeley, where Sims Signs will be turned out under the management of J. G. Sims.

Petroleum Heat & Power Company, San Francisco marker of oil burners, has opened a factory branch at 310 Broadway, Oakland, under A. H. Blackwell.

Hawley Bros., Inc., Seattle manufacturer of oil burners, has opened branch offices at Tacoma, Aberdeen, Bellingham, Olympia, Wash., and at Vancouver, B. C.

Santa Rosa Roofing Co., 585 Mendocino Ave., Santa Rosa, has been appointed sales representatives in Sonoma County for the John Lucas and Co., Inc., line of paint products.

E. E. Baker, formerly San Jose manager of the Peerless Pump Company, has been appointed branch manager of the Fresno branch, with headquarters at 1864 H St. Baker succeeds L. A. Harnish.

O. K. Webb and H. W. Fleming, operating an electrical business at 368 East Julian St., San Jose, announces dissolution of partnership. H. W. Fleming will continue the business at the same location under the same firm name.

Willits Lumber Co. of Willits, Calif., has been re-organized and incorporated as the Willits Lumber Co., Inc. Officers are Paul S. Foster, President; F. G. Phelps, vice-president and Joseph Sheehan, secretary. George Heyward will continue as manager.

Carl D. Shufelt, connected with the sales staff of E. K. Wood Lumber Co., has been appointed vice-gent snark of the Los Angeles District, Order of Hoo Hoo. He was formerly engaged in the lumber business at Salt Lake City, Utah, and was vice-gent snark in that district.

Shirley S. French for the past three years president of the Berger Mfg. Co., now a subsidiary of the Republic Steel Corp. and for the past 18 months vice president and treasurer of the Central Alloy Steel Corp., has resigned, effective May 1. Before assuming the presidency of the Berger Company at Canton, Ohio, Mr. French was for ten years vice president and general manager of the Fireproofing Co. at Youngstown, Ohio. Tom M. Girdler, chairman of the Republic Steel Corp., announced that the Berger Mfg. Co. will continue under the active leadership of Joseph B. Montgomery, as vice president and general manager; J. S. Sprott, general sales manager; George B. Harlan, secretary and treasurer; and Fred A. Schmitz, factory manager. The Berger Mfg. Co., now a subsidiary of the Republic Steel Corp., has been for the past 44 years manufacturer of fabricated steel products, specializing in the manufacture and distribution of steel office furniture, shelving, lockers, steel ceilings, metal lath and other building products.

WASHINGTON STATE LEADS PACIFIC COAST AREA IN BUILDING PERMITS FOR APRIL

All Pacific Coast States Report Decreases in April Building Activities as Compared With Those for Corresponding Period in 1929—

Washington State Leads With 10,001 Permits Having Valuation of \$24,558,542—California Ranks Second With 7,230 Permits for Improvements Valued at \$17,871,972

The following is a complete tabulation of building permits issued in Pacific Coast Cities, together with April, 1929, activities, as reported by building department executives:

CALIFORNIA

City	No.	April, 1930 Cost	April, 1929
Alameda	68	\$ 181,113	\$ 213,935
Alhambra	79	231,530	186,577
Bakersfield	63	140,588	125,853
Berkeley	156	304,352	398,543

THE OBSERVER

WHAT HE HEARS AND SEES ON HIS ROUNDS

A variant has been noted by government experts which makes it difficult to compare this year's building statistics with those of preceding years, writes Paul Wootton, Washington correspondent for Engineering News-Records. More building is obtained by the same outlay. The variant is not declining prices, but a reduction in stresses brought about by improved materials and a more accurate knowledge of the safety factor.

Building codes in many cities are being liberalized in view of increased engineering knowledge. In many sections the allowable unit stress for structural steel has been increased to 15,000 lb. Similar changes also are being permitted in lumber stresses. Requirements of other building materials are being liberalized. A survey of building codes that has been made by the Commerce Department discloses that many of these codes are outworn. It is significant, however, that a movement to bring the building codes up-to-date has been sweeping over the country. A recent check on the Commerce Department's survey showed that 200 cities are preparing to or already have amended their building codes.

President Hoover on May 2 requested Congress to make available immediately \$10,660,000 to begin construction of Boulder Canyon dam. The request was made in order to supply funds for the commencement of work on the main stream of the Colorado river at Black Canyon to create a storage reservoir and for a power plant and incidental structures.

Approximately \$634,785,690 will be spent in the United States in 1930 for heating and ventilating equipment for new buildings. A survey made by Heating and Ventilating, a trade paper, estimated that \$138,000,000 will be spent for the construction of houses costing up to \$20,000 each and that the heating equipment in these houses will cost \$12,958,448. For dwellings costing from \$20,000 to \$50,000, the estimated total expenditure will be \$135,000,000, of which \$16,283,232 will be for heating and \$2,713,872 for ventilating.

During the month of April, 1930, the Los Angeles city building department issued 2792 permits with an estimated valuation of \$7,026,972, as compared with 2940 permits with an estimated valuation of \$9,843,782 for the same month a year ago, and 2764 permits with an estimated valuation of \$7,045,931 for the month of March, 1930. Los Angeles' building total for the first four months of the current year was \$27,085,813 as compared with \$37,534,185 for the corresponding period last year.

According to Associated Press dispatches from Washington, an administration summary of the measures taken to expedite construction and relieve unemployment shows that the construction program has been increased virtually to \$125,000,000. Included in the efforts is an increase in road appropriation of \$50,000,000. It was pointed out also that inasmuch as similar expenditures by the States is necessary to make Federal aid available to them, the unemployment situation should be materially relieved from this one source.

Engineering News Record reports that April contracts let in the field to heavy construction and engineering throughout the Nation reached an aggregate of \$335,839,000, 14 per cent below the record March total, but 6 per cent above April, 1929. March contracts totaled \$391,833,000, while lettings in April a year ago were valued at \$316,209,000.

Letters are being mailed to property owners in Oakland who signed petitions for street improvements specifying patented paving and proceedings of which have been cancelled, to determine the opinion regarding plans to continue with the paving under open specifications, Walter N. Frickstad, city engineer, announces.

Structural steel workers in New York City need climb no more than fifteen floors to reach their work, according to a recent ruling by the Structural Steel Board of Trade. When transportation is not furnished to within fifteen stories of the derrick location, a charge will be made of one-half hour's climbing time per man. This ruling was adopted to lessen accidents caused by physical exhaustion.

Dominion Steel & Coal Corp., a new organization chartered in Nova Scotia, will take over the physical assets of the British Empire Steel Corp., the Dominion Steel Corp., Ltd., and the Dominion Iron & Steel Corp., Ltd. The consolidated company will have assets of more than \$50,000,000. Directors of all three companies concerned have approved the merger, which will be submitted to shareholders for their authorization.

Receipt of class 1 applications for registration as civil engineers in the state of California will close at midnight on June 20, 1930. Class 1 applicants are entitled to registration without examination, under the provisions of section 10, chapter 801, California Statutes of 1929. The only applications acceptable after that date are class 2 (reciprocal registration under section 11 of the Act), and class 3 (examination required). Engineers who have not already received application blanks should communicate with the Department of Professional and Vocational Standards, State Capitol, Sacramento, or Phelan Bldg., San Francisco. All engineers come within the provisions of the Act.

Following a symposium at which several prominent California architects discussed the modern movement in architecture, the premiere exhibition of contemporary creative architecture of California has closed at the University of California at Los Angeles. The exhibit was in display for ten days in the Art Department of the University. It was compiled by Miss Pauline Schindler in cooperation with the Western Association of Museum Directors, and will be shown in the principal cities of the Pacific coast and southern states.

Declaring that "form follows function" the architects adhering to the modern trend refuse to plaster any useless ornamentation upon a building. It was brought out in the symposium. Real beauty lies in practical ornamentation. It was declared. Architects whose work was included in the exhibit are Frank Lloyd Wright, Richard Neutra, R. M. Schindler, Jack D. Peters, John Weber, Kem Weber and J. R. Davidson.

HERE — THERE — EVERYWHERE

American Plan Open Shop Conference will be held at Duluth, Minn., June 4-5 and 6.

Regular monthly meeting of the Builders' Exchange of Contra Costa County will be held May 29, it is announced by W. A. Brown, secretary.

Buzzell Electric Works, specializing in motor installations and industrial wiring, 130 8th St., has been admitted to membership in the San Francisco Builders' Exchange.

National Acoustic Plaster Co., Ltd., J. Don Griggs and Aetna Casualty & Surety Company, have filed application for membership in the San Francisco Builders' Exchange, it is announced by R. J. H. Forbes, Secretary.

Plans for the Organization of a sewer district in a 32-square-mile area north of the city limits of Seattle, Wash., have been submitted to the county commissioners of Kings County. The plans, which involve the expenditure of several million dollars, will require a special election.

Lawrence O'Connor of San Francisco has been elected president of the Engineering Society of the University of Santa Clara. Other officers elected were: Donald Hall, vice-president; William Warren, secretary; Dino Ceccarello, treasurer; John Wallace, sergeant-at-arms; Shirley Arnold, librarian, and Charles Harvey, assistant librarian.

A resolution asking that the Contra Costa county board of supervisors appoint a county electrical inspector has been drawn up by the Contra Costa County Electrical Development league held in Crockett and will be presented to the supervisors at their next meeting scheduled for May 5. The resolution proposes that owners of the buildings inspected pay the inspector fees.

GRADE-CROSSING FATALITIES DROPPED IN 1929

Reports for the year 1929 filed by the railroads with the Interstate Commerce Commission reveal that, although both the number of accidents at highway grade crossings and the number of persons injured increased during the year 1929, the number of persons who lost their lives in such accidents was reduced 3.2 per cent compared with 1928. Detailed figures are: accidents, 5,975, compared with 5,800 during 1928; persons injured, 6,804 and 6,666; fatalities, 2,485 and 2,568.

TO DISINCORPORATE

The Sudden Lumber Co. of Redwood City seeks dissolution of corporation, according to a voluntary application filed before the San Mateo County Superior Court by its directors. The board of directors of the concern is composed of M. E. Sudden, E. R. Sudden, Albert A. Axelrod, H. W. Fennimore and H. R. Blair Jr. Philip S. Ehrlich of San Francisco represents the Sudden Lumber Company in its petition.

ALONG THE LINE

James H. Mitchell, architect, formerly associated with Willis Polk and Company, San Francisco architects, has opened his own offices at 369 Pine St., San Francisco, for the practice of architecture.

C. C. Van Valkenburgh, Jr., has been appointed city commissioner of public works at Fresno, succeeding Andrew M. Jensen, who resigned March 1, to enter private practice in San Francisco.

George H. Wilhelm has been officially installed commissioner of public works of Oakland, succeeding William H. Parker, resigned. Wilhelm is a graduate of the University of California and for twenty-five years was general manager and chief engineer of the East Bay Water Company.

Guy Hyde Chick, president of the City Improvement Company of Oakland, passed away at his Berkeley home, May 2. Mr. Chick was at one time superintendent of streets of Berkeley and former president of the Contra Costa Construction Company and the Contra Costa Building Materials Company.

A. M. Grindell, 65, died at his home in Rocklin, Placer County, May 1, following a long illness. Grindell was a granite quarry operator in Rocklin for years, having been the head of the California Granite Company. Later he operated quarries in Porterville. His widow, a son and three daughters survive.

Horatio C. (Racy) Cate, superintendent of the Pratt Rock, Sand & Gravel Company, of Sacramento, died in that city following an operation for appendicitis performed four weeks ago. Cate was 41 years old and went to Sacramento from Marysville twelve years ago. His widow and three children survive.

E. A. BAILEY, ENGINEER, GETS FEDERAL POSITION

E. A. Bailey, former flood control engineer for the State of California, and more recently engaged in private engineering practice at Sacramento, has received an appointment from the United States Government to supervise a project of flood protection in West Virginia.

Bailey's work will include bank protection and flood control on several tributaries of the Ohio River. He will be stationed at Huntington, W. Va.

With the acceptance of the federal position, Bailey has tendered his resignation as president of the Sacramento Chapter, American Association of Engineers, a post he has held during the past year.

Bailey was with the state flood control work for several years, leaving to engage in private endeavors about a year ago.

NEW PLANT PROPOSED

Le Tourneau Manufacturing Company, specializing in the manufacture of road building equipment, has started negotiations for the erection of a plant in North Wilson Way, Stockton, to replace the present quarters in Moss Street.

TRADE LITERATURE

Koppel Industrial Car & Equipment Co., Koppel, Pa., has issued bulletin 62 describing standard quarry cars, track and track equipment.

"Celite for Construction" has been issued in a revised and enlarged edition containing new material and photographs by the Johns-Manville Corp., New York City.

Dump carts, scrapers, rooters, sheep's-foot rollers, bulldozers and power units for their control are described in "A Small Book Featuring Some Big Machinery," issued by Le Tourneau Manufacturing Co., Stockton, Calif.

Over 40 different types of welding rods, for use in every phase of welding, are conveniently listed and described in a recent bulletin of the Fusion Welding Corp., Chicago, Ill. General information such as standard rod sizes and lengths, packing and other details is also covered.

Littleford Bros., Cincinnati, Ohio, have issued two 32-page booklets describing their products. One of these is a full-size catalog describing asphalt kettles, heaters and miscellaneous contractors' equipment, the other a pocket-size booklet in which the text is greatly condensed. Both publications are illustrated.

Neon lights for the protection of railway grade crossings are being introduced by International Equipments, Inc., New York City. Advantages of this type of signal and results of tests made on several Canadian installations are given in a 16-page illustrated bulletin recently issued.

Characteristics, advantages, methods of manufacture and tentative standard specifications for cast stone, a building stone molded from special prepared concrete in which the aggregate is selected for durability and appearance, are given in a 28-page booklet issued by the Cast Stone Institute, Chicago, Ill., which is profusely illustrated to show applications of the process.

MAHOGANY, CEDAR EXPORTS FROM BRITISH HONDURAS TO U. S. INCREASE

An increase of 4 1/2 per cent in the exports of mahogany and of 23 per cent in the exports of cedar to the United States from British Honduras in 1929, is reported by Consul G. R. Taggart, of Belize, to the Lumber Division, of the U. S. Department of Commerce. The exports of mahogany logs from British Honduras in 1929 totaled 12,157,000 board feet, valued at \$1,301,273 as compared with 11,253,000 board feet valued at \$1,245,503 in 1928. The value of cedar log exports from Honduras to the United States increased from \$40,766 in 1928 to \$50,530 in 1929. Cedar is logged in Honduras only in connection with mahogany cutting. Because of a reported demand in the United States for cedar for boat building, it is probable that more of this stock was cut and shipped in 1929 than in 1928.

Building News Section

APARTMENTS

Segregated Figures Being Taken.

APARTMENTS Cost, \$80,000
OAKLAND, Alameda Co., Cal. Park Blvd., near 8th Ave.
 Three-story and basement reinforced concrete apartments.
 Owner—Max Bakar, Title Insurance Bldg., Oakland.
 Architect—Clay N. Burrell, American Bank Bldg., Oakland.

Plans Being Prepared.

APARTMENTS Cost, \$75,000
STOCKTON, San Joaquin Co., Cal. American and Lindsay Streets.
 Three-story brick apartments (30 2 and 3-room apts.)
 Owner—Mrs. Francis Gardner.
 Architect—Ralph Morrell, Union Bldg., Stockton.

As soon as financing arrangements are completed project will go ahead.

Preliminary Plans Being Prepared.

APARTMENTS Cost, \$—
SAN FRANCISCO, 25th St. and Fair Oaks.

Six-story steel frame and concrete apartments (36 2- and 3-room apartments).

Owner—V. Guilmes, 1203 Guerrero St. Plans by owner.

Project is in a very preliminary stage. More definite information will be given in about 90 days.

Low Bidder.

APARTMENTS Cont. price, \$19,350

BRIDGES

VISALIA, Tulare Co., Cal.—E. M. Noble, Marysville, at \$8844.47 awarded contract by county supervisors to construct reinforced concrete bridge over Tule River (Bridge No 57), involving 558.61 cu. yds. class A concrete including excavation; 1024 lin. ft. concrete piles. Complete list of bids follows:

E. M. Noble.....	\$ 8,844
L. C. Clark, Visalia.....	9,795
G. A. Graham, Dinuba.....	10,858
R. Hodgson & Son, Porterville.....	11,301
Pacific Constr. Co., Oakland.....	11,767
H. C. Whitty, Sanger.....	13,220
M. B. McGowan, S. F.....	20,854

County will furnish rock, sand, cement and steel.

OAKLAND, Alameda Co., Cal.—Healy Tibbitts Construction Co., 84 Pine St., San Francisco, at \$38,725 awarded contract by county for repairs to Bay Farm Island Bridge, involving widening of eastern approach to span and replacement of piling and strengthening other portions of the structure. Following is a complete list of bids:

Healy-Tibbitts Const. Co.....	\$38,725
A. W. Kitchen, San Francisco.....	44,116
M. B. McGowan, San Francisco.....	44,988
Duncanson-Harrelson Co., S. F.....	50,954

HOLLISTER, San Benito Co., Cal.—County supervisors petitioned to construct bridge over Tres Pinos Creek below Tres Pinos on the old New Liria road. Estimates of cost will be prepared by the county surveyor.

MODOC COUNTY, Cal.—Smith Bros., Eureka, at \$13,875 awarded contract by State Highway Commission to construct two timber bridges, one across north fork of Pit River, about 2½ miles NW of Alturas, consisting of seven 19-ft. spans with concrete deck on pile bents and the other across Shields creek channel change, about 4 miles NE of Alturas, consisting of three 19-ft. spans with concrete deck on pile bents. Project involves: Furnish 3000 lin. ft. creosoted Douglas fir piles; drive 93 creosoted Douglas fir piles; 53 M. ft. b. m. creosoted Douglas fir timber, select struc. grade; 7 M. ft. b. m. untreated Douglas fir timber, select struc. grade; 87 cu. yds. class A Port. cem. conc. (pave.); 9500 lbs. reinf. steel; one lot miscellaneous items of work.

MODESTO, Stanislaus Co., Cal.—County Surveyor J. H. Hoskins, completes surveys for bridge over San Joaquin river at Patterson, will be 1312½ ft. long with main span of 200 ft. and will involve construction of approximately 2 miles of road and fill on one side.

MONTEREY COUNTY, Cal.—Until May 28, 2 P. M., bids will be received by State Highway Commission to construct bridge across Salinas river at Bradley, consisting of six 140-ft. steel deck truss spans with concrete deck on concrete piers with pile foundations and eighteen 45-ft. reinf.

forced concrete girder spans on concrete bents with pile foundations.

See call for bids under official proposal section in this issue.

SANTA ROSA, Sonoma Co., Calif.—Walter L. Proctor, Santa Rosa, awarded contract by county to construct 50-ft. timber bridge over Hobson Creek at Hacienda, Fifth Supervisorial District.

(a) 25 cu. yds. concrete; (b) 5,000 lbs. reinf. steel; (c) 47 cu. yds. excavation; (d) 20-3 M.B.M. lumber; (e) 2,000 lbs. struc. steel.

W. L. Proctor, Santa Rosa, (a) \$18; (b) 4½; (c) \$2.00; (d) \$72; (e) 8c.

Geo. French, Jr., Santa Rosa, (a) \$20; (b) 4c; (c) \$3.00; (d) \$98; (e) 10c.

R. Press Smith, Santa Rosa (a) \$20; (b) 5c; (c) \$2.00; (d) \$81; (e) 5c.

L. E. Kingsley, Villa Grande (a) \$25; (b) 3c; (c) \$3.00; (d) \$74.50; (e) 8c.

STOCKTON, San Joaquin Co., Cal.—Carl Nelson, 1421 E Channel St., Stockton, at \$6,340 awarded contract by county to construct pile trestle bridges across the Boulton (McDonald Island) Road and about five miles NW of Holt, over a drainage canal on the Atherton road on King Island about 1½ mile west of King Island Bridge and across drainage canal on Newell road and about ½ mile east of Terminus.

Following is a complete list of bids:

Carl Nelson, Stockton.....	\$6,340
J. E. Fitzsimmons, Lodi.....	6,595
A. Love, Stockton.....	6,856
M. A. Jenkins, Sacramento.....	7,253

LOS ANGELES, Cal.—Board of Public Works will ask bids shortly to construct 60 ft. concrete bridge across Los Angeles river at Olive St. near Dark Canyon; estimated cost \$130,000.

LOS ANGELES, Cal.—Fisher, Ross, McDonald and Kahn, Spring Arcade Building, Los Angeles, at \$1,246,635, awarded contract by Board of Public Works to construct Fourth St. viaduct over the Los Angeles river and the tracks of the Santa Fe and Union Pacific Railways; will be reinforced concrete, consisting of single arch 251 ft. in length over the river and girder and arch approaches, a total length of 2,400 lin. ft. with a 600 ft. ramp to Mateo St.; 71 ft. wide over all with two 5 ft. sidewalks and a 56 ft. rdwy.

SAN BERNARDINO COUNTY, Cal.—J. F. Knapp, 5301 Horton St., Oakland, at \$118,460.50 awarded contract by State Highway Commission to construct a bridge over the Mojave river 3 miles north of Victorville, consisting of one 270-ft. through steel truss span, five 51-ft. concrete girder spans and one 48-ft. concrete girder span on concrete piers and bents, involving: 5900 cu. yds. rdwy. excav.; 50,000 sta. yds. overhaul; 148 lin. ft. 36-in. corrugated metal pipe; 350 lin. ft. laminated timber guard rail; 294 mi. oil detour; 1 existing bridge to be removed; 1400 cu. yds. struc. excav.; 1430 cu. yds. class A, 400 cu. yds. class B and 265 cu. yds. class C Port. cem. conc.; 260,000 lbs. reinf. steel; 750,000 lbs. struc. steel; 12,900 lbs. cast steel; 6220 lbs. bronze expansion plates; 19,200 lbs. cast iron in railing; 62,000 lbs. struc. steel in railing; 870 cu. yds. riprap; 1 lot, miscellaneous items of work. State will furnish corr. metal pipe.

DREDGING, HARBOR WORKS & EXCAVATIONS

LOS ANGELES, Cal.—Until 2 P. M., May 19, bids will be received by county supervisors for Guniting levees on San Gabriel Wash from Centre St. in Artesia to Norwalk-Clearwater Road, involving: 340,000 sq. ft. Gunite clock slab; 215,000 sq. ft. Gunite clock toe mat. E. C. Eaton, 202 N Broadway, is chief engineer Los Angeles county flood control department.

HAWTHORNE, Nev.—See "Government Work and Supplies," this issue. Bids wanted for gate house, fences, gates, bath houses, bunkwater, etc., in connection with Naval Ammunition Depot project.

LOS ANGELES, Cal.—Hauser Construction Co., Securities Bldg., Los Angeles, at \$117,500 submitted low bid to county supervisors to lay railroad track and furnish and place rock rip-rap on levees of Los Angeles river north and south of Long Beach Blvd. involving: (a) 7,600 ft. r.r. work, \$4.00; (b) 42,000 tons rock rip-rap on west levee facing, \$1.80; (c) 23,000 tons rock rip-rap on east levee facing, \$1.70. Standard Dredging Co. only other bidder at (a) \$3.00; (b) \$2.57; (c) \$2.45½.

SACRAMENTO COUNTY, Calif.—Until June 5, 2 P. M., bids will be received by State Department of Public Works, Division of Water Resources, State Office Bldg., Sacramento, to construct bank protection works on the left bank of the Sacramento river, one mile below Iseleton, consisting of approximately 8,000 cu. yds. of sand fill and 21,000 sq. ft. of 4-in. conc. pave. Plans obtainable from above office.

See call for bids under official proposal section in this issue.

MENDOCINO COUNTY, Cal.—Until June 5, 2 P. M., bids will be received by State Department of Public Works, Division of Water Resources, State Office Bldg. Sacramento to construct rock jetty or dyke 170 ft. long and containing approximately 2,000 cu. yds. of quarry rock, at the mouth of the Navarro river, 20 miles south of Fort Bragg. Specifications obtainable from above.

See call for bids under official proposal section in this issue.

IRRIGATION PROJECTS

TURLOCK, Stanislaus Co., Cal.—Until May 26, 2 P. M., bids will be received by Anna M. Sorensen, secretary, Turlock Irrigation District, for construction in Improvement District No. 31, involving:

SCHEDULE NO. 1

Sec. No. 1, approx. 6467.6 sq. ft. of 2-in. thick concrete canal lining.

SCHEDULE NO. 2

Approx. 3 concrete structures, a total of 4 cubic yards of concrete. Certified check 5% payable to district required with bid. Plans obtainable from secretary.

COLUSA-GLENN COUNTIES, Cal.—Following bids received May 5 by C. H. Whitmore, district engineer, State Highway Commission, to construct drainage ditch between Hunter's

Creek and one-half mi. north of Glenn-Colusa boundary:
 Lilly, Willard and Blassotti,
 Stockton\$6,421.50
 M. J. Treaster, Sacramento..... 6,666.25
 Freeman & Murch, Willows..... 6,906.50
 J. P. Holland, Inc., S. F. 7,703.75
 J. R. Reeves, Sacramento..... 8,004.50
 Hemstreet & Bell, Marysville..... 8,091.75
 Mathews Const. Co., Sacto..... 8,115.00
 Frederickson & Watson Const.
 Con., Oakland 9,379.50
 Award recommended to low bidder.

CALIFORNIA.—Following permits were granted during the month of April by the State Department of Public Works, Division of Water Rights, Sacramento, to appropriate water:

Permit 3458, App. 5304 (Orange Co.), issued to San Juan Water Co., Los Angeles, for 2,000 ac. ft. per annum from San Juan Creek, for domestic purposes.

Per. 3459, App. 6544 (Mendocino Co.) Robert B. Pinn, Mill Valley, for .025 c.f.s. from unnamed creek tributary to S Eel river, for domestic purposes. Est. cost, \$450.

Per. 3460, App. 6041 (Mariposa Co.), Wm. Winsell, Nipinnawase, for 500 gals. per day from Chowchilla creek, for domestic purposes. Est. cost \$1200.

Per. 3461, App. 6139 (Mariposa Co.), Chris W and Ebba W. Jeppeson, Romona, for .0031 c.f.s. from Chowchilla creek, for domestic purposes. Est. cost \$1200.

Per. 3462, App. 6563 (Sierra Co.), United States Tahoe National Forest, Nevada City, for .04 cu. ft. per second from unnamed spring, for domestic and recreational purposes. Est. cost \$100.

Per. 3463, App. 6324 (Lassen Co.), Lester F. Totten, Biber, for 2 acre feet per annum from unnamed stream, for stock watering. Est. cost \$350.

Per. 3464, App. 6532 (Inyo Co.) H. M. White, Independence, for .002 c.f.s. from small unnamed spring, for mining and domestic purposes. Est. cost \$50.

Per. 3465, App. 6543 (Yuba Co.) W. J. Stanford, Wheatland, for .67 c.f.s. from Dry Creek, for irrigation and domestic purposes on 100 acres. Est. cost \$3500.

Per. 3466, App. 6548 (Los Angeles Co.), Isaac Wiskerson, Palmdale, for .025 c.f.s. from Granite Springs, for irrigation and domestic purposes on two acres. Est. cost \$400.

Per. 3467, App. 6433 (Sierra Co.), J. B. Harris, Downieville, for .125 c.f.s. from two unnamed springs, for power purposes. Est. cost, \$500.

Per. 3468, App. 6562 (Glenn Co.) W. F. Linton, Orland, for .81 c.f.s. from unnamed stream, for irrigation and domestic purposes on 5 acres. Est. cost \$400.

Per. 3469, App. 6149 (Trinity Co.), C. M. Salyer, Salyer, for 80 c.f.s. from Cedar Flat Creek, for mining purposes.

CALIFORNIA.—Following applications filed during the month of April with the State Department of Public Works, Division of Water Resources, Sacramento, for permits to appropriate water:

Application 6615 (Mendocino County) Hooper Bros., Valley Oaks Ranch, Ukiah, for 1.5 c. f. s. 10 ac. ft. from Unnamed Winter Drainage Creek, tributary to East Br. of Russian River, for irrigation purposes. Estimated cost \$1000.

App. 6616 (Lake-Napa-Yolo and Solano Counties) Karl Brehme of 1201 Hobart Bldg., San Francisco, for 200 c. f. s. and 100,000 ac. ft. from Putah, Pope, Capet, Eticura Creeks tributary to Sacramento River, for industrial and domestic purposes. Estimated cost \$3,900,000.

App. 6617 (Contra Costa County) John Fleuti, Moraga, for 0.016 c. f. s.

from (1) Grizzly Creek, (2) Unnamed Spring, tributary to Walnut Creek for domestic purposes. Estimated cost, \$1000.

App. 6618 (San Bernardino Co.) Los Angeles Council of Camp Fire Girls, 1107 Security Bldg., Los Angeles, for 1/32 c. f. s. from Santa Ana River, for recreational purposes. Estimated cost \$1000.

App. 6619 (Siskiyou Co.) John A. Foss, Hamburg, for 2 c. f. s. from Caroline Creek tributary to Klamath River for irrigation purposes.

App. 6620 (Yuba Co.) David N. Jones, % Steel & Lingenfelter, Marysville, for 1/2 c. f. s. from Dry Creek tributary to Bear River for irrigation and domestic purposes, (50 acres). Estimated cost \$1000

App. 6621 (El Dorado Co.) Spicky Polish Corp., 1401 3rd St., San Francisco, for 1 c. f. s. from White Rock tributary to South Fork American River for industrial purposes.

App. 6622 (Los Angeles Co.) Cienega Springs Water Co., % R. B. Bidwell, Glendora, for .025 c. f. s. from Tunnel to Spring, tributary to Big Dalton-San Gabriel Watershed for domestic purposes.

App. 6623 (San Joaquin Co.) L. F. Grimsley, Est. Joseph Geiger, deceased, P. E. Holt & Anderson Orchard Co., a Calif. Corp., % Neumiller & Ditz, 605 Bank of Italy Bldg., Stockton, for 2.56 c. f. s. from Calaveras River tributary to San Joaquin River for irrigation purposes (204.69 acres)

App. 6624 (San Joaquin Co.) Raymond T. McGurk & C. H. McGurk, % Neumiller & Ditz, Bank of Italy Bldg. Stockton, for 2.31 c. f. s. from Calaveras River tributary to San Joaquin River for irrigation purposes. (233 acres).

App. 6625 (Los Angeles Co.) Geo. H. Lettau, 305 Security Bldg., Los Angeles, for 0.29 c. f. s. from 7 springs at head of Mint Canyon, tributary to Santa Clara River watershed for irrigation and domestic purposes (230 acres).

App. 6626 (El Dorado Co.) United States, El Dorado National Forest of Placerville for .0019 c. f. s. from Hemlock Creek, tributary to Upper Echo Lake for domestic purposes. Estimated cost \$250.

App. 6627 (El Dorado Co.) United States, El Dorado National Forest of Placerville for .0015 c. f. s. from Hemlock Creek, tributary to Upper Echo Lake for domestic purposes. Estimated cost \$200.

App. 6628 (Trinity Co.) J. O. Gillice of Weaverville for (a) 50 c. f. s. (b) 100 c. f. s. from (a) Cedar Creek (b) Horst Linto Creek, tributary to Trinity River for mining purposes. Estimated cost \$150,000.

App. 6629 (Riverside Co.) O. J. McMahon, % Frazier M. Sallee, San Jacinto, for 0.12 c. f. s. from Unnamed stream for irrigation and domestic purposes. (10 acres to be irrigated). Estimated cost \$2000.

App. 6630 (San Joaquin Co.) City of Stockton for 200 c. f. s. and 65,500 ac. ft. per annum, from Calaveras River tributary to San Joaquin River for power purposes. 2550 H.P.

App. 6631 (San Joaquin Co.) City of Stockton for 50 c. f. s. and 90,000 ac. ft. per annum, from Calaveras River tributary to San Joaquin River for municipal purposes. Estimated cost, \$1,500,000.

App. 6632 (Tulare Co.) C. W. Gray, Hollywood, for .0012 c. f. s. from Asoqui Creek tributary to East Fork Kaweah, River for domestic purposes. Estimated cost \$350.

App. 6633 (Riverside Co.) W. R. Peeler, 1701 S. Grand Ave., Los An-

geles, for .0025 c. f. s. from Spring, tributary to Lake Elsinore, for domestic purposes. Estimated cost \$500

App. 6634 (El Dorado Co.) Wm. B. Parker of Placerville, for 0.27 c. f. s. from Emigrant Ravine Creek, tributary to Hangtown, R. Webber Creek, South Fork American River, for irrigation purposes. (22 acres). Est. cost, \$50.

App. 6635 (Siskiyou Co.) Buzzard Hill Mine, Inc., % L. J. Rowland, Manager, Happy Camp, Calif., for 12.5 c. f. s. from Independence, tributary to Klamath River, for power and domestic purposes. Est. cost, \$10,000.

App. 6636 (Siskiyou Co.) Buzzard Hill Mine, Inc., % L. J. Rowland, Mgr. Happy Camp, Calif., for 0.05 c. f. s. from Independence Creek, tributary to Klamath River, for irrigation and domestic purposes. Est. cost, \$2000.

App. 6637 (Siskiyou Co.) Buzzard Hill Mine, Inc., % L. J. Rowland, Mgr. Happy Camp, Calif., for 0.25 c. f. s. from Independence Creek, tributary to Klamath River, for mining purposes. Est. cost, \$10,000.

App. 6638 (Modoc Co.) John Miller of Lake City, Calif., for 1.65 c. f. s. from Mill Creek tributary to Upper Lake, for irrigation and domestic purposes (112.2 acres).

App. 6639 (Modoc Co.) W. J. Hays, Mrs. Nannie Daniels, G. M. Warrens and Mrs. C. H. Darst of Lake City, Calif., for 3 c. f. s. from Mill Creek, tributary to Upper Lake, for irrigation and domestic purposes (252 ac.)

App. 6640 (Modoc Co.) Simon Bennett, Cedarville, Calif., for 1.35 c. f. s. from Mill Creek, tributary to Upper Lake, for irrigation and domestic purposes (160 acres).

App. 6641 (Modoc Co.) Grover Wimer, Lake City, Calif., for 1 c. f. s. from Mill Creek, tributary to Dry Alakl Lakes, for irrigation purposes (15 acres). Est. cost, \$100.

App. 6642 (Mendocino Co.) Murphy & Yarbrough, % H. S. Stocker, Ukiah, for 1 c. f. s. from Forsythe Creek, tributary to Russian River, for irrigation and domestic purposes (121.2 acres). Estimated cost \$800.

App. 6643 (Butte Co.) H. D. March, Chico, for .5 c. f. s. from Spring, tributary to Little Butte Creek, for power purposes. Est. cost \$2000.

App. 6644 (Butte Co.) H. D. March, Chico, for .5 c. f. s. from Spring tributary to Little Butte Creek, for irrigation and domestic purposes (70 A). Est. cost \$2000.

App. 6645 (Lake Co.) Martin Judge Jr. & Co., Crocker First Natl. Bank Bldg., San Francisco, for 250 c. f. s. and 175,000 ac. ft. per annum, from North Fork of Cache Creek, tributary to Cache Creek, for industrial and domestic purposes. Est. cost, \$3,000,000.

App. 6646 (Lake County) Martin Judge Jr. & Co., Crocker 1st Natl. Bank Bldg., for 175,000 ac. ft. per annum, from North Fork of Cache Creek, tributary to Cache Creek, for irrigation purposes (50,000 acres). Estimated cost, \$1,000,000.

App. 6647 (Siskiyou Co.) Buzzard Hill Mine, Inc., % L. J. Rowland, Mgr. Happy Camp, for 2.75 c. f. s. from Buzzard Creek, tributary to Klamath River, for power purposes (68.7 H.P.) Est. cost, \$2000.

App. 6648 (Siskiyou Co.) Buzzard Hill Mine, Inc., % L. J. Rowland, Mgr., Happy Camp, for .35 c. f. s. from Buzzard Creek, tributary to Klamath River, for mining and domestic purposes. Estimated cost \$2000.

App. 6649 (San Diego Co.) Southern California Water Supply Co., % F. M. Faude, Vice President, Loveland En-

gineers, Inc., 1010 Bank of Italy Bldg., San Francisco, for 18.6 c. f. s. and 40,000 ac. ft. per annum, from Sweetwater River, tributary to San Diego Bay, for irrigation and domestic purposes (5000 acres). Est. cost, \$1,500,000.

App. 6650 (El Dorado Co.) Florence D. Smith, 219 Kentucky St., Petaluma, for .001 c. f. s. from Winifred Spring, tributary to Fallen Leaf Lake, for domestic purposes. Est. cost \$125.

App. 6651 (Ventura Co.) Chester F. Robbins, 468 E. Main St., Ventura, for 1.00 c. f. s. from Middle Fork of Lockwood Creek, tributary to Lockwood Creek, Piru Creek, for irrigation and domestic purposes (80 acres) Est. cost, \$200.

App. 6652 (Placer Co.) Bear River Water & Power, Co., % J. L. Rollins, Mer., Colfax, Calif., 111,020 c. ft. per annum, from Bear River, tributary to Feather River, for power purposes—4250 H.P. Est. cost, \$2,500,000.

App. 6653 (Santa Clara Co.) Mrs. A. F. Cochrane, % Louis O'Neal, 1st Nat'l Bank Bldg., San Jose, for 0.64 c. f. s. from Coyote River, tributary to San Francisco Bay, for irrigation purposes. (51 acres).

App. 6654 (Santa Clara Co.) Mrs. A. F. Cochrane, for 0.025 c. f. s. from Coyote River, tributary to San Francisco Bay, for domestic purposes. Est. cost \$250.

App. 6655 (Santa Clara Co.) Mrs. A. F. Cochrane, for 0.22 c. f. s. from Coyote River, tributary to San Francisco Bay, for irrigation purposes. (18 acres). Est. cost \$1500.

App. 6656 (Santa Clara Co.) Mrs. A. F. Cochrane, for 0.12 c. f. s. from Coyote River, tributary to San Francisco Bay, for irrigation purposes (9½ acres).

App. 6657 (San Luis Obispo Co.) Dr. O. M. Pollin, % J. D. McGregor, Gibson-Drexler Bldg., San Luis Obispo, for 1.78 c. f. s. from well, tributary to San Luis Obispo Creek, for irrigation purposes (131 acres). Est. cost, \$20,000.

App. 6658 (Los Angeles Co.) W. H. Cruzan, Rt. 1, Box 110, Saugus, for .5 c. f. s. from 3 springs, tributary to Mint Canyon, Santa Clara River, for mining purposes. Est. cost \$26,000.

App. 6659 (El Dorado Co.) U. S. El Dorado National Forest, % Edwin F. Smith, Supervisor, Placerville, for .0027—or approx. 1800 gals. per day, from unnamed stream, tributary to Upper-Echo Lake, for domestic purposes. Est. cost, \$150.

App. 6660 (Butte Co.) A. H. Dakin, Magalia, for 40 c. f. s. from Empire Creek, tributary to W branch of N Fork of Feather River, for mining purposes. Est. cost \$300.

App. 6661 (Riverside Co.) J. O. Blackburn, Hemet, for 3000 gallons per day from Bee Canyon Spring, tributary to San Jacinto River, for irrigation purposes. Est. cost \$3000.

App. 6662 (Riverside Co.) Lucile Mann Morris, Keen Camp, Calif., for 8 miner's inches, or .2 c. f. s. from spring, tributary to San Jacinto River, for irrigation purposes. (20 acres). Est. cost \$1100.

App. 6663 (San Bernardino Co.) Otto E. Kanka, Lucerne Valley, Calif., for 20 miner's inches, or 5 c. f. s. from unnamed spring, tributary to Mojave Desert, for irrigation and domestic purposes. Est. cost, \$3000.

App. 6664 (Sutter Co.) James R. Young, Cranmore, Calif., for 1.94 c. f. s. from Sacramento River, tributary to Suisun Bay, for irrigation purposes. (154.97 acres. Est. cost, \$5000.

STREET LIGHTING SYSTEMS

OAKLAND, Cal.—Until May 15, 12 noon, bids will be received by Frank C. Merritt, city clerk, to install ornamental duplex (15) lighting standards together with underground system in 17th St. bet. San Pablo Ave. and Harrison St., and in portions of San Pablo Ave. and Franklin St. adjacent to 17th St. 1911 Act. Certified check 10%, payable to city required with bid. Plans on file in office of clerk.

FRESNO, Fresno Co., Cal.—Robinson Electric Co., 141 College Ave., Fresno, at \$23,073 awarded contract by city council (101-2) to install lighting system in Stanislaus St. bet. M., bids will be received by State Department of Public Works, Division of Water Resources, State Office Bldg., Sacramento, to construct bank protection works on the left bank of the Sacramento river, one mile below Isleton, consisting of approximately 8,000 cu. yds. of sand fill and 21,000 sq. ft. of 4-in. conc. pave. Plans obtainable from above office.

See call for bids under official proposal section in this issue.

SAN FRANCISCO.—Louis Johnson at \$5,140 submitted low bid to Board of Public Works for grading Phelps St. bet. Jerrold and Evans Avenues, including crossings.

STARRETT BROS. ANNOUNCE FIRM NAME CHANGE

In recognition of Andrew J. Eken's contribution to the building industry, the directors of The Starrett Corporation have authorized that the name of its wholly-owned subsidiary, Starrett Brothers, Inc., be changed to Starrett Brothers and Eken, Inc. The change will take effect at once.

Mr. Eken was associated with Paul Starrett and Colonel William A. Starrett in the formation of Starrett Brothers in 1922 and has since been its Vice President. The concern has erected a number of the most important structures in New York and vicinity to which Mr. Eken has given close personal attention.

He is credited with many innovations in the building industry, his most recent achievement being in connection with the erection of the new 70-story Bank of Manhattan Company building at 40 Wall Street. Under his immediate direction and using building methods largely original with him, the new structure was completed in less than a year after the work of demolition was started upon the old buildings covering the site. This operation broke all records for new building operations and incidentally through its time-saving feature, saved the owners over a million dollars in interest charges and rent.

Starting as a sixteen year old office boy with an architectural firm in Newport News, Va., Mr. Eken in the thirty-two years intervening, has had a varied experience in the building industry in the United States, Canada and Japan. For eleven years previous to joining Starrett Brothers he occupied various important executive positions with the George A. Fuller Company.

POTTERY FIRM INCORPORATES

Naming Warren D. Coleman and Walter Banner of Albany and Leslie Price, Berkeley attorneys, as directors, Western Potteries, Ltd., has filed articles of incorporation with Secretary of State Frank C. Jordan in Sacramento, according to dispatches. The corporation is a reorganization of Pottery, Inc., and will use its plant at 136 Kearney St., El Cerrito, for manufacture of porcelain products, according to Price. The firm specializes in the manufacture of bathroom fixtures and other colored porcelain products. The concern is capitalized at 500 shares with no par value, according to information from Sacramento. It will be a closed corporation and no stock will be on public sale, Price said.

A "Pittsburg" Automatic Water Heater installed in the Home indicates high quality throughout.

Recommended and specified by all the leading architects, plumbers and builders.

Consider the high merit of the Pittsburg coupled with "Pittsburg Perfect Service."

"Hot water quick as a wink."

Pittsburg Water Heater Co.

Makers of "Pittsburg Automatic"—"Bungalow Automatic" Storage Systems and "Lyon" Tank Water Heaters.

309 13th Street, Oakland 478 Sutter St., San Francisco

OFFICIAL PROPOSALS

STATE OF CALIFORNIA

DEPARTMENT OF PUBLIC WORKS

DIVISION OF HIGHWAYS

NOTICE TO CONTRACTORS

SEALED PROPOSALS will be received at the office of the State Highway Engineer, Public Works Building, Sacramento, California, until 2 o'clock P. M. on May 28, 1930, at which time they will be publicly opened and read, for construction in accordance with the specifications therefor, to which special reference is made, of projects of State Highway, as follows: Lassen and Modoc Counties, between Hillside and Alturas (11-Las, Mod-28-A,B), about fifty-seven and two-tenths (57.2) miles in length heavy fuel oil to be furnished and applied as dust layer.

Shasta County, between Tower House and Greenhorn (11-Sha-20-A), about five and two-tenths (5.2) miles in length; between Ashers and Montgomery Creek (11-Sha-28-B), about twelve and three-tenths (12.3) miles in length; between Haynes Ranch and Fall River (11-Sha-28-D), about twenty-four and one-tenth (24.1) miles in length; Trinity County, between Grass Valley Creek and Westerville, (11-Tri-20-A,B), about seventeen and one-tenth (17.1) miles in

length; a total of about fifty-eight and seven-tenths (58.7) miles in length, heavy fuel oil to be furnished and applied to the roadbed.

Monterey County, a bridge across Salinas River at Bradley (V-Mon-2-b), consisting of six 140-foot steel deck truss spans, with concrete deck, on concrete piers with pile foundations and eighteen 45-foot reinforced concrete girder spans on concrete bents with pile foundations.

Riverside County, between White-water River Bridge and Indio (VII-Riv-26-D,E), about twenty-nine (29) miles in length, heavy fuel oil to be furnished and applied to the shoulders.

San Bernardino County, between Cronese and the easterly boundary (VIII-SBD-31-J,K,L,M,N and P) about seventy-one and eight-tenths (71.8) miles in length, heavy fuel oil to be furnished and applied as dust layer.

San Joaquin County, between South Santa Road and East Santa Road (X-S-J-5-B), about one and nine-tenths (1.9) miles in length to be graded and paved with asphalt concrete.

Proposal forms will be issued to only those Contractors who have furnished verified statement of experience and financial condition in accordance with the provisions of Chapter 44, Statutes 1929, and whose statements so furnished are satisfactory to the Department of Public Works. Bids will not be accepted from a Contractor to whom a proposal form has not been issued by the Department of Public Works.

Plans may be seen, and forms of proposal, bonds, contract and specifications may be obtained at the said office, and they may be seen at the offices of the District Engineers at Los Angeles and San Francisco, and at the office of the District Engineer of the district in which the work is situated. The District Engineer's offices are located at Eureka, Redding, Sacramento, San Francisco, San Luis Obispo, Fresno, Los Angeles, San Bernardino and Bishop.

A representative from the district office will be available to accompany prospective bidders for an inspection of the work herein contemplated, and Contractors are urged to investigate the location, character and quantity of work to be done, with a representative of the Division of Highways. It is requested that arrangements for joint field inspection be made as far in advance as possible. Detailed information concerning the proposed work may be obtained from the district office.

No bid will be received unless it is made on a blank form furnished by the State Highway Engineer. The special attention of prospective bidders is called to the "Proposal Requirements and Conditions" annexed to the blank form of proposal, for full directions as to bidding, etc.

The Department of Public Works reserves the right to reject any or all bids or to accept the bid deemed for the best interests of the State.

DEPARTMENT OF PUBLIC WORKS,
DIVISION OF HIGHWAYS.

C. H. PURCELL,

State Highway Engineer

Dated April 30, 1930.

NOTICE TO CONTRACTORS

SEALED BIDS will be received by the DIVISION OF WATER RESOURCES, Department of Public Works, at Room 410, State Office Building, Tenth and L Streets, Sacramento, California, until 2 o'clock P. M. on June 5, 1930, at which time

they will be publicly opened and read, for the construction of a rock jetty or dyke 170 feet long and containing approximately 2,000 cubic yards of quarry rock, at the mouth of the Navarro River in Mendocino County, 20 miles south of Fort Bragg.

Specifications, form of proposal and detailed information may be obtained at the above address. Each bid shall be on the form provided, and shall be accompanied by a certified check for not less than 10 per cent of the total amount of the bid. Sealed proposals must be addressed to R. L. Jones, deputy in charge of flood control and reclamation, at the above address. The Department of Public Works reserves the right to reject any or all bids, or to accept the bid deemed for the best interests of the State.

Department of Public Works
DIVISION OF WATER RESOURCES
EDWARD HYATT,
State Engineer.

NOTICE TO CONTRACTORS

SEALED BIDS will be received by the DIVISION OF WATER RESOURCES, Department of Public Works, at Room 410, State Office Building, Tenth and L Streets, Sacramento, California, until two o'clock P. M. on June 5, 1930, at which time they will be publicly opened and read, for the construction of bank protection works on the left bank of the Sacramento river one mile below Isleton, consisting of approximately 8,000 cu. yds. of sand fill and 21,000 sq. ft. of 4 inch concrete pavement.

Specifications, form of proposal and detailed information may be obtained at the above address. Each bid shall be on the form provided, and shall be accompanied by a certified check for not less than 10 per cent of the total amount of the bid. Sealed proposals must be addressed to R. L. Jones, deputy in charge of flood control and reclamation, at the above address. The Department of Public Works reserves the right to reject any or all bids, or to accept the bid deemed for the best interests of the State.

Department of Public Works
DIVISION OF WATER RESOURCES
EDWARD HYATT,
State Engineer.

PACIFIC CLAY PRODUCTS IN
EXPANSION PROGRAM

Directors of the Pacific Clay Products Company, according to word from Los Angeles, have approved the immediate expenditure of approximately \$250,000 in a program for improvements and additions to its main sewer pipe plant at Los Nietos, near Santa Fe Springs.

As a part of its expansion program Pacific Clay will abandon its Slauson Avenue plant in Los Angeles and plans to subdivide that six-acre tract in the near future for smaller industrial enterprises.

While immediate subdivision of this tract is unlikely, in view of the present real estate market, proceeds from the sale of this land when received will be used to retire the company's funded indebtedness of \$218,500.

The expenditure of approximately a quarter of a million dollars at Los Nietos will increase the present manufacturing capacity by 33 per cent and in addition will provide the manufacture of building tile and roofing tile.

CO-OPERATION PAYS

Sniff—I hear you took a long auto trip with Sandy MacTight. Who paid traveling expenses?

Bjones—Well, we split 50-50. I furnished gas and oil while Sandy saw to the air and water.

1083 ENGINEERS APPLY FOR STATE LICENSES

In his report to the Governor's Council at its meeting in Sacramento April 30, James F. Collins, director of the State Department of Professional and Vocational Standards, stated that 1083 applications for licenses had been received from engineers up to April 19. Approximately 4500 application blanks and other printed matter for information of engineers regarding the new state license law have been mailed to persons listed as engineers, according to Secretary Givan. It is estimated that 3000 civil engineers will ultimately be licensed by the state.

Five new licenses were issued to architects in the Southern District during March, bringing the total of licenses up to 711. Director Collins stated in his report, "Investigations numbered three and at the close of the period there were three investigations pending. Conviction was obtained in one case under prosecution. The board's campaign against unlicensed persons and firms who, through the wording of their advertising, hold themselves out to the public as architects, culminated in the prosecution of a firm in Long Beach. The defendants were convicted and were given a suspended sentence of 30 days in jail."

Three licenses were issued to architects in the Northern District during March, making the total number of licenses 513.

Reporting on the operations of the Section of Contractors' Registrations, Director Collins said: "The investigation work of the section showed an increase in March, 1930, over the preceding period as the result of an increasing number of complaints filed against licensees operating under the contractors' registration law. The procedure followed in conducting investigations and holding first hearings or conferences continues to prove highly satisfactory from a standpoint of results obtained."

"All complaints filed with the section are receiving prompt attention and, where necessary, are brought as speedily as careful investigation will permit to the conference stage. The manner in which complaints have been handled and adjusted has brought many compliments and has tended to accelerate the registration and licensing of contractors."

HIRE AN ARCHITECT!

Someone once asked Andrew Carnegie the reason for his phenomenal success. The Laird of Skibo Castle's eyes glinted as only the Carnegie eyes had the faculty of doing. His smile was a triple grin.

"I have always been able to get men to work for me who know more than I do," he replied.

There's a tip there for the prospective builder who usually is a construction novice.

Engage an architect to do the job for you.

PROTESTS PLUMBING CODE REVISIONS

A protest against the new amendments to the city's plumbing ordinance, recently passed to print by the Oakland city council, has been received by the council from the Master Plumbers' Association, which asserts that the plumbing ordinance is "ambiguous," and "is not being enforced uniformly and impartially." The protest, signed by President J. M. Campbell of the association added that the introduction of this ordinance had resulted in "a split in the previously harmonious ranks of the plumbers, who are now in opposing camps."

The protest was referred to Commissioner Frank Colbourn for an investigation and report. Colbourn asserted that the ordinance was the result of long study, with the assistance of many of the leading plumbers and gas-appliance companies in the city. He added that there has been considerable disagreement as to the ordinance, although it was finally adopted at what seemed to be the desire of the majority of those concerned. Colbourn added that the ordinance can be further amended if necessary, and an investigation of the whole matter will be started again by his department.

Final passage of the ordinance, he said, can be postponed as long as is necessary.

MERCED POTTERY PLANT NOW IN NEW HANDS

Merced capital has assumed complete control of the California Pottery Company's plant, according to word from that city. Plans are now under way to resume manufacturing activities. It is announced by F. B. Fancher, manager of the Merced branch of the Bank of Italy. The consideration involved in the transaction was not announced.

F. O. Costello of Oakland, who formerly held a controlling interest in the Merced plant, is no longer connected with the new company. Costello will continue his association with the Oak, land plant of the California Pottery Company, which is no longer connected with the Merced plant.

Officers of the new company are: A. C. Fancher, president; W. E. Bedesen, vice president; J. R. Flynn, secretary, and F. B. Fancher, treasurer. Employment will be given approximately 40 men when manufacture of pottery and tile is resumed, Fancher said. It is expected that management of the plant will be the same as formerly.

URGES COURTHOUSE BONDS

Building Trades Council of Alameda County has forwarded a resolution to the Alameda County Supervisors urging a bond issue to secure funds to finance erection of a new county courthouse to replace the present structure in lower Broadway.

SAN FRANCISCO BUILDING IN APRIL SUMMARIZED

Following segregation of April, 1930, building permits is compiled by John B. Leonard, superintendent of the Bureau of Building Inspection, San Francisco Department of Public Works:

	No. of Bldgs.	Cost	Families
1-family dwlgs.....	103	\$486,702	103
2-family dwlgs.....	5	38,000	10
Multi-fmly (3 or m).....	5	131,000	79
Other non-house-keeping dwlgs	1	59,374	
Total	114	\$715,076	192
Non-Residential			
Amusement and Recreation places.....	1	\$ 300	
Factories, etc.	1	75,289	
Garages (private)	13	4,995	
Gas & serv. stations ..	8	9,845	
Office bldgs. (banks) ..	2	76,500	
Sheds, etc.	5	4,075	
Stores & other mercantile bldgs.	2	10,500	
Total	32	\$181,504	
Alterations — house-keeping dwlgs.	205	\$120,985	
Non-housekeeping dwellings	8	18,525

Total	317	\$428,418	
Installation permits.....	124	\$ 31,655	

BRIDGE DESIGN AWARDS ARE ANNOUNCED

Supplementing the bridge design competition recently held among architectural students, the American Institute of Steel Construction has awarded three cash prizes and one honorable mention to four engineering students for aesthetic designs of a steel arch bridge. The first prize of \$500 was awarded to John Heckerthorn of the University of Idaho; the second prize of \$250 went to J. Hoogstraaten of the University of Manitoba, whereas the third prize of \$100 was awarded to William Neissen of Drexel Institute. Honorable mention was given to J. B. Striowski of the University of Manitoba whose design nearly tied for the third prize-winner.

The judges were Messrs. Gustav Lindenthal of Jersey City; J. E. Greiner of Baltimore, and O. H. Ammann of New York, consulting engineers; and Messrs. Theodore E. Blake of New York, and Stephen F. Voorhees of New York, architects.

The problem called for the design of a steel bridge of 650 feet total length and with a main span of 325 feet, to be erected over a river separating a suburban residential section from an industrial city.

QUANTITY SURVEY ON PUBLIC WORK ADVOCATED BY ENGINEER

The subjects for the deliberations of this meeting are matters of considerable interest to me as an engineer. While quantity surveying as a branch of the engineering profession may be a modern development a need for such I understand your theory rightly, it establishes the underlying motive of the business between the man who is to pay for certain work and the man who is going to do the work; thus, that the man paying for the work shall pay for exactly what is done and no more, and that the man who does the work shall be paid for work actually accomplished and no less.

Eliminates Guesswork

This is accomplished in my departmental work, particularly in the construction of streets and sewers, because this work is of such nature that we may let contracts at unit prices based on fairly close preliminary surveys. After the job is done, then comes the real quantity survey; that is, a survey of what has actually been accomplished. Under that method, of course, the City pays for what is done and no more and the contractors is paid for exactly what he does and no less.

This is a sound basis of fairness between the owner and the contractor. It takes all of the guess work out of the job and I may say along that line that whenever you can eliminate any guess work you are saving money for both parties concerned. Let me illustrate how far we go in St. Louis in our endeavor to eliminate guess work from the contractor's bidding.

We are constructing here what is doubtless the largest sewer in the world and one section of it was so located that there was very considerable hazard to the work due to flooding. It was quite certain that during its progress, damage would be done to the work by floods from streams. Also that during the course of the work there would be two, three or four times when a large amount of material from upstream would be washed in on this section of the work and require removal. How often these contingencies would arise could only be guessed at. If a contractor were asked to guess on these items and guarantee to meet the costs thereof he surely would, if he were a sound bidder, figure high enough to cover the maximum amount of trouble he might anticipate. Under these conditions the City doubtless would have paid for one or two floods which never happened.

Takes Out Gamble On Contracts

It is bad business, in my opinion, to gamble on a contract and so, in the case referred to, the contract provided that the contractor should do a definite amount of work embraced in a completed structure and the City would meet the cost of the flood contingencies if and when they might occur. I know you will agree that such a procedure was fair between the contractor and the City. It would have cost the City far more for that job if we had undertaken to require somebody to gamble on it and back up that gamble with a bond.

Owner Pays Overhead

If dealings between the owner and the contractor are based on exact knowledge you are cutting out waste. I understand that to be the underlying principle of your branch of the engineering profession. Might I mention another type of waste and illus-

(Address of E. R. Kinsey, President, St. Louis Board of Public Service, at the Fifth Annual Convention of the American Institute of Quantity Surveyors, St. Louis, Mo., April 14-16.)

trate it with the statement that recently I received bids on a very large job on which we had twelve bidders. It cost each one of these bidders over twelve to fifteen hundred dollars to figure the job. There is a total cost, we will say, of \$15,000 spent just in figuring. One man got the job and the rest have nothing to show for their expense. Of course, all this expense reappears in the next job and it must necessarily reappear until recovered, if the contractor is to remain in business.

I am quite sure also that the contractor who got our job included in his overhead expense a proportion of the money lost in figuring on dozens of other jobs which he did not get. All that waste of a dozen men doing the same thing at the same time costs money, and the money comes out of the pocket of the ultimate consumer. Any organized efforts to eliminate that waste is economically sound.

Hasty Estimates Costly

May I mention another element of waste, remembering that the average contractor may figure at least a dozen jobs for each one he gets. Some figures are hastily assembled as he cannot afford to spend sufficient time on each separate job to figure it as closely as an expert might. Now, what is the result if he does not figure closely. Either he figures too high, in which event the owner pays too much, or else he will omit what should have been figured in, in which event he does some work that he is not paid for.

Now, that is not good business for either side. There is no satisfaction for the engineer in charge in handling a losing contract. A sound business basis between the owner and the contractor is one wherein the owner pays for exactly what he gets and no more, and the contractor is paid for everything he does and no less. Thus, everybody is treated fairly and the work is accomplished at the least reasonable cost to the owner.

So I am interested in the kind of work you are doing. It is sound. It is developing a sound method of doing business and eliminating waste.

Quantity Survey Ancient

Earlier in my remarks I think I said that the need for quantity surveying was a very ancient one. May I tell you a story of what I had in mind? There is a very interesting book, "Pontinus on the Water Supply of Rome," translated by Clemens Herschel. Mr. Herschel was a very eminent hydraulic engineer. Among other things he is the inventor of the Venturi Meter, used the world over. I had the pleasure of working for him for a while, a good many years ago. One of his hobbies was research in ancient engineering and he discovered in Rome in a monastery the original manuscript of some notes by Pontinus, the engineer, dated A. D. 97. From these notes Mr. Herschel translated the interesting story so that people in general would know what contractors and engineers have been about for a long time. Pontinus was building an aqueduct tunnel through a hill and he commenced the work by

starting on both sides, which makes it evident that Pontinus was a pretty good engineer. Apparently the work was let on a unit price basis, and the unit prices were highly satisfactory to the contractor. As the story goes, Caesar went off on one of his military expeditions and took Pontinus with him as a military engineer. Pontinus thereupon was compelled to leave the tunnel work in charge of a young assistant engineer. The war kept him away from the job longer than he expected and as soon as he returned to Rome he hastened out to see how the job was getting along. There he found a very much worried engineer. The two headings had not met although the young engineer thought they should have met months ago. Pontinus made an investigation and discovered that the "foxy" contractor had so changed the alignment that the two tunnels passed each other and, as Pontinus remarked, if he had remained away six months longer they would have had two tunnels instead of one. The point is that if he had left with the young engineer a good quantity survey of the job the young man would have known that there was something wrong much earlier than he did.

PORTLAND STEEL WORKERS GET WAGE INCREASE

The wage-adjustment decision recently handed down by the arbitration committee of the building trades of Portland, Oregon, makes allowance for the date of bona fide commitments made by contractors in bidding on work. The structural and ornamental iron workers wage is increased from \$10 to \$11 per day after May 1, but this increase does not apply to jobs bid on prior to April 15. A wage increase from \$8.80 to \$9 was granted reinforcement steel workers subject to the same conditions. After May 1 all overtime for the latter mentioned type of mechanic will be double time instead of the former rate which allowed only time and one-half for the first two hours.

The committee's award has been accepted by all concerned. The committee is composed of representatives of the Building Construction Employers Association and the Building Trades Council of Portland, Oregon.

LOS ANGELES BUILDERS START PUBLICITY CAMPAIGN

Contractors' associations and other agencies interested in construction are conducting a "Now Is The Time To Build" campaign in the Los Angeles area through the mediums of newspapers, radio stations and local magazines. It is pointed out to the public that prices of construction materials show an average reduction of 35 per cent under prices of five years ago and an average of 60 per cent under prices of 1923. Cement, lumber, brick, and rock and sand, the most necessary elements in construction, are all 40 or 45 per cent under 1925 prices.

Suggestions to newspapers and other publicity mediums include the fact that labor, although obtaining practically the same wages as previously, is much more efficient as present than at times when work is not scarce.

"STOP NOTICES" TO SECURE PAYMENTS ON PUBLIC PROJECTS

(By Harry C. Westover, Attorney-at-Law)

This is the ninth of a series of articles prepared especially for these columns by Harry C. Westover, attorney of Santa Ana, Calif., on the Mechanics' Lien Law. Other articles will appear from time to time.—Editor.

It is impossible to file liens on public property or public work. The filing of liens on such work has repeatedly been held to be contrary to public policy. Public debts can be paid in one way; i. e., by public taxation. The revenue obtained by taxation are divided into specific funds and one furnishing labor or materials to any public body becomes a creditor of a specific fund and has no rights except with reference to such funds.

Although public property cannot be subjected to liens, the mechanics' lien statute of the State of California has made provision whereby such work can be reached and claimants protected for work and labor done or materials furnished. Section 1184 of the Code of Civil Procedure provides that all persons performing work or furnishing materials upon any public improvement may at any time prior to the expiration of the period within which claim of lien must be filed for record give to the owner a notice that they have performed labor or furnished materials.

The term "owner" as used in section 1184 includes the State or any board, commission or officer, or any political subdivision thereof.

Section 1184 also states that in all cases in which work is being done under a contract with the State or political subdivision such notice to withhold must be filed in the office of the controller, auditor, or other public discharging officer whose duty it is to make payments under the provision of the contract or with the commissioners, managers, trustees, officers, board of supervisors, board of trustees, common council, or other bodies by whom the contract for improvement was awarded.

Upon such notice being given the owner, the board, commission, city, county, or other political subdivision "shall withhold from the contractor sufficient money and bonds where bonds are used in lieu of money, due or that may become due to the contractor to answer such claim and any lien that might be filed therefore including the reasonable costs of any litigation thereunder."

There is no special form of stop notice or notice to withhold as long as the notice sets out the necessary facts and contains the statements required by statute. Section 1184 specifically says that "no such notice shall be valid by any reason in defect or form provided it is sufficient to inform the owner of the substantial matters required."

A stop notice or a notice to withhold must contain the same information as required in a lien that is: (1) The name of the claimant must be given; (2) the job must be described sufficiently for identification; (3) the amount due the claimant must be stated after deducting all just credits and offsets; (4) the name of the person employing claimant must be stated; (5) there must be a general statement as to the kind of labor performed or materials furnished. The Stop Notice or Notice to Withhold must be verified the same as liens. Stop Notices must be filed within the same time as liens are required to be filed; i. e., if no notice of completion is filed, within ninety days after the completion of the work; if a notice of

completion is filed then all sub-contractors and material men must file their stop notice within thirty days after the notice of completion, and the general contractor must file his notice within sixty days after the date of completion.

Notice to Withhold or Stop Notices are not filed for record with the County Recorder. They must be filed with the party disbursing the fund or with the public board, commission, trustees, board of supervisors, etc., who ordered the work done.

When a notice to withhold or a stop notice is filed, the owner, that is, the one ordering the work done must withhold sufficient money or bonds where bonds are given in lieu of money to take care of the demand stated in the stop notice.

In the case of a dispute between the contractor and the party giving notice, the statute specifically provides for a way of handling the dispute. Paragraphs 1184d of the Code of Civil Procedure provides that if the contractor or other person shall dispute the correctness of a stop notice, it shall be lawful for the contractor, auditor, or other public discharging officer whose duty it is to make payments under the provisions of the contract or of the board of supervisors, commissioners, trustees, etc., in his discretion, to permit the contractor to whom was awarded the contract to deliver to such board, commission, or officer, a bond executed by some corporation authorized to issue bonds in the State of California, in a penal sum equal to 1½ times the amount of said claim which said bond shall guarantee the payment of any sum which said claimant may recover on said claim, and upon the giving of such a bond then such board, commissioner or officer shall not withhold any money or bonds from said contractor on account of said claim. In other words, the bond takes the place of the money or bonds impounded by the notice to withhold and in the event of a recovery, the claimant can look to the bond or bondsman for payment.

The same persons are entitled to file stop notices as are entitled to file liens. Stop Notices may be withdrawn so as to release the fund impounded or allowed to outlaw. Section 1184a of the Code of Civil Procedure provides no action to enforce the payment of stop notices shall be commenced against the owner prior to the expiration of the period within which claims of liens must be filed for record now shall any suit be commenced later than ninety days following the expiration of such period. In other words, an action must be filed to enforce the stop notice within ninety days after the expiration of the time in which liens could have been filed if it had been a private job. If an action is filed to enforce a stop notice, then notice of the action must be given the owner within the five days after its commencement.

CONTRACTOR SUED

The Southern Pacific Company has brought suit at Redding, Calif., against F. P. Basler and the Matthews Construction Company, contractors on the highway between Sims and Castella, for \$2595 damages. The railroad company alleges the contractors blasted rocks and dirt onto the railroad track.

FRANCE TAKING MORE AMERICAN HARDWOODS

An increased demand for American hardwoods—white oak and gum particularly—now exists in France, says a report from Merle H. Cochran, consul in charge, Paris, to the Lumber Division of the Department of Commerce.

The increase in the imports of American oak into France is explained by the fact that the price of native French oak is very much higher than it was previously. The native oak is generally considered by the French trade to be of better texture than American oak, but the American oak can be obtained in large dimensions and is, therefore, in demand for those uses in which large dimensions are required. Slavonian oak, highly prized by the French trade, is being imported in increasing quantities.

White oak is used for house building and for furniture. When it is used for flooring, the question of color and grain plays an important part. Oak from the Appalachian region of the United States is a favorite for furniture purposes.

The use of hardwoods from French colonies having a decided effect on the hardwood market in France. For instance, American gum, once much used as a substitute for walnut, is being replaced for some purposes by colonial woods.

Gum wood known in France as satin walnut, was formerly used extensively for the manufacture of furniture, but is now employed principally for making picture frames and moldings, plywood and panels.

American yellow poplar, formerly much used for furniture also, now goes into motor car bodies, airplanes, and veneers. Ash from the United States is used considerably for making various manufactured products. Recently there has been an increasing demand for hickory, which is used for manufacturing looms, skis, rulers, machinery parts, etc.

American walnut is used in France, although considerable native French Walnut is available. The native wood is preferred to American walnut because of its light color. In some sections of France, however, dark colored walnut is in greater demand.

Birdseye maple, used for veneers, fancy furniture and wood work, and persimmon and dogwood for manufacturing shuttles and reels, are among other woods imported by France from the United States.

GLADDING, McBEAN & COMPANY ELECTS DIRECTORS

Walter Sullivan, San Francisco, and Charles H. Quinn and James R. Martin of Los Angeles, were elected to the directorate of Gladding, McBean & Company at the annual meeting of stockholders held April 30.

Sullivan was elected to fill the vacancy caused by the resignation of John S. Drum of San Francisco, while Quinn and Martin succeed to seats heretofore held by Willis G. Hunt and Howard Frost of the Southern metropolis. There were no other changes in the board.

Officers for the ensuing year will be elected at the next board meeting.

New orders booked during the first quarter of 1930, as reported to the U. S. Department of Commerce by eighty-one manufacturers of electrical goods, were \$298,733,203, as compared with \$288,696,415, for the last quarter of 1929, and \$322,424,619 for the first quarter of 1929.

THE OBSERVER

WHAT HE HEARS AND SEES ON HIS ROUNDS

Rarely has there been such little effort required upon the part of the competitors as will be in the Third Common Brick House Competition to be held this year by the Common Brick Manufacturers' Association of America. All of the difficulties usually attending an architectural contest have been eliminated. Only photographs and blue print floor plans are necessary. The photos constitute the main entry. The competition will close on November 18.

Houses to be eligible must have at least 75 per cent of the exterior surface of their walls built of common brick, which means of course brick of burned clay or sale. Any sound, fire-resistive backing or steel framing is admissible. Other forms of backup, including all cinder products, are not.

Brick veneer on frame, which is classified as frame construction and not as masonry, is not eligible. A common brick is any brick not especially treated for color or texture, including clinker or overburned brick. Only common brick are eligible.

Architects may submit only houses actually completed from their plans. Houses entered in our prior competitions are not eligible. New houses, with landscaping undeveloped, are acceptable. Photographs submitted become the property of the association. Photographs should be glossy prints not less than 5 x 7 inches. Photos 8 x 10 are preferred. They should show full perspective and close-up of some exterior detail of particular interest. A brickwork detail is desirable, though not imperative.

The prizes will be: First, \$500; second, \$300; third, \$200; fourth, \$100; with six honorable mentions of \$50 each. The jury of award will consist of three architects of national reputation.

In a further effort to reduce the accident toll at grade crossings, the State Railroad Commission has sent out a statewide appeal to the various highway authorities, including the boards of supervisors of all counties, to co-operate with the Commission in the matter of promptly appraising the Commission of instances where heavy traffic, because of detours or other reasons, is thrown over grade crossings of main line railroads normally carrying insufficient traffic to justify special protection. With such information in its possession, the Commission will be in a position to have adequate special protection provided at these crossings during such periods of unusual traffic flow. It is believed that such a plan, properly co-operated in by all concerned, will materially reduce the accident toll at this class of crossing.

A state minimum plumbing code is now being drafted for presentation to the State Legislature at its next session. It was announced by C. M. Swinnerton of Los Angeles, at the annual convention of the California State Master Plumbers' Association, meeting in Sacramento. This code would

apply to sections of the state outside of the limits of incorporated cities, which, at the present time, are unregulated in all but a few counties.

Swinnerton said the minimum code, which will probably be based upon the department of commerce regulations drafted by Herbert Hoover, will have special application to summer resorts and automobile camps and other such places of temporary group residence.

The proposed code would establish regulations in areas contiguous to centers of large population which now are without sanitary restrictions, in view of the possibility of thus preventing epidemics threatening the cities themselves.

Building permits issued in 584 leading cities and towns in the United States during April totaled \$210,411,881, an increase of 12 per cent over \$188,452,177 in March. S. W. Straus & Co. report. The company said that inasmuch as the normal trend of building activities between March and April is about 3 1/2 per cent downward, it would appear that the outlook for increased building activities from now on is encouraging.

April wholesale prices of standard plumbing fixtures for a six-room house, as collected by the U. S. Department of Commerce from reports of twelve representative manufacturers and wholesalers, were \$105.46 as compared with \$104.51 in March and \$97.99 in April, 1929.

In explanation of the declaration of the National Lumber Manufacturers' Association in favor of a lumber tariff after it had remained silent on the subject throughout the tariff debate, it is said at the offices of the Association in Washington that the chief consideration is threatened Russian competition.

Advices from Portland, Ore., state that Fred Horskotte, sawmill designer, has received a contract from the Soviet government for the installation of 120 modern American sawmill plants in the Russian state forests. The same advices say that contracts for sawmilling machinery have been let to American firms aggregating \$30,000,000.

According to American Federation of Labor sources the labor in the Russian logging camps and sawmills is practically all forced or convict labor.

The purpose of the Russian emphasis on the manufacture and exportation of lumber is to obtain gold credits abroad. Russia no longer exports grain, which was formerly its chief export. Lumber has been chosen to take its place. As the government has confiscated the timber its raw materials costs it nothing, and any money return is considered a benefit. In these circumstances almost any price in the United States that will leave a margin above the cost of manufacture and transportation will satisfy the Soviet authorities.

Oakland merchants will be given 30 days in which to comply with the law that all awnings must be not lower than seven and one-half feet from the sidewalk. After 30 days are up those who have not met the requirements will be subjected to arrest and prosecution. The maximum penalty is a

\$500 fine, six months in jail, or both. Inspectors from the city building department will measure awnings and warn merchants who are violating the law.

Edwin J. Symmes and Clarence Cullimore, heretofore operating as Symmes & Cullimore, architects, with offices in the Habersfelde Bldg., Bakersfield, announce a dissolution of the partnership. Mr. Symmes will continue the practice of architecture at the former location of the offices of Symmes & Cullimore, 215 Habersfelde Building. It is understood that Mr. Cullimore will open offices in the new Habersfelde Bldg now in course of construction.

STATE CHAMBER OF COMMERCE ELECTS DIRECTORS

A. J. Mount, president of the Bank of Italy, James A. Talbot, chairman of the Board, Richfield Oil Company, and Harold B. Franklin, president, Fox West Coast Theatres, Inc., are three new names added to the Board of Directors of the California State Chamber of Commerce, at the annual election which took place last Monday at the organization offices in the Ferry Building, San Francisco.

Election of officers for the ensuing fiscal year will be held at the first meeting of the new Board of Directors, May 23rd, at the St. Francis Hotel, San Francisco.

The Directorate of the State Chamber of Commerce numbers twenty-five, with two past-president directors. Six regional directors will be appointed by the president of the organization following the first meeting of the board.

The Directors elected at the Monday meeting are as follows: F. J. Belcher, Jr., Arthur S. Bent, Hubert H. Briggs, C. A. Bufum, Harry Chandler, Colbert Coldwell, R. A. Condee, A. B. C. Dohrmann, George L. Eastman, R. E. Fisher, Harold B. Franklin, Wm. M. Garland, R. B. Hale, Alfrid Harrell, Fred W. Kiesel, Joseph R. Knowland, Frederick J. Koster, J. B. Levison, Clinton E. Miller, A. J. Mount, E. W. Murphy, Dudley V. Saelzler, Paul Shoup, James A. Talbot, C. C. Teague, Chas E. Virden, A. Emory Wishon.

ARMY G. G. BRIDGE BOARD IS NAMED

Appointment of a board of three army engineers to hear a petition for a bridge across the Golden Gate is announced by the War Department. The board is headed by Lieutenant Colonel Thomas M. Robins of San Francisco, division engineer for the Pacific Coast and Hawaii. The other two members are Major William H. Lanagan, district engineer at Los Angeles, and Major E. H. Ropes, division engineer at San Francisco. Notice of the hearing will be issued in a few days.

LUMBER PLANT OPENED AT KLAMATH FALLS

The Kesterson Lumber Company's new 200,000-foot capacity mill, three miles south of Klamath Falls, Ore., started cutting on full capacity May 12. Two shifts went on duty. The mill was put into operation Thursday when 95,000 board feet were cut. In the timber unit, purchased from the Long-Bell Lumber Company, a crew is putting out 350,000 feet per day to serve the plant at Dorris, Calif., and the one at Klamath.

ALONG THE LINE

Edward von Geldern has been appointed city engineer of Yuba City, succeeding William Shearer.

Edward S. Carpenter, 54, former owner of the Western Lumber Company of Sacramento, died in that city May 5.

Robert Thom, county surveyor of Tuolumne County announces he will be a candidate for re-election at the coming election.

Walker R. Young, engineer in the U. S. Bureau of Reclamation, has been chosen chief engineer for the Boulder Dam project.

W. W. Wheatley has resigned as secretary of the Imperial Valley Lumbermen's Club to take effect June 1. He has announced no plans for the future.

Northwestern Timber Co. of San Francisco has been incorporated. Directors are A. T. O'Connell, Edward I. Fitzpatrick and John P. Davis.

Unconfirmed reports are to the effect that John N. Edy, city manager of Berkeley, will resign to accept a similar position at Flint, Michigan. The position carries a salary of \$15,000 a year. Edy is now in the East.

Quinlan, Code & Hill and Leeds & Irmann of Los Angeles, announce that these two engineering concerns were consolidated on May 1 to carry on jointly a broader practice of engineering than has been separately possible.

J. Kendall Masten, 3554 Washington Street, San Francisco, has been granted a Provisional Certificate to practice architecture by the California State Board of Architectural Examiners, Northern District, it is announced by Albert J. Evers, Secretary of the Board.

Three candidates are in the field to succeed C. Herriek Hammond, Chicago, as president of the American Institute of Architects. They are C. A. Favrot, New Orleans, and J. Monroe Hewlett and Robert D. Kohn, New York. The election will take place at the 63rd convention of the Institute to be held in Washington, D. C., May 21, 22 and 23. Harris C. Allen, Berkeley, Calif., has been nominated as regional director of the Sierra Nevada division of the Institute.

Ralph H. Mitchell, former editor of the Daily Transcript of San Diego, has been named publishing director of the California Constructor, official publication of the Associated General Contractors in Southern California. Previous to his association with the Transcript at San Diego, Mitchell was editor of the Daily Journal of Commerce of Portland, Oregon.

Aaron H. Gould, former architect of Portland, Ore., died in Detroit, Mich., May 9. Mr. Gould was born in Nova Scotia in 1864 and started in the construction business in Boston as a contractor. Later he became an architect and opened offices in Portland, Ore., in 1910. In 1916 he moved to Detroit to continue his architectural business.

TRADE NOTES

Victory Washer Co., Ltd., manufacturers of the Victory washing machine has opened headquarters at 434 Larkin St., San Francisco, with F. J. Lasar as general manager.

Transit Mixers, Inc., San Francisco, has appointed Francis H. James chief engineer with headquarters at San Francisco. Mr. James was formerly connected with the Northwest Engineering Co. as sales engineer for the State of California.

Neale Rainbow Light Corp., Ltd., of Los Angeles, plans to establish a sales and service branch in Sacramento. A factory was recently established by the company in Fresno and a new sales branch at Stockton.

Fuelless Magnetic Motors, Ltd., has established an experimental laboratory for perfecting a patented magnetic motor invented by H. L. Worthington, who is in charge of experimental work. Offices are located at 68 Post Street and the laboratory at 224 Harriet Street.

Bullard Davis, Inc., of California, has resumed its former name of E. D. Bullard Co., effective April 1. The company has purchased the First Aid Equipment & Supply Co., Los Angeles. Manufacture of first-aid material and equipment will be continued at both San Francisco and Los Angeles.

Three Seattle retail lumber firms effected a merger agreement last week, to operate under the name of Columbia Lumber Company. Merging companies are: Columbia Lumber Company, Ranning Lumber Company, Bell-Holmes Inc. The company operates yards in 18 Washington cities, in addition to three Seattle yards.

Mr. George H. Kemp, who has been affiliated with The Cleveland Varnish Company of Cleveland for seventeen years, as general representative, has been appointed industrial sales manager of The Ohio Varnish Company, Cleveland, Ohio. Mr. Kemp assumed his new duties May 1st.

HIGHWAY COMMISSION SEEKS CROSSING PERMITS

California State Department of Public Works, Division of Highways, has applied to the State Railroad Commission for permission to construct an undergrade crossing under the Southern Pacific tracks at Cottonwood, 14 miles south of Redding in Shasta County. The cost of construction is estimated at \$130,000.

A similar permit is sought by the highway department for an overhead crossing on the Southern Pacific line 2 miles west of Crystal Lake in Nevada County, known as Yuba Pass. The cost is placed at \$67,333.

Permission is also sought for the construction of an undergrade crossing on the Atchison, Topeka & Santa Fe Railway at Wasco, Kern County. The estimated cost of the proposed crossing is placed at \$38,600, exclusive of paving. The railroad has agreed to pay fifty per cent of the cost.

HERE — THERE —
EVERYWHERE

Progress toward the formation of an organization of the Salem, Oregon, general contractors has been effected to a point where a committee has been chosen to draft a constitution and by-laws. Meetings are to be held each Monday night until the organization is completed. The committee in charge of preliminary work consists of Cuyler Van Patten, chairman; L. G. Bulgin, secretary, and Earl Barham.

The annual meeting of the Western Association of State Highway Commissioners will be held in Salt Lake City, Utah, July 1 and 2, it is announced by Henry H. Blood, chairman of the Utah State Highway Commission and president of the association. Oil roads, billboards, highway legislative programs, and airways are among the topics to be considered.

Members of the association are to be invited to accompany governors to Salt Lake City for the National Governors' Conference June 30 to July 2, on a trip to Southern Utah for the dedication of the Zion-Mt. Carmel highway, July 4.

Appointment of representatives to the administrative board of the American Engineering Council have been announced by Carl E. Grunsky, of San Francisco, president of the council. Those from the American Society of Civil Engineers are: H. S. Crocker, Denver, Colo.; A. J. Dyer, Nashville, Tenn.; Dean Anson Marston, Iowa State College; Frank M. Williams, Albany, N. Y.

More than six hundred building-loan executives from various sections of the State are expected to attend the Silver Jubilee Convention of the California Building-Loan League, May 22-23-24, according to J. M. Abbott, president. Sessions will be held at Hotel del Coronado, San Diego. The conference is the last general meeting before the next session of the State Legislature. Mr. Abbott pointed out, and considerable interest and controversy will be generated in legislative program proposals. A discussion on "Codification of State Building-Loan Laws" will also be a highlight of the annual meeting. Gov. C. C. Young; Norman H. Sloan, general manager, State Chamber of Commerce; Chas. A. Whitmore, State Building-Loan Commissioner; Harrison Lewis, chairman, Legislative Council, California Real Estate Association and J. E. Driscoll, Jr., San Diego attorney, are among the outstanding speakers on the program.

105-STORY FOR NEW YORK

Tentative plans are being discussed in New York for a tower to rise to a height of 105 stories above Wall street. Such a structure would be the pinnacle of the world's greatest buildings. The estimated cost of the project is \$20,000,000. It has progressed so far that Louis Adler announces he has assembled the ground space for the site. It includes the entire block bounded by Wall, Pine, Pearl and Water streets. The Chas. F. Noyes Company were brokers in the transactions, which brought the

TRADE LITERATURE

Portable carbide lights and lanterns are described in an 18-page illustrated bulletin issued by the National Carbide Sales Corp., New York City.

Remote control instruments for indicating, recording and controlling flows, pressures, liquid levels and positions are described in a 32-page illustrated bulletin issued by the Brown Instrument Co., Philadelphia, Pa.

McEverlast, Inc., Los Angeles, has issued a 12-page booklet on the Hunt process of curing concrete which describes the material and equipment used, giving details of the method of application and lists advantages to be obtained by the use of this process.

A handbook on steel tanks, published by the Lancaster Iron Works, Inc., Lancaster, Pa., contains 91 pages of data on tank sizes and capacities, fire protection and insurance requirements for the storage of volatile liquids, specifications of steel for various purposes, and general useful information in connection with the design and installation of steel tanks.

A 16-page pamphlet "The Parkhurst Vertical Collimator," written by Geo. L. Hosmer, of the department of geodesy, Massachusetts Institute of Technology, and published by C. L. Berger & Sons, Inc., Boston, Mass., describes a new device for establishing a vertical line of sight. This was used in conjunction with portable steel triangulation towers by the U. S. Coast and Geodetic Survey on the Mississippi River floor-prevention control between Cairo and New Orleans.

Two publications of special interest, particularly in the technical field, have recently been published by the California Redwood Association. The first of these is "Naturally Durable California Redwood in Structural Grades." This publication carries safe working stresses approved by the U. S. Forest Products Laboratory. The second is "Naturally Durable California Redwood in Modern Timber Structures."

The booklet devoted to structural grades gives the Association's new grading rules conforming to essential provisions of A. R. E. A., A. S. T. M., A. L. S., etc. The booklet on modern timber structures is of a more popular nature, illustrated by photos of some of the more than 60 bridges built or building during the past year in California, Ohio, Kansas, Tennessee and Arkansas, and taking nearly 12 million feet board measure.

Both publications are being distributed without charge and will be furnished to those who are interested in their subject matter. In connection with the publication of these booklets the California Redwood Association has called attention to the fact that every piece of structural redwood is inspected, grade and trade marked and every shipment covered by inspection certificate. This inspection, they state, is done by the Association's inspectors and not by mill employes or representatives.

NOBILITY AT LUMBER MILL

Prince and Princess Friedrich Christian zu Schaumburg Lippe of Germany, accompanied by Chas. Beroltzheimer of Stockton, were recent visitors at the plant of the Pickering Lumber Company at Standard, Tuolumne County.

BILLION DOLLARS ANNUALLY FOR REAL ESTATE FINANCING

More than a billion dollars a year—without pause through the past three year period—is the record of real estate financing reported by Thomas F. Clark, Director of the Mortgage Bankers Association of America in an interview at the annual meeting of the United States Chamber of Commerce held in Washington recently.

"Such colossal figures, based upon a country-wide survey just made among members of the Mortgage Bankers Association, come as a surprise to the man on the street who has attributed lessened real estate and building activity to a curtailment of loans by mortgage bankers," said Mr. Clark. "Due to the fact that the survey was confined to the conservative institutions that have qualified under the strict membership standards of the Association, we can infer from the figures that companies of this type have regularly supplied mortgage money for sound projects even during this last three year period when real estate activity as a whole has been at a low ebb. Forty percent of the reported members actually showed an increased business in 1929 over 1928."

Two hundred leading members of the Association located in practically every state of the Union submitted figures in the survey showing sales of mortgages and bonds secured by city real estate to the extent of 676 millions in 1927, 727 millions in 1928 and 691 millions in 1929. An estimate of from a billion to a billion and a half dollars annual volume could be assumed on the basis of a full report from all of the Association's members. Building and loan associations, private investors, insurance companies, trust companies and savings banks negotiating directly with borrowers, rather than through mortgage bankers, are not included in the survey.

"It must be remembered that in the two or three years we have seen the gradual withdrawal or failure of many so-called 'high pressure' real estate security houses whose loans were, through intention or lack of experience, made along speculative lines," explained Mr. Clark. "As such houses are gradually being eliminated from the field it is only natural that builders and developers should feel the shortage of funds from those sources."

"While one section of the general public is bewailing the supposed 'tightness' of mortgage money another section is bound to feel satisfaction over the present conservative trend of mortgage banking, and in the knowledge developed by these statistics, that sound mortgage institutions are furnishing an uninterrupted service to borrowers and investors."

"Judging from the figures shown, high grade real estate securities are still being sold and being accorded their rightful honored place in the investment field. Such securities must not be made the tool of the wildcat promoter—the speculator unwilling to risk his own funds. Level-headed home-owners, landlords and builders who are more concerned with sound development than temporary profits will find mortgage funds as plentiful as ever in 1930."

Sixty members making farm loans in all the principal agricultural states were shown to have varied their annual volume less than three per cent over the three year period.

Total farm mortgages sold were \$4 millions in 1927, \$6 millions in 1928 and \$7 millions in 1929. A full report from all members making such loans would probably show an annual total of between 100 millions and 150 millions. The survey did not include Federal and Joint Stock Land Banks nor private investors, insurance companies, trust companies and savings banks negotiating directly with borrowers.

NATIONAL LUMBER MANUFACTURES ELECT OFFICERS

A. C. Dixon, manager of the Booth-Kelly Lumber Co., Eugene, Ore., was elected president of the National Lumber Mfrs. Association at the Chicago convention. He served as a trustee of the association during the last year and was former president of the West Coast Lumbermen's Association. Among those elected to the board of trustees for the coming year are: W. E. Nettleton, president of the Nettleton Lumber Co., Seattle, Wash.; C. D. Johnson, president of the Pacific Spruce Corp., Toledo, Ore.; J. D. Tennant, vice-president and manager of the Long-Bell Lumber Co., Longview, Wash.; M. C. Woodard, president of the Silver Falls Timber Co., Silverton, Ore.; R. H. Burnside, president of the Willapa Lumber Co., Raymond, Wash.; and F. R. Titcomb, vice-president and general manager of the Weyerhaeuser Timber Co., Tacoma, Wash.

BRIDGE EARNINGS GROW

Total receipts of the American Toll Bridge Company from the Antioch and Carquinez bridges in the first quarter of 1930 amounted to \$247,150, compared with \$222,400 in the first quarter of 1929, the company announced April 30.

Approximately 25,000 more vehicles used the bridges last quarter than traveled over them in the first quarter of 1929. Traffic for the first three months this year totaled 230,000 vehicles with 700,000 passengers. In the first quarter of last year 265,000 vehicles, carrying 630,000 passengers, used the bridges.

MILLWORK INSTITUTE OCCUPYING NEW QUARTERS

Headquarters of the Millwork Institute of California have been moved from Los Angeles to Fresno in order that the work may be under immediate supervision of the president, A. W. Benhauer, of the Fresno Planing Mill. Offices are located at 522 T. W. Patterson Bldg., Fulton and Tulare Sts., Fresno. L. G. Sterrett will continue as manager of the service bureau, but the position of managing director, made vacant by the resignation of H. T. Didesch to accept a position in Oakland, will not be filled for the present.

HOLLAND TUNNEL RECEIPTS DURING 1929

Income for the Holland vehicular tunnel under the Hudson River a New York City during 1929 totaled \$6,120,005. Operating expenses were \$1,528,684, leaving a profit of \$4,591,321. The tunnel cost \$48,000,000 and a the present rate should be paid for by the end of 1937.

PLANS WATER SURVEY

Town trustees of Hillsborough, San Mateo County, have appropriated \$5,000 to finance a water survey to determine the feasibility of a tri-city water district with Burlingame, San Mateo. Tentative plans provided for tapping the Spring Valley reservoir with a line large enough to supply the three cities.

OROVILLE INN OFFICIALLY OPEN TO PUBLIC ON JUNE 1

THE OROVILLE INN
G. A. Applegarth, Architect

Oroville Inn, located at the gateway to the Feather River country, at Oroville, Butte County, will be officially opened to the public on June 1.

The structure will be dedicated on May 31. Civic leaders from various sections of the state will be present. "Oroville Inn represents a decided advanced step in the construction and equipment of hotels," says Chas. W. Ward, San Francisco hotel operator, who, with Wm. E. Smith and Van A. Shafer will operate the structure. "The Inn will provide every comfort for the tourist," Ward continued, "as well as providing every facility for the hunter and fisherman who seeks pleasure in the Feather River district which is considered the greatest hunting and fishing area on the Pacific Coast."

The main hotel building will be four stories and basement, built around a garden court.

The approach to the building will be by a driveway through a large arched gate way leading through the garden to the entrances of lobbies and dining room.

Into this garden will be transplanted large growing oranges, bananas, avacados, and other semi-tropical trees and flowering plants which will give a succession of bloom throughout the year.

The style of the building is Spanish which is particularly suitable for this climate and combines so well with garden treatments. The interior of the building will be decorated in the soft blended colors of this style.

An air cooling system has been installed supplying cool washed air night and day in the summer to all bedrooms, lobbies, banquet rooms, etc., by a system of fans, ducts, and an air washer.

The garage facilities for the building are reached directly from the court, after passing the main entrance and the access to the hotel from the garage is under cover.

There are 94 guest rooms in the hotel, all with access to bath and shower combinations and with every modern convenience.

Furnishings for hostelry were installed by Geo. M. Hyde Company of San Francisco, associated with Messrs. Reed and Frank.

Mr. Applegarth, the architect of the Oroville Inn, has made a special study of buildings of this kind and has had experience in constructions throughout the state, having built more than 200 buildings, among which in San Francisco are the Clift Hotel, California Palace of the Legion of Honor, Fielding Hotel, Oceanic Building, and many others.

TREATED LUMBER SAVES BUILDING UPKEEP

Important economies in the upkeep of houses and other types of wood construction, may be effected by the use of chemically treated lumber, says Axel H. Oxholm, director of the National Committee on Wood Utilization of the Department of Commerce, in announcing the release of the Committee's latest bulletin "Treated Wood, Its Uses and Economies."

The fact that the railroads of the United States are saving \$145,000 annually through the use of chemically treated ties alone, is sufficient evidence of the economies made possible in wood construction by treating wood to protect it from decay and insect attack. It was in an endeavor to give home builders the benefit of similar economies, therefore, that the National Committee on Wood Utilization induced retail lumber dealers to stock chemically treated lumber, so

that it might be available in small quantities to the average consumer.

Directing this movement is a subcommittee composed of builders, architects, lumbermen, bankers, and agriculturists and led by T. F. Laist, in charge of retail lumber research, Antioch College, Yellow Springs, Ohio. The movement has passed the experimental stage. Treated lumber is now procurable in retail quantities throughout the State of Ohio; and the Committee is planning the extension of the treated wood project to other states, also.

The Committee's new bulletin explains in detail how the use of treated lumber in certain parts of a building will prolong the life of the structure. It stresses particularly, also, the uses to which treated lumber may advantageously be put on the farm.

It may be obtained from the Superintendent of Documents, Government Printing Office, Washington, D.

C., or from branch offices of the Department of Commerce, located in the principal cities

NEW MANAGER NAMED

Robert Simpson, former manager of the Portland, Ore., office of the Star Roof Corp., has taken over the management of the Fresno branch of the company located at 1824 Stanislaus St., Fresno. Simpson succeeds G. C. Watson, who was transferred to the company's Long Beach office after serving in Fresno for a year and at Visalia for six months.

PLAN LICENSE LAW

Martinez, Calif., city council plans adoption of an ordinance making it compulsory for contractors engaged in the building trades to secure a municipal license before performing work within the city limits.

Building News Section

APARTMENTS

Contract Awarded—Sub-Bids Being Taken.

APARTMENTS Cost, \$250,000
OAKLAND, Alameda Co., Cal. Perkins and Van Buren Sts.

Seven-story steel frame and brick apartments (69 2- and 3-room apts.)

Owner—Wm. Richardson.
Architect—Willis Lowe, 354 Hobart St., Oakland.

Contractor—J. Daneri, 6515 Raymond St., Oakland.

Sub-bids are wanted on all portions of the work.

Contract Awarded.
APARTMENTS Cost, \$250,000
LOS ANGELES, Cal. SW Ninth and Kingsley Drive.

Five-story and basement Class C brick apartments.

Owner—I. Roth, 905 S. Kingsley Dr., Los Angeles.

Architect—E. B. Rust, Wilshire Professional Bldg., Los Angeles.

Contractor—Barnett Shapiro Constr. Co., Pine Arts Bldg., Los Angeles

Segregated Bids Being Taken.
APARTMENTS Cost, \$75,000
ALAMEDA, Alameda Co., Cal. Santa Clara Avenue.

Three-story and basement frame and stucco apartments with reinforced concrete garage (18 2, 3 and 4-room apts.)

Owner—A. C. Cook.
Architect—Chester Treichel, American Bank Bldg., Oakland.

Completing Plans.
APARTMENTS Cost approx. \$100,000
VALLEJO, Solano Co., Calif. Capitol Way.

Three-story reinforced concrete apts. (21 2, 3- and 4-room apts.)

Owner and Builder—Dr. F. Burton Jones, 327 Georgia St., Vallejo.

Plans by W. A. Pentecost, 465 25th St., Oakland.

Sub-bids will be taken May 15th.

Bids In—Held Under Advice.
ALTERATIONS Cost, \$40,000
SAN FRANCISCO. NW Bush St. and Polk St.

Alter present apartments.
Owner—Estate of Louis Freidman.
Architect—S. Helman, 605 Market St.
As previously reported, refrigeration awarded to Cyclops Iron Works, (Norge Refrigerators), 837 Folsom St., at \$4000. There will be 47 refrigerators installed.

Work involves painting, electric wiring, plumbing.

BONDS

NORTH SACRAMENTO, Calif.—North Sacramento School District defeats proposal to issue bonds of \$25,000 to finance erection of a new school.

DELANO, Kern Co., Cal.—Election will be held May 31 in Delano Union Grammar School District to vote bonds of \$14,000 to finance school improvements. Trustees of district are: G. A. Swanson, O. T. Mast and F. W. Maehle.

SONORA, Tuolumne Co., Cal.—Until June 3 bids will be received by county supervisors for purchase of the \$17,000 bond issue of the Jamestown

School District; proceeds of sale to finance erection of a new school to replace structure destroyed by fire.

AUBURN, Placer Co., Cal.—Election will be called by city council shortly to vote bonds of \$40,000 to finance erection of a new city hall, preliminary plans for which have been prepared by Architect W. H. Weeks, 111 Sutter St., San Francisco.

MARYSVILLE, Yuba Co., Calif.—Linda School District will call election shortly to vote bonds of \$9,000 to finance erection of an addition to the present school.

OROVILLE, Butte Co., Cal.—Special election held in Lone Tree School District to vote direct tax of \$1250 to finance erection of school to replace structure destroyed by fire, carried by a vote of 10 to 7.

CHURCHES

SOUTH PASADENA, Los Angeles Co., Cal.—Until 2 P. M., June 2, bids will be received by South Pasadena City High School District for furnishing and installing a pipe organ in South Pasadena Senior High School, Fremont Ave. and Bank St. Specifications on file at 1327 Diamond Ave., South Pasadena.

Bids To Be Taken Within One Week.
CHURCH Cost, \$40,000
OAKLAND, Alameda Co., Cal. St. James Road.

One-story frame and stucco church (Spanish type).

Owner—Corpus Christi Parish.

Architect—W. E. Schirmer, 700 21st St., Oakland.

Contract Awarded.
CHAPEL Cost, \$150,000
LOS ANGELES, Cal. Thirty-fourth St. near University Ave.

Four-story and basement Class A reinforced concrete chapel and educational building (85x130 ft.)

Owner—University Methodist Church.

Architect—C. Raymond Johnson, School of Architecture, University of Southern California.

Contractor—William Simpson Constr. Co., 1007 Architects Bldg., Los Angeles.

A Demonstration of the

1267

Preliminary Plans Complete.

CHURCH Cost, \$20,000
EUREKA, Humboldt Co., Calif.

One-story redwood church (Colonial type).

Owner—First Methodist Church.

Architect—Rollin S. Tuttle, Box C, Los Gatos.

Financing arrangements are now being made.

Bids To Be Taken Within A Few Days
ALTERATIONS Cost, \$16,000
SANTA ROSA, Sonoma Co., Cal.

Alterations and additions to present church building (erect social hall and general alterations).

Owner—First Methodist Episcopal Church.

Architect—Rollin S. Tuttle, Box C, Los Gatos.

Mead Clark, E. A. Eymann and W. J. Meeker are on the building committee.

Contemplated.
CHURCH Cost, \$—
PETALUMA, Sonoma Co., Cal. English and Bassett Sts. (71x130 ft.)

One-story frame and stucco church.

Owner—Church of God (Rev. A. C. Bennett, Pastor).

Architect—Not Selected.

Contractor—George Seeley, Petaluma

FACTORIES AND WAREHOUSES

ALAMEDA, Alameda Co., Cal.—Sea-Maid Corp., manufacturers of a chemical cleaner, has taken over the abandoned borax plant at the west end of Pacific Ave. and will spend \$75,000 in reconstruction and installation of new equipment.

OAKLAND, Alameda Co., Cal.—J. G. Wilson Corp., 605 Market St., San Francisco, at \$8175 awarded contract by City of Oakland Port Commission for 24 steel rolling doors for the transit shed on 9th Ave. Pier.

Site Purchased—Plans To Be Prepared
INDUSTRIAL BLDG. Cost, \$—
SAN FRANCISCO. SE Russ and Howard Sts.

Industrial building.

Owner—Eng-Skell Co., 208 Mission St., San Francisco.

Architect—Not Selected.

Contract Awarded.
TRANSIT SHED Cont. Price, \$69,75
OAKLAND, Alameda Co., Cal. Ninth Avenue Pier.

One-story reinforced concrete super structure for transit shed (504 150 ft.; two 70-ft. trusses and on 40 ft. truss.)

Owner—City of Oakland Port Commission, 424 Oakland Bank Bldg. Oakland.

Architect—Eng. Dept. of Owner.

Contractor—Spivock & Spivock, Hobart Bldg., San Francisco.

Plans Being Prepared.
FACTORY Cost, \$—
STOCKTON, San Joaquin Co., Cal. North Wilson Way.

Fireproof factory.

Owner—Le Tournieu Mfg. Co., Modesto, St. Stockton.

Plans by Eng. Dept. of Owner.

The La Tournieu Mfg. Co. manufactures road building equipment.

Plans will be ready for bids in 30 days.

CAMPBELL, Santa Clara Co., Cal.—California Confection, Ltd., (California Fruit Products Institute), is conferring with Chamber of Commerce regarding a 2-acre site for the first unit of a plant for the manufacture of confections from local fruits. B. O. Curry, S. N. Hedegard and C. H. Whitman of Campbell have been appointed a committee to investigate the proposal.

Bids Opened.
STATIONS Cost, \$—
LOS ANGELES COUNTY, Orange County and Ventura County on State Highway.

Three maintenance stations (comprising one-story cottage, garage, bunk house and oil house; frame construction).

Owner—State of California.
Architect—Geo. B. McDougall, State Architect, Public Works Building, Sacramento.

Following is a complete list of bids: (1) Ventura County; (2) Los Angeles County; (3) Orange County (4) Total.

A. R. McMurtry, Los Angeles, (1) \$10,637; (2) \$10,597; (3) \$10,647; (4) \$31,000.

T. R. Hyatt, Alhambra, (1) \$10,700; (2) \$10,600; (3) \$10,395; (4) \$31,695.
Johnson & Hansen, Ventura (1) \$10,947; (2) \$10,562; (3) \$10,947; (4) \$32,338.

Nead Const. Co., Wilmington, (1) \$11,252; (2) \$11,146; (3) \$11,191; (4) \$33,589.

Adolph S. Schmid, Santa Ana, (1) \$12,690; (2) \$12,500; (3) \$11,900; (4) \$37,000.

Engineers' estimate, (1) \$12,526; (2) \$12,584; (3) \$12,511; (4) \$37,621.

Bids held under advisement.

DIAMOND SPRINGS, El Dorado Co., Cal.—Commissary warehouse of California Door Co. suffered a \$10,000 fire loss May 12. Loss included three torred automobiles.

Bids Opened.
CREAMERY Cost, \$15,000
SAN JOSE, Santa Clara Co., Cal. W. San Carlos and Locust Sts.
One-story reinforced concrete creamery.

Owner—Hester Dairy, San Jose.
Architect—W. A. and Higgins, Realty Bldg., San Jose.

Following is a complete list of bids: General Work

Frank Neves, 891 Harrison St., San Jose \$13,287

J. Thorp, San Jose 14,242

G. M. Latta, San Jose 14,490

Wm. Myers, San Jose 14,790

E. J. Smith, San Jose 14,800

The Minton Co., Mt. View 14,938

Magna & Newell, San Jose 15,590

R. O. Summers, San Jose 15,629

Plumbing, Sheet Metal and Piping I. Moltzen, 85 E San Fernando St., San Jose \$1,694

H. J. Pascoe, San Jose 1,730

Funck & Son, San Jose 2,001

Merritt & Song, San Jose 2,048

Electrical bids will be opened within a few days. All bids held under advisement.

SANTA ROSA, Sonoma Co., Cal.—Lebal Company of America, Inc., is conferring with the Santa Rosa Chamber of Commerce regarding the establishment of a plant for the manufacture of cod liver oil tablets. If the factory is located in Santa Rosa, the company would expect financial inducements.

Contract Awarded.
WAREHOUSE Cost, \$33,300
OAKLAND, Alameda Co., Cal. First and Market Sts.
One-story brick and steel warehouse.
Owner—Howard Terminal, ft. of Market St., Oakland.

Architect—Reed and Corlett, Oakland Bank Bldg., Oakland.
Contractor—James T. Walsh, 224 Bellevue Ave., Oakland.

Owner Taking Bids.
LAUNDRY Cost, \$50,000
(Including equipment)

MARTINEZ, Contra Costa Co., Cal. One-story steel frame and brick laundry.

Owner—Martinez Steam Laundry, 709 Howard St., Martinez.

Plans by A. L. Rector, 5410 Amador, Richmond.

Bids are being received by C. Arnaud, 709 Howard St., Martinez.

Sub-Contracts Awarded.
ALTERATIONS Cost, \$17,000
SAN JOSE, Santa Clara Co., Cal. 4th St. at Empire.

Alterations to brick industrial bldg. Owner—Hunt Bros., 361 N 4th St., San Jose.

Architect—None.
Contractor—P. J. Walker Co., Sharon Bldg., San Francisco.

Ornamental Iron—Fair Mfg. Co., 617 Bryant St., San Francisco.

Sheet Metal—Henry Eitzert, 748 Alameda St., San Jose.

Wrecking—San Jose Wrecking & Bldg. Material Co., 134 Stockton St., San Jose.

Steel Rolling Doors—Gunn, Carle and Co., 444 Market St., San Francisco

Composition Roofing—General Roofing Co., 3355 Beach St., Oakland.

Sliding Fire Doors—East Bay Sheet Metal Works, 1101 Market Street, Oakland.

Plumbing—C. L. Snyder Co., 98 East Santa Clara, San Jose.

Plans Being Revised.
CREAMERY Cost, \$14,000
SAN MATEO, San Mateo Co., Cal. Bayshore Highway.

Owner—Jersey Farm Creamery.
Plans by Enri Cavasso, 235 3rd Ave., San Mateo.

New bids will be taken in about one week.

Plans Being Completed.
PLANT Cost, \$3,000,000
RICHMOND, Contra Costa Co., Calif.

Group of steel frame and brick buildings (one-story assembly plant, 300,000 sq. ft.; two- or three-story wharf bldg. and receiving bldg.)

Owner—Ford Motor Car Co., Edsel Ford, president, Detroit, Mich.

Architect—Eng. Dept. of Owner.
It has been announced that plans are to be sent to San Francisco to a selected list of contractors on all trades in 15 to 20 days.

Sub-Contracts Awarded.
MILL Cost, \$—
TRACY, San Joaquin Co., Cal. One-half mile north of Tracy.

Alfalfa mill buildings (comprising six buildings all).

Owner—Denver Alfalfa Milling & Products Co., Denver, Colo.

Private Plans.
Contractor—Geo. J. Ulrich Const. Co., Modesto.

Reinforcing Steel and Wire Mesh—Soule Steel Co., Rialto Bldg., San Francisco.

Lumber and Building Material—Good Lumber Co., Tracy.

Rock and Sand—Atlas Rock Co., Bldrs. Bldg., Stockton.

Galvanized Iron and Hardware—Turner Hardware Co., 24 N American St., Stockton.

Cement and Metal Sash—United Lbr. Yard, Modesto.

United Commercial Company of San Francisco has the contract to construct a spur track in connection with the new plant.

RUTHERFORD, Napa Co., Calif.—Bella Oak Mines Co., S. H. Wyckoff, secretary, Napa, awards contract to

H. W. Gould Co., San Francisco, to construct Gould Rotary Furnace at the Bella Oak mines on the west side of the Napa valley, just south of Rutherford.

Plans Being Completed.
SPRINKLER SYSTEM Cost, \$—
OAKLAND, Cal. Inner Harbor.

Sprinkler system and electric work for Ninth Avenue Pier shed.

Owner—City of Oakland (Port Commission), 424 Oakland Bank Bldg., Oakland.

Architect—Engineering Dept. of Port Commission, 424 Oakland Bank Bldg., Oakland.

Plans Being Figured—Bids Close May 21, 2 P. M.
WAREHOUSE Cost, \$60,000
WATSONVILLE, Santa Cruz Co., Cal.

Warehouse and general offices. Owner—Espendola, Inc.

Architect—A. W. Story, Pajaro Valley Bank Bldg., Watsonville.

Plans Being Prepared.
FACTORY Cost, \$500,000
SOUTH GATE, Los Angeles Co., Cal.

Eastern Section (8½ acre site). Factory.

Owner—Grand Rapids Store Equipment Co., Grand Rapids, Michigan.

Architect—Withheld.

Contract Awarded.
CREAMERY Cost, \$35,000
OAKLAND, Alameda Co., Cal. SE E 14th St. and 19th Ave.

Two-story brick creamery. Owner—Darigold Milk Co., Ltd.

Architect—None.
Contractor—G. H. Wendt, 2116 Allston Way, Berkeley.

Contract Awarded.
OFFICES, ETC. Cost, \$25,000
VALLEJO, Solano Co., Cal.

Offices, warehouse and tanks (corrugated iron and wood frame construction).

Owner—Standard Oil Co., 225 Bush St., San Francisco.

Plans by Eng. Dept. of Owner.
Contractor—J. E. Johnston, 1248 N Ophir St., Stockton.

Contract Awarded.
LAUNDRY Cost, \$12,000
WOODLAND, Yolo Co., Cal.

One-story hollow tile laundry unit (30 by 60 ft.)

Owner—Woodland Clinic; Woodland. Private Plans.

Contractor—J. G. Motroni, Woodland.

Contract Awarded.
ADDITION Cost, \$—
EMERYVILLE, Alameda Co., Cal.

One-story brick addition to factory and warehouse.

Owner—California Packing Co., 101 California St., San Francisco.

Engineer—Phillip Bush, 101 California St., San Francisco.

Contractor—Chas. D. Vesey & Sons, 354 Hobart St., Oakland.

GARAGES AND SERVICE STATIONS

Bids To Be Taken In One Week.
GARAGE Cost, \$30,000
WATSONVILLE, Santa Cruz Co., Cal.

One-story concrete garage building. Owner—W. W. Bendell, 213 Main St., Watsonville.

Architect—A. W. Story, Pajaro Valley Bank Bldg., Watsonville.

To Be Done By Day's Work.
GARAGE, ETC. Cost, \$—

St., San Jose.

Glass and Glazing—Garden City Glass
Co., 762 Lenzen St., San Jose.

THEATRES

Plans Being Revised.
OPERA HOUSE Cost, \$1,500,000
SAN FRANCISCO. Block bounded by
Van Ness Ave., Franklin, Grove
and Fulton Sts.

Six-story Class A opera house, seat-
ing capacity, 4000; standing room,
500.

Owner—City and County of San
Francisco (S. F. War Memorial).

Architect—G. A. Lansburgh, 140
Montgomery St., & Arthur Brown,
251 Kearny St., San Francisco.

Meeting of the board is being held
next week to determine what steps
will be taken.

Preparing Plans.
THEATRE Cost, \$275,000
COMPTON, Los Angeles Co., Cal.

Two-story Class A reinforced concrete
theatre, stores and offices (audi-
torium to seat 2000; 6 stores).

Owner—Fox West Coast Theatres,
Washington St. and Vermont Ave.,
Los Angeles.

Architect and Engineer—Balch &
Stanbery, Film Exchange Bldg.,
Los Angeles.

Bids Under Advisement.
THEATRE Cost, \$100,000
HEALDSBURG, Sonoma Co., Cal.

One-story and mezzanine floor con-
crete modern theatre (to seat ap-
proximately 1,000).

Owner—Redwood Theatres, Inc., Geo
M. Mann and Chas. K. Koerner.

Architect—N. R. Coulter, 46 Kearny
St., San Francisco.

Bids are now in owner's hands. An-
nouncement will be made about May
14th.

Plans To Be Prepared.
THEATRE Cost, \$2,000,000
SACRAMENTO, Cal. NE Tenth and
L Streets.

Structural steel and reinforced con-
crete Class A theatre (to seat
2500).

Owner—Warner Bros. Pacific State
Theatres.

Architect—G. Albert Lansburgh, 140 Montgomery St., San Francisco, and Consolidated Bldg., Los Angeles.

Segregated Bids Being Taken.
THEATRE Cost, \$165,000
PASO ROBLES, San Luis Obispo Co., Calif.

One- and two-story reinforced concrete class A building (theatre to seat 1200; store, offices and apartments).

Owner—T. & D. Jr. Enterprises, Inc., 983 Market St., San Francisco (Mr. Naefy in charge).

Architect—Albert H. Larsen, 447 Sutter St., San Francisco.

Preparing Working Drawings.
REMODELING Cost each \$20,000
VALLEJO, Solano Co., Calif.
Remodel two theatre buildings.

Owner—Fox-West Coast Service Corp. Washington and Vermont Streets, Los Angeles.

Architect—Balch and Stanbery, Film Exchange Bldg., Los Angeles.

Work will include remodeling the fronts, interior alterations, painting and decorating, etc. The estimated cost is \$20,000 each.

Completing Plans.
THEATRE Cost, \$275,000
POMONA, Los Angeles Co., Calif.

Third and Gary Streets.

Two-story Class A reinforced concrete theatre (105x190 feet).

Owner—Fox West Coast Theatres, Inc., Washington and Vermont Sts., Los Angeles.

Architect—Balch & Stanbery, Film Exchange Bldg., Los Angeles.

Bids will be taken in two weeks.

WHARVES AND DOCKS

Contract Awarded.
PIER Cost, \$600,000
SAN FRANCISCO. Foot of Green St.

Steel frame and concrete pier (to be known as Pier No. 15).

Owner—State of California.

Engineer—F. G. White, chief engineer, State Harbor Commission, Ferry Building.

Contractor—Healy-Tibbitts Const. Co., 64 Pine St.

Following is a complete list of bids:

Healy-Tibbitts Const. Co. \$223,340

Merritt Chapman & Scott 329,500

Clinton Const. Co. 329,540

MacDonald & Kahn 334,650

M. B. McGowan 336,598

Pan-Pacific Piling & Const. Co. 346,000

Schuler & MacDonald, Oakland 363,000

MISCELLANEOUS CONSTRUCTION

Contract Awarded.
PAINTING Cost, \$—
SAN FRANCISCO. The Embarcadero.

Painting portions of Ferry Bldg. and adjoining structures.

Owner—State of California.

Engineer—F. G. White, chief engineer, State Harbor Commission, Ferry Building.

Contractor—D. E. Burgess, Box 432, Stockton.

Following is a complete list of bids:

(1) painting work; (2) burning and scraping.

D. E. Burgess, Stockton, (1) \$9,647; (2) \$1,225.

W. G. Thompson, (1) \$10,700; (2) \$1,625.

W. P. Blemert, (1) \$11,438; (2) \$1,875.

E. Anderson (1) \$12,867; (2) \$1,500.

Raphael & Co. (1) \$14,318; (2) \$1,275.

Aristo Painting Co., (1) \$14,468; (2) \$1,450.

A. Kahler, (1) \$14,750; (2) \$1,600.

Patterson Bros., (1) \$16,800; (2) \$1,625.

D. Zelinsky & Son, (1) \$17,150; (2) \$1,250.

J. J. Burdon, (1) \$22,240; (2) \$750.

A. Quandt & Son, (1) \$25,433; (2) \$1,800.

EUREKA, Humboldt Co., Cal.—Halsby & Lax, Eureka, at \$927.65

awarded contract by city council to construct concrete foundation for bird cage at Sequoia Park; engineer's estimate \$750.

ALAMEDA, Alameda Co., Cal.—Until May 20, 8 P. M., bids will be received by W. E. Varcoe, city clerk, to furnish and deliver:

1875 tons, more or less, crushed rock; 1250 tons, more or less, screenings; 810 tons, more or less, bird's eye screenings.

Certified check 10% payable to city required with bid. Further information obtainable from clerk.

MARCH FIELD, Riverside Co., Cal.—Construction of a swimming pool for enlisted men is contemplated at March Field, according to Col. W. C. Gardin-

hire, constructing quartermaster, who desires information from concerns that supply swimming pool equipment, particularly pumps and chlorinators.

Sub-Contracts Awarded.
SWIMMING POOL Cost, \$14,000
ATHERTON, San Mateo Co., Calif.

Atherton Avenue.

Reinforced concrete swimming pool (10 dressing rooms, showers and kitchenette; cement and brick pavements, garden, etc.)

Owner—Charles Haas, Atherton Ave., Atherton.

Architect—Gardner Dailey, 425 Mason St., San Francisco.

Contractor—Meese and Briggs, 1425 Broadway, Burlingame.

Lumber and Mill Work—Progress Lbr. Co., Redwood City.

Concrete—John Morey, Palo Alto.

Plumbing—P. E. Brand, Redwood City

Completing Plans.
POOL Cost, \$5000
WILLOWS, Glenn Co., Cal.

Reinforced concrete swimming pool (30x75-ft., depth 2-ft. 6-in. to 9-ft. 6-in.); two 1-story frame dressing rooms.

Owner—Williams Tennis Club.

Architect—O. Deichman, 110 Sutter St., San Francisco.

Segregated figures will be taken in one week.

EUREKA, Humboldt Co., Cal.—Until May 20, 5 P. M., bids will be received by John Griffith, city superintendent of public works, 524 D St., for painting three wooden tanks in connection with municipal water system. Previous bids rejected due to irregularities in the bidding. Specifications obtainable from above.

Completing Plans.
POOL Cost, \$5000
WILLOWS, Glenn Co., Cal.

Reinforced concrete swimming pool (30x75 ft., depth 2 ft. 6 in. to 9 ft. 6 in.); two 1-story frame dressing rooms

Owner—Williams Tennis Club.

Architect—O. Deichman, 110 Sutter St., San Francisco.

Segregated figures will be taken in one week.

EUREKA, Humboldt Co., Cal.—Until May 20, 5 P. M., bids will be received by John Griffith, city superintendent of public works, 524 D St., for painting three wooden tanks in connection with municipal water system. Previous bids rejected due to irregularities in the bidding. Specifications obtainable from above.

Completing Plans.
POOL Cost, \$5000
WILLOWS, Glenn Co., Cal.

Reinforced concrete swimming pool (30x75 ft., depth 2 ft. 6 in. to 9 ft. 6 in.); two 1-story frame dressing rooms

Owner—Williams Tennis Club.

Architect—O. Deichman, 110 Sutter St., San Francisco.

Segregated figures will be taken in one week.

Preparing Working Drawings.
AMUSEMENT CENTER Cost, \$—
SANTA CRUZ, Santa Cruz Co., Cal.

Adjoining Municipal Wharf.

Amusement center (1st unit comprises casino, bath house and plunge).

Owner—John Tait et al, San Francisco

Architect—L. D. Esty, Alta Bldg., Santa Cruz.

Mr. Esty is preparing plans for the first unit only. Plans will be ready for figures in September.

SACRAMENTO, Cal.—June 10 is the date set by city commissioners for election to vote bonds of \$150,000 to finance developments at the municipal airport, involving hangars, office facilities, etc. Fred J. Klaus, is city engineer.

PASADENA, Los Angeles Co., Cal.—Pasadena City Building Department will complete plans in about two weeks for replacement of wooden seats in Rose Bowl with concrete, increasing the seating capacity to 100,000. There will be approximately 18 miles of seats.

Sub-Bids Being Taken.
MARKET Cost, \$6000
SAN FRANCISCO. SE Taylor and Francisco Streets.

One-story and mezzanine floor reinforced concrete market.

Owner—A. La Rocca, 2360 Jones St., San Francisco.

Architect—Louis Mastropasqua, 580 Washington St., San Francisco.

Contractor—De Luca & Son, 666 Mission St., San Francisco.

Plans Being Figured By Selected List of Contractors.
ART GALLERY \$50,000 available
STOCKTON, San Joaquin Co., Calif.

Victory Park.

Haggin Memorial Museum and Art Gallery.

Owner—San Joaquin Pioneer and Historical Society (Donation of Mrs. Ella McKee).

Architect—W. J. Wright, Mall Bldg., Stockton.

Consulting Architect—Lewis P. Hobart, Crocker Bldg., San Francisco

Bids are to be in by May 21st.

Sub-Contracts Awarded.
PAVILION Cost, \$12,000
MANTECA, San Joaquin Co., Cal.

One and two-story brick dance pavilion.

Owner—S. D. E. S. M. Society (Portuguese Society)

Architect—Jos. Losekann, 931 N. El Dorado St., Stockton.

Contractor—T. E. Williamson, 1859 W. Park Ave., Stockton.

Plumbing and Sheet Metal Work—A. D. Ray, 735 E. Lafayette St., Stockton.

Masonry—S. H. Bartman, 336 E. Blaine St., Stockton.

Electric Wiring—Eddy Electric Co., 309 E. Weber St., Stockton.

Painting—Henry Wolters, 1233 College Ave., Stockton.

Lumber—San Joaquin Lumber Co., Scott and Madison Sts., Stockton.

Plastering bids are being taken. Concrete is now being poured and building to be completed by June 15th

Construction Under Way.
MAUSOLEUM Cost, \$75,000
VALLEJO, Solano Co., Cal.

Benicia and Glen Cove roads.

Reinforced concrete mausoleum (marble and bronze interior).

Owner & Builder—T. L. McCew, Val- lejo.

Plans by Owner.

Marble—George Eastman, 209 Mississippi St., San Francisco.

Bids Open—Held Under Advisement
POOL Cost, \$20,000
SAN LEANDRO, Alameda Co., Calif.
 At Roosevelt Grammar School in
 Dowling Bldg.

Concrete swimming pool, 60x120-ft.
 Donation of Henrietta Farrell, dec'd.
 Engineer—Merrill Guitwitz, assistant
 city engineer, San Leandro.

Following is a list of the bidders:
 Bell Co., 1826 E 15th St., Oakland.
 J. B. Bishop, 487 Athol St., Oakland.
 Carl T. Doell, 487 21st St., Oakland.
 Chester A. Gossett, 327 Davis Court,
 Oakland.

Wm. C. Keating, Central Bank Bldg.
 Oakland.

George Petersen, 2208 34th St., Oak-
 land.

George Prentice, 2207 13th Avenue,
 Oakland.

Schreiber Bros., 2945 Elmwood, Oak-
 land.

Scott Co., 1130 10th St., Oakland.

A. Soda & Son, Oakland.

Spivock & Spivock, Hobart Bldg.,
 San Francisco.

Sullivan & Sullivan, Oakland.

Wallace Walcox.

F. J. Westlund, 625 40th St., Oak-
 land.

Chas. D. Vezey & Son, 354 Hobart
 St., Oakland.

International Filter Co., Monadnock
 Bldg., San Francisco.

McLeran Co., Hearst Bldg., San
 Francisco.

Martin & Farr.

Bids have been referred to City En-
 gineer for tabulation.

Madera County supervisors have
 been petitioned to call an election to
 vote bonds of \$100,000 to finance erec-
 tion of a new county hospital to re-
 place the present plant.

TO CUT WAGES

Wages of sheet mill workers in
 union plants throughout the country
 will be reduced $\frac{1}{2}$ per cent, May 1.
 According to the Western Sheet and
 Tin Plate Manufacturers' Association,
 (New York), wages for May and June,
 based on a selling price of \$2.90 per
 100 pounds will be 22 $\frac{1}{2}$ per cent above
 the base rate against 27 per cent in
 March and April.

TO VOTE BONDS

An election has been called at Vi-
 salla, Tulare County, for June 6 to
 vote bonds of \$210,000 to finance the
 erection of additions to the present
 high school plant. The additions will
 comprise classrooms, administration
 quarters, auditorium and a central
 heating plant, it is announced by De
 Witt Montgomery, city superinten-
 dent of schools.

An election will be held June 9 in
 the Monterey Union High School Dis-
 trict, Monterey County, to vote bonds
 of \$225,000 to finance improvements
 and additions to the high school
 plant. Tentative plans for the de-
 velopments have been prepared by Ar-
 chitects Swartz & Ryland with offices
 at Monterey, Salinas and Fresno.

JAS. CREGGAN PASSES

James F. Creggan, 63, vice-presi-
 dent of the California Pottery Com-
 pany, was fatally stricken with a
 heart attack in Oakland last Monday
 evening.

Mr. Creggan was a native of San
 Francisco, a member of California
 Council, No. 380, Knights of Colum-
 bus; Lodge No. 3, B. P. O. E., and
 various other societies. He was for
 many years active in Democratic pol-
 itics.

LONG TERM FEATURES OF MODERN MORTGAGE PROVES AID TO HOME OWNERSHIP

The villian who held the mortgage
 got the beautiful daughter, in the old
 fashioned plays, because her father
 had never heard of amortization, says
 the National Association of Real Es-
 tate Boards.

Modern people chuckle at the old
 themes that pictured the family be-
 ing evicted at the hour the mortgage
 was due which usually occurred in the
 dead of night during a heavy snow-
 storm, says the Association, but few
 stop to think that these scenes re-
 flected the tenor of those times.

People did lose their home in those
 days through the operation of the old
 fashioned mortgage, says the Associa-
 tion, first, because its term usual-
 ly extended for only a year, and sec-
 ond, because there was no plan for
 its gradual reduction by periodical
 payments.

The year would pass only too quick-
 ly, sickness and other unforeseen
 events would drain the family savings,
 and the maturity date of the mortgage
 would find them faced with the ne-
 cessity of either raising the entire
 amount or throwing themselves on the
 mercy of the mortgagor for renewal.
 And these mortgagors, who were of-
 ten just private individuals with a lit-
 tle money to lend, and who were in
 no way trying to build a business in
 this field, and therefore, had no feel-
 ing of serving a client by extending
 the time, probably did demand Lucy
 in marriage or otherwise harass the
 luckless home owner.

Extensions Aid Home Ownership

The gradual development of the
 long-term mortgage and the inaugura-
 tion of the amortization plan of paying
 it off in small monthly instalments has
 helped thousands of people to buy
 homes in this country and to retain
 them after they got them.

The realty association quotes A. A.
 Zinn, Kansas City, president of the
 Mortgage Bankers' Association of
 America, and Leonard E. Fackner,
 controller of the Metropolitan Life
 Insurance Company, on the history of
 the modern mortgage.

"Fifty years ago most mortgages
 were made for twelve months, with
 the principal due all at one time,"
 says Mr. Zinn. "But the growth of the
 country and especially the growth of
 the savings banks and life insurance
 companies gave the mortgage more
 dignity and the home owner fewer bad
 nights."

"Thus, these financial institutions,
 looking for safe places in which to in-
 vest their ever growing funds, cov-
 ered the country with a net-work of fi-
 nancial correspondents who bought
 mortgages for them and fast displaced
 the family 'friend' who had been con-
 ducting this business heretofore."

"These institutions, supplemented by
 regular mortgage loan companies that
 were beginning to specialize in this
 field, soon realized the advantage of
 having steady incomes for more than
 the usual year period, and the terms
 were gradually extended to three and
 five years, with the full principal,
 however, still payable at maturity."

Payments Make Compulsory

"Then these companies began to see
 that few people were able to put by
 money to meet more or less large
 sums, unless they are required to do
 so. And they began to see that few
 people will make voluntary partial
 payments on mortgage loans. So the
 plan of reducing the mortgage by pe-
 riodical payments was evolved: this
 plan provides for monthly, semi-an-
 nual, or annual principal payments of

sums that are scarcely missed from
 the family earnings.

"In addition to removing the dread-
 ed fatal day when the entire sum was
 due, the amortization plan teaches
 borrowers habits of systematic saving
 which they often continue after the
 mortgage is paid."

"But the mortgage was to have an
 even greater evolution. Loans are
 now made for ten, twelve, and even
 twenty years. This was good busi-
 ness for the companies. It cut down
 on their overhead, as it cost so much
 to handle renewals, or to place their
 funds in other hands when short term
 mortgages were paid. The longer
 terms assured them of steady incomes
 for longer periods."

Metropolitan Makes Long Loans

"We have always, as a general rule,
 preferred the long term mortgage,"
 says Mr. Leonard Fackner, control-
 ler of the Metropolitan Life Insurance
 Co., the largest insurance company in
 the world, whose outstanding mort-
 gage loans at present amount to more
 than a billion dollars. "As you, of
 course, realize we annually invest large
 sums in first real estate mortgages. It
 is our object to invest this money and
 keep it invested for as long a period
 as possible consistent with safety and
 adequate return."

"It is for this reason, therefore,
 that practically all of the larger loans
 we make on strictly commercial prop-
 erties are for a long term, ranging ten,
 fifteen or twenty years. On residential
 loans, in addition to the advantage of
 these long terms described above,
 there is the advantage to the owner
 of gradually reducing his indebtedness
 on his home without the fear of having
 his mortgage called, or of necessity
 arranging for an extension or new
 mortgage during a period when it
 might prove a hardship."

Naturally, all companies use care
 in placing their mortgages in the be-
 ginning, and the borrower's ability to
 pay is investigated, so they reason
 that if the man is good for three
 years' interest, he is good for three
 years', if he wants the mortgage to
 last that long. And, of course, he
 does! The longer term permits him
 to settle down and pay it off in com-
 fortable instalments. He is not har-
 assed by thoughts of possible refusals
 of renewals. He does not have to pay
 renewal or refinancing charges and
 commissions, which often run high.
 His dreams must certainly be sweeter!

BAKERSFIELD COUNCIL DEFERS ACTION ON LICENSE LAW

Members of the building trades in
 Bakersfield have petitioned the city
 council for the passage of an ordi-
 nance requiring general and sub-con-
 tractors to post a surety bond to in-
 sure protection for the general public.

The petition asks that two classifi-
 cations be made, Class A and Class
 B. Class A contractors, under the
 plan, will be forced to post a bond of
 \$10,000 and Class B contractors the sum
 of \$5,000.

The plan is modeled after that used
 in Compton, Calif., which is said to
 have worked out in a beneficial man-
 ner to both the contractors and the
 public. Pledgers for the surety bond
 ordinance say that the Compton plan
 has been successful to a high degree
 and has aided in legitimizing the gen-
 eral and subcontracting jobs.

The council appointed a committee
 to investigate the matter and will vote
 on it at next Monday night's session.

Engineering News Section

BRIDGES

SHASTA COUNTY, Cal.—Until June 1, 2 P. M., bids will be received by State Highway Commission to construct timber bridge over Salt Creek about 15 miles east of Redding, consisting of one 60-ft. pony truss span on concrete piers and six 19-ft. approach spans on frame bents with concrete pedestals.

See call for bids under official proposal section in this issue.

OLYMPIA, Wash.—Until June 17, bids will be received by State Highway Commission for the steel superstructure of the new Aurora bridge in Seattle, involving 7500 tons structural steel; estimated cost \$1,500,000. Plans obtainable from Samuel J. Humes, State Director of Highways at Olympia.

MONTEREY, Monterey Co., Cal.—Dean Construction Co., Berkeley, at \$24,245 awarded contract by State Highway Commission to construct a timber bridge across Alder Creek, about 29 miles north of San Simeon, consisting of sixteen 19-ft. spans on frame bents with concrete pedestals, involving: 600 cu. yds. struc. excav.; 140 cu. yds. class B Port. cem. conc.; 127 M. ft. b.m. redwood timber, dense select all-heart stud grade; 45 M. ft. b.m. redwood timber, select all-heart stud grade; 69 tons broken stone bit, macadam surf.; 6 tons asph. road oil; 1 lot, misc. items of work.

EUREKA, Humboldt Co., Calif.—Henry Padgett, Eureka, at \$4,418 submitted low bid to county supervisors to construct Quill Slough culvert. All bids, taken under advisement, follow:

Henry Padgett	\$4,418
Oliver S. Omlie	4,963
Walter Selvig	5,125
Elmer Gardner	6,165

EUREKA, Humboldt Co., Calif.—Henry Padgett, Eureka, at \$7,200 awarded contract by county supervisors to construct bridge over Old River near Ferndale. Complete list of bids follows:

H. Padgett	\$7,200
Elmer Gardner	7,344
H. A. Anderson	7,890
Smith Brothers	8,654
Engineer's estimate	8,000

CHICO, Butte Co., Cal.—T. H. Polk, Chico, only bidder at \$1,649 awarded contract by city council to widen Broadway bridge over Little Chico Creek, involving removal of old r. r. trestle west of the bridge and widening by 19 ft., 5 ft. of which will be for sidewalk. Concrete construction.

SACRAMENTO, Calif.—U. S. War Department has approved plans submitted by Sacramento county supervisors for proposed Snodgrass Slough bridge near Walnut Grove; estimated cost \$60,000. Chas. W. Deterding, Jr., county engineer.

OROVILLE, Butte Co., Cal.—T. H. Polk, Chico, at \$3,370 awarded contract, by county supervisors to construct wooden bridge over Chico Creek near the Frank Mickey place on the proposed Chico Canyon road.

NEVADA COUNTY, Cal.—California State Highway Commission seeks authority of State Railroad Commission to construct an overhead crossing over the tracks of Southern Pacific Railroad two miles west of Crystal Lake, Nevada County, known as Yuba Pass, at an estimated cost of approximately \$67,335.25.

SHASTA COUNTY, Cal.—California State Highway Commission seeks authorization of the State Railroad Commission to construct an undergrade crossing under the tracks of Southern Pacific Company at Cottonwood, approximately 14 miles south of Redding, Shasta County, at an estimated cost of approximately \$130,000.

KERN COUNTY, Cal.—California State Highway Commission seeks authorization of Railroad Commission to construct an undergrade crossing of the tracks of The Atchison, Topeka & Santa Fe Railway Company at Wasco, Kern County. The estimated cost of the proposed undergrade crossing is \$38,600, exclusive of paving, and the railway company has agreed to pay 50 per cent of the same.

REDDING, Shasta Co., Cal.—Until May 23, bids will be received by county supervisors to construct Oregon Gulch Bridge. Plans obtainable from County Surveyor Carl F. Mau.

SANTA BARBARA, Cal.—Until 10 A. M., June 2, bids will be received by the county supervisors for the construction of a structural steel highway bridge with wooden floors and rails, concrete footing and abutments, including painting or painting and galvanizing, over San Roque Creek, on the Goleta Foothill Blvd., 3rd Road Dist. Plans may be obtained from the county surveyor's office upon deposit of \$5. Certified check, 5%. D. F. Hunt, clerk of the board.

REDWOOD CITY, San Mateo Co., Cal.—County supervisors petitioned to construct bridge over Seal Creek slough east of Beresford Park. Referred to County Surveyor George A. Kneese for report.

SHASTA COUNTY, Cal.—As previously reported, bids will be received June 4 by State Highway Commission to construct timber bridge over Salt Creek, 15 miles east of Redding, consisting of one 60 ft. pony truss span on concrete piers and six 19 ft. approach spans on frame bents with concrete pedestals. Project involves: 300 cu. yds. structure excavation; 68 cu. yds. class A cement concrete (structure); 78 cu. yds. class A cement concrete (pavement); 30 cu. yds. class B cement concrete; 16,500 lbs. reinf. steel; 17,750 lbs. structural metal; 3100 lbs. steel castings; 3 m. ft. board measure redwood timber, dense select all-heart structural grade; 26 M. feet board measure redwood timber, select all-heart structural grade; 1 lot miscellaneous items of work.

MODESTO, Stanislaus Co., Cal.—County Surveyor J. H. Hoskins completes plans for fixed span bridge over the San Joaquin river northeast of

Patterson. Bids for construction will be asked when the plans have received the approval of the War Department.

SACRAMENTO, Cal.—County Engineer Chas. Deterding Jr., instructed by county supervisors to prepare plans for bridge over Snodgrass Slough, construction having been authorized by the War Department.

DREDGING, HARBOR WORKS & EXCAVATIONS

BAY POINT, Contra Costa Co., Cal.—Peter Bollomo, Bay Point, will spend \$7000 in the construction of a yacht harbor on Suisun Bay just north of Bay Point.

LONG BEACH, Cal.—A bond issue of \$300,000 for the construction of a navy landing pier is to be voted on at the election May 13. Plans have been prepared and approved by the consulting engineers Leeds & Barnard. The work includes more than 1000 feet of rock work west of the outer end of the Rainbow Pier.

STREET LIGHTING SYSTEMS

SAN FRANCISCO—Until May 21, 2:30 P. M., bids will be received by S. J. Hester, secretary, Board of Public Works, to install ornamental street lighting system in Hyde street between Market and California Sts. Plans obtainable from Bureau of Engineering, 3rd Floor, City Hall.

EUREKA, Humboldt Co., Cal.—City council petitioned to install ornamental electrolier system in Fourth St., bet. Broadway and Myrtle St., the work to be done under the Imp. Act 1925. Taken under advisement.

OAKLAND, Cal.—City Council declares intention to install ornamental electrolier system together with undergroud system in Foothill Blvd., between 55th and 62nd Aves., involving 59 single-light standards. 1911 Act. Hearing May 29. Frank C. Merritt, city clerk. Walter N. Frickstad, city engineer.

CHICO, Butte Co., Cal.—Until May 27, 8:15 P. M., bids will be received by H. H. Hume, city clerk, to install, operate and maintain a system of electrolier street lights in various streets, involving 68 electrolier standards in all. Certified check 10% required with bid. Further information obtainable from city clerk.

LOS ANGELES, Cal.—H. C. Reid Co., 389 Clementina St., San Francisco, submitted low bid to the county supervisors May 12 at \$20,861 for constructing a lighting system in Brooklyn Ave., between Record St. and Mednik Ave., Belvedere, C. I. No. 535, involving 48 Marbelite standards, type 2500. Estimate, \$21,675. The other bids were: R. A. Wattson, \$21,322; John R. Davis, \$21,492; Newbery Elec. Co., \$22,020; Walker & Martin, \$22,700.

MACHINERY AND EQUIPMENT

OAKLAND, Cal. — General Engineering & Drydock Co., Ft. of Fifth Ave., Oakland, at \$8975 awarded contract by City Port Commission for dredge repairs.

HAWTHORNE, Nevada — Until June 5, 10 A. M., bids will be received by S. T. Kelso, county clerk, to furnish and deliver 2½-ton or 3-ton motor truck, with or without dump body. Further information obtainable from clerk.

YUBA CITY, Sutter Co., Cal. — Until May 23, 7 P. M., bids will be received by John P. Onstott, clerk, Yuba City Union High School District, to furnish and deliver school bus. Certified check 10% payable to clerk required with bid. Specifications obtainable from clerk.

REEDLEY, Fresno Co., Cal. — Logan Auto Co., Fresno, at \$2,575 for chassis and \$1,950 for coach, awarded contract by Reedley High School District to furnish and deliver 42-passenger school bus.

EL CENTRO, Imperial Co., Cal. — The county purchasing agent has been authorized by the supervisors to advertise for bids for supply road district No. 1 with one 2 ft. road grader, Austin-Western type; to advertise for bids for one Caterpillar type tractor No. 30 for road district No. 1; and to purchase two carloads of lumber for road district No. 4.

SAN FRANCISCO — Until May 19, 2 P. M., bids will be received by the U. S. Forest Service, Ferry Bldg., to furnish and deliver nine reversible bulldozer attachments to be fabricated and assembled to attach to a Model 30 Caterpillar. Specifications and further information obtainable from above office.

FIRE EQUIPMENT

RIVERBANK, Stanislaus Co., Cal. — City trustees will ask bids shortly to furnish and deliver a 1½-ton chassis and 300- to 400-gal. pump for fire department. G. C. Staley is city clerk.

YUBA CITY, Sutter Co., Cal. — City council plans purchase of 500 ft. 2½-inch hose for fire department. Informal offers have been submitted by two concerns.

Mr. E. E. Shelton, 1105½ 30th St., No. 1, Indianapolis, Indiana, is in the market for timber tract. Shipping facilities must be first class and timber on land must be of high quality. Strictly cash transaction.

SCOTCH SHIPBUILDERS DRAW ON U. S. FOR TIMBER SUPPLIES

Clear decks of Douglas fir lumber are in demand by Scotch Shipbuilding Industries, according to a report by G. E. Chamberlain, Consul General in charge, Glasgow, to the Lumber Division of the Department of Commerce.

Despite the fact that fair stocks of this wood are reported, decking stock is difficult to obtain. White Pine, pitch pine, teak and Scandinavian spruce are also in steady demand for shipbuilding, according to reports.

During the first three months of 1930 the Clyde shipbuilders launched 43 vessels of 115,571 tons. This is less by \$2,040 tons than the first quarter of 1929. While fewer new contracts were received in March than during the months of January and February, there is still a substantial amount of work on hand, chiefly cargo boats and tankers. It is reported that not many passenger liners are under construction at the present time.

There is considerable inquiry for pitch pine in the Glasgow district especially for the larger sizes, which appear to be scarce. With the exception of plain oak, other American woods have moved slowly. A slightly better demand for oak and pitch pine from railway car builders is reported.

The tendency in Scotland at present is to contract ahead for Douglas fir, California white pine and Sitka spruce.

The strike among the joiners in Glasgow and vicinity restricted the movement of lumber into the market, as well as the placing of contracts for future delivery. Following the strike, the trade revived and there is a fairly good demand for Scandinavian woods and Douglas fir, and also for the cheaper Russian stock, for construction purposes.

It is believed that the chief demand for American lumber during the next three months will be for Douglas fir, pitch pine, plain and quartered oak, California white pine, Sitka spruce, and poplar.

OFFICIAL PROPOSALS

STATE OF CALIFORNIA

DEPARTMENT OF PUBLIC WORKS

DIVISION OF HIGHWAYS

NOTICE TO CONTRACTORS

SEALED PROPOSALS will be received at the office of the State Highway Engineer, Public Works Building, Sacramento, California, until 2 o'clock P. M., on June 4, 1930, at which time they will be publicly opened and read, for construction in accordance with the specifications therefor, to which special reference is made, of portions of State Highway, as follows:

Butte County, between Bardees Creek and Pulga (11-But-21-C), about one and eight-tenths (1.8) miles in length, to be graded.

Lassen County between Susanville and two miles west of Milford (11-Las-29-C,D), about twenty-two (22.0) miles in length, seal coat and bituminous surface treatment to be applied.

Shasta County, a timber bridge across Salt Creek about 15 miles east of Redding (11-Sha-28-A), consisting of one 60-foot pony truss span on concrete piers and six 19-foot approach spans on frame bents with concrete pedestals.

Shasta and Lassen Counties, between Fall River Mills and Big Valley (11-Sha-Las-28-E & A), about seventeen and nine-tenths (17.9) miles in length, to be graded and surfaced with untreated crushed gravel or stone.

Nevada and Placer Counties, between South Fork of Yuba River and Soda Springs (11-Nev-Pla-37-A, F,B) about ten and eight-tenths (10.8) miles in length, to be surfaced with crusher run base and untreated crushed gravel or stone surfacing.

Marin County, between San Rafael and Alto (IV-Mrn-1-C), about four and four-tenths (4.4) miles in length, to be surfaced with bituminous macadam.

Proposal forms will be issued only to those Contractors who have furnished a verified statement of experience and financial condition in accordance with the provisions of Chapter 644, Statutes of 1929, and whose statements so furnished are satisfactory to the Department of Public Works. Bids will not be accepted from a Contractor to whom a proposal form has not been issued by the Department of Public Works.

Plans may be seen, and forms of proposal bonds, contract and specifications may be obtained at the said office, and they may be seen at the offices of the District Engineers at Los Angeles and San Francisco, and at the office of the District Engineer of the district in which the work is situated. The District Engineers' offices are located at Eureka, Redding, Sacramento, San Francisco, San Luis Obispo, Fresno, Los Angeles, San Bernardino and Bishop.

A representative from the district office will be available to accompany prospective bidders for an inspection of the work herein contemplated, and Contractors are urged to investigate the location, character and quantity of work to be done, with a representative of the Division of Highways. It is requested that arrangements for joint field inspection be made as far in advance as possible. Detailed information concerning the proposed work may be obtained from the district office.

No bid will be received unless it is made on a blank form furnished by the State Highway Engineer. The special attention of prospective bidders is called to the "Proposal Requirements and Conditions" annexed to the blank form of proposal, for full directions as to bidding, etc.

The Department of Public Works reserves the right to reject any or all bids or to accept the bid deemed for the best interests of the State.

DEPARTMENT OF PUBLIC WORKS

NOTICE TO CONTRACTORS

SEALED PROPOSALS will be received by the Department of Public Works, Division of Highways, at the office of the District Engineer, P. O. Box 1353, Fresno, California until 2:00 o'clock P. M., on May 26, 1930, at which time they will be publicly opened and read, for performing work as follows:

Fresno and King Counties, between Coalinga and Hanford, VI-Fre-Kin-10-D.E.F.B. & C. about forty-five (45) miles in length, light fuel oil to be furnished and applied to the shoulders.

Plans may be seen, and forms of proposal, bonds, contract and specifications may be obtained at the above address.

No bid will be received unless it is made on a proposal form furnished by the District Engineer. Each bid must be accompanied by cash, or a certified check made payable to the Director of Public Works, for an amount equal to ten (10) per cent of the amount bid, such guaranty to be forfeited should the bidder to whom the contract is awarded fail to enter into the contract.

The Department of Public Works reserves the right to reject any or all bids or to accept the bid deemed for the best interests of the State.

LAB TESTS OF REINFORCED CONCRETE ARCH RIBS

Bulletin No. 202 of the Engineering Station of the University of Illinois contains the results of an investigation made with reinforced concrete arch ribs. One object of the test was to determine the strength developed by the concrete in an arch in order that a comparison might be made with the strength developed by the same concrete in control cylinders.

Also it was desired to compare the actual stress at various loads with the theoretical stress at the same loads. Arches of various widths were tested in order that the effect of the slenderness ratio of a rib upon its strength might be determined. A few tests were made to determine whether spiral reinforcement increases the strength of an arch rib, as it does the strength of concrete columns. The magnitude of the deformation of concrete is known to depend upon the length of time that the load is applied. Tests were made to determine the effect of time yield upon the relation between reaction and abutment displacements.

The bulletin contains a description of the specimens and apparatus used. It includes a detailed report of tests of thirteen arches, eleven specimens being subjected to symmetrical loads and two to unsymmetrical loads, as well as the results obtained from the investigation.

Copies of Bulletin No. 202 may be obtained without charge by addressing the Engineering Experiment Station, Urbana, Illinois.

A. H. Albertson, Seattle architect, has been nominated for first vice-president and director of the American Institute of Architects. The election will be held at Washington, D. C., during the Institute's 63rd convention, May 21-23. Nominations of officers are made by petitions by institute members grouped by state chapters. The only other nominee for first vice-president and director is Arthur Wallace Rice of Boston.

Mr. Albertson also has been nominated for second vice-president of the institute, with additional candidates consisting of Mr. Rice, Horace W. Peaslee of Washington, D. C., and Dalton J. V. Snyder of Detroit. The only other nominee for president are Charles A. Favrot of New Orleans and J. Monroe Hewlett and Robert D. Kohn of New York.

A "Pittsburg" Automatic Water Heater installed in the Home indicates high quality throughout.

Recommended and specified by all the leading architects, plumbers and builders.

Consider the high merit of the Pittsburg coupled with "Pittsburg Perfect Service."

BUSINESS CONDITIONS NEAR NORMAL—LAMONT

With a continuation of present trends in business conditions the United States should be back to normal within a few months, Secretary of Commerce Lamont declares.

The normal curve of business is steadily upward to meet the increasing requirements of greater population and increased consumption, according to Lamont.

"At this time in 1921 business was 22 points below the normal level, while today it is but 6 points below," Lamont said. "Underlying conditions are better today than in 1921 and if the present rate of progress continues we should be back to normal in two or three months."

Lamont said that the steel industry expected to "carry on" at about the present rate for sometime. He characterized the 80 per cent of capacity operation in the steel industry as satisfactory, remarking that such an output was equal to 85 to 100 per cent capacity operation a few years ago.

Total construction contracts in April amounted in value to \$483,000,000, the largest since August, 1929, he said. This figure, however, was 25 per cent less than April, 1929, an unusually heavy month, while contracts for the first four months of the year averaged 17 per cent less than in 1929.

April public utilities and public works contracts were valued at \$149,670,000, compared with \$105,350,000 in March and \$152,127,000 in April last year. For the first four months contracts of this character amounted to \$452,910,000, an increase of 30 per cent over last year.

Referring to retail trade Lamont said that 51 per cent of stores reporting showed good to excellent trade in April, while 22 per cent of the same stores made similar reports in March, indicating an improvement.

O. M. THOMPSON, CONTRACTOR, DIES IN OAKLAND

Oliver M. Thompson, 78, a member of the firm of Thompson Bros., contractors of Fresno, and a resident of that city for the past fifty years, died in an Oakland hospital last Wednesday.

Active in the business development of Fresno, Thompson also had taken part in civic affairs and was president of the board of education from 1901 to 1909. During his term of office, the school system underwent a considerable expansion.

Thompson was born in Lewistown, Missouri, in 1852. He is survived by his widow, Mrs. Nancy Hope Thompson; a son, Eugene O. Thompson of Fresno, and 7 grandchildren, Ronald, Clinton, Dorothy, Robert, Nancy Barr, Jean and Betty Thompson.

H. T. Didesch, former managing director of the Millwork Institute of California, had taken charge of the association activities of the East Bay millwork group at Oakland.

C. OF C. WITHHOLDS G. G. BRIDGE APPROVAL

San Francisco's Chamber of Commerce does not approve, nor does it oppose, construction of the Golden Gate bridge or of a transbay bridge.

The Chamber of Commerce will take no stand on the bridge question until a complete investigation has been made and the findings studied. Then, if satisfied that either project is "sound economically," the Chamber of Commerce will endorse.

So says Almer M. Newhall, president of the Chamber, who further asserts that no criticism will force the organization into a premature stand.

The Chamber of Commerce, Newhall announces, will support the Golden Gate Bridge Project only under the following conditions:

"If that bridge is necessary to the progress of San Francisco and its metropolitan area; if it can be built to handle adequately the traffic demands made upon it at a cost which can be justified on sound business principles; and if this cost can be determined accurately and finally before a shovelful of earth is turned in the construction of that bridge."

BERKELEY CITY MANAGER TO ACCEPT FLINT POSITION

John N. Edy, city manager of Berkeley, has accepted an appointment to head the municipal business of the city of Flint, Mich., according to word received at Berkeley.

The salary paid by Berkeley is limited by charter to \$10,000 annually. The Flint salary will be \$15,000 to start with and an annual increase of \$1000 until the maximum of \$20,000 is reached.

Edy entered Berkeley's municipal service in 1923, the first man to hold the position of city manager. He introduced many innovations which have gained him notice throughout the nation. He was given a degree of master of arts at the University of California in 1926. He is a civil engineer by training, holding degrees in this subject from the University of Missouri.

SEEVER REPRESENTS GENFIRE IN PACIFIC NORTHWEST

H. E. Seever, for several years with the Genfire Steel Company in various capacities throughout the country, has been appointed district manager for Washington and Oregon, with offices in the Seaboard Bldg., Seattle. He succeeds Geo. Turner, resigned. Mr. Seever began his service with the company in the main office at Youngstown, Ohio. He is a graduate of the engineering school of the University of Kansas. Products of the Genfire Steel Company distributed in the Northwest are steel joists, steel sash, metal building specialties, steel pangs and water proofing products.

EFFORTS TO ADJUST CRAFT DISPUTES OF BUILDERS PROGRESS

Department of Labor officials are deeply concerned in the matter of jurisdictional labor disputes and have expressed satisfaction concerning negotiations to provide an impartial agency, representing contractors of the country and the building trades, to adjust inter-craft differences, the Director of the Conciliation Service, H. L. Kerwin, stated orally to U. S. Daily on May 12.

Contractors' representatives and the spokesmen for the building trades are reported to be making rapid progress in conferences now going on and it is anticipated that they will finally accomplish the work of drawing up a plan that will be satisfactory to all interests concerned, Mr. Kerwin said.

He explained that a joint committee composed of eight representatives of the contractors and eight delegates of the tradesmen met in Tampa, Fla., in January to take up the matter of these disensions, which annually cause a large economic loss because of stoppage of work on construction projects. A sub-committee was formed of three representatives each of the contractors and craftsmen and it formulated a preliminary plan.

The sub-committee presented the plan to the larger body later in meetings in Washington, D. C., according to Mr. Kerwin. Certain changes were suggested. At a conference in Washington the larger committee decided on April 24 that there should be no stoppage of work on account of jurisdictional disputes during a 90-day period when the plan was being considered. The sub-committee is to meet again next month to act on suggestions concerning the plan which it is hoped will be received in the interim from representatives of the national building trades, and then present another draft of the plan to the joint committee at a meeting to be held about July 28. The committee hopes to take final action on the plan at that time, Mr. Kerwin said.

Inventions, improvements and changes in building materials and methods are bound to cause occasional disputes over jurisdiction and some of them are honest differences in opinion, Mr. Kerwin, asserted. If the question were one of wages, working conditions, or a controversy of some sort between workers and employers, there might be a more justifiable reason for stopping work until a settlement could be made, he declared.

In a dispute as to which craft shall do a certain kind of work, the owner or employer is in no way at fault and has no part in the dispute, he pointed out. He has entered into a contract and, in all fairness, is entitled to the services of labor, even though the crafts disagree among themselves, it was added. Agreements generally call for unbroken work until the construction is completed, said Mr. Kerwin.

METHODS OF PROCEDURE IN FILING MECHANICS' LIENS

By HARRY C. WESTOVER, Attorney-at-Law

As stated in a previous article, it is only necessary that the following things be stated in a lien: 1. The amount due after deducting all just credits and offsets. 2. The name of the owner or reputed owner. 3. A general statement of the kind of work done or the materials furnished. 4. The name of the person by whom the lien was employed. 5. A description of the property sought to be charged sufficient for identification must be given, and the claim must be verified by the oath of the claimant or some other persons.

In regard to the amount due claimant, nothing more is required in the lien than a statement of the demand showing its nature and character and the amount due or owing. It is immaterial whether the whole amount due, that is, the full amount of the contract price, is stated, with credits or the true amount due after deducting credits and offsets is given, provided of course, that the facts are correctly stated. It is necessary to include in the demand a statement as to the amount due after deducting all just credits and offsets and a claim that merely states a sum due to the claimant without any reference to payments or offsets is bad. Davis vs. Livingston 29 Cal. 283. In the absence of a fraud or willful falsity, a claim of lien which is good in other respects is not vitiated because the claim is made for more than the amount due, and a mistake in stating the amount due is unimportant as long as the mistake was made in good faith. In the absence of fraud the fact that a claim of lien places too high a value on materials furnished will not defeat the lien for a just amount. The amount of one's lien is not necessarily what he claims to be due but what is actually due and owing.

Section 1183 of the Civil Code of Procedure specifies that claimants "shall have a lien upon the property for the value of labor done and materials furnished." The statute does not say anything as to the contract price and the lien cannot exceed the reasonable value of the work and labor performed or the materials furnished regardless of the contract price. Where there is an attempt to hold property on a lien that belongs to one other than the party with whom the lien claimant made the contract, the property should not be required to stand a lien for more than the reasonable value of the materials furnished or the work and labor done regardless of the contract price.

Since the amendment of 1919, no statement of terms, time given or conditions of the contract or the price and when payable is required.

It is necessary that the claimant give the name of the owner or reputed owner, and when the name of the owner or reputed owner is not known to the claimant, the claimant may state the fact and perfect his lien without naming the owner. An honest mistake in the name does not invalidate the lien and if in good faith the claimant states the name of a reputed owner he does not lose his lien if he afterwards ascertains that some other person was the owner. "It is not the Legislative intention that the claimant shall state the name of the true owner at the risk of losing his lien if it turns out that he made an error." Corbett vs. Chambers 100 Cal. 178. A statement of lien not giving

This is the eighth of a series of articles on the Mechanics' Lien Law, prepared by Harry C. Westover, attorney, of Santa Ana. Other articles will be published from time to time.—Editor.

the name of the owner and not stating that it is unknown, is defective. Hooper vs. Flood 54 Cal. 218.

It is necessary for the claimant to make a general statement as to the kind of work done or materials furnished. A claim which states that it is for lumber furnished, sufficiently discloses the character and quality of the material. Germanie B. & L. Assn. vs. Wagner 61 Cal. 349. The claimant should state whether the material was lumber, brick, sash and doors, or steel, but it is unnecessary to describe the kind of lumber or the kind of sash and doors, or the kind of brick. Labor should be described as to whether it is carpentry labor, plastering labor, etc. The purpose of the lien is to give information and any information which will allow the owner to determine what kind of labor or materials were used or furnished is desirable.

It is important that the name of the person by whom claimant was employed or to whom he furnished materials be given. One of the fundamental rules for the establishment of a Mechanics' Lien is that there must be a valid contract with the lien claimant on which to predicate the lien. A lien claimant before being allowed to establish his claim must prove that he was employed to perform labor or to furnish materials on the property on which the lien is placed. One who goes upon property and does labor upon the property or furnishes materials to be used on the property without some agreement from some one in regard to the furnishing of materials or labor cannot establish a valid lien, inasmuch as there has been no contract on which to predicate the lien. Consequently it is very important that the lien must contain a statement showing the name of the person by whom the lien claimant was employed or to whom he furnished materials and unless the claim of lien contains such a statement it is defective. The requirement is intended to advise the owner whether the asserted debt is against him personally or whether the claimant looks to the original contractor and to the property. A claim for materials furnished must truly state the name of the person to whom the claimant furnished the materials and a false statement in this regard is more objectionable than if the claim had contained no statement. It is immaterial whether the owner purchased the materials in his own name or that of a firm of which he is a member and a claim stating that the claimant was employed by a corporation is not objectionable because not giving the name of the agent or officer who made the contract of employment.

The lien must give a description of the property sought to be charged sufficient for identification. The description is required to be only such as will be sufficient for identification and the same fullness and precision of description is not required as in the case of deed or judgment. A technical description is not necessary nor is it necessary that the description should be full or precise or that the boundaries of the property should be given. The test is whether the description given would enable a party

familiar with the locality to identify the premises intended with reasonable certainty to the exclusion of others. It is sufficient if the description identifies the property by referring to the facts, and is if it points clearly to a piece of property and there is no other which will answer the description. A claim describing the property as a mill in a given town and county is sufficient as a matter of description where it does not appear that there is any other mill at that place. It is not necessary to give a technical description, but lien claimants who fail to give a legal description of the property on which they wish to file a lien can certainly be criticized for not obtaining the proper description is playing with fire as the description may be so loosely drawn as it will not describe the premises in question. The best description obtainable is the description giving the lot, block and tract number.

When the claimant has met the above requirements in his lien then it must be signed and verified. The claim of liens should be signed by the claimant and it must be verified by the oath of claimant or some other person. It may be verified by the claimant's agent, attorney or manager. The purpose of the verification is not to prove the claim but to show good faith and prima facie to support the claim the purpose of giving notice. A claim of a corporation need not bear the corporation seal where it is verified by a duly authorized officer. Heiberling vs. Day 59 App. Cal. 13.

No mistake or error in the statement of the demand or of the credits and offsets allowed or of the balance asserted to be due to claimant, nor in a description of the property against which the claim of lien is filed shall invalidate the lien unless the court finds that such error in the statement was made with the intent to defraud or the court shall find that an innocent third party without notice direct or constructive has since the claim was filed become the bona fide owner of the property liened upon and that the notice of lien was so defective that it did not put the party upon further inquiry in any manner. C. C. P. 1203. In the absence of fraud and prejudice to an innocent third party a mistake or error in the claim does not invalidate the lien.

The court does not expressly authorize the amendment of the claim of lien hence the claim of lien is not capable of being amended. However, a new claim of lien may be filed within the time in which liens must be filed.

Suits to foreclose liens must rely upon the claim of lien and defects in the claim of lien may not be aided by the complaint. Madera Flume Co. vs. Kendall 120 Cal. 182.

FIR-TEX INSULATING BOARD PLANT OPENS JULY 1

Completion of the new \$1,500,000 plant of the Fir-Tex Insulating Board Company at St. Helen's, Ore., by July 1 is announced by Sherman M. Miles, San Francisco official of the company.

The new product will be placed on the market shortly following that date. The plant has an estimated capacity of 75,000,000 feet annually of insulating board and lath.

SACRAMENTO BUILDERS TRADES GO FIVE-DAY WEEK ON JUNE 2

Officials of Sacramento Builders' Exchange and the Sacramento Building Trades Council, representing contractors and workers, announce that a joint conference of both bodies had agreed upon a 5-day week for members of all building trade unions in Sacramento, effective June 2nd.

The trades council, composed of representatives of the workers, has accepted the agreement. The board of directors of the exchange is expected to act favorably on the agreement during the next week.

The announcement was made jointly by L. L. Patterson and M. F. Connors, secretaries of the exchange and trades council, respectively. They estimated that between 2,500 and 3,000 tradesmen, helpers and contractors would be affected by the proposal.

Patterson said he regarded it as practically certain that the board of directors of the contractors' organization would approve the agreement.

The proposal has been before both groups since early last Fall. Referred to a joint conference board, it has been the subject of numerous meetings at which various minor compromises were effected.

Patterson said the terms of the

agreement had been made sufficiently broad to permit the contractors to give the same type of service to the public on Saturdays as they are giving now.

Any emergency work such as plumbing, wiring, sewage, etc., will be handled without inconveniencing the public in any way.

"The contractor will be able to get the same amount of work done in five days as in six, if he is pressed for time, by adding more men to the job," Patterson said.

Connors explained that the move was favored by the unions as a means of giving a greater number of men employment. He said there has been an oversupply of building craftsmen in Sacramento for some time due to a slowing up in building activity and other conditions.

The agreement will not affect the existing daily wage scales for the men engaged in the various crafts. The practical effect of the plan will be to decrease the average weekly earnings of men regularly employed on a six-day week basis, this decrease going into the pockets of the additional workers employed who otherwise would be without work.

proposed building construction work. Every building project will be thoroughly investigated for the purpose of determining, before the job starts, whether or not it is properly financed. This information will be available to associations affiliated with the bureau. These associations will in turn present such information to their members. It is believed this service alone will prove invaluable inasmuch as it will enable each unit concerned to know exactly what the financial status of each job is at all times until completed.

The aims of the bureau are tersely stated under five headings: 1. To strengthen the mutuality of interest between the responsible buyer and seller. 2. To protect bona fide dealers' responsible customers, and the building public. 3. To bring about results ante-mortem—not post-mortem. 4. To enable the individual to avoid making mistakes of judgment in the extension of credit. 5. To reduce, in the interests of economy in the general business of distribution, losses suffered through non-payment of accounts, due to dishonesty or financial irresponsibility, and which necessarily become a part of the overhead cost of distributing.

The operation of the plan was begun when each member dealer reported to the bureau a complete list of accounts on his books, giving the name, address, the total amount due, the amounts 30 days, 60 days and 90 days past due, as well as all accounts more than 90 days past due. The exact status of each account in other respects, such as whether the account was in the hands of an attorney, was protected by lien, whether a judgment had been secured, or the respective firm was out of business, in bankruptcy, etc.

On the first day of each month each member dealer reports to the bureau a list of all material accounts on their books, showing the balance due on the first of the month. This report must be in the bureau not later than the 10th of the month. A ledger account is opened in the bureau for each account reported by the members. This ledger account will carry separate columns for each member reporting the account and will show a complete record of all sales and collections by each member.

All accounts are payable on the 10th of the month following delivery, and any account unpaid on the first of the third month following delivery will be placed on the cash list. The bureau will notify customers on the 15th of the second month following delivery, to pay the account prior to the first of the next month if they wish to retain their credit privileges. A composite list will be prepared on the 10th of each month, listing the names and addresses of all customers to whom credit is thus refused.

Another list, termed "extra hazardous," will be issued quarterly and will contain the names of individuals or concerns who have gone out of business, leaving behind unpaid debts, well known "dead beats" and other undesirable accounts. Accounts may be removed from this extra hazardous list only by a vote of the Board of Directors of the Bureau. Other reports to be prepared and circulated among members include daily remittance reports, which will disclose the changing status of customers, etc.

The report of each cash payment of a delinquent account is telephoned to all members.

Contested accounts and other controversial matters are referred to the bureau in written form for adjustment. Should the bureau's decision not be satisfactory to both parties, either may appeal to the Board of Directors.

COOPERATIVE CREDIT BUREAU IS PERFECTED IN CHICAGO

A credit stabilization program has been completed and is in operation in the building industry of Chicago, Ill., says the American Contractor. This latest credit unit is composed of building material supply dealers, functioning in cooperation with associations of general contractors, sub-contractors and other units of the industry. The program in operation is much like that functioning in Detroit, Minneapolis and certain other cities. It is based on a fact finding and information service which is augmented

by stringent disciplinary measures to be used in connection with obviously irresponsible units in the industry. At the same time every precaution appears to have been taken in the formation of the plan to safeguard the responsible element who temporarily may be forced to extend their credit beyond the average limitations.

The name of the new organization is The Material Dealers Credit Bureau. One of its important functions is to collect and disseminate information as to the financial structure of

THE OBSERVER

WHAT HE HEARS AND SEES ON HIS ROUNDS

Rents reached a peak in 1924, then gradually decreased until 1928 and since that time have remained at a steady level, according to a report released by the California Building-Loan League, based upon a study of the "Cost of Living in the United States, 1914-1929," just completed by the National Industrial Conference Board. Clothing prices have risen substantially, during the past fifteen years. Among other important items in the budget of the consumer is food, which advanced sharply up to 1920, since when the prices for this commodity have been below the general price level. Light and fuel were also at their highest in 1920 but have steadily decreased since.

Considering major items only, the cost of living is now higher than before the War, the League report states, but for the past several years is greatly below the record figures of 1920.

A great variance is revealed in the rise in the prices of sundries, according to the separate items involved. One-fifth of the entire budget of the wage earner's family is expended for sundries.

Household furnishings made the greatest increase in the laundry group. Tobacco prices sagged steadily since 1920, while drugs touched their peak in 1925 and have declined since. Calfare was 52% higher than in 1914 at the opening of the current year, which however, is below the general increase in the total cost of living.

Food prices, as a whole, are at the lowest price level during April and at the highest in November, with higher prices prevailing during the summer season.

Total cost of living has dropped to 61% above that of July, 1914, from 68% the California Building-Loan League survey points out. The decrease in total cost of living, which began late in 1925, is still continuing.

Evidence that the volume of legitimate contract construction, despite a decrease in gross dollar value for all building, is now greater than at the same time in either 1928 or 1929, is revealed in a statistical study just completed by the Associated General Contractors of America, which also shows that a new all-time high record was established in the total award of surface pavement contracts during the first three months of the year. The total of these awards increased 63 per cent over that of the first quarter of 1929, the study indicates.

Bearing out its earlier predictions that there is to be an exceptionally large volume of engineering construction this year, the association's analysis discloses that long term state and municipal bond issues for the first quarter ran well in advance of the same period last year, totaling \$106,000,000 for March and averaging \$36,700,000 monthly as compared with \$88,200,000 during the first quarter of the previous year.

According to E. J. Harding, assistant general manager of the Associated General Contractors, the effect of this public works acceleration is strikingly marked in the phenomenal increase in the total yardage covered in the pave-

ment contracts. During the first three months of 1930, contract awards were made for 27,200,000 square yards, as compared with 16,700,000 during the first quarter of 1929. With contemplated work in this field continuing to come forward, and with the increased highway program made possible by upward revision of federal aid appropriations, Mr. Harding states that engineering construction faces a banner year.

Although the first 14 weeks of the year show a decline in the total value of contracts awarded for the various classes of construction, this decrease is attributed wholly to the elimination of speculative building, which in turn is spurring legitimate construction to greater and sounder activity.

Mr. Harding points out that the net decrease in the grand total embraces a substantial decline in commercial building and a larger drop in residential building—the two fields in which speculative operations had been particularly rampant—whereas in the unspeculative field of all types of legitimate contract work a definite increase is indicated.

Sacramento building trades craftsmen, in voting for the five-day week, have taken a progressive stand duplicated as yet in only seven other American cities.

While the movement is spreading rapidly over the country, the short week has been wholly in effect in the seven cities and partially in 37 centers of population.

According to information collected by Paul Yates from the United States department of labor in Washington, more than 142,000 New York City building trades workers are on a five-day basis, with 24,282 in Boston, 23,470 in Cleveland, 21,050 in Chicago and 20,000 in San Francisco.

California cities wholly or partially on a five-day basis with respect to building trades include, San Francisco, Los Angeles, Long Beach, Fresno, Bakersfield, Newton, Oakland, Santa Barbara, San Jose, Salinas and Venice.

The national industrial conference board recently made public the results of a survey of the five-day week among American manufacturing concerns.

Its report showed that 270 establishments, employing an aggregate of 216,321 wage earners, were operating the full year on a five-day basis at the close of 1928.

More than 70 per cent of these companies, the report states, are obtaining a greater output under the new plan than they obtained under a five and one-half or six-day week. The summary of the report says in part:

This evidence removes the five-day week from the status of a radical and impracticable administrative experiment to place it among plans which, however revolutionary they may appear to some, have demonstrated both practicability and usefulness under certain circumstances.

The Ford Motor Car Company of Detroit is among the manufacturers employing the five-day week as a regular policy.

Bids for three schools to be erected under a recently authorized \$330,000 bond issue will be asked shortly by the Santa Cruz Board of Education. In asking bids for construction the board stresses the fact that local labor and supplies will be given every preference in the construction of the three new buildings. In each of the contracts for construction will be this clause:

"It is stipulated and agreed that no mechanic or workman shall be employed in the actual construction of this public school building who is not a citizen of the United States."

"It is further stipulated and agreed that preference shall be given the citizens and residents of the city of Santa Cruz in all cases where laborers or mechanics are employed on erection of this public school building."

"It is understood and agreed that no mechanic or laborer shall be allowed or required to perform work on this public school building at a less minimum compensation per day than the prevailing current labor rates now prevailing in the county of Santa Cruz."

"It is stipulated and agreed that, other things being equal, all materials shall be purchased in the city of Santa Cruz."

"It is stipulated and agreed that contractors shall take out their surety bonds through local agents."

California leads the entire United States in the production of electricity by public utility companies with water power.

She is second only to New York State in the total production of electricity by water and fuel power.

Figures just released by the Geological Survey for 1929 show California plants turned out a grand total of 8,849,624,000 kilowatt-hours. Of this, 6,366,804,000 kilowatt-hours were by water power and 2,482,818,000 kilowatt-hours by fuel power.

New York State's total production was 14,465,073,000 kilowatt-hours, of which 5,617,418,000 hours were by water power and 8,847,655,000 hours by fuel power.

In fuel power production of electricity the California plants used 2,158,596 barrels of oil and 26,914,327 thousand cubic feet of gas.

PIPE LINE CONSTRUCTION IS AUTHORIZED

Pacific Gas and Electric Company has been authorized by the State Railroad Commission to enter into an agreement with Standard Oil Company of California for the purpose of constructing a single natural gas transmission line from Kettleman Hills oil and gas fields in Fresno and Kings counties to the San Francisco Bay area, through a third corporation to be known as Standard-Pacific Gas Line, Inc. The Commission specified in its authorization that all of the natural gas transported by means of the aforesaid pipe line for the use of Pacific Gas and Electric Company, or other public utility, shall be distributed, allocated and disposed of in accordance with the orders of the Railroad Commission.

The proposed pipe line, which will take the place of pipe lines that were to have been built independently by Pacific Gas and Electric Company and Standard Oil Company of California at a total cost of \$15,000,000, will cost approximately \$9,000,000, and will have a daily delivery capacity of 138,000,000 cubic feet of gas per day without compression, or 180,000,000 cubic feet per day, with compression, or approximately the same as the capacity of the two pipe lines).

ALONG THE LINE

E. A. Neumarkel, architect, formerly located at 544 Market St. has moved to larger quarters at 340 Kearny St., San Francisco.

Oliver W. Britt, general contractor, 57, a native of Ohio, died at his country place in Felton, Santa Cruz County, last Thursday. Mr. Britt had been in poor health for the past several months.

Neil M. Cecil of Modesto, and Geo. D. Macomber of Oakdale, will be candidates for the office of county surveyor of Stanislaus County at the August primaries. J. H. Hoskins, incumbent, will seek re-election to the office.

James F. Collins, state director of professional and vocational standards, will address members of the Builders' Exchange of Santa Clara County and the interested public at the Chamber of Commerce Hall, San Jose, next Monday evening. Director Collins will tell of the purpose of the law and what it has accomplished since adoption.

Roy A. Watkins, city manager of Pittsburg, Contra Costa County, has submitted his resignation to the city council. Watkins has been city manager of Pittsburg since 1904 and gives ill health as his reason for giving up the position. He plans to take treatments at the Mayo Clinic in Rochester, Minn.

James S. James, former city engineer of Burlingame, has announced his candidacy for the office of county surveyor of San Mateo County to oppose George A. Kneese, incumbent. The election will be held in August.

James has been a resident of San Mateo County for more than seven years having come from Colorado where he was county engineer of San Miguel County for two terms and city engineer of Telluride, Colo., for six years. He has served as city engineer of Burlingame for five years and has practiced civil engineering since 1906.

KAWNEER TAKES OVER ADELBERT COLMAN METAL WORKS

Further expansion of The Kawneer Company is announced by President Francis J. Plym, with the purchase of the Adelbert Coleman Architectural Metal Works Company of Chicago, formerly known as the Chicago Ornamental Iron Works. This is the second recent acquisition of important allied companies by Kawneer, the Zouri Drawn Metals Company having been acquired last month.

Assets, name and good will were included in the purchase for a cash consideration which is not stated. The Kawneer Company does not contemplate any additional financing in the transaction, according to the announcement.

"The purchase of the Coleman plant, which manufactures architectural metal work, including cast bronze, aluminum, nickel silver and iron, used for building purposes, will considerably enlarge the operations of The Kawneer Company in cast architectural materials," stated Mr. Plym in announcing the purchase. "The Adelbert Coleman Company will operate under its own charter as a division of The Kawneer Company. Benjamin R. Coleman, the former president, will remain with the corporation."

TRADE NOTES

Economic and mechanical advantages of the Fuller Leigh mills, both of the air and screen separation type, are given in a new 4-page circular issued by the Fuller Leigh Co., Fullerton, Pa.

Sunkist Lumber Company, operating throughout Southern California, has purchased the business and property of the Charles R. McCormick Lumber Co. at San Bernardino; also at Riverside and Oceanside. The McCormick yards in these cities will be operated under the name of the San Bernardino Lumber Company with Alvin D. White, former executive of the McCormick company, as manager.

The Celotex Company (New York) reports net profit of \$227,955 for the six months ended April 30, against \$370,338 for the same period of the preceding year. This was equivalent to 19 cents a share on 221,208 shares of common stock compared with \$1.03 on 178,033 shares in the prior interval. In the quarter ended April 30 net profit was \$467,293, or \$1.69 a share, against \$416,000, or \$1.31 in the first three months of 1929.

The White & Friant Lumber Company, organized in 1885, has filed a certified copy of its articles of incorporation at Sonora, Calif. All of the capital stock of the corporation, amounting to \$250,000, with shares at \$100 each, has been subscribed, according to the document. The owners of stock and the amount of the holdings of each follow: T. Stewart White, John Ruger and Thomas Friant, 620 shares each; Francis Lettellier and Monroe Miller, 310 shares each, and Hugh M. Boyer and Samuel H. Sweet, 10 shares each. The company's principal office is in Chicago.

Kern Rock Company of Bakersfield has been incorporated. Directors are C. W. Hartman, J. T. Carnahan and W. E. Roe, all of Bakersfield. The company will operate a rock quarry, haul and sell dirt and clay as well as conducting a general building material business.

E. R. De Graf, Portland, Ore., manager of the paint department of the Paraffine Companies, Inc., has resigned to become vice-president and general manager of the Southern Asbestos and Magnesite Corporation, with headquarters in Los Angeles. L. K. Bishop has been named manager of the Paraffine paint department.

CEMENT PRODUCTION DECLINES, SURVEY REVEALS

The ratio of operations to capacity of American Portland cement mills continues to be under that of a year ago, as indicated by the figures for the 12 months' period ending April 30. According to statistics released by the Bureau of Mines of the Department of Commerce, the ratio of operations to capacity for the last 12 months was 66.0 per cent. The ratio percentage for 12 months' period ending April 30, 1929, was 71.1 per cent. During the month 13,521,600 barrels were produced. 13,357,000 barrels were shipped, and stocks on hand at the end of the month were 30,637,000 barrels. Production in April, 1930, was 1.7 per cent less and shipments 0.5 per cent more than April, 1929. Stocks at the mills were 1.8 per cent more than a year ago.

HERE — THERE — EVERYWHERE

A decided difference in building razing bids was revealed in connection with the demolishing of the old Florence School Building in Northampton, Mass., recently when one contractor wanted \$12,000 to do the job. Another agreed to pay the city \$25 for the privilege of wrecking the structure. He was awarded the contract.

Recently the Court of Claims of the National Treasury Department handed down a decision in the case of Stafford Owners v. United States, which held that a co-operative apartment corporation was not a business carried on for profit within the meaning of the capital stock provisions of the 1921 and 1924 revenue acts.

Claude Hickman of San Pedro was elected president of the California State Master Plumbers' Association at the annual election of officers held in Sacramento. Jack Young of San Francisco was named vice-president; J. H. Hawley of Sacramento, treasurer, and C. R. Hutton of Los Angeles, secretary. Those named to the Board of Directors are: Hickman, Young, Thomas H. Hogan of Los Angeles, and R. W. Timmons of Richmond.

Advices from Portland, Ore. are that with upwards of 200,000,000 ft. of logs in the Columbia river the logging camps will be closed down for the summer vacation a month earlier than usual. Reports also indicate many mills in the northwest will eliminate their night shifts and will work only 5 days a week.

ON BRIDGE PROJECT

Bids will be considered by the Washington State Highway Commission on June 24 for the steel superstructure of the \$4,500,000 Aurora Avenue bridge. The project will involve 6,900,000 pounds of carbon structural steel; 3,100,000 pounds of silicon structural steel; 480,000 pounds of castings; 1,000,000 pounds of reinforcing steel; 4220 lineal feet of metal railing and other miscellaneous items.

This is one of the largest single contracts to be awarded on this job and involves approximately \$1,500,000.

Bids were called recently for construction of the north and south approach piers and two concrete girder piers. These will be received until June 3.

CELOTEX WINS POINT IN RECEIVER SUIT

Application for a receiver for the Celotex Company was dismissed by the Chancery Court at Wilmington, Del., May 16. The motion for dismissal of the application was made by counsel for David Adler, who recently filed a receivership bill against the company. Counsel for Adler and the company are to agree on an early date for a hearing on the application for a permanent receiver, which still remains to be disposed of.

Counsel for the Celotex Company wanted an immediate hearing on the merits of the entire case, but the court said that under the rules it would have to grant the motion for dismissal of the application for a receiver pendente lite.

TRADE LITERATURE

A new and complete 56-page catalog describing all products of the J. D. Adams Co., Indianapolis, Ind., has been issued by that company.

A new edition of bulletin 850 of the Chicago Pneumatic Tool Co., New York City, is devoted to the one-man self-rotating hand hammer drill and accessories.

Specifications and uses of the United crawler tractor are given in 8-page circular issued by the United Tractor & Equipment Corp., Milwaukee, Wis.

General Wheelbarrow Co., Cleveland, Ohio, has issued a folder briefly describing equipment for highway maintenance, including the Planestainer, rotary scraper, road drag, backfiller, plows and scrapers.

Reliance induction motors with ball bearings for two- and three-phase alternating-current circuits are described in bulletin 106, issued by the Reliance Electric & Engineering Co., Cleveland, Ohio.

Pump Guide No. 12, issued by the Chicago Pump Co., Chicago, Ill., contains 48 pages of data to aid in the selection of pumps for different services. A number of miscellaneous tables giving useful information on pump design are included.

Physical and chemical characteristics of stainless iron and steel alloys, particularly those containing chromium, are dealt with in considerable detail in a 21-page booklet "Corrosion Resistant Alloys in General Fabrication," by T. H. Nelson, published by the Dowtown Iron Works, Dowtown, Pa.

A complete handbook of metal lath and accessories, containing specifications and technical data following the standard practice of lathing and plastering associations and the standard specifications of both the Associated Metal Lath Manufacturers and the American Specifications Institute, has been published by the Genfire Steel Co., Youngstown, Ohio.

Recent publications of the Caterpillar Tractor Co., San Leandro, include bulletins devoted to blade graders, elevating graders, maintenance machines and a condensed catalog of the entire Caterpillar road machinery line (formerly known as the Russell). Separate bulletins describe two new pieces of equipment, a road planer and a trailer patrol.

An analysis of the cost elements of motor truck operation, together with charts, showing the average cost of haulage under different conditions, records from the experience of large trucking companies and a series of forms used in cost keeping are included in an interesting book, "Trucking Costs—How to Lower Them," by L. A. Graham, vice-president of Relay Motors Corp., Lima, Ohio, now being distributed by this company. Text matter is extremely simple, most of the information being presented in the form of graphs, illustrations and actual records.

SUB-CONTRACTORS ORGANIZE TO HALT UNFAIR TRADE PRACTICES

The Sub-Contractors Council of the Orange County Builders' Exchange, with headquarters at Santa Ana has been organized, it is announced by Frederic W. Sanford, exchange secretary-manager.

The council is composed of one member of each craft in addition to sub-contractors and material dealers. The purpose of the council is to create a better understanding between the general contractors and sub-contractors and to eliminate, as far as is possible, the several disastrous trade practices in the construction industry that have been in evidence so much in the last few years.

The following code of ethics has been adopted by the council:

(1). Sub-contractors may furnish to architects and general contractors unit prices and preliminary informal estimates of the cost of a proposed building, or part thereof, but approximates on a quantity basis in detail should be adequately paid for, particularly if in competition, and if there is a real doubt of the job going ahead.

(2). Sub-contractors should refuse to bid or estimate unless complete, clear and accurate plans and specifications and reasonable complete details are furnished in order to obtain intelligent, accurate, responsible and non-jeopardizing bids.

(3). The number of sets of plans and specifications provided by the Architect, or Engineer, or General Contractor, should be sufficient for the use of sub-contractors.

(4). Sufficient time for careful preparations of bids should be allowed all sub-contractors.

(5). Sub-contractors should insist that the proposed contract form be definitely decided before bids are called for; and a copy of such proposed contract form, and the basis of payments should be furnished in the call for bids.

(6). The new A. I. A. Joint Conference standard building contract forms are recommended, and if any other conditions will be required of the successful bidder this information should be furnished all bidders alike in the call for bids.

(7). If the sub-contractor is to be required to assist in financing the improvement this information should be clearly stated in the call for bids.

(8). When time is the essence of a contract the time limit should be set by the Architect or General Contractor, in order that all sub-contractors may bid on an equal basis.

(9). Cost of a bond (if required) should be included within the final price, and be definitely stated in the call for bids.

(10). Sub-contractors recommend that special bid forms be furnished for each job; and that no bid should be made which does not follow this form; and that the call for bids might be combined with the bid form. Sub-contractors should not submit voluntary bids after the time set by the General Contractor for receiving sub-bids on that portion of the work.

(11). Only those sub-contractors should be invited, or permitted to bid to whom the owner, general contractor and architect are willing to award the contract. No complimentary bids should be allowed.

(12). Only a limited number of sub-contractors should be asked to compete, preferably six to eight in number, of substantially equal ability and sufficient experience, financial standing, organization and plant equipment

and only those firms who conduct themselves along ethical lines.

(13). Sub-contractors should discourage requests for unit prices, alternate estimates and secondary estimates when making final bids.

(14). Sub-contractors should insist that general bids should be opened in the presence of bidders who care to attend, notice of time and place of opening having been furnished in the call for bids; these bids to be placed on file.

(15). With bids invited as above, the work should be awarded to the lowest bidder unless other considerations than price are to enter into the award, in which case the fact should be made clear in the call for bids.

(16). No sub-contractors will directly or indirectly seek to obtain any information from an architect, or general contractor, or owner, of the bid or prices, or estimates of any other sub-contractor in his line of work, until after sub-contract has been awarded.

(17). No sub-contractor will make or submit more than one bid upon any job, unless said work is submitted for further bidding because of any changes made by the architect, or general contractor, and new bids are asked for from all sub-contractors. Each sub-contractor shall have the right to withdraw his bid in case of error or oversight; provided, however, that withdrawal is made before the bid is used.

(18). Sub-contractors should not make an estimate, or accept any contract from any architect, general contractor, or owner, who is not conducting his business in accordance with the procedure set forth by this Committee.

(19). The practice of peddling bids in whatever guise, or form, is condemned without reserve by sub-contractors, and no ethical sub-contractor will participate directly or indirectly, nor seek to take advantage, directly or indirectly, in any manner, in such practice, and no sub-contractor, general contractor, architect, or owner, who knowingly indulges in or continues to be deemed to be reputable or responsible.

(20). No sub-contractor should rely upon the practice of "bid peddling" for his financial backing upon material dealers but will depend upon his own financial resources, or upon the accredited sources of financial assistance, i.e., banks, mortgage companies and legitimate money lenders.

(21). Any bid submitted by a sub-contractor should be deemed to cover the cost of the complete job, unless supplemented by a written statement to the contrary at the time the bid is submitted.

(22). Whenever sub-contractors are required to furnish a surety bond for their portion of the work or contract, they should furnish surety bond from the list of responsible surety companies.

(23). Sub-contractors should insist that the General Contractor shall make payments promptly in accordance with the terms of the contract.

(24). Every sub-contractor will to the best of his ability endeavor to protect and preserve the rights, work, material, tools, and property of others working upon the same improvement or building; and will be responsible for any willful or needless waste, destruction or damage to the work, materials, or tools, of others committed by his employees, or those under his charge.

**U. OF S. C. STUDENTS TO
FEATURE ARCHITECTURE**

The entire second floor of the State Building in Exposition Park, Los Angeles, is to be devoted to a display of the work of students in the School of Architecture of the University of Southern California from April 2nd to June 1st.

In addition to building plans and designs, there will be freehand drawings, mural paintings, stained glass designs, watercolor sketches, statuary, bas-reliefs, sketches of interior arrangements, ornamental iron work designs, friezes, and figurines clothed by co-eds to illustrate period costumes.

The same work will constitute a campus exhibit in Architecture Building of the University of Southern California during the Semi-Centennial celebration of the Trojan University, May 29 to June 7th. Other unique and significant exhibits to be featured in the Golden Anniversary program include scientific laboratory work, charts showing legal clinic work, a music exhibit, physical education demonstrations, and a relief map of the prospective permanent campus of S. C., as well as comparative relief maps showing the growth of the present campus since 1830, when the University of Southern California was founded.

**N. Y. LIEN LAW HAILED AS AID
TO BUILDING**

A new law just signed by Governor Roosevelt of New York is expected to have a considerable effect in the placing of the operations of contractors on a sound and business-like basis. The law provides that all moneys obtained pursuant to a loan mortgage during the process of construction and four months prior to the completion thereof shall constitute trust funds, and shall be held by the owner subject to the expenses for the cost of the improvement. The law is to go into effect October 1.

The law provides not only that all moneys received during the stated period shall be held in trust for the builder, but that money derived from any mortgage recorded during the same period shall be under the same ruling.

Under the statute the definition of the cost of improvement includes sums paid to contractors, architects, engineers, surveyors, sub-contractors, laborers and material men.

The significant difference between the present law and the 1929 one is that the former infractions of the rights of the contractors which were misdemeanors in 1929, triable before a magistrate, are defined as larceny by the present law. Misuse of the moneys either by contractor or by owner, is a crime subject to indictment and to trial by jury.

The commission which is responsible for the present law has been continued for another year.

GLIDDEN REFINANCING

The Glidden Company, Ohio, manufacturers of paints and varnishes, is engaged in new financing to retire bank debts made in increasing plant facilities and for additional working capital.

In this connection, Bancamerica-Blair Corporation is expected to announce the offering of \$6,000,000 of the company's 5-year 5½ per cent gold notes at a slight discount within a few days.

The notes are to be dated June 1, 1930; they mature June 1, 1935.

**"SAFETY COMPETITION" BOOK.
LET IS ISSUED**

Methods of stimulating employee interest in safety by developing the spirit of friendly competition or the desire to excel are presented in a report entitled "Safety Competition," published by the Policyholders Service Bureau of the Metropolitan Life Insurance Company.

This publication is the seventh of a series of industrial safety leaflets, based on a study of the field of safety engineering and outlining effective methods of applying the principles governing successful accident prevention work.

"Safety Competition" emphasizes the need for arousing interest in safe practices among employees and presents methods of planning and organizing inter-departmental contests which will serve as incentives for safe workmanship.

A copy of this study and the six previous leaflets in the series may be had upon application to the Policyholders Service Bureau, Metropolitan Life Insurance Company, New York City.

**L. A. TO INVESTIGATE EVILS OF
ASSESSMENTS**

At request of Mayor Porter, Council President Sanborn of Los Angeles, has named the committee which is expected to make a study of the assessment evil question in Los Angeles during the next few weeks, and to suggest changes to stop over-lapping assessments, and other evils due to public improvement projects. He named the mayor, City Engineer J. J. Jessup, City Attorney Erwin P. Werner, Efficiency Director Roy Knox, Zoning Engineer Thomas Coombs, and Councilmen Webster, Burns, Spoke, Davis and Randall. The council voted Sanborn to the committee membership as the 11th member.

**RUSSIAN COMPETITION WEAK-
ENS SWEDISH LUMBER
MARKET**

Russian competition and slow British buying weakened the Swedish lumber market somewhat during the spring 1930, according to recent advice from T. O. Klath, Commercial Attaché at Stockholm, to the Lumber Division of the Department of Commerce.

The exports of lumber during 1930 are expected to be about 15 per cent below that of 1929,—2,400,000,000 board feet. Advance sales for the first three months of 1930 were estimated at 900,000,000 compared to 1,135,000,000 board feet for the same period of 1929.

SURETIES MAKE REFUND

The five surety companies which wrote the \$120,000 bond for the contractors on the San Gabriel dam will refund \$150,670 out of the \$240,000 premium paid upon it. Their offer has been accepted by the Los Angeles county supervisors who furnished the bond for the contractors. The project was recently abandoned because a safe foundation could not be obtained at the Forks site.

INCORPORATES

Capitalized at \$200,000, an Oakland firm, Home Builders, Inc., Ltd., had filed articles of incorporation with the Secretary of State Frank C. Jordan. Directors named by the organization, which will engage in a general real estate business, are William H. Sims, Frances Sims and Howard F. Sims, all of Oakland.

PATRONIZE HOME INDUSTRY

Organized to encourage the buying of home products, 100 Sacramento business men have formed the Sacramento Payroll Builders, Mark L. Burns, Sacramento attorney, has been elected president; H. S. Parmelee, North Sacramento grocer, vice-president, and R. D. McFarland, Sacramento publisher, secretary. Members joining the organization promise "to give preference in my purchases whenever practical to Sacramento-made products."

**TECHNICAL ENGINEERS HOLD
DINNER DANCE**

Members of Sacramento Chapter No. 47 of Technical Engineers held a dinner and dancing party May 14 at the Alhambra Ranch, attended by thirty persons. Among those participating in the affair were: Messrs. and Mesdames W. O. Castello, Charles Deterding, G. W. Endicott, Fred Frieske, C. E. Hawthorne, Ed Hook, P. E. Jones, I. B. Mattson, J. L. R. Marsh, J. J. Rooney, D. B. Smith and E. E. Welch; Messrs. D. R. Cade and J. G. Kennedy; Mrs. Kathryn Date and Miss Mayme G. Kennedy.

**BUSINESS FAILURES SHOWING
RECESSION**

Business failures for the week as reported to R. G. Dunn & Co. totaled 517, as compared with 525 for the previous week.

The figures, however, show an increase of 42 over the 475 defaults a year ago.

Defaults of firms with liabilities of more than \$5,000 rose to 327, from 311 reported last week.

The California Railroad Commission is sending its transportation engineer, Joseph C. Hunter, east to attend the Hoover National Conference on Highway Safety, to be held in Washington, D. C., May 27, and the Eighth Annual Conference of State Utility Commission Engineers, to be held in Washington, D. C. June 5 and 6 next.

In addition to attending these conferences, Mr. Hunter will make a special study of the street transportation systems in a number of the eastern cities, as well as the various methods of protecting grade crossings throughout the country.

Just at this time there is considerable public interest being taken in devising means of reducing hazards at grade crossings. There have recently been developed a number of new automatic signal devices in the way of flashing lights, both incandescent and neon; second train indicators; various types of signals embodying both banner and flashing light indicators; automatic crossings gates and many types of highway markings. These devices are being presented to reduce the number of accidents at the many crossings where grade separations cannot be financed for the present.

California, like the other states, has its grade crossing problem in an acute form since we have a very high use of the automobile in this state, together with many improved highways which are open throughout the entire year and the present day tendency to increase rates of speed of both vehicular and train movements.

The grade crossing problem is one of the important matters to be discussed at the National Conference on Highway Safety and the California Railroad Commission, in line with its established policy, desires to contribute all possible to the solution of this problem.

REMOVE SHACKLES OF TRADITION WITH "MODERN DESIGN"—ARCHITECT

By SAM T. DE REMER*

*Architect of Grand Forks, N. D. Excerpts from an address on "Modern Design" delivered at the annual meeting of the Grand Forks Builders' and Traders' Exchange. Mr. De Remer is associated with his father, Joseph Bell De Remer, president of the North Dakota Association of Architects, in the practice of architecture at Grand Forks. Joseph Bell De Remer practiced architecture in Los Angeles for a number of years.

Contrary to the general opinion, modern design, or contemporary architecture, did not just recently come into being. It has been in the process of development some twenty years or more. True, it has just reached the zenith of perfection and is more or less generally accepted as being the modern style. When we speak of modern we don't mean that it is simply a passing fancy; it has taken too long in its inception. In any field of endeavor you will find individuals or parties devoting their efforts to the development of their interpretation of enlightenment as they see it. In religion, politics, government, et cetera, you will find liberals and extremists. Thus it is you will find these same groups in design.

It is here that I wish to point out the difference in modern and modernistic design. In my opinion, the modernistic is the extremist interpretation, and being extreme, will be short lived, as the futuristic, cubistic and impressionistic styles in the field of art have been. It may be that the modernistic is an outgrowth of these types; it would appear to me that it is not the case, but rather that it is an outcropping of the extremist views over the modern, caused by the spirit of unrest which always comes into existence after a great crisis, such as the late war.

The interesting feature about this modern architecture is that it is international and not purely American, as is quite generally believed. It seems to have broken out throughout Europe as well as on this continent.

An American Idea

Some twenty years ago, an American architect, having won world-wide reputation, started something different in the way of architecture. Working with concrete as a medium, he proceeded to embellish the structural members of his buildings simply by making them more conspicuous and massive. The teachings of the old school which had become more or less orthodox were thrown aside. This could hardly be called extreme in the sense as we know it today, but enough different so that it was too much of a shock for this country. He went abroad, thinking if he could get his ideas approved by foreign peoples that he then could return to this country and sell them here, knowing that anything however remotely associated with art, would have to have the foreign stamp of approval before it would be accepted in America.

His style was bold truth, being a series of etagiers as the French call it, or receding shelves, vertical lines being broken by the use of horizontal planes, all projections being at right angles to vertical planes. The cornice was not yet thrown into the discard. That was to come later. But his handling of it was different, simply pushing out a flat slab the two or three feet that was necessary and ornamenting it with a fine low relief.

But the eggs and darts were gone, the medallions were also missing, the

architecture and entablature were thrown in the ash can. Horrors, the old masters would turn in their graves, sacreligious cried some, and others that the hallowed past was profaned with incongruities, and so it went.

Europe Take Kindly To It

Later, Europe along with the rest of the civilized world, turned out to be not so civilized, and things were thrown in chaos, and in order that this great wrong might be righted the heads of the various governments decided to annihilate everybody living within the three-mile limit of this terrestrial sphere, who didn't have a government job—for they would be needed to draft more laws. And they were nearly successful in this undertaking. After every great war there is a period of reconstruction and readjustment. People try to shake off the shackles of tradition with which they have been bound. There is no question but what our modern architecture experienced its growing pains at this time of rehabilitation. Artists and architects were quick to grasp the opportunity and the people willing to accept. Naturally out of a melee such as this there would come bad with the good, but the big thing is that it was not all bad.

The people were dissatisfied and in quite a number of the European countries were revolting, revolting against the government which got them into this debacle. People fighting for freedom of expression, fighting against imperialistic governments, fighting for anything different than it was before.

With Europe well started on this new era, America was soon to follow. France, Germany, Austria, Holland, Denmark, Finland and the Scandinavian countries, I believe, are still ahead of us, with the exception of our skyscrapers, which are incomparable. That is, some of them are incomparable, and some are just as bad as it's possible to build them, big, cumbersome, ill-proportioned masses of junk, wherein the brick can't even get along with each other.

Along with the spirit of freedom felt after the war, architects were further encouraged to break away from the old school by the development in the manufacture of new building materials. Architects' offices today are continuously flooded with literature and samples of new materials being developed so fast that were one to become thoroughly acquainted with them all, he would have time for nothing else.

Modern vs. Classic

I have spoken as if this new freedom has been accepted wholeheartedly and unanimously by members of the architectural profession. That is not the case. There is still much discussion. The dyed-in-the-wool conservatives who are schooled after the Roman classics, are not prone to accept this new type.

The more liberal and broad visioned are satisfied by answering their arguments by saying that the old styles are not in harmony with our present-day mode of living. For architecture is, after all, a reflection of our mode of living. Why should we wrap up our buildings, whose plans function of necessity, with our present day activities which dif-

fer radically from those of centuries ago in an exterior resembling a Roman basilica when the building it to function as the New York Stock Exchange? Why top off a shaft of some twenty or more stories with a faithful copy of a Greek temple when on the inside in place of ancient Greeks in flowing robes and sandals, we find a modern broadcasting studio where every hour of the day they are announcing between saxophone solos and bed-time stories, the instantaneous relief awaiting your tired, aching feet if you will use save?

Influences of a New Age

In the nineteenth century any number of attempts were made for just this sort of freedom, but were short lived. Particularly after the Napoleonic wars this was true, and now some of our veterans of the old academy are citing these cases as proof that our modern style will likewise be of short duration. But what reason outside of a few dissatisfied souls was there for these earlier attempts to be long lived. There had been no radical change, either in an industrial way or in their habits of living.

Facts alter cases. There is no getting around the fact that we are living different lives, in a different atmosphere, than we were even twenty years ago. In fact, the whole order of things has been accelerated, economic, industrial, social and even our modes of worship. A few years ago, if one trespassed one bit from the accepted arrangement of church planning he had committed a gross sacrilege. The transept and nave were as necessary as the roof, and the whole adorned with Gothic tracery, vaulted ceilings, groined and pointed arches. Today our method of worship is not individual but group, and in the main large groups. On restricted sites, and there are few which are not restricted, with a large congregation to seat at one time, the former type is impossible for many reasons, among them the acoustical conditions are impossible. Also, it is necessary to have unobstructed vision. True, the cathedral type has been accepted for so long, that the building itself seems to inspire a spirit of reverence, but might not some other type suitable to our present-day needs be successful in like manner.

New Style Defined

After all this talk in favor of this new freedom, just what is our contemporary style? In as clear a conception as I can give, one who welcomes the opportunity of working in it, I would describe it as being a frank expression of unhampered individuality. One works with solids and voids, making no attempt to masquerade the structural features, on the contrary making the structural features function both for strength and beauty, abandoning the use of supercilious ornamentation in the shape of heavy cornices, belt courses and innumerable other jig saw embellishments scattered about over an unsuspecting facade as if from a salt and pepper shaker.

To make the picture complete it must have life. This is obtained by the use of very carefully selected materials, of which there is a wealth at hand, and this in turn painted, in the daytime by sunlight and shadow playing over the elevation and at night by appropriately colored flood lights.

A very important feature in the development of this new type and which is wholly American, is the set-

back which is the result of recent zoning laws in our larger cities. This was originally conceived not to enhance the beauty of our modern skyscraper, but as a means of enabling the sunlight to reach the depths of the brick canyons of which the busy thoroughfares of the large cities remind us. This set-back has been found very useful in problems of design and as a consequence is being used not only on the skyscraper, but on lesser buildings as well. Great care must, however, be exercised where the setback is to be used on smaller buildings, for one does not have the masses in the same proportion as on the larger or tower type and thus the set-back instead of being a thing of beauty becomes an ill conceived monstrosity.

Here is a graphic example of how the development of new building materials show their effect upon the design of buildings: in New York there is to be built a new sixty-story skyscraper—the Palais de France, it will be called. It is being financed by the French government at a cost of approximately fifty million dollars. It will house the French embassy along with the arts and science allied with that nation. Irvin S. Channin, head of the Channin Construction Company, has just returned from France, and is quoted as saying that owing to the discovery of a new type of glass, which is made in either plate form or brick form, the upper seven stories of this building will probably be built of glass. This glass has not been on the market long enough to have reached standardization and mass production, so that there is little danger of the brick masons having to look for a new vocation as yet, but it bids fair to establishing the glass setter on an equal basis with the major crafts. It is the intention on the new Palais de France building to crystalize the face of this glass to reflect the sunlight rays like jewels. Imagine the beauty of this huge seven-story jewel, sixty stories above the sidewalk, and imagine the beauty at night, when it will be illuminated by thousands of many-colored lights. And imagine, too, what the tariff will be on a suite of offices in this quartz palace.

Height Limit for Skyscrapers

While we are speaking of sixty-story buildings let me get off my subject of design for a minute. How high are these skyscrapers likely to go? That is a subject of much debate at the present time. It seems that there are no physical limits. One hundred stories are already being talked of, and engineers would jump at the chance of a two hundred-story job. But there are limitations of other kinds, and as important as the physical. For example, here is an economic limit. Experts have studied with great diligence for years on what the economic height limit will be. It has been found that on a \$200-a-foot square-foot site that the sixty-third story reaches the maximum economic return, while on a \$400-a-foot site, seventy-five stories have been found to be most economical. There are other difficulties confronting the prospective builders of skyscrapers — heating, sanitation, wiring, corridors, stairways, elevators. The handling of vertical traffic is a big problem. The speed of elevators will have to be increased from 300 feet per minute which is the present legal speed limit to the more than 1500 feet per minute, and it is doubtful if the human ear drum can

stand the vibration in the enclosed cab at that rate of speed. Another thing which will give the elevator engineers something to think about is the tremendous weight and size of the cables in buildings approximately 2000 feet in height. Then, too, there is the dispatching of cars, both express and local, which will have to be double-deckers to handle the crowds, with the possibility of having to change from an express which operates between, say the first fifty stories, to a local running from the fiftieth floor to the seventieth in order to get off at the sixty-third.

Taking Care of Tenants

Another great problem will be to outline a schedule of routine agreeable to tenants and in mesh with the scheme of operating a smoothly running machine, which will have to synchronize perfectly. Think of the thousands of people tenanted in a building of 200 stories. A large city within itself. Then think of the additional thousands who will have to carry on business with the people having offices in this vertical city. Now, it would be a physical impossibility for all these people to come in or go out at the same time. Even if the stairs, corridors, and elevators would handle the crowds, there would not be room on the ground floor for entrances sufficient to pass this mob. It would be like pouring water out of a large bottle when turned upside down; it becomes air bound. This would necessitate streets at different levels from which those who would go to the ninety-second floor would enter on, say D level, and those going to the one hundred and tenth floor would find entrance on some other level.

If, on the other hand, all these people have to find entrance on the ground floor, then, as I said, a system of routine will have to be followed similar to this: Those in a certain part of the building, on floors approx-

imating the same levels, will have to be in their offices at seven in the morning, and will lunch at ten-thirty or eleven, those in another portion will go to work at eight and lunch at noon, and those in still another strata will start the day off with the bankers at nine o'clock, and lunch at one, and so on, ad infinitum. Now, maybe the tenants might not like this arrangement. The commuters, would I am sure, insist on a nine o'clock lease, inasmuch as they already have to rise an hour or so earlier than the urbanites, but just try to get a New Yorker in his office before nine. I am afraid that this would be more of a stumbling block than the engineering difficulties. It might be necessary to change the working hours of the day from nine in the morning to five for one shift and ten to six, and eleven to seven for succeeding relays.

Importance of Good Design

With a "paying height" pretty well established and engineering problems in competent hands, the remaining important factor is what part design or art has on the attractiveness to tenants of one building, in comparison with its competitor across the street or around the corner. Design does play an important part and its influence is bound to increase as competition among building owners increases.

People today are taking more interest in the things which surround them than ever before, in the history of the country, and will be no more content to work in drab business quarters than to live in poorly furnished and inartistic homes. It is certain that a prospective owner cannot hope to realize a maximum return on his investment, if he does not insist upon beautifully designed, well proportioned facades, pleasing to the eye of a well informed public, along with a well planned interior which functions.

GENERAL CONTRACTORS HELD RESPONSIBLE FOR WORK OF SUBS

Warning of the responsibility of the general contractor for the work of his subcontractors under the California state license law was given by James F. Collins, Registrar of Contractors, at the meeting of the California State Branch, Associated General Contractors, at Los Angeles. Mr. Collins stated he had found it necessary to make the ruling, in a case which came before him recently, that the general contractor is the owner's agent and that it is up to him to see that work which is sublet is done in conformity to his contract to deliver the job in accordance with plans and specifications. He stated it was important, therefore, that this ruling should be understood by all contractors.

In the particular case which brought out the ruling, the subcontractor who did the painting on a building used other materials than those called for in the specifications. This was not disclosed until after the work was completed, and upon learning of it the general contractor withheld payment to the subcontractor. No complaint was made as to the character of the work. The subcontractor stated that he had used the materials substituted, believing that he would produce as good if not a better job. When the general contractor asked for an adjustment the subcontractor refused to make any concession, but offered to give a bond guaranteeing the work for a certain period.

After hearing the statements of all the parties concerned, the Registrar refused to suspend or revoke the li-

cence of the subcontractor and the latter immediately tendered the general contractor a bond and demanded payment. This placed the general contractor in the position of having to shoulder the full responsibility, first in the matter of payment to the subcontractor, and, second, in answering to the owner under his contract.

The Registrar pointed out that the general contractor was to receive his money in five payments. However, his agreement with the subcontractor was for a lump sum on completion and acceptance of the painting on the job. It was the opinion of the Registrar that had similar payments been called for on the subcontract the general contractor would probably have discovered the deviation from the specifications before the work had proceeded far and would have demanded compliance with them. By allowing the work to proceed without protest the general contractor accepted the full responsibility.

In answer to questions the Registrar stated that approval of work by the architect on a job would not relieve the general contractor of his responsibility as agent of the owner for full compliance with his contract and that such approval would be no defense of failure on his part to deliver the job in strict accordance with plans and specifications. The owner can only look to the general contractor for the proper execution of work included in his contract, and it behooves the general contractor to see to it that all work sublet is faithfully performed.

APARTMENTS

Preparing Working Drawings.
APARTMENTS Cost, \$75,000
SAN FRANCISCO. SE Parker Ave.
and California St.
Three-story frame and stucco apart-
ments (18 2-3- and 4-room apts.)
Owner—H. O. and W. R. Lindemann,
619 27th Ave.
Plans by L. O. Ebbets, Hobart Bldg.

Preparing Working Drawings.
APARTMENTS, ETC. Cost, \$350,000
SAN FRANCISCO. Richmond District.
Twelve 2-story frame and stucco flats
and four 3-story and basement
frame and stucco apartments.
Owner represented by Alberton Real-
ty Co., 5498 Geary St.
Plans by L. O. Ebbets, Hobart Bldg.

Plans Being Completed.
APARTMENTS Cost, \$125,000
STOCKTON, San Joaquin Co., Calif.
N Hunter Street.
Three-story and basement frame and
stucco apts. (reinforced concrete
basement; 42 2- and 3-room apts.)
Owner—Owen Jones.
Architect—Glenn Allen, Union Block
Bldg., Stockton.

Preparing Preliminary Plans.
APARTMENTS Cost, \$24,000
SACRAMENTO, Sacramento Co., Cal.
18th St., bet. H. and O Sts.
Two-story frame and stucco apart-
ments (8 apts, 8 baths).
Owner—Alice E. Harrison, San Fran-
cisco.
Architect—Frederick S. Harrison, P.
O. Box 873, Sacramento.
Cast cement, Roman brick and Cali-
fornia stucco exterior finish, wood
frame, wood and California stucco in-
terior finish, Longlife rustic shingle
roof, wood, tile and oak flooring,
steam heating system and incinerator,
Standard Mfg. Co. plumbing goods,
Marshall & Stearns wall beds, tile
bath rooms, Kelvinator refrigeration.

Preparing Preliminary Plans.
APARTMENTS Cost, \$91,300
SACRAMENTO, Sacramento Co., Cal.
Four-story brick and concrete apart-
ments (36 apts and baths).
Owner—Withheld.
Architect—Frederick S. Harrison, P.
O. Box 873, Sacramento.

Klinker and common brick, Flemish
bond and cast cement ornament finish
wood, oak and tile floors, terra cotta,
tile and composition roofing, steam
heating system, Otis elevators, Stand-
ard Mfg. Co. plumbing, Marshall-
Stearns wall beds, mahogany and O.
P. interior finish, Kelvinator refrig-
eration.

Sub-Bids Being Taken.
APARTMENTS Cost Approx. \$100,000
VALLEJO, Solano Co., Cal. Capitol
Way.
Three-story reinforced concrete apart-
ments (21 2, 3 and 4-room apts.)
Owner and Builder—Dr F. Burton
Jones, 327 Georgia St., Vallejo.
Plans by W. A. Pentecost, 465 25th
St., Oakland.
Bids are being received by W. A.
Pentecost.

Preparing Working Drawings.
APARTMENTS Cost, \$200,000
BERKELEY, Alameda Co., Cal. Sac-
ramento St. and University Ave.
Three-story Class C brick apartments
(56 2, 3 and 4-room apts.)
Owner—Davis-Pearce Co., Grant and
Weber Sts., Stockton.
Architect—Davis-Pearce Co., Grant
and Weber Sts., Stockton.
Plans will be ready for bids in from
thirty to forty-five days.

Plans Being Revised.
ALTERATIONS Cost, \$40,000
SAN FRANCISCO. NW Bush St. and
Polk St.
Alter present apartments.
Owner—Estate of Louis Freidman.
Architect—S. Helman, 605 Market St.
New bids will be taken at a later
date.

Form, Concrete and Framing Bids
Wanted.
APARTMENTS Cost, \$650,000
SAN FRANCISCO. California St. and
Joice St.
Eight-story class A steel frame and
reinforced concrete apartments
(300 rooms).
Owner & Builder—Marian Realty Co.,
110 Sutter St.
Architect—H. C. Baumann, 251 Kear-
ny Street.
Bids are to be in on May 26. Plans
available from owner.

Contract Awarded.
APARTMENTS Cost, \$20,832
SAN FRANCISCO. N 21st Street E
Church St.
Three-story frame and stucco apts.
(9 apts.)
Owner—H. Tillman, 4344 Balboa St.
Architect—F. W. Dakin, 625 Market.
Contractor—A. R. Larson, 4020 24th
Street.
Plumbing, Heating and Electrical
Work—Frank J. Klimm, 456 Ellis
St., \$6,300.

Plans Being Prepared.
APARTMENTS Cost, \$25,000
MILBRAE HIGHLANDS, San Mateo
Co., Cal.
Two-story frame and stucco apart-
ments and store building.
Owner—Milbrae Highlands, Inc.
Architect—Chas. Strothoff, 2274 15th
St., San Francisco.

BONDS

WINTERS, Yolo Co., Cal.—Winters
Grammar School District votes bonds
of \$16,000 to finance erection of ad-
ditional classrooms and remodeling
of present school building.

FRESNO, Fresno Co., Cal.—Elec-
tion held in Bullard School District
to vote bonds of \$30,000 to finance
erection of additions to the present
school was defeated. Swartz & Ry-
land, Brix Bldg., Fresno; 373 Main St.,
Salinas, and Spazier Bldg., Monterey.

ONTARIO, San Bernardino Co.,
Cal.—Electors of the Chaffey Union
High School District defeated bond
issue of \$410,000 for construction of
Junior College plant and additions to
present High School buildings. Junior
College project was estimated to cost
\$210,000, and alterations and addi-
tions to existing school, \$200,000.
Allison & Allison, 1005 California Re-
serve Bldg., Los Angeles, architects.

REDWOOD CITY, San Mateo Co.,
Cal.—Until June 2 bids will be re-
ceived by county supervisors for pur-
chase of \$35,000 bond issue of the
Hillsborough Grammar School Dist.;
proceeds of the sale to finance school
improvements. Willis Polk Co., 277
Pine St., San Francisco, architects.

CHURCHES

Plans Complete.
ADDITION Cost approx. \$25,000
OAKLAND, Alameda Co., Calif. 26th
Street and Broadway.
Hollow tile addition to present church.
Owner—First Presbyterian Church.
(Rev. Frank Sillsley, pastor).
Architect—Jos. J. Rankin, 26 O'Far-
rell St., San Francisco.
Bids will be taken about June 1.

Contract Awarded.
TEMPLE Cost, \$—
STOCKTON, San Joaquin Co., Calif.
Willows and Madison Sts.
One-story brick Jewish Temple.
Owner—Temple Israel.
Architect—Glenn Allen, Union Block
Bldg., Stockton.
Contractor—L. S. Peletz, 1660 West
Acacia St., Stockton.

Contract Awarded.
ALTERATIONS Approx \$50,000
SAN FRANCISCO. Van Ness Ave.
and Broadway.
Alterations to exterior of church.
Owner—Roman Catholic Archbishop,
1100 Franklin St., San Francisco.
Architect—H. A. Minton, Bank of
Italy Bldg., San Francisco.
Contractor—G. E. Scully, Phelan
Bldg., San Francisco.
Sub-bids will be taken shortly.

Preparing Plans.
CHURCH Cost, \$40,000
SACRAMENTO, Sacramento Co., Cal.
Reinforced concrete church with tile
roof (auditorium and classrooms)
Owner—First Nazarene Church.
Architect—Frederick Gloege, C. W.
Dustin, Associated, Los Angeles.
Plans will be completed in four
weeks.

Plans Being Figured.
ALTERATIONS Cost, \$16,000
SANTA ROSA, Sonoma Co., Cal.
 Alterations and additions to present church building (erect social hall and general alterations).
 Owner—First Methodist Episcopal Church.
 Architect—Rollin S. Tuttle, Box C, Los Gatos.
 Mead Clark, E. A. Eymann and W. J. Meeker are on the building committee.

Plans Being Figured—Bids Close May 30, 4:30 P. M.
CHURCH Cost, \$40,000
OAKLAND, Alameda Co., Calif. St. James Road.
 One-story frame and stucco church (Spanish type).
 Owner—Corpus Christi Parish.
 Architect—W. E. Schirmer, 700 21st St., Oakland.

Factories and Warehouses

Plans Being Prepared.
FACTORY Cost, \$25,000
OAKLAND, Alameda Co., Cal. 46th and Telegraph Aves.
 Two-story reinforced concrete factory and warehouse.
 Owner—Margaret Burnham Candy Co. 3800 Piedmont Ave., Oakland.
 Private Plans.

May 22, 1930
 Plans Being Figured.
CREAMERY Cost, \$14,000
SAN MATEO, San Mateo Co., Calif. Bayshore Highway.
 Owner—Jersey Farm Creamery.
 Plans by Enri Cavasso, 235 3rd Ave., San Mateo.

Bids Opened.
WAREHOUSE Cost, \$60,000
WATSONVILLE, Santa Cruz Co., Cal.
 Two-story reinforced concrete warehouse and general offices.
 Owner—Espindolas, Inc.
 Architect—A. W. Story, Pajaro Valley Bank Bldg., Watsonville.
 Following is a complete list of bids:
 Lawrence Scudder and Co., 369 Pine St., San Francisco.....\$ 80,000
 M. J. Murphy, Monterey..... 83,421
 Fred. McCrary, Monterey..... 83,500
 The Minton Co., Mt. View..... 86,642
 D. T. Walstrum, Watsonville..... 87,370
 Wm. Radtke, Gilroy..... 87,788
 T. H. Rosewall, Watsonville..... 90,500
 J. H. Graham, Salinas..... 92,000
 C. E. Burts, Oakland..... 92,770
 J. T. Walsh Co., S. F..... 100,000
 Bids held under advisement.

Plans Being Figured.
WAREHOUSE Cost, \$30,000
SACRAMENTO, Sacramento Co., Cal. Tenth and R Streets.
 Two-story and basement concrete brick plant warehouse.
 Owner—W. P. Fuller & Co., 301 Mission St., San Francisco.
 Architect—Coffman, Sahlberg & Stafford, Forum Bldg., Sacramento.

Contract Awarded.
LAUNDRY Cost, \$50,000
 (including equipment)
MARTINEZ, Contra Costa Co., Cal.
 One-story steel frame and brick laundry.
 Owner—Martinez Steam Laundry, 709 Howard St., Martinez.
 Plans by A. L. Rector, 6410 Amador St., Richmond.
 Contractor—Wallace Snelgrove, 24th and Esmond Sts., Richmond.

Plans Being Prepared.
TRANSIT SHED Cost, \$—
OAKLAND, Alameda Co., Cal. Outer Harbor.

400 ft. extension to transit shed.
 Owner—City of Oakland Port Commission, 424 Oakland Bank Building, Oakland.
 Architect—Eng. Dept. of Owner.

Plans Being Completed
REMODELING Cost approx. \$7000
SAN JOSE, Santa Clara Co., Calif.
 Second and San Fernando Sts.
 Remodel present warehouse.
 Owner—Lion & Co., San Jose.
 Architect—Herman Krause, Bank of San Jose Bldg., San Jose.
 Plans will be ready for bids within ten days.

Bids Opened.
CLEANING PLANT Cost, \$6000
HAYWARD, Alameda Co., Calif.
 One-story brick cleaning establishment (30x50-feet) and one-story hazardous building (32x14-ft.).
 Owner—Star Cleaners (Mr. Palmtag), Hayward.
 Architect—E. P. Whitman, 192 Main St., Hayward.

Following is a complete list of bids:
 C. Schwartz, Hayward.....\$6,238
 Tuttle & Green, Hayward.....\$6,500
 F. C. Little, Hayward..... 6,650
 A. Holyoke, Hayward..... 6,650
 Carl Sorensen, Hayward..... 6,750
 A. F. Hansen, Hayward..... 6,780
 James Willison, Hayward..... 6,880
 M. Russell, Hayward..... 7,190
 Bids held under advisement until May 19th.

Sub-Contracts Awarded.
WAREHOUSE Cont. price, \$17,999
OAKLAND, Alameda Co., Cal. 14th Ave. and E 14th St.
 Three-story factory and warehouse (wood and steel frame, reinforced concrete and hollow tile construction).
 Owner—Caldow Paint Co., 1422 14th Ave., Oakland.
 Architect—C. W. McCall, 1404 Franklin St., Oakland.
 Contractor—Villadsen Bros., 461 Market St., San Francisco.
 Excavation—I. C. Lacey, 5207 West St., Oakland.
 Mill Work and Lumber—Sunset Lbr. Co., 400 High St., Oakland.
 Steel Sash—Detroit Steel Products Co. Hunter-Dulin Bldg., San Francisco

Preparing Working Drawings—Contract Awarded.
BUILDING Cost, \$25,000
SAN FRANCISCO, N Mission St. bet. 5th and 6th Sts.
 Two-story reinforced concrete bldg.
 Owner—Mrs. T. Lyons.

Project involves 175 cu. yds. struc. excav.; 145 cu. yds. class B cem. conc.; 260 cu. yds. class A do.; 11 cu. yds. class E do.; 54,000 lbs. reinf. steel; 2000 lbs. cast steel (rockers and bearings); 1 lot misc. items of work.

NEVADA COUNTY, Calif.—As previously reported, bids will be received June 11 by State Highway Commission to construct overhead crossing over tracks of S. P. Ry. at Yuba Pass, consisting of one 112-ft. deck plate girder span, one 66-ft. deck plate girder span, one 54-ft. deck plate girder span, all on concrete piers, and 279-lin. ft. timber trestle approach on framed bents and rubble masonry abutments. Project involves: 1175 cu. yds. struc. excav.; 475 cu. yds. class B cement concrete; 375 cu. yds. class A do. (struc.); 127 cu. yds. class A do. (pave). 57,000 lbs. reinf. steel; 270,000 lbs. struc. steel; 6000 lbs. cast steel (bearings and rockers); 60 M. ft. b.m. redwood timber, dense select all-heart struc.; 45 M. ft. b.m. redwood timber select all-heart struc.; 120 cu. yds. rubble masonry; 1 lot misc. items of work.

AMADOR & EL DORADO COUNTIES, Cal.—As previously reported, bids will be received June 11 by State Highway Commission to construct timber bridge over Cosumnes river, 10 miles south of El Dorado, consisting of one 120-ft. through truss span on concrete piers and nine 19-ft. approach spans on frame bents with concrete pedestals, and approx. 0.14 miles of roadway to be graded and surfaced with untreated crushed gravel or stone. Project involves: 1300 cu. yds. rdwy. excav. without class; 2400 sta. yds. overhead; 390 cu. yds. hand placed fill; 265 cu. yds. untreated crushed gravel or stone surf.; 22 M. gals. water for surfacing; 8 sta. finish rdwy.; 1 boulder to be removed; 350 cu. yds. struc. excav.; 210 cu. yds. class A cem. conc.; 42 cu. yds. class B do.; 6500 lbs. reinf. steel; 14,000 lbs. struc. metal; 7250 lbs. steel castings; 129 M. ft. b.m. Douglas fir timber, select struc. grade; 37 cu. yds. broken stone (bitum. mac. surf.); 4 tons as-

phaltic road oil; 26 lin. ft. clean and relay corrug. metal pipe; 29 lin. ft. 12-in. corrug. metal pipe; remove 1 existing bridge; 1 lot misc. items of work.

State will furnish untreated crushed gravel or stone for surfacing and corrugated metal pipe

SAN JOSE, Santa Clara Co., Calif.—Until June 16, 11 A. M., bids will be received by Henry A. Pfister, county clerk, to construct reinforced concrete bridge on Penetencia Creek Road in Supervisor District No. 3. Plans obtainable from County Surveyor Robt. Chandler.

SAN JOSE, Santa Clara Co., Calif.—Until June 16, 11 A. M., bids will be received by Henry A. Pfister, county clerk, to construct reinforced concrete bridge on Bloomfield Ave. over Canadadero Creek in Supervisor District No. 1. Plans obtainable from County Surveyor Robt. Chandler.

SAN JOAQUIN CO., Cal.—Following bids received May 21 by State Highway Commission to construct bridge over Mokelumne river near Lodi, consisting of three 54-ft. reinforced concrete girder spans on concrete piers with pile foundations, and thirty 19-ft. timber approach spans with concrete deck on pile bents:

J. S. Metzger & Son, Stockton and Los Angeles.....	\$ 84,379
Jacobs & Pattian, Oakland.....	88,703
Frederickson & Watson Const. Co., Oakland.....	89,297
Ward Eng. Co., San Francisco.....	92,552
Lord & Bishop, Sacramento.....	94,822
Rocca & Coletti, San Rafael.....	95,372
M. B. McGowan, San Francisco.....	96,644
Rutte Const. Co., S. F.....	102,249
Utah Const. Co., S. F.....	103,732
Bodenhamer Const. Co., San Diego.....	105,201
Mathews Const. Co., Sacto.....	110,024
Healy-Tibbitts Const. Co., San Francisco.....	110,781
A. W. Kitchen, San Francisco.....	113,509

EUREKA, Humboldt Co., Cal.—Following bids taken under advisement by county supervisors to construct reinforced concrete bridge over South Fork of Eel River at Redway: Henry Padgett, Eureka, bridge, \$37,292; fills at 70 cents per cubic yd. Hirshbach & Sciarrino, San Jose, bridge, \$35,127; fills, \$4987.50; total, \$40,124.50.

W. L. Proctor, Santa Rosa, bridge proper, \$37,070; fills, \$4702; total, \$41,772.

F. J. Maurer & Son, Eureka, bridge, \$38,685; fills, \$4332; total, \$43,017. Thomas Englehart, Eureka, bridge, \$40,277; fills, \$3135; total, \$43,412. Smith Bros. Co., Eureka, bridge, \$43,195; fills, \$6783; total, \$49,978.

Argument arose when Henry Padgett explained that his bid of \$37,292 covered the total figure, and that he did not figure the fill work as part of the total. The two low bids were referred to the district attorney's office for a decision.

LOS ANGELES, Cal.—E. G. Perham, 1125 Stearns Dr., Los Angeles, at \$22,560 awarded contract by county supervisors to construct wooden truss bridge in Washington St. over San Gabriel river.

DREDGING, HARBOR WORKS & EXCAVATIONS

No. 1, involving grading; 4-in. waterbound macadam base course with 3-in. asphaltic concrete surface; conc. curbs and gutters; part circle corr. iron pipe culverts; 10-in. vit. pipe; catch-basins.

OFFICIAL PROPOSALS

STATE OF CALIFORNIA

DEPARTMENT OF PUBLIC WORKS

DIVISION OF HIGHWAYS

NOTICE TO CONTRACTORS

SEALED PROPOSALS will be received at the office of the State Highway Engineer, Public Works Building, Sacramento, California, until 2 o'clock, P. M., on June 11, 1930, at which time they will be publicly opened and read, for construction in accordance with the specifications therefor, to which special reference is made of portions of State Highway, as follows:

Nevada County, a reinforced concrete girder bridge across South Fork of Yuba River near Indian Springs (111-Nev-37-A), consisting of one 70-foot span and one 30-foot span on a concrete pier and concrete abutments with wing walls.

Nevada County, an overhead crossing over the tracks of the Southern Pacific Railroad near Yuba Pass (111-Nev-37-A), consisting of one 112-foot deck plate girder span, one 66-foot deck plate girder span, one 54-foot deck plate girder span, all on concrete piers and 279 lineal feet of timber trestle approach on framed bents and rubble masonry abutments.

Santa Clara County, between San Antonio Avenue and Sunnyside (IV-SCI-2-A), about four and nine-tenths (4.9) miles in length, to be graded and paved with Portland cement concrete and asphalt concrete.

Santa Barbara and San Luis Obispo Counties, between Third Crossing and the Easterly Boundary (V-S-B, SLO-57-C,D,C), about twenty-six and two-tenths (26.2) miles in length, to be graded and surfaced with oil treated crushed gravel or stone.

Los Angeles County, between Citrus Avenue and Glendora (VII-LA-9-H), about one (1.0) mile in length, to be graded and paved with asphalt concrete.

Amador and El Dorado Counties, a timber bridge across Cosumnes River about 10 miles south of El Dorado (X-Ama-E-D-65-A,C), consisting of one 120-foot through truss span on concrete piers and nine 19-foot approach spans on frame bents with concrete pedestals, and approximately 0.14 mile of roadway to be graded and surfaced with untreated crushed gravel or stone.

Plans may be seen, and forms of proposal bonds, contract and specifications may be obtained at the said office, and they may be seen at the offices of the District Engineers at Los Angeles and San Francisco, and at the office of the District Engineer of the district in which the work is situated. The District Engineers' offices are located at Eureka, Redding, Sacramento, San Francisco, San Luis

Obispo, Fresno, Los Angeles, San Bernardino, and Bishop.

A representative from the district office will be available to accompany prospective bidders for an inspection of the work herein contemplated, and Contractors are urged to investigate the location, character and quantity of work to be done, with a representative of the Division of Highways. It is requested that arrangements for joint field inspection be made as far in advance as possible. Detailed information concerning the proposed work may be obtained from the district office.

No bid will be received unless it is made on a blank form furnished by the State Highway Engineer. The special attention of prospective bidders is called to the "Proposal Requirements and Conditions" annexed to the blank form of proposal, for full directions as to bidding, etc.

The Department of Public Works reserves the right to reject any or all bids or to accept the bid deemed for the best interests of the State.

DEPARTMENT OF PUBLIC WORKS
DIVISION OF HIGHWAYS

C. H. PURCELL,
State Highway Engineer.
Dated May 14, 1930.

STATE OF CALIFORNIA

DEPARTMENT OF PUBLIC WORKS

DIVISION OF HIGHWAYS

NOTICE TO CONTRACTORS

SEALED PROPOSALS will be received by the Department of Public Works, Division of Highways, at the office of the District Engineer, Room 211, State Building, San Francisco, California, until 2:00 P. M. on Wednesday, May 28, 1930, at which time they will be publicly opened and read, for performing work as follows:

Sonoma and Mendocino Counties, between Cloverdale and Hopland (IV-Son-Men-1-A) twelve and five-tenths (12.5) miles in length, asphaltic road oil to be furnished and applied.

Plans may be seen, and forms of proposal, bonds, contract and specifications may be obtained at the above address.

No bid will be received unless it is made on a proposal form furnished by the District Engineer. Each bid must be accompanied by cash, or a certified check made payable to the Director of Public Works, for an amount equal to ten (10) per cent of the amount bid, such guaranty to be forfeited should the bidder to whom the contract is awarded fail to enter into the contract.

The Department of Public Works reserves the right to reject any or all bids or to accept the bid deemed for the best interests of the State.

DEPARTMENT OF PUBLIC WORKS
DIVISION OF HIGHWAYS

C. H. PURCELL,
State Highway Engineer.
By JOHN H. SKEGGS,
District Engineer, Dist. IV.
Dated: May 14, 1930.

REID LANDS CONTRACTS

H. C. Reid & Co., of San Francisco, have been awarded a contract by the Los Angeles County Supervisors to install a street lighting system in Brooklyn Avenue, involving forty-eight Marbelite standards. The bid was \$20,851.

The same firm at \$25,758 submitted the lowest bid to the Los Angeles County Supervisors on May 19 to install a street lighting system in Pico Boulevard. The engineer's estimate on this project was \$23,198. Newbery Electric Corporation was second low on this unit at \$26,327.

NOTICE TO CONTRACTORS

SEALED BIDS will be received by
 Geo. B. McDougall, State Architect,
 Public Works Building, 11th and P
 Streets, Sacramento, California, up un-
 til 2 o'clock P. M., Tuesday, June 17,
 1930, thereafter on said day to be pub-
 licly opened and read for the erection
 and completion of Guard House, Veter-
 erans' Home, Yountville, California, in
 accordance with plans and specifica-
 tions therefor.

The building will be a two story re-
 inforced concrete structure with wood
 and tile partitions, wood roof con-
 struction and tile roof. The total floor
 area is approximately 3500 square feet.

Plans and specifications are on file
 for examination in the office of the
 Division of Architecture, Public Works
 Building, Sacramento, California, and
 also at Room 1025 Associated Realty
 Building, Los Angeles, and at the

principal California Cities Builders'
 Exchange Offices.

Plans, specifications and proposal
 forms may be secured by licensed con-
 tractors who have qualified or who
 will qualify by furnishing a verified
 statement of experience and financial
 condition as required by the provisions
 of Chapter 644, Statutes 1929, and
 whose statements so furnished are
 satisfactory to the Department of
 Public Works. Questionnaire forms
 may be secured from the Division of
 Architecture.

Bids will not be accepted from a
 Contractor to whom a proposal form
 has not been issued and all bids must
 be on proposal forms supplied by the
 State.

Requests for plans shall be accom-
 panied by a deposit of twenty-five
 (\$25.00) dollars. Check shall be made
 payable to the Department of Public
 Works, Division of Architecture. De-
 posit will be returned upon receipt of
 the set in good condition, at Sacra-
 mento Office of the Division within 30
 days after opening bids, otherwise it
 will be forfeited to the State.

All bids must be filed at the office
 of the State Architect on or before the
 time heretofore stated and in accor-
 dance with the "Rules for Bidding" ac-
 companying the proposal form.

No bid will be considered unless cash,
 a bidder's bond made payable to the
 State of California or a certified check
 made payable to the "State Engineer,
 Department of Public Works," in the
 sum of at least ten per centum (10%)
 of the amount of the bid is enclosed
 with the bid.

The Division of Architecture, State
 Department of Public Works, reserves
 the right to reject any or all bids and
 to waive any informality in any bid
 received.

STATE DEPARTMENT OF PUBLIC WORKS**DIVISION OF ARCHITECTURE**

BERKELEY WANTS NEW CITY MANAGER

With the formal acceptance of City Manager John N. Edy's resignation, Mayor Thomas E. Caldecott of Berkeley, announces that applications for the position will be received in his office until June 2.

Applicants for the position are requested by Mayor Caldecott to submit their qualifications and credentials with their applications. It is understood that more than a dozen city managers and several civic leaders already have applied for the position, which carries a maximum salary of \$10,000 per year.

John Edy, the present city manager, resigned to accept a similar position at Flint, Michigan, paying \$15,000 a year with an annual increase of \$1000 until the maximum of \$20,000 a year is reached.

REPUBLIC STAINLESS STEEL UNIT FUNCTIONING

Operations have been started in the new stainless steel finishing division of the Republic Steel Corp., it is announced by T. M. Girdler, chairman of the company. The new equipment, located at Massillon, gives Republic the largest capacity in the world for the production of highly polished stainless sheets. The metal is produced under Krupp license.

The equipment consists of 40 units, specially designed by Republic engineers. Rough grinding, polishing and buffing operations are carried on in separate rooms so that no grit in the air may mar the final finish. In securing the mirror finish new oscillating type machines are used which eliminate all polishing marks.

According to Republic officials, the development of machinery for quantity polishing of Enduro Nirosta stainless steel largely solves the problems of its production on a volume basis in this country. The pressure for large scale output is increasing rapidly, with the expanding demand for stainless in a growing number of industries including automobiles, building, oil and aviation. About 40 per cent of the demand is for polished metal.

FIR-TEX PLANT WILL BE OPERATING JULY 1

Completion of the new \$1,500,000 plant of the Fir-Tex Insulating Board Company at St. Helen's, Ore., by July 1.

The new product will be placed on the market shortly following that date. Fir-Tex is a thermal insulating board made entirely by the disintegration of wood fibers by converting wood waste, consisting of limbs, edgings and slabs. Through a process invented by A. E. Millington, now vice-president and general manager of the Fir-Tex Insulating Board Company, these waste products will now be made into a commodity for which its makers claim greater tensile strength, fire-resisting and water-proofing qualities than insulating boards now on the market.

Early in July the \$1,500,000 Fir-Tex plant at St. Helen's, Ore., is expected to be in operation. The estimated annual capacity will be 75,000,000 feet of insulating board and lath.

In 1928 A. E. Millington (father) and C. A. Millington (son) built a laboratory at Standard, Calif., and for many months quietly made various kinds of sawdust stew. They found out what they wanted to find out, and took out patents on their discoveries. Then they surveyed the Pacific Northwest for suitable plant-site and interested some major financiers in their project. Now they are making their final plans for production and marketing.

Raw materials for Fir-Tex will come from the sawmills tributary to the Columbia River between Portland and Astoria. This volume of waste will make possible a potential daily production of 6,000,000 square feet of Fir-Tex (capacity of present unit is 250,000 per day). Chippers will be installed at the sawmills, to reduce slabwood to half inch chips. These will be loaded on barges and brought to the Fir-Tex docks. A belt conveyor will take the chips to a battery of 6 rotary globe digesters, each 15 feet in diameter, where they will be cooked with live steam. After several hours' cooking the softened chips will be transferred to storage pits and thence to the shredding machines. These machines, Millington-designed, instead of grinding up the fibers, pound them apart, freeing the individual shreds. What was once a multitude of chips will now be a running mass, which goes from the last shredding machine to the mixing tanks. Thence the pulp goes to the board machine, designed by the Millingtons, and largest ever built for insulation board. The product emerges from this machine as an endless board, at the rate of 20 feet per minute. After passing through the dryer the board is inspected for color and weight, and they cut by automatic saws into standard sizes. The entire process requires less than eight hours.

Among the directors of Fir-Tex are Herbert Fleischacker, Lee A. Phillips, Franklin T. Griffith, K. D. Dawson, C. E. Dant, H. F. McCormick and other Pacific Coast financiers.

LOS ANGELES VOTES \$38,800,000 FOR WATER DEVELOPMENTS

Los Angeles last Tuesday voted a bond issue of \$38,800,000 to finance improvements and extensions to the municipal water works system.

Included in the project for which the bonds were voted are plans for enlarging the present Owens river valley aqueduct; purchase of rights in Owens valley and surrounding Mono lake; construction of a tunnel to carry the Mono basin water to the headwaters of the Owens river; construction of reservoir dams in the upper Owens valley and along the aqueduct and improvement of the water system within the limits of Los Angeles.

A large single item included under the bond issue is \$5,790,000 for the purchase of the towns of Bishop, Laws Big Pine, Independence and Lone Pine. Also \$6,660,000 has been allotted for the purchase of privately owned property in the Owens and Long valleys and \$7,000,000 for buying lands and water rights in Mono basin.

RULING ON PUBLIC GARAGE AS NUISANCE STANDS

The Supreme Court has refused to review the determination of a Pennsylvania court that a public garage is a nuisance merely because it is a garage, says the U. S. Daily.

This was made known by the court on May 19 in denying a petition for a writ of certiorari in the case of Riesenman, et. v. Nesbit, et al., No. 771.

This action arose out of a bill in equity in the Court of Common Pleas of Venango County, Pa., to enjoin as a nuisance the garage business operated by the petitioners at Franklin, Pa. The brief pointed out the garage is housed in a new \$40,000 building which contained a salesroom, storeroom, two offices, rooms on the second floor for the storage of automobiles, and a shop on the first floor in the rear equipped with hand tools and a few small electric machines for light repairs only.

Relying on the decision of the Pennsylvania Supreme Court in the case of Ladner v. Siegel (233 Pa. 305, 310), the lower court ruled the garage was a nuisance per se, it being situated in a residential section. The court thereupon enjoined the petitioner's business as a private nuisance, not by reason of the evidence produced at the trial, it was claimed, but by reason of the terms of the arbitrary nuisance per se rule.

It was urged that the application in this case of the public garage rule, is an arbitrary exercise of authority violating the Fourteenth Amendment in that it conclusively presumes the facts in individual cases, and is not the equivalent of a rule of evidence defining a prima facie case.

"The public garage rule," as announced has no real or substantial relation to the general welfare, it was asserted.

ESTIMATING FEE SYSTEM OF A. G. C. UNIT IS SATISFACTORY

(Memphis Chapter of Associated General Contractors of America Adopts System for Compensating Contractors for Expenses Involved in Making Bids. Reprint from "The Constructor," A. G. C. Publication.)

The use of the estimating fee system by the Memphis Chapter of the Associated General Contractors was begun over a year ago and was found to be a very satisfactory means of providing compensation to contractors for the expenses attendant upon making out bids. The inauguration of the system occurred during an abnormal period of recession in business activities and its success under such conditions is seen as an added point in its favor.

During the period in which the estimating fee system has been in force in the Memphis district, out of a volume of work totalling \$1,500,000, over \$19,000 were handled in fees of which \$14,979.98 went to the participating bidders and \$4,185.00 went to the association to reimburse it for the expenses involved in carrying on the work. Mr. R. G. Church, secretary of the Memphis Chapter, reports that the association has a partial record of 63 building projects in the district. Of this number 59 (involving 265 bidders) were awarded to firms bidding in the fee, eight were projects awarded to firms outside the local chapter, which did not participate in the estimating fee; however, in every one of these projects the difference between the low bid and the lowest bid in which the fee was estimated was greater than the amount of the estimating fee—in other words the estimating fee was not instrumental in losing the job. Three of the total number of projects had no fee placed upon them, it being waived because of conditions peculiar to the projects. On two of the projects the work was done by the owners. On one project on which the fee was placed delays occurred and all bids were finally rejected.

Since the use of the system had proved so satisfactory to all members it was decided to incorporate it in the by-laws of the chapter. The rules governing the estimating fee system as they stand now in the by-laws follow in full:

Approximate Amount of Total Bid	Av'g Per M'br Fee
\$ 000.00 to 2,000.00	\$ 00.00
2,000.00 to 3,000.00	10.00
3,000.00 to 5,000.00	12.00
5,000.00 to 10,000.00	15.00
10,000.00 to 15,000.00	20.00
15,000.00 to 20,000.00	25.00
20,000.00 to 30,000.00	30.00
30,000.00 to 40,000.00	40.00
40,000.00 to 50,000.00	50.00
50,000.00 to 60,000.00	60.00
60,000.00 to 75,000.00	75.00
75,000.00 to 100,000.00	100.00
100,000.00 to 150,000.00	150.00
150,000.00 to 200,000.00	200.00
200,000.00 to 300,000.00	250.00
300,000.00 to 400,000.00	300.00
400,000.00 to 600,000.00	400.00
600,000.00 to 1,000,000.00	500.00
1,000,000.00 to 2,000,000.00	600.00

Schedule of Estimating Fees

"Sec. 1. Name: That hereafter the members of this association engaged in construction work, in addition to the regular dues hereinbefore assessed, shall be assessed with fees on the estimating fee system plan, as hereinafter set out, such activity to be known as the Estimating Fee System of the Memphis Chapter, Associated General Contractors of America, Inc.

Purpose a Nominal Expense Sharing
 "Sec. 2. Purpose: The fee system is a nominal expense-sharing system among contractors, its purpose being

dual: First, in a measure to reduce the loss of contractors for expenses in making bids, thus encouraging reasonable competitive bidding; and, second, the reduction of such overhead expense of contractors, usually figured in bidding, enabling him to reduce estimated overhead costs, also included, thus encouraging building construction.

"Sec. 3. Jurisdiction: That the operation of the fee system be under the jurisdiction and supervision of the executive board of the chapter, and the staff of the chapter carrying on the detailed activities incident to the successful operations of same.

"Sec. 4. Participants: That all sustaining members of the local chapter, as well as all A. G. C. members from foreign chapters or branches of the national association be permitted to participate in the fee system, and in addition any non-member may, upon application to and in the discretion of the executive board, Associated General Contractors of America, participate in said system.

"Sec. 5. Fee Schedule: That for the purpose of the system, a schedule of fees (given in accompanying box) per member bidding, ranging from approximately 1/2 to 1/20 of one per cent of construction cost, is adopted.

"Sec. 6. Operation: (a) That each participant immediately upon deciding to bid on a project shall notify the manager or the association office, that he or they intend to bid on said project.

"(b) That the manager, upon finally ascertaining the number of bidders upon any one project, and if possible not less than two days prior to the date set for submitting bids, shall inquire of a sufficient number of bidders as to the probable cost of the project to permit him, the manager, or his duly authorized assistants, to approximate this cost, at which time the manager shall determine from the schedule outlined above the per member fee for said project and then multiply this per member fee by a number which is one less than the participating members so bidding, the resultant figure being the total fee to be collected from the successful bidder, if a participant in this system.

"(c) That the manager shall then notify each participant the amount of the total fee to be paid by the successful bidder.

"(d) That all participants, submitting on any project, within the jurisdictional boundaries of the chapter and for the purpose of this system, shall file with the manager of the chapter an exact copy of his or their proposal on the particular project and at the same time as the original proposal is submitted to the owner, architect, engineer or agent of either. The proposal so filed with the manager of the chapter, to be sealed and properly identified on the envelope enclosing same.

"(e) That immediately after the time when the bids are to be opened by the owner, architect or engineer or their agent, the manager shall open the bids which have been submitted to him on said project and, as outlined above, tabulate them. Upon completion of the tabulation and his ascertaining the lowest bidder, the manager, or his duly authorized assistant, shall notify at once the said low bidder that his proposal is the lowest of the bids submitted by participants in the fee system.

Successful Bidder Sends Check for Fee

"(f) Upon the award of the contract, the successful bidder, if a member of this chapter or participant in this system, shall within 30 days after the award, forward to the office of the association, or give to the manager in person, a check covering the total amount of the estimating fee on said work, theretofore given him by the manager or association office, which check shall be made out to the order of the Memphis Chapter, A. G. C. of A., Inc., and be deposited to the account of the association. It shall then be the duty of the manager, or his duly authorized assistants, to compute the amount of the fee which shall accrue to the association and which amount, in all cases, shall be twenty per cent of the total fee, as collected from the successful bidder. The manager, or his duly authorized assistants, shall then pro-rate the remaining amount of the fee, after having subtracted the amount accruing to the association, among the unsuccessful bidders, and shall draw and forward checks for the amount of their pro-rate to all unsuccessful bidders, which checks and figures shall be checked by the secretary-treasurer of the association and which officer shall sign said checks. The disbursements of monies in the association funds and received from such estimating fees, shall not be construed as violating Article XII of the By-laws.

"(g) That the manager shall, after the award of the contract, forward to each bidder a complete tabulation of the bids, alternates, etc.

"Sec. 7. Ethics: (a) That is understood to be essential for the successful operation of the estimating fee system that when bids are solicited and received by an owner, architect, engineer or his agent, no participant shall hereafter solicit the work on a percentage basis, or any other form of cost-plus contract, provided, however, that any participant shall have the right to accept the work on a percentage basis if tendered him without guaranteed maximum cost or at a guaranteed maximum cost not less than his original bid.

"(b) It is further understood as being essential to the successful operation of the estimating fee system that the amount of a bid after once having been filed with the architect, owner, engineer or their agent, and opened, should not be altered except when substantial changes are made in the work or when further bidding on alternate items is requested. In the event of such change, or further bidding, the contractor should bid only on the item specified and should increase or decrease the amount of his bid only in proportion to the change or alternate involved. Any reduction of a bid disproportionate to such change or the submission of any alternates which in effect produce such a disproportionate reduction, constitutes unfair competition. However, the low bidder may decrease his bid upon all or any part of the work for any reason he sees fit.

Bidders Must Notify Manager If Called In

"(c) That should any bidder, other than the lowest, be called in by the owner, architect, engineer or their agent, for consideration of the contract, then that bidder shall notify the manager of the chapter when he is so called in and in notifying the manager, he may secure from the

manager the name and amount of the bid of any bidder whose proposal is between the amount of the lowest bidder and the amount of the bid called in and making the request, as provided for in this paragraph, and that the low bidder shall be given the same information subsequently to any other bidder under circumstances as provided for in this paragraph.

"No person or firm shall be entitled to receive any estimating fee who has not in good faith made calculations of the cost of the work; and the manager, before paying out any fees, may at his option, demand from one or more or all of the bidders, their work sheets showing work done in preparing estimates or bids. No member shall file a complimentary figure or bid without notifying the manager, and upon such notification, he will be included on the list of participants of the fee system on that job. In the event any member submits a complimentary bid without notifying the manager, he shall be assessed and pay to the association the amount of the fee he would have received had he been a participant in the system. Nor shall any member furnish figures or facts for a complimentary bid of another contractor without notifying the manager or association office. Any member so doing shall forfeit his right to an estimating fee, and his share will revert to the successful bidder paying same.

Permanent Changes In Rules Only by Vote

"Definite or permanent changes in the aforesaid rules and provisions can be made only by a proper vote of the members, in regular or special meeting, with notice of said meeting made in writing or by an announcement at a meeting, at least thirty days prior to the date of the called meeting for the purpose of considering change or changes in the aforesaid rules and provisions, but provided, however, that temporary deviations may be made on special conditions only, under authority of the executive board."

Some questions arose in connection with the legality of the system and in order that these might be settled it was determined to secure an opinion on the matter from competent authority. The plan was submitted to the firm of Crabtree & Crabtree, Memphis lawyers, and a draft of the by-laws was drawn up by them. The opinion of the firm on the legality of the system is given in full below.

"As we understand the proposed system as expressed in the proposed by-laws, it is a nominal expense sharing system among contractors, whereby they may receive a nominal return for the labor and expense incident to the conscientious preparation of estimates or bids on construction work. This, the members of your association believe, will be of great benefit to themselves and the public (especially those employing contractors or competitive estimates) in that the expense of preparing and submitting estimates or bids, being part of the contractor's overhead expense, and considered and included in every bid submitted by him, is reduced and economically distributed. It seems to us that, if not abused, this would tend to the benefit of persons seeking estimates, in that the entire expense of contractors in former unsuccessful estimates would not be reflected in the estimates on their job, and yet the proposed schedule of fees is not of sufficient size to encourage fraud. And, too, the fact that under the proposed system the unsuccessful bidder is not burdened with the entire expense of preparing his estimate, should encourage, rather than stifle reasonable competition.

No Interference With Competition or Prices

"If the system can accomplish this

mutual benefit to its members and the public, without tending to impair competition or enhance prices, it is our opinion that it will be upheld by the courts. If it does not, it will be adjudged an unlawful restraint of trade and as such unenforceable. While the individual members of your association may bid or refuse to bid, increase or decrease prices as they see fit, they cannot enter into an agreement or combination to do either.

"In this connection, we would call your attention to two associations attempting, in a far more restrictive manner, to regulate the estimates or bids of their members

"1. About 1897, the Milwaukee Masons & Builders Association established by-laws providing among other things: (a) That all bids from members be first submitted to the association, by whom the low bidder was determined, and to his bid was added six per cent for the benefit of the association before it was submitted; (b) Members not first submitting their bids to the association would submit no bid; (c) No member should bid on changes or alterations on the same work. Members were fined for non-compliance; and by contract, complying members received rebates in price from materialmen.

"In a suit to collect from one of its members various sums due under these by-laws, the Supreme Court of Wisconsin held that they amounted to an unreasonable and oppressive restraint of trade and denied recovery. Milwaukee Masons & Builders Association v. Niezerowski, 95 Wis., 129; 37 L.R.A., 127.

"2. At about the time of the organization of the Milwaukee Builders, a majority of the master plumbers of the city of Memphis formed an association and adopted like by-laws, providing among other things: (a) Each member would report weekly all work done, and if it developed that this work was done in competition with another member he was charged a certain schedule for each item ranging from ten to 25 per cent of the price charged therefor; (b) No member should purchase supplies from dealers not complying with their regulations; and (c) No member should purchase materials from anyone other than a member of the association.

"In a suit to collect assessments under these by-laws (Bailey v. Master Plumbers Association, 103 Tenn., 99; 46 L.R.A., 561), the Supreme Court of Tennessee approved and followed the ruling of the Wisconsin Court, saying:

"In its essential facts the present case is very similar to that of Milwaukee Masons & Builders Association v. Niezerowski, decided by the Supreme Court of Wisconsin. Certain by-laws of the association suing in that case, required that all bids of its members should be first submitted to a committee of the association, which should decide who was the lowest bidder, that he should then add at least six per cent to the amount submitted to the committee and present only the increased figures as his bid to the person desiring to build, and that the member so securing the contract should pay to the association the amount of the increase on his bid as submitted to the committee. The defendant was a member of the association, made a contract for the erection of the Gesù Church of Milwaukee, at the price of \$71,000. The association afterwards demanded of him six per cent on the \$71,000 and he finally executed his note therefor. Part of that note, \$2,283, remaining unpaid, the association sued him for its collection, and was repelled from the court upon the ground that the by-laws were illegal and void because in restraint of trade."

"The court, in its opinion said:

"The manifest purpose of the pri-

vate by-laws was, by means of the combination thus effected, to suppress fair and free competition in bidding for building contracts in Milwaukee, and by such combination and method of bidding, upon its face apparently fair and free from objection, but, in fact, unfair and delusive, to compel owners to pay for the erection of buildings the sum of six per cent in excess of what they would be otherwise obliged to pay for them, if fairly let to the lowest bidder uninfluenced by such combination. It seems to us that the restraint put upon the rights of the proprietors by the provisions of these by-laws or rules, as well as the entire scheme thus disclosed, is contrary to public policy, and therefore void. . . . While all reasonable stipulations and means to protect labor or trade are laudable, we must hold that the means here sought to be employed are such as the law will not sanction. We must consider what may be done under such an agreement and the result which it will necessarily produce. As already pointed out, the operation of this combination, under its private by-laws, is to suppress free and fair competition in bidding for contracts, and by delusive and deceptive means members of the association are enabled to exact from owners a higher price for buildings than they would otherwise have to pay." 37 L.R.A., 129, 130.

Member Was Bound to Pay a Certain Sum

"In its essential facts the present work in competition with another member was bound to pay a certain sum to the association; the same is true here. There the member was required in positive terms to exact that sum from the customer, here such is the natural and proved effect.

"The distinction between the two cases is one without a difference in legal consequences. There the place for the burden was expressed; here it is implied. In each case the purpose to tax the customer for the benefit of the association and its members is plainly indicated. The provision there and the provision here are alike in restraint of trade, contrary to public policy, illegal and void. Both of them violate the general law, in that they tend unmistakably and inevitably to the destruction of free competition in important lines of trade and to the enhancement of legitimate prices therein."

"This ruling of our Supreme Court has never been changed or modified.

"The chief distinctions between the systems proposed by you, and those involved in the above mentioned suits, are:

"(1) There is no purpose or attempt to regulate purchase of supplies or materials by the members.

"(2) There is no attempt to curtail bidding, but it rather encourages competition by the sharing of the expense of making estimates.

"(3) By the section on complimentary bidding, on one not actually doing the work, an estimate cap participate in the system.

"(4) No control is exercised over the manner of making or amounts of bids submitted.

"(5) No control is exercised over the low bidder, he being free to make any further bid or contract he desires with the owner.

"(6) The schedule of fees is so low, ranging from $\frac{1}{2}$ to 1/20 of one per cent, as that even if included in bids and not absorbed by the contractor, it would never, unless abused, amount to a considerable sum.

"(7) The system is so planned as that even if the owner pays the fee, it is exceedingly minor and is paid only to those who have rendered service to him in figuring his work.

"(8) The system contemplates competition from others than participants

in this system, and in the event a non-participant is the successful bidder, the service of figuring bids is rendered the owner without cost.

"In addition to the above distinctions, since these suits were decided there has been a decided change in public sentiment, reflected to a degree in judicial opinions, more sympathetic with and favorable to business protection and business combinations. The opinions quoted were handed down during a period of 'anti-trust' agitation which has greatly subsided.

"As hereinbefore stated, if the system can be so operated without impairing competition or enhancing prices, it will be upheld. Personally, we think your system fairly and justly distributes the cost of making estimates, but professionally we cannot give you a more definite opinion until a further judicial determination is had in this state."

HIGHWAY COMM. SEEKS BIDS ON SIX PROJECTS

Bids will be considered by the State Highway Commission on June 11 for 6 projects, including one reinf. concrete girder bridge, one timber bridge, an overhead crossing and three grading and paving projects.

In Nevada County, bids are wanted for a reinforced concrete girder bridge across the South Fork of the Yuba river near Indian Springs, consisting of one 70-foot span and one 30-foot span on a concrete pier and concrete abutments with wing walls.

In Amador and El Dorado Counties, bids are desired for the construction of a timber bridge over the Cosumnes river about ten miles south of El Dorado, consisting of one 120-foot through truss span on concrete piers and nine 19-foot approach spans on frame bents with concrete pedestals, and approximately 0.14-mile of roadway to be graded and surfaced with untreated crushed gravel or stone.

In Nevada County, bids are requested for an overhead crossing over the tracks of the Southern Pacific R. R. near Yuba Pass. This project will consist of one 112-foot deck plate girder span, one 66-foot deck plate girder span, one 54-foot deck plate girder span, all on concrete piers and 279 lineal feet of timber trestle approach on framed bents and rubble masonry abutments.

In Santa Clara County, bids are wanted to grade and pave with cement concrete, 4.9-miles between San Antonio Avenue and Sunnysvale.

In Santa Barbara and San Luis Obispo Counties, bids are desired for grading and surfacing with oil treated crushed gravel or stone, 26.2-miles between Third Crossing and the east boundary.

In Los Angeles, bids are requested to grade and pave with asphalt concrete, 1.0-mile between Citrus Avenue and Glendora.

FARM MACHINERY FIRMS IN MERGER AT FRESNO

Irrigation Engineering Co. and the Farm Equipment Company, Ltd., of Fresno, have been merged.

The merger is part of a plan to expand the business of the Farm Equipment Company. Acquiring the manufacturing plant and patent rights of the Irrigation Engineering Company, the Farm Equipment concern will continue to operate the present plant at Fresno.

Officers of the Farm Equipment Company are: C. H. Sortor, president; T. C. Jameson, of Corona, vice-president, and L. A. Hendrix of Fresno, secretary-treasurer.

THE OBSERVER

What He Hears and Sees on His Rounds

Fire, which authorities believe to be of incendiary origin, destroyed the Roy Beebe Lumber Mill at Leona, Ore., May 25, with a loss, estimated by the owners, at \$350,000.

Plans for a new organization of the lumbermen of Los Angeles are being considered and some action is expected soon. The new association will be formed upon a somewhat different basis from that previously adopted, if present plans carry. Its work will be chiefly educational.

Motor Body Co. of Fresno, capitalized for \$25,000 has been incorporated at Fresno and will specialize in the construction of school busses. G. Phillips is president of the company which will maintain shop and offices in Fresno St., between Broadway and H St.

State Railroad Commission has authorized the Los Banos Lumber & Supply Company, and Malm and Angle Lumber Company, Inc., to cancel their warehouse tariffs for public utility warehouse service at Los Banos and vicinity and to become parties to the California Warehouse Tariff Bureau tariffs now in effect in the San Joaquin Valley.

Counsel for Celotex Co. and counsel for David Adler, who recently filed a receivership bill against the company, agreed in Chancery Court to a stipulation which will enable receivership action to be tried next month at Wilmington, Del., if nothing unforeseen develops. Stipulation was agreed upon after counsel for the company argued a motion for expediting the case.

A concatenation of the Los Angeles district, Order of Hoo Hoo, has been set for June 13. Carl D. Shufelt, vice-gent snark, has announced his staff to serve on the occasion as follows: Senior Hoo Hoo, Cliff Estes; Junior Hoo Hoo, Ed Culnan; Bojun, Dee Essley; Scrivenoter, Ed Martin; Custocattian, George Geary; Arcanoper, Larry Turnbull; Gurdon, Russell Edmonson; Jabberwork, Earl Bowe.

Governor Roosevelt of New York has signed the bill amending the labor law regulating the hours of work and the wages of laborers, workmen and mechanics on railroad grade-crossing eliminations, by declaring that the hours of labor shall be the same as on other public work and that workmen shall be paid at the prevailing rate of wage. It is expected the railroad companies will attack the constitutionality of this law in the courts.

Following the shutdown of the Vancouver Lumber Company, Ltd., mill at Vancouver, B. C., the Hillcrest mill, Vancouver Island, and several small mills on Vancouver Island, the surplus of logs in the water has assumed a less formidable appearance. The mills have shut down indefinitely, and it is rumored will not resume operations this year unless market conditions improve. This represents a reduction in lumber production exceeding 10,000,000 feet monthly.

George Oliver, former city engineer, has been appointed city manager of Pittsburg, Contra Costa County, succeeding Roy Watkins, who resigned due to illness.

Plans have been filed by interests affiliated with Henry L. Doherty & Co. for a 63-story skyscraper, to be erected in the Wall St. district of New York City at a total cost for land and building of \$15,000,000. For the first time in building design it is planned to use double-deck elevators which will load and unload at two floors simultaneously. It is reported that this structure is the first of a series of tall buildings to be erected by the Doherty interests in downtown New York. The architects are Clinton & Russell and Holton & George. James Stewart & Co. will be the builders.

Morris Davison of Stockton was elected president of the newly-formed Pacific Coast Chapter of the Institute of Scrap Iron & Steel, Inc., at the recent convention in Los Angeles. Thirty-five charter members were recruited from steel men from eleven western states at the convention. The object of the organization is to conserve scrap steel and iron and prevent its shipment to foreign countries. Steel mills on the Pacific Coast, where there are no great iron supply sources, use 100 per cent scrap steel and iron in fabrication.

One of the difficulties of many of us is to meet the expense of unforeseen sickness or death; another is the necessity for meeting payments on a home when through unfortunate circumstances the income of the head of the family had been impaired. Such cases have been the fertile field of the loan shark. Banks, by requiring security which the average wage-earner could not produce, have not been able to assist. Early in May, 1928 the National City Bank of New York inaugurated a plan whereby the wage-earner could receive the same consideration in the matter of a loan as the large borrower. The plan is now in successful operation and is being seriously considered by other institutions. The National Industrial Conference Board says:

"The publication of the first year's experience with this plan brings out some interesting facts. Loans aggregating \$16,529,805 were granted to 51,203 borrowers. An analysis of data in the possession of the bank indicates that the average borrower is thirty-four years of age, is earning \$2,755 a year, has been steadily employed in his present connection for more than five years, is married, and has one child. Loans averaged \$320 in amount, and about 5 per cent of the borrowers repaid their loans before the expiration of the year allowed. Approximately 87 per cent of applications for loans were granted. More than 97 per cent of the borrowers fulfilled their obligations in the matter of regular repayment deposits, and in less than one per cent of the cases was it necessary for the bank to take legal action in order to effect collection of loans."

ALONG THE LINE

As a means of aiding the unemployment situation, the Los Angeles city council has asked the civil service commission to instruct the foreman of the group which is to carry on the city's weed-cleaning program this summer, to use discretion in order that he may employ from civil service lists, "those who are in need and have families to support, provided they are citizens of the city."

C. H. Purcell, California state highway engineer, is on his way to Washington, D. C., to represent Governor Young at the National Safety conference called by President Hoover. Purcell will also attend a session of the executive committee of the Association of State Highway Officials, and will confer with officers of the United States Highway Bureau on federal road projects affecting California.

States and counties of the nation will co-operate in President Hoover's plan to enlarge all construction programs to help the unemployment situation to the extent of spending at least \$250,000,000 more in 1930 road building than was spent in 1929. State and local authorities plan to spend \$1,601,167,455 for highway improvement in 1930, according to reports of state highway departments compiled by the Bureau of Public Roads, U. S. Department of Agriculture.

The planned expenditure by state highway departments for construction and maintenance of state highways is \$937,500,455; the balance, \$663,667,000, will be spent on local roads and bridges. State highway officials of forty-five states estimate the total length of roads to be improved by them in 1930 as 32,532 miles, an increase of 3126 miles over the estimate in the 1929 programs.

The maintenance of 231,393 miles of highways will be controlled by states this year, a gain of 32,381 over the mileage under state maintenance in 1929.

Pacific states comprising California, Washington and Oregon indicate a highway expenditure of \$121,590,000 for the year, according to the department of agriculture figures.

INDUSTRIAL ARTS SUMMER WORK PLANNED AT L. A.

Instruction in the department of mechanics as planned for the Los Angeles Summer Session of the University of California will embrace almost every subject related to the industrial arts, according to announcement by Dean Thomas M. Putnam. The group of instructors will include Foss R. of Brockway, Harold W. Mansfield and James W. Marsh, of the mechanics arts department of the University of California at Los Angeles, and Claude E. Nihart, supervisor of industrial arts in the junior and senior high schools of Los Angeles.

The various courses offered include of engineering drawing, furniture construction, furniture design, general composite shop, applied electricity, machine shop, machine drawing, architectural drawing, the automobile, and technical subjects.

TRADE NOTES

Kartschoke Clay Products Co., Third and Keyes Sts., San Jose, announces change of firm name to Gladding Bros. Manufacturing Company.

San Joaquin Rock Products Company of Fresno, capitalized for \$50,000, has been incorporated. The company will engage in a general rock, sand, gravel and clay products business. Arthur R. Kerstetter is head of the company.

Valley Homes Builders, Inc., of Los Angeles, capitalized for \$50,000, has filed articles of incorporation at Hanford, Calif., and will engage in a general brokerage, agency and commission business in the sale and management of real estate for others. Directors are: N. C. Bailey, E. R. Ash and Fred L. Nordell.

E. A. Peat, former comptroller and treasurer of the Southern California Gas Co., recently resigned that position to become chairman of the board and secretary-treasurer of McEverlast, Inc., Los Angeles manufacturer of termite preventives, pipe-line coatings and a concrete curing process. A. M. Shenk, president of the organization since its inception will retain that position and will continue as active head of the firm. Kenton A. Miller, Los Angeles attorney, is vice-president and general counsel.

Alec McEae, one of the original founders of McEverlast, Inc., who has had an active part in its development from the start, will continue to have charge of all manufacturing operations.

E. A. Hartman, Los Angeles financier, will be a member of the board of directors.

While no definite announcement has been made to date, it is expected that McEverlast will inaugurate a widened and more aggressive marketing policy under the new regime.

ACCEPTING ORDERS FOR 1930 UNIFORM BUILDING CODE

Advance orders for 424 copies of the 1930 edition of the Uniform Building Code have been received at headquarters of the Pacific Coast Building Officials Conference in Long Beach. The order includes 266 copies for cities, individuals, and organizations, the remainder going to members of the Conference. Orders for copies of the 1930 edition may be sent to Conference headquarters, 19 Pine Avenue, Long Beach, or to the Sun Printing & Publishing House, 430 Court St., San Bernardino. Single copies are \$1.00.

HOME PRODUCTS ON PUBLIC WORK IN R. W. CITY

Contractors on public work in Redwood City will be requested to give preference to Redwood City products, under a resolution by the council, voted on request of the Redwood City Chamber of Commerce. In all street improvements preference will be given to cement manufactured at the plant of the Pacific Portland Cement Company at Redwood City.

The city of Palo Alto, according to reports, also requests contractors to use cement manufactured at the Redwood City plant.

TRADE LITERATURE

A new series of circulars describing Mahon Steel roof decks, roof sumps, fire doors and rolling steel doors has been published by the E. C. Mahon Company of Detroit, Michigan. The catalogues contain comparative figures showing economy in Mahon Steel Roof Deck construction, and photographs of roof deck and steel doors in every type of construction.

An illustrated circular of Recommendations for Applying Ambler Asbestos Walthite has been prepared by the Ambler Asbestos Shingle & Sheathing Co., Ambler, Pennsylvania. Details regarding dimensions, cutting, accessories and application over flat surface walls or studding are thoroughly discussed in this interesting booklet.

The use of Armco ingot iron in the form of plates of light, medium and heavy gage for water supply and other engineering projects is discussed in a 20-page illustrated booklet recently issued by the American Rolling Mill Co., Middletown, Ohio.

American Tar Products Company, Pittsburgh, Pa., has published a 32-page illustrated booklet showing sixteen specifications for roofs for both flat and steep surfaces. Several new and interesting features to be found in this book are specifications for automobile parking roofs, ATP roofs over insulation, and ATP roofs over steel decks, as well as eight pages of valuable information for specification writers on ATP Flashings, Waterproofing and Sub-Floor Tar.

ELECTRICAL GROUP IN DRIVE TO MODERNIZE NEW YORK

Electrical modernization of New York City's 27,000 factories, the annual value of whose manufactured products almost equals that of Chicago and Detroit combined, has been undertaken by the Electrical Association of New York.

Electrical contractors of the city are interviewing factory owners, surveying conditions in their plants, and presenting concrete plans for overcoming production deficiencies, eliminating waste, and saving costs. Engineers, loaned by the various groups co-operating in the plan, are working with the contractors. Newspaper advertising (\$250,000 worth) is used to inform industrialists of the service available. Each advertisement carries a coupon which, when returned by a factory executive, entitles him to a free survey of his plant.

ALL-STEEL BUILDING

A new type of steel building, built without interior supporting posts, has been developed by the Columbian Steel Tank Co., Kansas City, Mo., to meet a demand for large storage space with a minimum of steel used. The building is made up of a series of steel trusses of welded construction, with angle iron purlins running from end to end about 4 ft. apart, the whole covered by galvanized steel sheets. It is fabricated at the Columbian plant and may be set up by unskilled labor.

Over-Selling Instalment

Customers' Economic Evil,
Phelps Tells Credit Men

While instalment selling has undoubtedly had a stimulating effect on business, it has, in many cases, had a disastrous effect on consumers, Dr. C. W. Phelps, of the University of Chattanooga, said in an address before the annual convention of the National Association of Credit Men at Dallas, Texas.

These ill-effects should be guarded against, Dr. Phelps said, by closer credit co-operation to prevent over-buying on the part of people who are unable to budget their incomes and plan ahead.

"It is impossible to escape the conclusion," he said, "that so far as goods of relatively high value are concerned, large-scale production and large-scale merchandising could not exist in their present degree without the aid of instalment selling.

"However, we find many cases where individuals have been led into extravagance and debt due to the opportunities offered by the instalment plan. There have been many distressing cases brought to light of people who have over-bought, and finding their monthly payments to be larger than their salaries, have borrowed from loan companies at high rates in order to meet their obligations. But borrowing from loan companies loads new and larger monthly payments on the borrowers, and many people have become hopelessly involved.

"This is an economic evil of the first importance, and it can be cured in only two ways: By effective credit co-operation among firms selling on instalments to prevent consumers from over-buying, and by educating consumers to obligate themselves only within the limits prescribed by their incomes."

Dr. Phelps discussed the various ways in which instalment selling has reacted on business. Some lines of business have been helped, and others hurt, he said.

"Instalment selling has tended to direct a large part of the spending of consumers away from ephemeral goods and commodities of low value to durable goods of high value. In other words, if it were not possible to devote small sums each month to the purchase of high-priced, durable goods, those small sums would very likely be spent for more food, more delicacies, and more articles of personal adornment.

"The increasing volume of instalment credit also seems to have slowed down the collections of firms selling on open account. Some merchants estimate that a quarter of their open accounts have been made slower by instalment buying from other houses on the part of their customers."

Dr. Phelps said that it is not yet possible to determine the effect of instalment selling on the business cycle, because there has not been sufficient time for the collection and study of adequate data.

"As far as the present recession is concerned," he said, "it appears that the bad consequences of instalment selling on the credit structure and the business cycle have failed to appear in the exaggerated form which were predicted.

"Instalment selling is here to stay. It is simply an evolution in the development of credit. Its abuses are similar to the abuses which have arisen in the past whenever credit was extended to a new field, or for

a new use. We shall rid it of its abuses and utilize it to promote the prosperity of the country, because our credit men will learn how to handle it scientifically, as they have learned to do with the older forms of credit."

THREE FIRMS SEEK TO SERVE
LIQUEFIED NATURAL GAS

Application has just been made to the State Railroad Commission by the Natural Gas Corporation of California for permission to serve liquefied natural gas in the cities and towns of Jackson, Anador County; Placerville, El Dorado County; Lakeport, Lake County; Susanville, Lassen County; Alturas, Modoc County; King City, Monterey County; Auburn, Placer County, and Sonora, Tuolumne County.

At the present time there are before the Commission applications by three companies, namely, Natural Gas Corporation of California, West Coast Gas & Fuel Company and Inland Empire Gas Company for permission to serve liquefied natural gas to a total of 65 cities and towns in California. These communities are spread over the entire state from Crescent City and Yreka on the north to Holtville on the south.

Briefly described, the proposed service consists of the delivery of a mixture of vaporized butane, propane and air through distribution gas mains in the same manner as natural gas is distributed. The same type of gas mains, gas meters and gas regulators would be used as in the case of either natural gas or manufactured oil gas, and the same type of gas appliances, such as stoves, ranges, furnaces, heaters and water heaters, would be used to burn the gas.

Butane and propane are hydrocarbons that are present in natural gas as it comes from the oil wells and are gases at atmospheric temperature and pressure. They are liquids at pressures above fifty pounds, and are transported as liquids in tanks under pressure. However, they are much higher in heat value than either manufactured gas or natural gas, and contain 3000 heat units per cubic foot, whereas natural gas contains 1150, and manufactured gas 550 heat units per cubic foot.

The applicant utilities request permission to distribute a mixture of butane, propane and air which would have a heat content of 550 heat units per cubic foot. Such a mixture is not explosive and could be burned in the same manner as manufactured or oil gas. This mixture has been successfully used in a number of western cities for several years past.

HOLLOW SPUN CONCRETE PILING
GIVEN SEVERE TESTS

The eleven-story General Engineering Laboratories Building now under construction for the Westinghouse Electric & Manufacturing Company at East Pittsburgh is supported on a new type of concrete piling, which are manufactured by the hollowspun or centrifugal process in exactly the same manner as the hollowspun granite columns used as supports for street lighting units and trolley wires.

These hollowspun piles used in the General Engineering Laboratory Building are approximately 20 feet long by 9½ inches in diameter at the small or point end by 14½ inches in diameter at the large or butt end. They were driven to bed rock which extended from 20 to 25 feet below the

surface with a large steam hammer. The terrific blows delivered by the hammer caused practically no spawling or brooming at the pile butt. Ten piles were withdrawn for test purposes; their condition showed, upon examination, that they had been driven through a stratum of large rocks without apparent damage to the points or to the whole. Subsequent tests of these ten piles for columnar loads developed an average load bearing capacity of 150 tons before failure, each failure being a compression failure and not columnar.

The manufacturing process is extremely interesting. A reinforcing cage of longitudinal steel bars wrapped spirally with wire hoopings is made up and placed in steel molds. After the mold is filled with a specially prepared concrete mix, it is spun in a horizontal position for approximately fifteen minutes at varying rates of speed. The spinning compacts the concrete into a dense mass and forms a hollow core in the center of the pile, from which the name hollowspun is derived. In street lighting columns this hollow core is used for wiring, and in piles for jetting in place with water pressure.

These piles differ from the usual concrete piles in that the concrete attains an average crushing strength in 28 days of 5000 pounds per square inch and will safely withstand the usual rough handling and the impacts of the largest pile driving hammers.

MEETING MODERN DEMANDS IN
CONSTRUCTION

In no field of engineering activity are modern demands for speed more urgent than in that of office-building construction in our large cities, says Engineering News-Record. The reason is simple: The large loss inherent in unproductive land places a premium on the early replacement of old buildings after they have been vacated and the high cost of borrowed money is a strain on the resources of the owner. Briefly, speed in building has acquired a high dollar value, and on this account engineers and contractors in the building field have had to revolutionize old methods. They have done so with apparent ease and facility, which not only tends to diminish the luster of the accomplishment but also creates danger that its immediate value to the engineering profession may not be fully appreciated. One would naturally expect that increased proficiency and ability had played an important part, and a study of numerous building projects checks this expectation. But it also reveals something more significant—namely, that the real basis of modern building speed lies in organization, efficiency and planning, which taken together may be termed co-ordination. A case in point is the 71-story Manhattan Company Building in New York, which was building complete, including wrecking of old buildings on the site, in 33 weeks. Such performances as the construction of new foundations while the wreckers still were busy overhead, completion of the foundations after steel erection had begun, fabrication of the steel in five widely separated shops, erection of 2,100 tons of steel in one week and the maintenance of a weekly average of 1,600 tons throughout the first six weeks, and dovetailing of the operations of half-a-hundred subcontractors, are not the result of new advances in the art. They resulted wholly from co-ordination, made possible by a firm sense of organization on the part of the general contractor and an appreciation of its necessity on the part of the owner, the architects and the engineers.

PROPERTY MANAGERS OF N. A. R. E. ADOPT STANDARDIZED LEASE FORMS

Standardized lease forms for offices, stores, apartments and lofts so written as to protect both the interests of lessors and lessees from Maine to California and to state definitely their mutual obligations were adopted by the executive committee of the Property Management Division of the National Association of Real Estate Boards and the store and loft forms were approved by the executive committee of the Brokers' Division in session recently in Chicago. Meetings of the executive committees of the Farm Lands and Home Builders and Subdividers Divisions also took place in Chicago last week.

The use of such standardized lease forms to establish, as they are intended to, a uniformity of contract in leases for each type of property, will go far toward the elimination of those misunderstandings between tenant and property manager which arise because the tenant "didn't know that was in the lease," it was pointed out by F. S. Slosson, Chicago, chairman of the Property Management Division, who presided at the Chicago meeting.

Collaborated With Brokers

The standard lease forms, which are the result of two years collaboration on the part of committees in the Property Management Division charged with this work, leading legal authorities in the field of real estate law and the executive committee of the Brokers' Division, embrace the minimum requirements which have been felt to be essential in leases for these types of property, and additional optional clauses so constructed as to be applicable in states where custom and legal requirements make necessary special provisions in lease contracts. Mr. Slosson viewed the completed forms as indicative of the trend of thought and progress in property management as a specialized phase of real estate.

In adopting the standard forms the executive committee upon conference incorporated some slight changes into the leases. Final forms of the leases are to be issued to every member of the Property Management Division, with the recommendation that these forms be used by Realtor-Property Managers everywhere. Following are the committee chairmen of the groups who were in charge of drawing up the lease forms: Carlton Schultz, Cleveland, Ohio, chairman of the committee on the standardization of short term leases for stores, loft buildings and lofts; Arthur B. Hall, Chicago, chairman of the committee on the standardization of office lease forms, and Charles F. Marks, Birmingham, Alabama, chairman of the committee on standardized apartment leases.

Standard Management Contract

A standard management contract definitely defining the responsibilities of the property manager and the owner of the building when the latter contracts with the former for management of his property was likewise adopted by the executive committee of the Property Management Division and will be issued to all Division members. Oliver S. Turner, Chicago, was chairman of the committee presenting this form.

The committee further discussed final plans for the Property Management Division meetings at the 23rd annual convention of the National Association of Real Estate Boards, to be held in Toronto, Ontario, July 9, 10, and 11.

The convention addresses will deal with very practical problems which confront the property manager and will include analyses of two buildings—a Toronto office building and an apartment house. These analyses will discuss in detail every feature in the two buildings selected which would be

of interest to the property manager. Carlton Schultz, Cleveland, is chairman of the committee which will analyze the office building. Mr. Schultz is now president of the Cleveland Real Estate Board and is a member of the advisory committee of the Property Management Division. Thomas Fleming, Chicago, is chairman of the committee appointed to analyze the apartment building. Mr. Fleming, who was formerly manager of the Potter Palmer estate, is now with Ross & Browne.

Pricing and Finding Prospects

Those fundamental questions of pricing space in and finding prospects for a building will be discussed before the Division by Leo J. Sheridan, Chicago, who is managing one of Chicago's mammoth new loop skyscrapers. Mr. Sheridan was formerly director and vice-president in charge of real estate finance for S. W. Straus & Company.

Advice as to the buying of supplies for the buildings under their administration will be given the property managers by William H. Lyman, Chicago.

At the meeting of the executive committee of the Brokers' Division, at which Mark Levy, Chicago, Division chairman, presided, the standard lease forms for stores and lofts as adopted by the executive committee of the Property Management Division were read and approved with the addition of the optional clauses which will accompany the forms.

Intelligently Operated Farm Profitable

The average farm intelligently operated is a money making business today. This was the general conclusion of opinion in an informal discussion on the part of the executive committee of the Farm Lands Division. Harvey Rathbone, Lincoln, Nebr., chairman of the Division, who presided at the Chicago meeting, declared that farm lands in Iowa, Nebraska, and Kansas can now be purchased for about 50 per cent of their value, if one bases the value of these lands on their potential earning power for the owner. Mr. Rathbone expressed his conviction that the one panacea which may be with certainty regarded as a cure-all for farm ills is intelligent farming. He pointed to the many examples of farms, not previously showing satisfactory income returns, which, when put under the direction of a competent, professional farm manager had become profitable enterprises, adding that such experiences clearly indicated the value of and need for this professional service whose field and whose employment he predicted is to broaden rapidly in the next few years.

Further discussion at the meeting of the Farm Lands Realtors brought out the fact that today, due to excellent highways and improved transportation the dealer in farm properties is able to widen the geographic scope of his operations to a radius of several hundred miles around his headquarters. With good highways, it was stated, the farm lands broker is well able to take his would be farm owners to tract 300 miles distant in one day's time.

The proposed standards of practice for subdividers, recently placed in the hands of all members of the Home Builders and Subdividers Division, will be brought before the Division at its sessions at the Toronto convention, it was decided at the meeting of the executive committee of the Home Builders and Subdividers Division. While the standards of practice remain substantially the same, originally suggested by the executive committee of the Division, some slight changes are to be made before the Toronto convention, it was indicated.

WALKER TO AID U. S. D. A. ON FARM BUILDINGS

Prof. H. B. Walker, head of the University of California Agricultural Engineering Division, has been notified of his appointment to the Advisory Council in Farm Structures by Arthur M. Hyde, Secretary of the United States Department of Agriculture. This council will act in cooperation with the Department of Agriculture in an advisory capacity. Its members have been chosen from the American Society of Agricultural Engineers and industries allied with agricultural engineering. Professor Walker was nominated by M. C. Kaiser, president of the American Society.

Professor Walker also is a member of the Advisory Council for research in mechanical farm equipment, in the Bureau of Public Roads of the Department of Agriculture, having been appointed several years ago. In 1927-28 he was director of research in the Bureau of Public Roads.

The Farm Structures Advisory Council will meet May 28, and that on farm equipment on May 27. Professor Walker probably will be unable to attend either meeting, as he is planning to attend the annual convention of the American Society of Agricultural Engineers in June.

OUTPUT OF MASONRY, NATURAL, AND PUZZLAND CEMENTS IN 1929

Statistics of hydraulic cements, other than Portland cement in 1929, which include masonry, natural, and puzzland cements, as compiled by the United States Bureau of Mines, Department of Commerce, show a production of 2,209,465 barrels, which represents a decrease of 0.04 per cent compared with 1928. There were shipped from mills in 1929, 2,159,130 barrels of these cements, valued at \$2,950,717, a decrease of nearly 2 1/2 per cent in quantity, and an increase of 1.4 per cent in gross value compared with 1928. Stocks at the mills increased and were more than 36.6 per cent higher at the end of 1929 than at the end of 1928.

These statistics represent the output of 11 plants located as follows: One each in Alabama, Illinois, Indiana, Kansas, Kentucky, Ohio and Pennsylvania; and two each in Minnesota and New York. The figures for 1929 include the output of a new plant in New York which began operating toward the end of 1929 superseding an establishment that was active in 1928, but reported idle and out of business in 1929.

The output has been expressed in terms of 376-lb. barrels to correspond with the statistics of Portland cement.

PROTESTS FREIGHT RATES

The Western Freight Rates Company has filed a complaint with the State Railroad Commission against Northwestern Pacific Railroad Company, alleging that the rates and charges for the transportation of lumber from points of origin on the line of complainant to points of destination on the line of the defendant carrier north of Dos Rios Station, Mendocino County, are unjust, unreasonable and excessive, and that no joint rate exists for such transportation. It is alleged that public convenience and necessity demand the establishment of a joint through rate for the transportation of lumber between the points in question, and the Railroad Commission is asked by complainant to issue its order establishing equitable, joint rates via San Francisco, and to fix the division of such rates between the parties thereto.

PRACTICAL METHOD TO DISPOSE OF OBSOLETE EQUIPMENT DESIRED

By J. F. Martz in Class and Industrial Marketing

Can industry develop a practical method for disposing of obsolete equipment? Here is a problem that is becoming increasingly common and increasingly bothersome in the field of industrial selling. What about trade-ins? Who will stand the burden of scrapping old equipment or the losses occasioned by trade-in allowances—the buyer, distributor or the manufacturer? By what course of action manufacturers prevent trade-in policies from becoming mere shields for price-cutting competition? The problem is being recognized by many sales executives in the industrial field. What can be done to avoid markets cluttered with low price, obsolete equipment and price-cutting tactics.—Editor.

What about trade-ins of industrial equipment? The X Company finds itself with thousand units of industrial equipment in production to be sold during the year. If sold on a cash basis with standard prices, or even on an acceptable basis of deferred payment selling, and sales costs being kept within the limitations of the budget, it is not difficult to forecast the year's profits.

But what, if at the close of the year, the company finds on its hands from 200 to 400 units of old junk, the ashes of the sales department's enthusiasm for quick action?

Aside from the cash losses involved in virtual price reductions through increasing the bid for trade-ins there is also another loss in markets for new equipment. What happens to the old equipment that the manufacturer takes in and disposes of at junk value or at as much as he can get out of it. He may sell it either direct to a user or to a house that specializes in cleaning it up and placing it on the market again for resale.

The complications of the trade-in are well recognized in the automotive field. Chevrolet has brought forth one suggestion toward its solution. The plan involves offering the local dealer \$50 for any car he accepts from a buyer of a new car, provided he will destroy the car. If the dealer cannot hope to get more than that amount for his trade-in he will readily accept this proposition. The fund could be provided by automobile manufacturers by setting aside a definite amount from the income of every new car manufactured and sold. The average life of a car is taken to be seven years, but all cars are not eliminated from the road in that period.

In the industrial field the situation is somewhat different. Although obsolescence enters very directly into the scrapping of old machinery an investigation conducted two years ago established the fact that at least more than half of the machine tools in use today were produced a quarter of a century ago.

Obsolescence affects both the industry using the equipment and the industry producing it. The study that is being made of obsolescence of equipment in the knit goods industry already has shown indications that many plants are operating without profit mainly due to decrepit production machinery with which is closely

related almost fatal misunderstandings of actual production costs.

The construction industry, for example. More ironclad policies regarding trade-ins are being requested by contractors who are the buyers of construction equipment. They say that cheap second-hand machinery allows poorly financed contractors to enter into local competition without adequate capital responsibility. The established contractor with several thousand dollars of capital tied up in dependable equipment is forced into direct competition with price-cutters whose only equipment has come at low prices from the junk pile.

While the price-cutter may not get a great many construction jobs, at least jobs of importance, he can quote great quantities of prices. Builders are quick to take advantage of such situations and the result is general demoralization of the industry through profitless price-competition.

N. DeWind, president of the Parsons Company, Newton, Ia., now a division of the National Equipment corporation, inclines toward the belief that heavy equipment manufacturers can profitably join together to provide means of disposing of old equipment.

This might be done by determining in advance the normal or maximum service-life of a model and setting scales of values at which the machine could be traded in during its service life. The maximum should not exceed the junk value of the machine at the end of its maximum service life, and it should be an obligation among manufacturers accepting the machine at the end of its predetermined service life to junk it.

Another suggestion has been that manufacturers refuse to furnish repair parts after the maximum period of a machine's service life has expired.

It is said that a great many manufacturers are contributing to the second-hand market by keeping alive a lot of old machines which should have been junked years ago.

It is costly to maintain repair parts for old machines, yet some manufacturers feel a responsibility to service a machine forever if it is of their own make.

Another suggestion for eliminating obsolete construction machinery has been the formation of an association of manufacturers operating jointly own junk yards. Obsolete trade-ins could be passed to this co-operative junk yard and destroyed, the association bearing perhaps 25 per cent of the loss and the individual manufacturers who accepted the trade-in the remaining 75 per cent. The manufacturer suggesting this plan states that he believes it would pay the industry at large to accept its loss each year on trade-ins and keep at a minimum the volume of old equipment constantly changing hands in the field.

Another company, manufacturing a varied line of equipment from wheelbarrows to steam rollers fails to see how any organized plan could clear up the trade-in problem or quite relieve the congestion of obsolete equipment in the field.

While the Chevrolet plan does not appear applicable to the construction field in the eyes of a manufacturer of shovels and dredges, it is pointed out that some equipment manufacturers are seriously endeavoring to develop a program which will remove the worst claws of the trade-in problem. Several manufacturers practically refuse to consider trade-ins. Some will consider only machines of their own makes.

The advertising manager of another concern in the construction machinery field observes that the burden is not going to be carried by manufacturers alone. He further points out that the field is beset with the evil and that at its worst useless old relics are accepted at high prices in the intense competition to sell new machines.

Rather than assume the whole loss the manufacturer puts the machine into the field again where it remains to block future sales.

A manufacturer of gears and machines find trade-ins less of a problem in his market. When the problem does arise the policy is to accept the old equipment for credit less the cost of putting it into salable condition at a profit.

A manufacturer of rolling mill equipment and other heavy machinery states that some of his equipment has been in use for 25 to 50 years. He presumes that the user charges his own depreciation against the machine and disposes of it when obsolescence makes the old machine too costly to operate in comparison to improved models. In this field obsolescence has proved to be somewhat slower than in some other industries and old machinery has, in general, only junk value when it is released from service.

Commenting upon the Chevrolet plan, a manufacturer of electric motors regards such a plan as unfeasible for the industrial field because obsolescence is much slower in industrial equipment than in motor cars.

This, in most cases, is true, but it would hardly seem that that fact would alter the elements of the problem.

This manufacturer, however, is facing the problem squarely when he points out certain products of his own line which were developed for specific purposes as long as 25 years ago and which have not been materially improved in so far as that purpose is concerned since.

J. F. Lincoln, president of the Lincoln Electric Company, says essentially the same thing regarding some types of welding equipment. Some welders put in service 15 or 20 years ago perform that service as well today. Modern equipment has more applications, is more flexible and convenient and probably does some jobs that the old equipment was not designed to do. But in so far as the old equipment is not obsolete in terms of performance its age has no relation to any necessity for retirement.

Of course this is hardly true of machines with moving parts that wear out. When the machine becomes dangerous or liable to frequent breakdown, then it becomes obsolete no matter what its record of operation may be.

There is, however, undoubtedly a market for usable second-hand machinery, and a great deal of such machinery is sold either direct by one business to another or through distributing houses that specialize in handling or repairing used equipment. It can hardly be the aim of manufacturers to dispose of such equipment. Rather, their efforts obviously must be directed toward elimination of old equipment which will not function as

economically as new models either for the reason of being worn out or because of improvements in design.

A well-known manufacturer of conveying equipment observes the trade-in problem as follows:

"As we learn about the problem through our distributors it seems to be getting more serious, although it has not reached nearly the stage observable in the automobile industry.

"Now we consider that there are just two reasons why an owner should replace an old tractor with a new one; first, because the machine is worn out, and, second, that he needs more power and a different kind of a tractor than he now has.

"Under the first circumstance the machine has only scrap value. In the second situation the tractor may have some resale value. We sell such machines to buyers who have only limited use for the machine or who have not the ready funds to buy a new one. In most cases the sale can be handled locally to avoid extra costs of handling the trade-in."

The president of another company, this one manufacturing small portable conveyer units, believes the productivity of the industry and the country at large is handicapped by the resale of obsolete equipment.

He believes that any industry will suffer less by writing off obsolescence rapidly enough to purchase new equipment when it becomes an economic necessity and by scrapping the old than it suffers under the present regime, when practically every old machine is thrown back into the market to be used by someone in spite of mechanical advancements which have handicapped the machine's chances of earning profits.

The manager of a company manufacturing overhead conveying systems writes in response to inquiry as follows:

"Your letter on the subject of trade-ins has arrived at an opportune time. It just happens that today we are considering such a problem, involving several thousand dollars.

"In the past we have not given this problem much serious thought, and have usually refused to make any trade-in allowances. However, we recognize the fact that the problem is going to become more difficult in the future.

"The builders of overhead machinery are in a unique position, for two reasons. First, the cost of installing such machinery is the major item to the purchaser. And the machinery cannot be easily moved, once installed. Second, when a tramrail system is installed the user often must stick to the same make in order to run carriers from one end to the other.

"We have therefore an additional reason for wishing to accept trade-ins, and it is this factor which inclines us toward making pretty big allowances in the case we have under consideration today.

"At this time the customer is in the market for \$6,000 worth of equipment. Yet we feel assured that if we are so successful in beginning to replace the competing manufacturer's equipment, which is much cheaper than ours, we will get from \$25,000 to \$50,000 worth of additional business during the coming year. In approaching this problem, however, at least in our own transaction, make this particular transaction stand on its own feet. We cannot definitely count upon the future business. We are, therefore, going to submit the following proposition:

"We are going to disregard entirely the resale value of the cheaper make of equipment. If we take it in trade we will throw it into our cupola as scrap. We are therefore figuring the cost of material, labor and factory overhead, and will leave the greater part of the net profit of the transaction to

pay for the equipment traded in. We will not charge any sales expense or administration and will not pay the salesman any commission on the sale. The extensions of the equipment however, will bear regular sales costs and administration and will provide the profit on the business.

"In order to make doubly sure that all of the old equipment is shipped to us, we are not making a lump sum allowance on the system but are breaking it down into separate prices on parts and units. With this arrangement we are allowing the customer approximately half of what he paid for the old equipment, which has been in service two or three years. He will, however, have to pay the cost of removing it as well as transportation cost to our plant."

A manufacturer of electric tractors tried some years ago to work out a scheme whereby allowance could be made on a used tractor contingent upon reselling the equipment traded in at a profit. It was soon learned that it was very difficult to recondition a used tractor and dispose of it at any price that would permit a profit in the transaction.

Recently the company has adopted the policy of allowing no more than \$50 for an old piece of equipment. No attempt is made to re-sell machines so traded in. They are junk and the salvage value is around ten dollars.

BOULDER DAM EXPECTED TO CREATE MECCA FOR TOURISTS

Boulder Dam is expected to be as important a mecca for tourists as Old Faithful geyser or the Carlsbad caverns, according to a statement issued by the U. S. Department of the Interior. In addition to the dam and the huge lake which it will impound, the scenery will also appeal to the tourist.

The statement of the Department is as follows:

When Boulder Dam is completed and the water is massed in a column 575 feet high behind it, Secretary Wilbur, of the Department of the Interior says, it will become one of the most interesting features of the West which will attract visitors as does Old Faithful or the Carlsbad caves. Such a dam with such a body of water behind it will create a situation the like of which man has never seen before.

The nearest approach to it is the Elephant Butte Dam on the Rio Grande, in New Mexico, 306 feet high, where one-tenth as much water is stored. Under this pressure the water released through the dam produces a raucous roar such as human ears have seldom heard. Air vents were left toward the base of the dam to relieve the suction caused by these rushing waters. So great was the force of the air currents that, shortly after the water was turned through, they led to a most peculiar tragedy. Two workmen were passing near the grated air hole, three feet across. The force of the air seized them, slammed them against the grating and sucked the life out of them. Their dead bodies were later found plastered against the grating.

Previous experience will prevent any such tragedies at Boulder, but a view of this, the most stupendous cement structure in the world, taller than Washington Monument, releasing such unmeasured forces, a visit from the crest, through the passageways which penetrate its very heart, to the power houses at its base, will be an unusual tourist experience.

Although the equipment has very long life trade-ins are discouraged. New tractors have some advantages over old ones which are usually kept as spares.

A manufacturer of belt conveyor idlers has adopted a similar policy, going a step further, however. He allows only the current price for the metal and disposes of the old equipment through a local junk dealer.

At the outset of the investigation into actual experiences of manufacturers it can be pointed out that when trade-ins become the cloak for price-cutting the manufacturers individually and as groups are losers.

The legitimate sale of second-hand machinery which can be profitably put into operating condition and resold hardly affects the problem.

One generalization, however, may be drawn at this point for guidance in handling the trade-in problem—namely, when through wear or through obsolescence a machine cannot be sold or operated with profit both buyer and seller have a direct interest in eliminating it from the market. It has been pointed out that obsolete machinery may bankrupt one user after another, creating price-cutting havoc, and yet maintain a waiting list of victims. Naturally there is no justification for any production machine that cannot compete in the market with fair play and reasonable opportunity to earn a profit on its investment.

In addition to the interest attached to the dam itself, and to the great lake which it will form extending into the Grand Canyon, the area is exceedingly interesting from a scenic standpoint, and its desert topography and vegetation will appeal to the scientists. It offers unusual opportunities of development from the standpoint of being easily accessible from Los Angeles. The crest of the dam will serve to bridge the Colorado for a new link in the trans-continental automobile highway which can be depended to divert many visitors to this route. In addition it could be linked up in a spectacular circuit trip of the southwestern national parks, including the Grand Canyon, Bryce Canyon and Zion.

Such a route would utilize the first possible crossing of the Colorado River Canyon west of the Grand Canyon National Park, and in addition would give the motorist a view of a very precipitous portion of the Canyon. It is even suggested that it might be possible for motorists to embark, automobile and all, on a boat at this crossing, known as Pierce Ferry, and journey down the river to the landing at the dam, resuming their motor journey at that point.

In connection with such travel it would, of course, be important to install public automobile camps, and the possibility of hotel accommodations being provided is already under discussion.

FABRICATED STRUCTURAL STEEL

New orders of fabricated structural steel in April, as reported to the Department of Commerce by the principal manufacturers were 59 per cent of capacity as compared with orders of 62 per cent of capacity in March, and 67 per cent a year ago. Shipments of fabricated-structural steel in April represent 77 per cent of the capacity of firms reporting this item as against 70 per cent in March and 79 per cent a year ago.

Building News Section

APARTMENTS

Contract Awarded.

APARTMENTS Cost, \$250,000
LOS ANGELES, Cal. Havenhurst Ave. near Sunset Blvd.
 Six-story and basement Class B stone tile apartments (21 5, 6 and 7-room apts.)
 Owner—Colonial House, Inc.
 Architect—Leland A. Bryant, 6513 Hollywood Blvd., Los Angeles.
 Contractor—Barnett Shapiro Co. Co. Fine Arts Bldg., Los Angeles.

Plans To Be Prepared.

will leave in a few days to spend the
summer visiting colleges and univer-
sities in the East and Middle West.
Professor Gregg will study the meth-
ods of research and instruction and
the equipment used in landscape ar-
chitecture in other institutions.

With the completion of Giannini
Hall, Agricultural Extension offices
will be moved from the first floor of
Agriculture Hall to the new building.
The division of Landscape Design will
move from its present crowded quar-
ters on the third floor to the space
thus vacated. With this change of lo-
cation, Professor Gregg hopes to ex-
tend his work in the University and
add new courses.

While in the East he will look for a
new man for the division, to assist in
the new program. Prof. H. W. Shep-
ard, who has been on leave of ab-
sence during the current year, will re-
turn to resume his work in the di-
vision, July 1.

ENGINEER WINS SUIT

James S. James, former city engi-
neer of Burlingame, won his suit
against the city to collect \$311.69 for 60
surveyor's monuments erected in North
Burlingame. The decision was handed
down by Judge George H. Buck at
Redwood City.

The city council of Burlingame dis-
allowed the bill of the former city en-
gineer on the ground that the min-
utes of the council did not show of-
ficial authority for the work.

Engineering News Section

BRIDGES

SAN LUIS OBISPO, San Luis Obispo Co., Calif.—City council declares intention (319) to improve Ida St. near Marsh St. involving construction of a reinforced cement concrete bridge with wing walls; reinforced concrete retaining wall. Imp. Act 1911. Bond Act 1915. Hearing June 9. C. M. John, city clerk. L. Moore, city engineer.

UKIAH, Mendocino Co., Calif.—Until June 10, 3 P. M., bids will be received by H. M. Burke, county clerk, to construct 100 ft. steel bridge over Calpella Creek near Calpella. Bids are wanted on two propositions:

- (a) Furnish labor and materials for construction of bridge complete;
 - (b) Furnish complete 100-ft. steel span, f. o. b. Calpella.
- Certified check 10% required with bid. Plans on file in office of clerk.

TEHAMA & SHASTA COUNTIES, Cal.—Until June 18, 2 P. M., bids will be received by State Highway Commission, Public Works Bldg., Sacramento, to construct undergrade crossing between one mile south of Cottonwood and Cottonwood, consisting of two reinforced concrete abutments and a ballasted subfloor and about 0.9 mile roadway to be graded and paved with cement concrete.

See call for bids under official proposal section in this issue.

STANISLAUS COUNTY, Cal.—Until June 10, 11 A. M., bids will be received by C. C. Eastin, county clerk, to replace West Pier of Laird Slough Bridge; also remove present pier. Certified check 10% required with bid. Plans obtainable from J. H. Hoskins, county surveyor.

SAN DIEGO, Cal.—R. R. Rowe of San Diego, has been authorized by the city council as special engineer to prepare plans for a bridge and fill to extend from First St. to Mission Hills. The estimated cost is \$155,000.

PLACER COUNTY, Cal.—Until June 18, 2 P. M., bids will be received by State Highway Commission, Public Works Bldg., Sacramento, to construct undergrade crossing under the tracks of S. P. Ry. near Emigrant Gap, consisting of two concrete abutments with wing walls and grading and surfacing roadway between abutments with crusher run base and untreated crushed gravel or stone surfacing.

See call for bids under official proposal section in this issue.

LOS ANGELES, Cal.—Until June 25, 10 A. M., bids will be received by Board of Public Works to construct Washington Street Bridge over Los Angeles river, between So. and Harriet St. Estimated cost \$250,000. Will be 310 ft. in length consisting of five reinf. conc. girder spans, each 62 ft. center to center; roadway 56 ft. wide with 25 ft. walks. Involves approx. 330,254 lbs. reinf. steel; 8975 cu. yds. Class F concrete; 11,136 lin. ft. conc. piling 15 ft. long. Plans obtainable from above.

REDDING, Shasta Co., Cal.—R. N. McKenzie, Gerber, at \$1593 awarded contract by county supervisor to construct bridge over a branch of

Oregon Gulch on east side of the railroad in the vicinity of the county hospital. Other bids: J. P. Brennan, Redding, \$1772; Rolla Arbuckle, Anderson, \$1963.

SAN JOAQUIN COUNTY, Calif.—J. S. Metzger & Son, Eden Square Apts., Stockton, at \$84,379 awarded contract by State Highway Commission to construct bridge over the Mokelumne river near Lodi, consisting of three 54-ft. reinforced concrete girder spans on concrete piers with pile foundations, and thirty 19-ft. timber approach spans with concrete deck on pile bents.

EUREKA, Humboldt Co., Cal.—County Supervisors reject bids to construct proposed bridge at Redway. Complete list of bids received previously reported. Construction has been temporarily postponed until authorization is secured by the county supervisors to remove certain trees in the vicinity of the proposed project.

EUREKA, Humboldt Co., Cal.—Until June 16, bids will be received by Fred M. Kay, county clerk, to construct culvert on Cooks' Gulch near Petrolia in the Upper Mattole area. Plans on file in office of clerk and obtainable from County Surveyor Kelly.

EUREKA, Humboldt Co., Cal.—Until June 16, bids will be received by Fred M. Kay, county clerk, to construct a steel truss bridge over Trinity River at Hoopa. Estimated cost, \$50,000. The Federal Government will pay one-half the cost of construction. Plans obtainable from County Surveyor Kelly and on file in office of the clerk.

VALLEJO, Solano Co., Cal.—Pacific Const. Co., 2235 E 7th St., Oakland, at \$15,475 submitted low bid to city council to construct Sacramento street overhead crossing over tracks of the San Francisco, Napa and Calistoga Railway. Complete list of bids follows:

Pacific Const. Co.	\$14,475
S. J. Weeks, Vallejo	15,600
H. Thorsen, Napa	15,750
W. L. Proctor, Santa Rosa	16,623
L. Tagnon, Vallejo	17,353
C. S. Koller	19,360

Bids referred to City Engineer T. D. Kilkenny to confer with San Francisco, Napa and Calistoga R. R., with regard to awarding contract. The project will be financed by the railroad.

DREDGING, HARBOR WORKS & EXCAVATIONS

SANTA PAULA, Calif.—Until 3 P. M., June 12, bids will be received by the Security-First National Bank of Los Angeles, escrow agent, at its Santa Paula branch, 601 Main Street, Santa Paula, Calif., or at room 213 Security Bldg., Los Angeles, in the trust dept. of the Security-First National Bank, 5th and Spring Sts., Los Angeles, for protection work on what is known as the Santa Clara river project. The work is being done for certain property owners owning property along and adjacent to the Santa Clara river, who have heretofore filed claims against the city of Los Angeles for damages alleged to have been occa-

sioned to such property by the destruction of the St. Francis dam. The proposed construction program involves the construction of embankments, drainage channels and other work along the Santa Clara river as a flood control measure. The estimated cost of the work is between \$350,000 and \$400,000, which will be paid for out of special funds provided by the city council. According to H. L. Jacques, the engineer, the proposed work will involve the following:

70,000 lin. ft. of earth, sand and gravel levee, comprising about 5 cu. yds. to the lin. ft.

7500 lin. ft. of double row type A creosoted timber piling of 8-lb. empty cell treatment with 15,000 lin. ft. of electric welded wire mesh No. 6 galv. wire fencing 8 ft. wide by 6 in. by 6 in. fencing.

2300 lin. ft. rail type tetrahedron jetties using old 60-lb. rails, each row of tetrahedrons to have 5½-in. to 1-in. second hand wire rope ties.

38,000 lin. ft. double row pipe piling, using 4-in. and 6-in. pipe up to 24-ft. lengths, with 76,000 lin. ft. of the 8-ft. 6-in. x 6-in. wire fencing described above.

The law firm of Stephens & Green, Rowan Bldg., Los Angeles, is handling the legal matters in connection with this project. Plans may be seen and obtained at room 768, 207 S Broadway, Los Angeles. A charge of \$10 per set of plans will be made. Certified check for \$15,000, payable to the Security-First National Bank of Los Angeles, Santa Paula branch, escrow agent, must accompany each bid.

STOCKTON, San Joaquin Co., Cal.—Bids will be asked shortly by U. S. Engineer Office, Customhouse, San Francisco, to construct levees in the vicinity of Stockton in connection with the Stockton Deep Water project, a \$6,000,000 development.

FRESNO, Fresno Co., Cal.—Members of City Park Commission vote to construct a 5-acre lake in Roeding Park of sufficient depth to permit boating. Estimates of cost are being prepared.

STREET LIGHTING SYSTEMS

LIVERMORE, Alameda Co., Cal.—City trustees contemplate installation of ornamental street lighting system in First street. Various types of standards are being considered.

SAN FRANCISCO.—Until June 16, 11 A. M., bids will be received by Consulting Quartermaster, Fort Mason, for installation of night lighting system at Crissy Field, Presidio. Specifications obtainable from above on deposit of \$20.00.

ROSEVILLE, Placer Co., Cal.—Until June 4, 8 P. M., bids will be received by F. R. Chilton, city clerk, to furnish and deliver one carload of poles for Municipal Electric Light Department. Specifications on file in office of clerk.

PORTERVILLE, Tulare Co., Cal.—City council plans to install ornamental street lighting system. City Manager Fred Pease, after inspecting standards in various cities in North-

ern and Central California, recommends the installation of metal type standards.

FRESNO. Fresno Co., Cal.—Until June 5, 10:30 A. M., bids will be received by H. S. Foster, city clerk, (102-D) to install lighting system in Fresno St., bet. O and Divisadero Sts.; Howard St., bet. Fresno and Divisadero Sts.; portions of Divisadero and Fresno Sts. involving installation of 76 electroliters together with underground system. Standards of combination steel and cast iron, single lamp, 1911 Act. Certified check 10% payable to city required with bid. Plans obtainable from C. C. Van Valkenburgh Jr., city engineer.

MACHINERY AND EQUIPMENT

SACRAMENTO. Cal.—Until June 5, 3 P. M., under Order No. 2019-1648, bids will be received by U. S. Engineer Office, California Fruit Bldg., for one pipe threading machine, belt driven, capacity 1-inch to 4-inch, complete with full set of dies, similar and equal to machine manufactured by the National Pipe Threading Machine Company also one complete set of attachments and dies for above machine for threading ½-inch and ¾-inch pipe. Further information obtainable from above.

ALAMEDA. Alameda Co., Cal.—Fageol Co. submitted low bid to Municipal Board of Public Utilities to furnish and deliver two new busses for transportation in South Alameda and west of Webster street. Taken under advisement.

MERCED. Merced Co., Cal.—Until June 5, 8 P. M., bids will be received by N. S. Peck, clerk, Merced Union High School District for one 48-passenger school bus to be built on Dodge Bros. two-ton chassis lengthened to approx. 220-in. wheel base. Tire equipment to be 34x7.50 truck balloon with dual equipment on Budd disc rear wheels. One 42-passenger school bus to be built on Dodge Bros. two-ton chassis lengthened to approx. 212-in. wheel base. Tire equipment to be 34x 7.50 truck balloon with dual equipment on Budd disc rear wheels. Certified check 10% required. Specifications on file in office of Principal at High School.

SAUSALITO. Marin Co., Cal.—Until June 9, 12 noon, bids will be received by M. F. Seymour, secretary, Tamalpais Union High School District, to furnish and install one Hendy lath, 16 in. by 8 ft. or equal and other supplies. Specifications on file with Mr. Wenderling, superintendent of construction.

EUREKA. Humboldt Co., Cal.—Until June 5, 7:30 P. M., bids will be received by Geo. E. Abbe, city superintendent of schools, Eureka Junior High School, to furnish one Pierce-Arrow School Bus, Model 1925 with model Z motor, equipped with Westinghouse air brakes, 220-in. wheel base and 42-passenger bus body. Certified check or bidder's bond of 5% payable to Eureka High School District. Further information obtainable from above office.

TAFT. Kern Co., Cal.—Until June 16 7 P. M., bids will be received by C. A. Page, city clerk, to furnish and deliver one Caterpillar ten motor patrol or equal. Standard equipment, 10-ft. blade with scarifier, equipped with 8-in. flat track shoes and canopy top.

WASHINGTON. D. C.—See "Government Work and Supplies," in this issue. Bids wanted for miscellaneous supplies for various navy yards including a gasoline operated crane, lathe, machine tools, etc.

MODESTO. Stanislaus Co., Calif.—City council appropriates \$300 for the purchase of a motorcycle, \$3,300 for purchase of two automobiles and \$1,200 for the purchase of a pick-up truck. H. E. Gragg is city clerk. F. W. McCarton, city engineer.

FIRE ALARM SYSTEMS

SAN MATEO. San Mateo Co., Calif.—Until June 2, 8 P. M., bids will be received by E. W. Foster, city clerk, to construct traffic signals at the intersection of El Cerrito and Tilton Aves. and El Camino Real. Specifications obtainable from city clerk. Certified check 10% required with bid. E. P. Wilsey, city engineer.

FIRE EQUIPMENT

MARYSVILLE. Yuba Co., Cal.—Until June 2, 7:30 P. M., bids will be received by Chester O. Gates, city clerk, to furnish and deliver a 750-gal. pumper and hose body fire engine for Fire Department. Certified check 10% required with bid. Specifications on file in office of clerk.

MISCELLANEOUS SUPPLIES AND MATERIALS

MODESTO. Stanislaus Co., Calif.—Until June 11, 11 A. M., bids will be received by C. S. Abbott, secretary, Modesto Irrigation District, to furnish copper wire. Certified check 5% payable to district required. Specifications obtainable from above. C. S. Abbott, secretary.

RESERVOIRS AND DAMS

PLACERVILLE. El Dorado Co., Cal.—Until June 12, 11 A. M., bids will be received by R. W. Browne, secretary, El Dorado Irrigation District, 685 Main St., to construct Webber Creek Dam diversion tunnel, wasteway, appurtenances and certain concrete work in connection therewith. Bonds of \$350,000 have been voted to finance the work. Bids for the bonds are also scheduled to be opened on June 12. In the event that the district does not receive a satisfactory offer for the bonds, the directors of the district will consider proposals for the acceptance of the bonds in payment for construction covered in the bid. Certified check or bidder's bond of 10% payable to treasurer of the district required with bid. Plans obtainable from secretary at above address on deposit of \$25. returnable.

PIPE LINES, WELLS, ETC.

EUREKA. Humboldt Co., Cal.—John Griffith, city superintendent of public works, will ask bids at once to drill well near site of three wells, now in use at Hawthorne Street and Broadway.

SEWERS AND SEWAGE DISPOSAL PLANTS

SAN FRANCISCO.—Until June 6, 11 A. M., bids will be received by Constructing Quartermaster, Fort Mason, to furnish and install water softener plant at the Letterman General Hospital, San Francisco Presidio. Specifications obtainable from above.

SANTA CRUZ. Santa Cruz Co., Cal.—Until June 2, 2:45 P. M. (to be opened 3:15 P. M.) for repair and anchorage

of existing outfall sewer in the Pacific Ocean. Bidders will include in their proposals the repair of the break in the east pipe line and shall construct concrete foundation anchor blocks in the east and west outfall pipe lines. Payments will be made in lump sum as follows:

1. First payment, 25% of the bid, payable on or before Jan. 1, 1931.
 2. Second payment, 25% of the bid, payable on or before Jan. 1, 1932.
 3. Third payment, 25% of the bid, payable on or before Jan. 1, 1933.
 4. Final payment, 25% of the bid, payable on or before Jan. 1, 1934.
- Certified check or bidder's bond 10% payable to city required with bid. Plans obtainable from Roy Fowler, city engineer, on charge of \$5, not returnable.

SAN FRANCISCO.—MacDonald & Kahn, Financial Center Bldg., at \$93,002 awarded contract by Board of Public Works to construct Section D of the Fillmore St. sewer, involving: 2698 lin. ft. 6 ft., 6 in. circular reinf. conc. sewer; 515 lin. ft. 6 ft. circular reinf. conc. sewer; 115 lin. ft. 3 ft. by 4 ft. 6 in. reinf. conc. sewer; 111 lin. ft. 2 ft. 6 in. by 3 ft. 9 in. reinf. conc. sewer; 10 lin. ft. 3 ft. by 5 ft. brick sewer; 25 lin. ft. 21-in. and 35 lin. ft. 15-in. V.C.P. sewer; 90 lin. ft. 10-in. V.C.P. culvert connection; 15 manholes on reinf. conc. sewer; 2 manholes on existing V.C.P. sewers; 3 manholes on existing brick sewers; 1 alternate connection of reinf. conc. alterations of auxiliary water supply pipe (in lump sum bid) involving: 215 lin. ft. 12-in. V.C.P. underdrain, 430 ft. 10-in. do, 850 ft. 8-in. do, and 1710 ft. 6-in. do, all covered with concrete or imbedded in broken rock.

UKIAH. Mendocino Co., Calif.—Until June 4, 7:30 P. M., bids will be received by F. C. Handy, city clerk, to construct sewers in Cypress Ave. and Clay St., involving 5,500 ft. of sewer in all. Certified check or "its equivalent" payable to city council for 10% required with bid. Plans on file in office of clerk.

MARTINEZ. Contra Costa Co., Cal.—County Supervisors declare intention (1) for sewers in Acy and Imp. Dist. No. 5, in portions of Monterey St., Carl Ave., etc., involving 30-inch and 36-inch vitrified sewer pipe; 4-in. and 36-in. reinforced concrete sewers with stand. vit. clay lining blocks; brick and cem. conc. manholes. Acq. and Imp. Act 1925. Hearing June 16. J. H. Wells, county clerk. Ross L. Calfee, engineer, 322 Arlington St., Berkeley.

WATER WORKS

SUNNYVALE. Santa Clara Co., Cal.—Until June 2, 8 P. M., bids will be received by I. Trubschenck, city clerk, to install pump at municipal water plant, having capacity of 250-gals. of water per minute with 200-ft. lift. Bidder to furnish specifications. Certified check of 10% payable to city required with bid.

WHITTIER. Los Angeles Co., Cal.—City council adopts ordinance providing for the issuance of bonds in the sum of \$310,000 issued for the extension and improvement of the water works system. Debbie E. Allen is the city clerk.

YUBA CITY. Sutter Co., Cal.—Until June 6, 10 A. M., bids will be received by Beatrice Johnson, city clerk, to furnish and install a vertical deep well turbine pump together with electric motor, according to specifications of Edward von Geldern, engineer, 2nd and C Sts., Yuba City.

Certified check 10% required with bid. Specifications obtainable from clerk.

BIGGS, Butte Co., Cal.—Pittsburg-De Moines Steel Co., at \$4800 awarded contract by city trustees to furnish and install tank and tower in connection with water system; tank with capacity of 40,000 gals. on 75 ft. tower.

MONTEREY, Monterey Co., Calif.—Until June 2, under Circular No. 9, bids will be received by Quartermaster Presidio of Monterey, to furnish and install 2 horizontal centrifugal pumps, etc., in Building No. 21. Specifications obtainable from above office.

PLAYGROUNDS & PARKS

SAN FRANCISCO.—Until June 9, 3 P. M., under Proposal No. 596, bids will be received by Leonard S. Leavy, city purchasing agent, 270 City Hall, to furnish and deliver 5,000 cubic yards of loam for Park Commission. Specifications and further information obtainable from above office.

SAN FRANCISCO.—Until June 9, 3 P. M., under Proposal No. 598, bids will be received by Leonard S. Leavy, city purchasing agent, to furnish 20,000 cubic yards of cow manure for Park Commission; delivered to Sharp Park. Specifications and further information obtainable from above office.

STREETS AND HIGHWAYS

HUMBOLDT COUNTY, Cal.—J. P. Holland, 1834 McKinnon Avenue, San Francisco, at \$51,480 awarded contract by State Highway Commission to improve 5.2 miles between Loleta and 2 miles north of Beatrice, 2.6 miles to be graded and 5.2 miles surface with river run gravel.

SAN RAFAEL, Marin Co., Cal.—City council declares intention (506) to improve Taylor St., bet. B and D Sts., portions of First and C Sts., etc., involving grading; hydraulic concrete pavement; hyd. conc. curbs and gutters; 4-inch ironstone pipe side sewers; 6-in. and 8-in. ironstone pipe sewers; hyd. conc. manholes, sidewalks; hyd. conc. and corr. iron arch culverts, catchbasins, etc. 1911 Act. Bond Act 1915. Hearing June 10. Eugene W. Smith, city clerk. Herbert K. Brainerd, city manager.

SANTA CRUZ, Santa Cruz Co., Cal.—Granite Const. Co., Watsonville, at \$16,995.22 awarded contract by city council (458-C) to improve portions of Windsor St., South Branciforte Ave. and Pine St., involving cement conc. pavement, curbs, sidewalks, driveway approaches, catchbasins; vit. city pipe sewer laterals; wrought iron water pipe services.

EL DORADO COUNTY, Cal.—Until June 17, 2 P. M., bids will be received by C. H. Sweetser, district engineer, U. S. Bureau of Public Roads, 461 Market St., San Francisco, to surface 4.20 miles of Section B, Strawberry-Phillips, of Route No. 32, Placerville-Lake Tahoe National Forest Highway, involving:

4,000 cu. yds. unclass. excavation for borrow;
4.20 miles fine grading subgrade and shoulders;
13,300 cu. yds. crushed rock surf.;
800 cu. yds. crushed rock (supplemental);
700 M. gals. watering;
provide and maintain water plant;
maintenance of existing road and sections accepted for traffic (extra work, estimated cost \$1,000);
1,060 cu. yds. coarse screenings;
560 cu. yds. fine screenings;
60 right of way monuments (in place).

Plans obtainable from engineer on deposit of \$10, returnable, checks for same to be made payable to Federal Reserve Bank of San Francisco.

SANGER, Fresno Co., Calif.—Until June 9, 8 P. M., bids will be received by M. W. Bacon, clerk, Sanger Union High School District, to construct 406 lin. ft. concrete curb and 3,941 sq. ft. concrete sidewalks at school grounds. Specifications and further information obtainable from clerk.

SEQUOIA NATIONAL PARK, Cal.

—Monarch-Breen, Inc., San Diego, at \$139,839.60 submitted to bid to U. S. Bureau of Public Roads, San Francisco, to grade 2.7 miles of Section D-2, Route No. 1, Generals' Highway in Sequoia National Park, involving:

19.9 acres clearing;
95,133 cu. yds. unclass. excavation;
19,475 cu. yds. Type B excavation;
694 cu. yds. unclass. excavation for structures;
20,917 sta. yds. overhaul;
2.70 miles finishing;
415 cu. yds. cem. rubble masonry;
1456 lin. ft. corr. metal pipe (in place);
4500 cu. yds. mile hauling backfill material.

Contract has been recommended awarded to the low bidder. Complete list of bids follows:
Monarch-Breen, Inc. \$139,839.60
W. A. Bechtel Co., S. F. 177,703
Isbell Constr. Co., Fresno 187,386
Engineer's estimate 173,386

SAN MATEO, San Mateo Co., Cal.—City Council declares intention (30-5) to improve Glendale Rd. from Hillsborough town limits to present pavement at intersection of Poplar Ave., portions of Edgewood Rd. and Fulton Rd., involving grading; combined conc. curbs and gutters; 4-inch

asph. conc. base pavement with 2-inch concrete surface; 6-inch vit. clay pipe san. sewers; 4-in. vit. clay pipe lateral sewers; 12-inch conc. pipe storm water sewers and 2 circular concrete pipe catchbasins. 1911 Act. Bond Act 1915. Hearing June 16. E. W. Foster, city clerk. E. P. Wilsey, city engineer.

WHITE PINE COUNTY, Nevada.—Wheelwright Const. Co., Ogden, Utah, at \$92,659.52 awarded contract by State Highway Commission to construct highway bet. Robinson Summit and Keystone and Magnuson's and North County Line, 47.01 miles, involving grading; structures and gravel surfacing. Engineer's est., \$93,655.

CHURCHILL COUNTY, Nevada.—A. D. Drumm Jr., Fallon, Nevada, at \$11,955.50 awarded contract by State Highway Commission to grade; construct structures and place surfacing material on 4.10 miles between 13.6 miles south of Fallon and 17.6 miles south of Fallon. Dodge Bros. next low at \$12,033; engineer's est., \$14,210.

CHURCHILL COUNTY, Nevada.—A. D. Drumm Jr., Fallon, Nevada, at \$22,088.32 awarded contract by State Highway Commission, to furnish asphaltic fuel oil, apply and mix with crushed rock or gravel surface on 11.70 miles between Salt Wells and Sand Springs. Other bids: Dodge Bros., \$23,813; J. Casson, Hayward, Calif., \$28,556; engineer's estimate, \$25,605.

SAN MATEO, San Mateo Co., Cal.—Until June 2, 8 P. M., (previously reported June 6), bids will be received by E. W. Foster, city clerk, (30-4) to improve portions of 17th Ave., 19th Ave., 20th Ave., etc., involving grading; hyd. cem. conc. pave.; hyd. cem. conc. curbs; cem. conc. walks; circular conc. pipe storm water catchbasins; hyd. cem. conc. pipe storm water sewers; reinf. conc. box culvert; sanitary sewers of vit. and c. i. pipe.

1911 Act. Bond Act 1915. Certified check 10% payable to city required with bid. Plans on file in office of clerk. E. P. Wilsey, city engineer.

SANTA CRUZ COUNTY, Cal.—Until June 18, 2 P. M., bids will be received by State Highway Commission, Public Works Bldg., Sacramento, to grade and surface about 2.6 miles bet. Waterman Switch-back and Saratoga Gap with bituminous treated water-bound macadam.

See call for bids under official proposal section in this issue.

SAN RAFAEL, Marin Co., Calif.—S. R. Harliss, San Rafael, at \$15,885.12 awarded contract by city council (493) to improve G and I Sts., and one unnamed street, involving:

1,312 cu. yds. excavation;
31,774 cu. ft. 5-in. asph. conc. pave.;
6,034 sq. ft. 4-in. do;
22,080 sq. ft. 3-in. do;
40 tons 2-in. do;
17 tons conform do;
59,883 sq. ft. 4-in. stone sub-base;
3,222 lin. ft. conc. gutter;
45 lin. ft. 3x8-in. r.w. header;
96 lin. ft. 4-in. I. S. P. sewers;
4 catchbasins;
48 lin. ft. 10-in. corr. iron pipe;
30 cu. yds. concrete (shallow sewer protection);
4x30-in. corr. arch and conc. culvert (38 lin. ft. complete;
50 lin. ft. using existing metal)

Complete list of bids follows:
S. R. Harliss \$15,885
F. J. Main, Fairfax 16,708
Pacific States Const. Co., S. F. 18,607

REDDING, Shasta Co., Cal.—Survey of the proposed Weed-Klamath Falls road made by the U. S. Bureau of Public Roads was adopted by the directors of the Joint Highway district, meeting in Redding last Tuesday.

The survey adopted is a modification of two proposed routes: Route one from Weed to Dorris and route two from Dorris to the Klamath Falls highway. The Dorris to Klamath Falls section of route two was adopted because the state highway commission suggested that the grades be reduced from six to five per cent and that the curves be lengthened.

The road extends over 55 miles, 15 miles in the national forest, beginning at Weed to a point on the state line north of Dorris and connecting with the Oregon road from Klamath Falls.

The road is almost in a straight line at an elevation of 4000 feet for almost 40 miles but at the divided it will average 5000 feet in elevation.

The directors in attendance at the meeting were J. B. Rohrer of Montague, Siskiyou County supervisor and president of the board; Jesse Wolcott of Corning, supervisor in Tehama County, treasurer of the board, and A. H. Gronowoldt of Shasta County, secretary of the board.

The directors met in the offices of Baker & Ross, of Redding, attorneys for the district.

HAYWARD, Alameda Co., Cal.—Jack Casson, Hayward, at \$11,325 awarded contract by city council to improve portions of Peralta, Grace, Soto and Simon Sts., involving:

- (a) 4175 sq. ft. conc. sidewalks;
- (b) 250 lin. ft. vit. clay side sewer, 4-in.;
- (c) 100 lin. ft. redwood header-board;
- (d) 78,000 sq. ft. 6-in. full penetration emulsified asphalt macadam paving;
- (e) 11,700 sq. ft. 5-inch full penetration emulsified asphalt macadam paving including grading.

HAYWARD, Alameda Co., Cal.—City Engineer Jesse B. Holly preparing plans to improve Smalley Ave. from Western Blvd. to Meekland Ave.; Laurel Ave. from Western Blvd. to Belmar St.; Belmar St. from A St. to Laurel Ave., and Princeton St. from A to Laurel Ave., involving grading; curbs; walks; gutters; paving.

ARCHITECTS NOT SELECTED FOR FEDERAL PROJECTS

There is no assurance that a Portland architect will be selected to prepare plans for the new federal building at Portland, Oregon, or that such a selection will be made before July 1, if local talent is decided upon, according to Major Ferry Heath, assistant secretary of the treasury in charge of the public building program.

Heath declared that no local architects have been selected for federal buildings because congress as yet has appropriated no funds for such a purpose. The Elliott act authorizing additional public buildings also approves the use of \$1,200,000 for employment of outside architects at such places as the treasury may designate, but there has been no appropriation.

WESTERN PIPE EARNINGS

Net income of Western Pipe & Steel Company for the first quarter of 1930, after depreciation, was \$146,445. Total sales amounted to \$1,993,137 while unfilled orders on hand are in excess of \$2,000,000.

A. I. A. ANNOUNCES AWARDS OF FINE ARTS MEDAL

The American Institute of Architects announces award of its fine arts medal for 1930 to Adolph Alexander Weimann, New York sculptor, widely known as the designer of the dime and half dollar of the current coinage.

The institute awarded its craftsmanship medal to John Kirchmayer of Cambridge, Mass., wood carver who carved the altars, pulpits and bishop's thrones in several churches in New England, Detroit and Pittsburgh.

Weinman made the frieze of the Elks' memorial in Chicago. The monument to General Alexander Macomb in Detroit, the Maryland soldiers' and sailors' monument in Baltimore, the Lincoln memorials in Hodgenville, Ky., Madison, Wis., and Frankfort, Ky., and the Colonel William F. Vilas monument in the National Military Park at Vicksburg, Miss.

The medals will be presented today in Washington during the institute's 63rd convention.

KEEP AGREEMENTS

Breaking a contract even though it may be only a verbal one is just as dishonorable as the deliberate violation of one duly witnessed and signed. Groups of men who wilfully place themselves in this position should not be encouraged and should be warned that they are rocking the boat and that it is a long lane that has no turn.

OIL DERRICK SPECIFICATION

West Coast engineers have figured out a specification for a heavy duty wood oil derrick to meet deep drilling requirements. It allows for a safe

load of 756,000 lbs. The 28,000 board feet of lumber in the derrick was cut to detail in several Los Angeles mills to determine the cost.

"Business houses should not only maintain their appropriations for advertising and research during the present times, but should expand them prudently as prospects warrant," declares Dr. Julius Klein, assistant secretary of commerce. "Advertising is inherently constructive, acting as a powerful stimulant to every branch of activity. It not only keeps goods moving—it inspires confidence. 'Good will' is a priceless business attribute, but it is one that may waver and droop under the veering winds of public opinion. Advertising can keep it sturdy and upstanding. There is a bit of advice worth the attention of every business man. Prosperity will only return when all hands work for it. Advertising is one of the best tools available."

On the matter of the 5-day week, Roger Babson, a foremost business economist, has this to say:

"Whether or not the 5-day week will relieve unemployment is a much disputed question. If, however, the 5-day week means speeding up the work in five days in order that production may be equal to 5½ or 6 days, then only the most efficient workmen can stand the pace. Hence, the slower or less efficient men would drop out, thereby increasing, rather than diminishing unemployment. Labor's idea is not to speed up all production, but to make jobs for more men. More important to business, however, is the fact that workers have more time to spend money and more things for which to spend it. If added leisure means that workers will buy more, it should stimulate business in certain lines."

A "Pittsburg" Automatic Water Heater installed in the Home indicates high quality throughout.

Recommended and specified by all the leading architects, plumbers and builders.

Consider the high merit of the Pittsburg coupled with "Pittsburg Perfect Service."

"Hot water quick as a wink."

Pittsburg Water Heater Co.

Makers of "Pittsburg Automatic"—"Bungalow Automatic" Storage Systems and "Lyon" Tank Water Heaters.

OFFICIAL PROPOSALS

STATE OF CALIFORNIA

DEPARTMENT OF PUBLIC WORKS

DIVISION OF HIGHWAYS

NOTICE TO CONTRACTORS

SEALED PROPOSALS will be received at the office of the State Highway Engineer, Public Works Building, Sacramento, California, until 2 o'clock P. M. on June 18, 1930, at which time they will be publicly opened and read, for construction in accordance with the specifications therefor, to which special reference is made, of portions of State Highway, as follows:

Tehama and Shasta Counties, between one mile south of Cottonwood and Cottonwood (II-Teh-Sha-3-C-A), an undergrade crossing consisting of two (2) reinforced concrete abutments and a ballasted sub-floor to be constructed and about nine-tenths (0.9) mile of roadway to be graded and paved with Portland cement concrete.

Placer County, an undergrade crossing under the tracks of the Southern Pacific Railroad near Emigrant Gap (III-Pla-37-E), consisting of two concrete abutments with wing walls and grading and surfacing the roadway between the abutments with crusher run base and untreated crushed gravel or stone surfacing.

Sanita Cruz County, between Waterman Switch-back and Saratoga Gap (IV-SCR-42-A), about two and six-tenths (2.6) miles in length, to be graded and surfaced with bituminous treated waterbound macadam.

San Joaquin County, between Houston School and Forest Lake (X-S-J-4-D), about three and three-tenths (3.3) miles in length, to be graded and widened with Portland cement concrete and crusher run base.

San Joaquin County, between French Camp and Stockton (X-S-J-5-B), about one and eight-tenths (1.8) miles in length, to be graded and surfaced with crushed gravel or stone.

Proposal forms will be issued to only those Contractors who have furnished verified statement of ex-

perience and financial condition in accordance with the provisions of Chapter 644, Statutes 1929, and whose statements so furnished are satisfactory to the Department of Public Works. Bids will not be accepted from a Contractor to whom a proposal form has not been issued by the Department of Public Works.

Plans may be seen and forms of proposal, bonds, contract and specifications may be obtained at the said office, and they may be seen at the offices of the District Engineers at Los Angeles and San Francisco, and at the office of the District Engineer of the district in which the work is situated. The District Engineer's offices are located at Eureka, Redding, Sacramento, San Francisco, San Luis Obispo, Fresno, Los Angeles, San Bernardino and Bishop.

A representative from the district office will be available to accompany prospective bidders for an inspection of the work herein contemplated, and Contractors are urged to investigate the location, character and quantity of work to be done, with a representative of the Division of Highways. It is requested that arrangements for joint field inspection be made as far in advance as possible. Detailed information concerning the proposed work may be obtained from the district office.

No bid will be received unless it is made on a blank form furnished by the State Highway Engineer. The special attention of prospective bidders is called to the "Proposal Requirements and Conditions" annexed to the blank form of proposal, for full directions as to bidding, etc.

The Department of Public Works reserves the right to reject any or all bids or to accept the bid deemed for the best interests of the State.

DEPARTMENT OF PUBLIC WORKS

DIVISION OF HIGHWAYS

NOTICE TO CONTRACTORS

SEALED PROPOSALS will be received at the office of the State Highway Engineer, Public Works Building, Sacramento, California, until 2 o'clock, P. M., on June 11, 1930, at which time they will be publicly opened and read, for construction in accordance with the specifications therefor, to which special reference is made of portions of State Highway, as follows:

Nevada County, a reinforced concrete girder bridge across South Fork of Yuba River near Indian Springs (III-Nev-37-A), consisting of one 70-foot and one 30-foot span on a concrete pier and concrete abutments with wing walls.

Nevada County, an overhead crossing over the tracks of the Southern Pacific Railroad near Yuba Pass (III-Nev-37-A), consisting of one 112-foot deck plate girder span, one 66-foot deck plate girder span, one 54-foot deck plate girder span, all on concrete piers and 279 lineal feet of timber trestle approach on framed bents and rubble masonry abutments.

Sanita Clara County, between Antonio Avenue and Sunnyvale (IV-SC1-2-A), about four and nine-tenths (4.9) miles in length, to be graded and paved with Portland cement concrete and asphalt concrete.

Sanita Barbara and San Luis Obispo Counties, between Third Crossing and the Easterly Boundary (V-S-B, SLO-

57-C-D,C), about twenty-six and two-tenths (26.2) miles in length, to be graded and surfaced with oil treated crushed gravel or stone.

Los Angeles County, between Citrus Avenue and Glendora (VII-LA-9-H), about one (1.0) mile in length, to be graded and paved with asphalt concrete.

Amador and El Dorado Counties, a timber bridge across Cosumnes River about 10 miles south of El Dorado (X-Ama-E-D-65-A,C), consisting of one 120-foot through truss span on concrete piers and nine 13-foot approach spans on frame bents with concrete pedestals, and approximately 0.14 mile of roadway to be graded and surfaced with untreated crushed gravel or stone.

Plans may be seen, and forms of proposal bonds, contract and specifications may be obtained at the said office, and they may be seen at the offices of the District Engineers at Los Angeles and San Francisco, and at the office of the District Engineer of the district in which the work is situated. The District Engineers' offices are located at Eureka, Redding, Sacramento, San Francisco, San Luis Obispo, Fresno, Los Angeles, San Bernardino, and Bishop.

A representative from the district office will be available to accompany prospective bidders for an inspection of the work herein contemplated, and Contractors are urged to investigate the location, character and quantity of work to be done, with a representative of the Division of Highways. It is requested that arrangements for joint field inspection be made as far in advance as possible. Detailed information concerning the proposed work may be obtained from the district office.

No bid will be received unless it is made on a blank form furnished by the State Highway Engineer. The special attention of prospective bidders is called to the "Proposal Requirements and Conditions" annexed to the blank form of proposal, for full directions as to bidding, etc.

The Department of Public Works reserves the right to reject any or all bids or to accept the bid deemed for the best interests of the State.

BRITISH COLUMBIA LUMBER EXPORTS TO U. S. DECREASE

Exports of lumber, logs, and shingles from British Columbia to the United States decreased, while exports of poles increased in April, 1930, as compared with April, 1929, according to a report from Consul General Ely E. Palmer, Vancouver, to the Lumber Division of the Department of Commerce.

Figures presented by Mr. Palmer show that the lumber exports in April, 1930, totaled 49,729,000 as compared with 51,133,000 board feet in April, 1929; log exports, 7223 as compared with 22,378 board feet; shingle exports, 11,231 as compared with 201,730; and pole exports, 1,429,760 as compared with 1,060,534 lineal feet.

Lumber shipments from the Vancouver consular district to the United States, during April, 1930, totaled 32,915,000 board feet as compared with shipments of 39,062,000 board feet in April, 1929, and 32,137,000 board feet in March, 1930. Shipments of shingles to the United States from this district totaled 102,627,000 a decrease of 88,111,000 as compared with shipments for April, 1929, which totaled 190,733,000. Exports of shingles to the United States in March, 1930, totaled 100,518,000.

Of The NEW

Daily Pacific Builder

The only daily construction newspaper affording complete coverage of the construction activities in Central and Northern California, featuring work contemplated, bids wanted, bids opened, contracts awarded, sub-bids wanted and sub-contracts let on all types of building construction, bridges, dams and harbor works, irrigation projects; machinery and equipment; water works and supplies business opportunities, building permits, building contracts, mechanics' liens, acceptances, etc., etc.

Keep informed on construction developments in Central and Northern California and the major projects in Southern California, the states of Oregon, Washington, Nevada and Arizona.

The new DAILY PACIFIC BUILDER will afford a service that serves—both in Quality and Quantity. You, as a member of the construction fraternity, should not be without it.

Subscription price \$1.50 per month, or \$15.00 a year, payable in advance.

RICHMOND COUNCIL ADOPTS UNIFORM CODE

The uniform building code, now in effect in more than 75 cities and approved by the League of California Municipalities, has been given first reading by the Richmond City Council.

The new code is quite similar to the one that has been in effect in Richmond, but provides for engineering standards, clearances and opening similar to those in effect in other cities, according to City Building Inspector A. J. Hurley. Hurley said the new ordinance would eliminate confusion that sometimes had existed in the past due to differences between the Richmond ordinance and the regulations of neighboring cities.

A new plumbing ordinance, sponsored by the Richmond Plumbers Association has also passed first reading.

According to City Plumbing Inspector C. S. Ford, the new ordinance does not materially change the former regulations, but provides for payment of licenses quarterly instead of annually. The annual license remains at \$100. The new ordinance is said to be similar to that in effect in Oakland.

ENGINEERS FAIL TO ENDORSE FILTRATION BOND ISSUE

Sacramento Section, American Society of Civil Engineers, has adopted a resolution in which it declined to endorse the \$450,000 bond issue for addition to the city filtration plant until the city council determines upon a definite policy regarding a permanent water supply for Sacramento. The bond issue will be voted upon June 10.

Fred Grumm, engineer in charge of survey, with the California State Highway Commission, presented the resolution. The resolution was seconded by C. S. Pope, construction engineer for the state division of highways.

The matter was brought before the section two weeks ago, after City Manager James S. Dean had requested the section president, Thos. H. Stanton, to present the matter to the body of engineers for the purpose of obtaining their endorsement.

At that time the question was referred to the section's committee on public relations, of which Joseph Gross is chairman, and the report of that committee was substantially the same as the sentiment expressed in the resolution.

The resolution follows: "Resolved, That pending the determination by the city council of a definite policy with respect to a permanent water supply for the City of Sacramento, the Sacramento section of the American Society of Civil Engineers prefers not to endorse any proposal to vote bonds for additional construction at the existing filtration plant."

The adoption was by acclamation, and there were no negative votes.

S. F. BUILDING IN MAY REGISTERS \$2,881,110

Building construction in San Francisco for the month of May, based on the number of building permits issued by the Department of Public Works, involved an expenditure of \$2,881,110 bringing the total operations for the past five months to \$10,316,120.

During the month 570 permits were issued as compared with 765 permits in May, 1929, when the expenditure registered \$4,307,352.

The activities of the past month include a project for the State Harbor Commission calling for an expenditure of \$375,000.

Following is a segregated report of May, 1930, activities as compiled by the Department of Public Works:

Class	No. of Permits	Est. Cost
A	2	\$ 307,850
B	2	77,000
C	13	294,200
Frames	136	725,405
Alterations	415	329,668
Public Bldgs.	1	571,977
Harbor Bldg.	1	575,000
TOTAL	570	\$2,881,110

STATE BUILDINGS 'DEPLORABLE' SAYS FIRE MARSHAL

According to a United Press dispatch, J. W. Stevens, state fire marshal, in addressing 100 members of the Contra Costa County Firemen's Association in Richmond, issued the warning that California had best put its houses in order to avert a holocaust worse than the recent Columbus, Ohio, prison fire.

"There are several state institutions, notably the State Hospital at Stockton," Stevens said, where, should fire break out, a catastrophe would occur that would dwarf the Ohio fire, where 320 prisoners were cremated.

"In one building at the Stockton institution, an antiquated 4-story frame structure, conditions created by barred windows, a building-height stairwell and elevator shaft would conspire to imprison 1,000 women without a hope of exit, should fire break out on a lower floor in their sleep or at a time when they are gathered on the upper floors.

"To the credit of the state administration, it must be said that they are working to rectify these conditions. The prison board had recommended a program of building which will make the institutions fireproof.

"But the program is scheduled over a period of years, and fire peril does not wait for budgets to mature."

The California supreme court has affirmed an order of the state railroad commission requiring the Southern Pacific, Santa Fe and Los Angeles and Salt Lake railroads to construct a union passenger station in the city of Los Angeles at an estimated cost of \$10,000,000.

NAT'L ENGINEERING INSPECTION ASSOCIATION IS PERFECTED

In December last, a group of inspecting engineers and representatives of testing laboratories from all sections of the country met in Detroit, Michigan, and formed a preliminary organization among those engaged in the practice of testing and supervising the manufacture and use of various engineering materials for construction work of Federal, State and City governments; public service corporations; railroad and highway construction and maintenance; bridges; office, manufacturing, educational and other building projects.

At a second meeting held April 3 and 4, also at Detroit, the success of the preliminary gathering was continued and there was finally concluded the formation of the National Engineering Inspection Association.

The officers elected were: Watson Vredenburgh, president of Hildreth & Co., Inc., New York City, as president; J. D. Stoddard, vice-president of the Detroit Testing Laboratory, as vice-president, and B. H. Witherspoon, president of the Pittsburgh Testing Laboratory as secretary-treasurer.

The Board of Directors include the officers and a representative from each of the four geographical sections of the country as follows: Henry Gulick, president of Gulick-Henderson Company, New York, for the Eastern Section; James H. Herron, president of James H. Herron Company, Cleveland, for the Mid-Western Section; F. B. Porter, president of the Southwestern Laboratories, Fort Worth, Texas, for the Southern Section; Abbot A. Hanks, president of Abbot A. Hanks, Inc., San Francisco, California for the Western Section.

The Association adopted complete construction and by-laws and code of ethics. The former states the object of the association is, "to promote a proper understanding and cooperation among those engaged in and concerned with engineering inspection; to establish practices which will prove beneficial to proper service and to develop and encourage better and more effective inspection methods." Provisions are made also for constant supervision of the affairs of the association by the officers and Board of Directors as well as arrangements for semi-yearly general meetings.

The charter membership consists of individuals, partnerships and corporations about equally divided between the four sections of the country and an indication of a number of additional memberships at an early date.

WINDOWLESS FACTORIES

Windowless factories as the standard form of design within 20 years were predicted by Dr. E. E. Free before a meeting of engineers in New York. The meeting was the second annual illuminating conference, at the Westinghouse Lighting Institute. Dr. Free said artificial light is more dependable than daylight and easier on the eyes of the workers.

NEW UNIFORM METHOD OF ASSESSMENT PROCEDURE HELD INADVISABLE BY L. A. ATTORNEY

(By George W. Crouch, Los Angeles Attorney)

Address on "Uniform Methods of Procedure in Relation to Public Improvements," delivered before the University of Southern California, Los Angeles. Mr. Crouch is a member of the firm of Crouch and Crouch, attorneys, Los Angeles.

Public improvements are usually accomplished through the employment of one of the following methods:

First: By the municipality from general taxation moneys on hand.

Second: From money derived from the sale of a general bond issue voted by the people, as provided by the Constitution, and

Third: Through the medium of special assessments.

It is only with regard to special assessments that occasion arises to discuss uniform methods of procedure. A special assessment, as distinguished from a tax, is a special and local charge upon property in the immediate vicinity of municipal improvements, predicated upon the theory of equivalent benefits from such improvement, and levied upon the land specially benefited. Nevertheless, in reality it is a tax and derives its authority from the taxing power of the government.

It is within the power of the Legislature to prescribe various methods in apportioning the amount of the benefit or tax. Sometimes it is delegated to the municipality to apportion according to benefit. Again, it may be on the ad valorem principle; that is, according to the assessed value of the property owner to pay for all improvements in that is, according to the respective number of front feet of property on the improved street. It may be on the basis of square feet, and, in some cases, requiring the property owner to pay for all improvements in front of his land.

Creating Assessment Districts

Under the usual practice, an assessment district is created by the municipality after notice by publication of the work or improvement proposed to be done or acquired, and the extent of the district to be assessed, and a hearing accorded persons in interest. Sometimes the property in the district, as under the Acquisition and Improvement Act of 1925, is zoned, so that each portion of the district may in advance determine the relative amount of the debt they will ultimately be called upon to pay.

Granting that the object of the tax is a matter which can properly be made the subject of a special assessment, then the constitutional provision of due process of law is ordinarily complied with if the parties to bear the burden have a right to be heard as to the assessment before the lien becomes final on their property.

It is no objection to the application of a special assessment law that the public also receives a benefit for the improvement, because every such improvement is for a public purpose. The test is, does there exist, as against the property in the vicinity of the improvement, a distinct and peculiar benefit and, if so, then the imposition of a special assessment is ordinarily justified.

Question of Procedure

There are many different kinds of improvements the proper subject of special assessment, and these powers are constantly being enlarged by the Legislature. In discussing this subject it becomes important, therefore,

to consider whether a procedure proper to be applied in providing a new road and assessing the cost of one kind of improvement would be properly applicable to another, or whether a tax, which in the nature of things would only be applied in a sparsely settled community, should be engrossed into a law intended to apply to every situation.

The things sought to be accomplished with relation to irrigation districts, reclamation districts and improvements of that nature differ in almost every respect from affairs concerning street work. Sometimes, indeed, it becomes necessary to provide for the continued maintenance of public improvements, and, of course, a different method of apportioning benefits is resorted to. Moreover, conditions are constantly changing, and special powers and restrictions, applicable to each particular situation must from time to time be added by legislative amendment. These Acts run into the hundreds and cover almost every conceivable public purpose wherein property in the neighborhood received a special and peculiar benefit from the undertaking.

Laws for Different Purposes

This still leaves unanswered the question as to whether a uniform procedure would be desirable with relation to the so-called "street improvement" laws. The law most commonly used is the "Improvement Act of 1911." This statute, like most of the others, contains powers having no relation to street improvement, such as wells and reservoirs for the supply and storage of water, the building of sewage disposal plants and the building of wharves.

It occasionally happens that a street is to be improved to such a grade that some property is damaged and other property is improved and it becomes necessary to determine and assess for damages as well as benefits, and for this purpose the authorities avail themselves of the provisions of Acts like the "Improvement Act of 1913." Again it may become necessary to acquire lands through the medium of a condemnation suit and at the same time install the work where resort is had to laws like the "Acquisition and Improvement Act of 1925." It might even be necessary to establish a permanent improvement district wherein powers are given with relation to the voting of general bonds pledging the credit of the district, coupled also with powers of special assessment. Combined with all this, the legislature will in one instance prescribe that the cost be levied on the basis of the assessed value of the property, and in another that it be determined on a theory as ascertained by the legislative body. Since therefore the necessities differ and the tax differs, the procedure must of course, differ.

Chartered Cities

The oldest municipal organization known to modern times was the chartered city. It was an outgrowth of the Feudal System. Formal charters of communities first appeared in about the Twelfth Century to the end that greater liberty and privileges might be insured for the people. The theory contended at the time was that local self-government is not a right granted by the central power, but a right inherent in the inhabitants of the community. They thus in Municipal affairs became independent of the Crown.

This doctrine in modified form has

long been the law of California with respect to chartered cities, and is contained in Section 6 of Article XI of the California Constitution.

The whole theory upon which our government is founded rests largely in the delegation of authority. Local self-government is the keynote of municipal organization. Local improvement procedure is but one branch of official duty incident to such government. Attempts to enforce uniform self-government in municipal affairs are not in harmony with the principles applying to chartered cities as long recognized by our organic law.

Some of the greatest writers upon municipal law have frequently declared that to attain the highest efficiency in administration a City should be a self-governing body, privileged to originate and administer such government functions as are expressive of the will of the people residing within the community. Why, then, should we attempt to lay down uniform procedure with relation to local improvement any more than we should attempt to prescribe the form of ordinances covering any other matter pertaining to the police power of a Municipality?

Nearly all of the large cities of this State are chartered cities, and to these cities special assessment powers are surrendered by virtue of their charters. Under the constitution these powers have been surrendered over any subsequent attempt at legislative amendment. In such cities, therefore, the legislature could not provide for a uniform procedure, even if it were meritorious.

Alternating Systems

It is true that there are a number of acts containing the same powers but under somewhat different methods of procedure, most frequently referred to as "alternate systems." One plan may be adopted for the needs of one community and be very unpopular in another part of the state where the people do not have the same problems to contend with. It is probably just as reasonable to presume that a state might well grant an alternate procedure in the exercise of similar powers as to expect that two states might enact divergent laws on the same subject matter designed to meet their individual requirements. At any rate, it seems to have stood the test of time, and practically every such law now enacted contains a provision that it is intended as a distinct and alternate plan and not to conflict with any other assessment law.

The tendency of legislation today is not to particularize procedure, but to pass only very broad general laws, and allow administrative bodies to work out details to suit their individual needs. The object, of course, of such a state law is to grant powers sufficiently elastic to fulfill the requirements of self-government, and yet sufficiently restricted to prevent their abuse by local legislative bodies. In principle, it does and ought to work something like this: The city authorities say to the property owners in any proposed improvement—"What sort of any assessment procedure will fulfill your particular wants?" The property owners confer with the financial institutions and ask—"What sort of security will supply your demand, and give to us the highest price?" The public of such community may then say to the Legislature—"Give us an assessment law that will accomplish these things for us." The Legislature

then considers it and, subject to constitutional provisions and such restrictions as they think are necessary to impose for the protection of the general public, enacts a law to fit the proper needs of the community. It may even be that only one section of the State will have any use for this law, but that is why we need new laws to fit the new situation and still continue to need the old law for other purposes.

Value of Tested Laws

The institution of the law, therefore, becomes a progressive science, and from time to time new powers are suggested, as well as the manner in which they should or ought to be exercised. If the laws already in force were amended or repealed to comprise these modifications, then they would not have the stability in the financial world that is so necessary to give the highest value to the bonds or security to be issued. In fact, the bond market might become practically stagnant until a final decision of the highest court were handed down covering all the material changes. This was true with relation to the Vrooman Act, The Improvement Act of 1911, The Improvement Act of 1913, the Road Improvement District Act, the Matton Act, and most of the other special assessment laws. Hence the legislature embraces radical modifications in new laws, rather than attempt to amend and perhaps injure the tried and true law already in force.

The Legislature in 1919 directed the legislative counsel to report a feasible and practical plan relating to the equitable distribution of the cost of local improvements. If that was intended to mean a uniform plan, then nothing noteworthy has been accomplished. In 1927 an attempt was made in the Legislature to provide a commission for the creation of uniform laws relating to assessment but it met with failure.

Uniform Procedure Inadvisable.

The author believes it to be the general consensus of opinion among at-

torneys, men of finance, and statesmen, who have carefully studied this question, that very little good would follow from attempts to consolidate such laws, and much harm might result. In short it is no more reasonable, and no more possible to successfully create a uniform method of assessment procedure, than it would be for a physician to prescribe a uniform treatment for tuberculosis or for the mining industry to suggest a uniform process for the reduction of metallic ores.

It is true that some reforms are needed, especially those which are calculated to give to the owner of property assessed ample notice in connection with the collection of taxes so that he will not be unnecessarily burdened with court costs, attorney's fees and penalties, and confronted with the possibility of losing valuable property on account of comparatively small assessment. Much good along this line could be accomplished if it were possible to have one central office in the county for the collection of all taxes and assessments. It would be a mistake to attempt to place too great restrictions upon the law of assessment because that would impede the progress of our community. People little realize how much Southern California in its development owes to the law of special assessments. Were it not for this, many of the beach resorts would still be but a waste of shifting sands. A sound municipal government using a wise discretion in the building of public improvements cannot be established by acts of the legislature. It rests more upon the wisdom of the people to elect competent and honest officials. The law makers should be warned against the inexperienced reformer who believes that he can by law establish a general panacea for all the ills of taxation through some uniform method of his own which probably does not agree with the reform method of any other reformer.

In other words, it may be another case of the successful operation of the physician, but the child died.

event of recovery against the property is held down to the reasonable value of the labor performed or materials furnished, and if the contract is for more than a reasonable value, then the lien will only protect the claim to the extent of the reasonable value.

As between the lien claimant and the contractor the lien claimant is entitled to the contract price regardless of the reasonable value but where the claimant wishes to subject property of innocent third parties to his claim of lien, he cannot impose upon the property a value greater than the reasonable value.

A contractor may recover upon a lien filed by the claimant only such amount as may be due him according to the terms of the contract after deducting all claims of other claimants for work done or materials furnished. The original contractor's claim is subject to the deductions due material men and sub-contractors.

Mechanics' liens are favored in law because the claimants have at least in part created the property on which the lien attaches. The California Civil Code of Procedure 1186 provides that such liens shall be prior to any hy liens, mortgages or other incumbrances which may have attached subsequent to the time in which the work, building or structure was commenced, work done, or materials were commenced to be furnished; also liens, mortgages or other incumbrances which the lien holder had no notice and which was not recorded at the time the building or work was commenced or materials were commenced to be furnished.

In other words the lien is prior to any mortgage, trust deed or other incumbrances which was not filed for record at the time the building or structure was commenced or any lien, mortgage, or incumbrance of which the claimant had no notice and which was unrecorded at the time the building or structure was commenced. Parties furnishing labor and/or materials may rely upon the records as kept in the County Recorder's Office showing the liens and incumbrances on the property. Any lien, mortgage or trust deed filed for record before the building is commenced is superior to any lien for labor and/or materials.

Lien claimants, however, may find that their claims of lien are subsequent to an unrecorded mortgage, trust deed or lien. It is not sufficient that lien claimants rely upon the liens, mortgages or trust deeds filed for record, but it is also necessary that the claimant have no knowledge of any unrecorded lien, trust deed or mortgage and if the claimant has knowledge of such an unrecorded instrument, the lien will be subsequent to the unrecorded instrument.

Purchasers take the property subject to liens which have attached thereto and persons dealing with the property during the progress of the work are charged with notice of the claims of mechanics' and material men who may file liens.

There is no priority between liens for labor and materials furnished. A lien for labor is not superior to a lien for materials. In its present form the law does not expressly prescribe the rank of the liens of various classes of claimants, but it would seem that the liens of contractors and sub-contractors are postponed to those of laborers or material men since any contractor is entitled to recover only such amount as may be due him after deducting the claims of other parties for work and materials furnished.

EFFECT OF FILING MECHANICS' LIENS DESCRIBED BY ATTORNEY

(By Harry C. Westover, Attorney-at-Law)

This is the tenth of a series of articles on the California Mechanics' Lien Law as prepared by Mr. Westover, attorney of Santa Ana, California.

One who furnishes labor and/or materials on a structure does not have a claim on the property until a lien has been filed. The Courts of California have held that until the lien is filed the right to file a lien is a mere inchoate right, and that the claimant may or may not perfect the lien as he sees fit.

In order to establish a valid lien certain steps must be taken by the lien claimant. First, these must be the furnishing of labor and/or materials which labor and/or materials must be used or consumed in the building or structure. Second, The claim must be filed with the County Recorder within the proper time in order to protect the claim for labor and/or materials furnished.

The lien is one of the very few instruments filed for record which is retroactive. As a general rule instruments filed of record encumber the property only from the date of filing. The right under the lien does not commence upon the day of filing, provided the lien is filed within the statutory period. The rights obtained

from the filing of the lien reverts back to the beginning of the building or structure, and intervening rights can not effect lien rights even though innocent third parties have obtained rights in the property prior to the filing of the claim of lien. The right under a lien may revert back six months or a year before the actual filing of the lien. In other words if a building is commenced on January 2nd, and is not completed until July 1st and a notice of completion is filed, liens filed in July will be reverted back to the commencement of the structure, that is January 2nd, and if innocent third parties have obtained any interest in the property between the time the building was commenced and completed such interests are subsequent to any lien filed with the statutory time.

The lien is as extensive as the claim which it is intended to protect and covers interest where the claimant is entitled to it. One may have a lien only for the amount due when suit is begun which may not in any case exceed the reasonable value of the labor done or materials furnished. Although liens may be based on the contract price as agreed to between the lien claimant and the contractor, nevertheless, the lien claimant in the

THE OBSERVER

What He Hears and Sees on His Rounds

The 1929-1930 State Licenses of all contractors and sub-contractors who come within the provisions of the Contractors' License Law, which has been operative in California since last August, expire on June 30. All such licensed contractors are required to apply for their 1930-1931 licenses not later than that date, James F. Collins, State Registrar of Contractors, announces.

Approximately 21,000 licenses have been issued by the Registrar since the inception of the law, and the Department of Professional and Vocational Standards, of which the section of contractors' registration is a part, now faces the task of renewing that many licenses and as many more as become registered during the remaining days of the present fiscal year, Collins says.

"It is obvious that, if every man in the construction industry who is now licensed and registered as a contractor, waits until the final day, June 30, to send in his application for the 1930-31 renewal of his license, the resulting congestion at the Sacramento offices would present a serious problem," Registrar Collins says. "We are urging every licensed contractor and sub-contractor to fill out his renewal application blank, sign it and send it to the Sacramento office, along with the \$5 annual fee as soon as possible. New licenses will be issued in the order in which these applications are received."

As original licenses were issued during the past year, there was furnished each licensee a renewal application blank. It is required only that these blanks be filled out and signed and sent to the Registrar of Contractors, Sacramento, California. Unlike the original application blank, the renewal blank does not require the services of a notary public, the Registrar pointed out. In the event that contractors have lost or mislaid their renewal blanks, new blanks may be obtained by writing to the Registrar at Sacramento, or by applying at the offices of the Building Exchanges department's inspector in the various districts of the State, he explained.

A. P. Giannini believes "good times" are ahead. Not in the dim nor distant future, but this year.

The California financier so expressed himself on the eve of his departure tonight for New York, to sail for Europe either June 11 or on the 18th. "Conditions are sound," he said. "I look for a slow but sure recovery in business during the next few months, with industry getting back to a very satisfactory level in the fall."

He would not forecast the course of the stock market.

"I don't know about stocks," evaded the creator of Transamerica corporation, the world's greatest bank holding corporation, and holder of securities worth many hundreds of millions. He explained.

"I am not a stock market man. Nobody can tell what the stock market will do. About business—yes. I speak only of business," adding that it was only of California business on which he was posted by first-hand information.

The builder of two great California

banking chains, the Bank of Italy and the Bank of America of California—the largest of their kind in the country—analyzed trade conditions in his home state from the multitude of sources furnished by his financial houses.

"Prices are good," he said. "Our citrus and other fruits have been bringing satisfactory returns.

"Asparagus and other vegetables have brought good prices.

"As to raisins, the outlook depends on whether the raisin pool plan goes through.

Giannini's eagerness to discuss the trade in fruits and vegetables showed he has retained his interest in the business in which he made his first success.

He went on to discuss the oil industry. Prospects are, he believed, hopeful that good prices will be maintained and profits will compare favorably with previous years.

His predictions for factories and stores was one of increasing activity until late in the year. By that time industry and commerce should be nearly back to normal.

Looking into the future for California's trade development, he said:

"Much depends upon the trend of foreign trade in general. If the buying power of Europe, South America, and Asia is gradually built up, trade should revive, and I expect California's part in that commerce to be increasingly enlarged.

"Our fruits should find larger foreign markets. Fresh, dried, canned and preserved products of this state's farms and orchards may be expected to find consumers in enormous numbers abroad. As our products become better known in other countries, and as our methods of handling fruits for foreign shipment are perfected, we should be able to increase the state's income tremendously through heavier exports."

Giannini will be gone a year. He plans to visit the principal nations of the old world, and to make a broad study of world economic conditions.

In 1929, according to R. G. Dunn & Co., 594 builders went broke!

Edward D. Stout, manager of the Credit Association of New York Building Trades, gives some of the major causes for their failures.

He says: "Among the elements to cause failure can be enumerated: Incompetence, inexperience, over-reaching a man's ability, lack of cooperation among the different branches of the industry and dishonesty." He continues, "Incompetency is a cause of failure involving not only contractors but sub-contractors and others all down the line. Severity of competition is a frequent cause of failure for the reason that it leads men to sell material and labor at a price that does not give them a sufficient profit and does not warrant the taking of any chances. Irresponsible operators without sufficient resources behind them take advantage of the severe competition, secure the work done at ruinous prices for the sub-contractor and if the building operation is not successful, suffering and failure follow all down the line. Looseness of credit granting encourages reckless building operation and resulting failures that often follow."

the Los Angeles City Council recently adopted an ordinance requiring that all contractors on public work employ only citizens and resident voters, and providing penalties for violation thereof.

Fred B. Ortman, vice-president and general manager of Gladding, McBean & Co., reports the orders booked by that company for face brick, terra cotta and tile during the first three weeks of May showed a gain of 90 per cent over those for the corresponding period in April, which he considers as reflecting a definite upward trend in building.

In present expansion activities of American corporations, Julius H. Barnes sees a preparation for enlarged earning power in the future and confidence that such will be the result. As chairman of the national business survey conference, organized at the suggestion of President Hoover, Barnes issued a statement for publication, saying that new capital obtained by domestic producing and distributing corporations totaled \$2,100,000,000 during the first four months of 1930. In addition, he reported borrowings by public authorities to a total of \$460,000,000 as compared with \$339,000,000 for the corresponding period of 1929.

Public building for the same period, the report said, increased from \$447,000,000 last year to \$550,000,000 this year.

Residential building dropped from \$995,000,000 to \$923,000,000 and residential building fell off from \$867,000,000 to \$460,000,000.

The report noted an improvement in the financial condition of building and loan associations and a 6 per cent increase in life insurance purchases in April, as compared with April of 1929. At the same time a 9 per cent drop in fire insurance premiums for the same month of this year as compared with last was reported.

Barnes said class one railroads expended \$97,000,000 more in the first quarter of this year than in the same period of 1929, and that on March 1 the employees of these carriers aggregated 1,547,000, which although \$1,000 less than a year ago, was 43,000 more than a month before that time.

CONTRACTOR SEEKS \$3,381 FROM STATE

Bert B. Meek, state director of public works; Ray L. Riley, state controller; the state department of public works, the G. D. Contules Construction Company and others are made defendants in a suit filed in superior court at Sacramento by Tom Burani, and the firm of Burani Brothers Damages totaling \$3,381.74 are asked. Burani complained that his firm a subcontractor, had done work for the Contules firm in the grading of state highway in Placer and Nevada counties. The suit is an attempt to collect payment for the work.

NEW WATER SUPPLY IS PLAN FOR PITTSBURGH

Proposing to bring Yolo county water to Pittsburgh and surrounding territory in Contra Costa County, Do McKinney of Sacramento is conferring with C. W. Scheller, president of the Contra Costa-Solano Counties Industrial Water Users' Association.

McKinney would pipe water for industrial purposes from the Capay valley, 50 miles due north of Pittsburgh. He has stated that his project would deliver water at a cost of less than 1 cent per 100 gallons. Present prices range around 24 cents for the large industrial consumers.

The project would involve an expenditure of several million dollars McKinney said.

ALONG THE LINE

Menlo Park city trustees have accepted the resignation of George A. Kneese, city engineer.

Paul V. Tuttle, architect, announces the removal of his offices from 337 17th St., Oakland, to studio quarters at the rear of his residence, 117 Pearl St., Alameda.

P. A. Quigley, formerly of Lovelock, Nevada, recent purchaser of the Red River Lumber Yards at Susanville, Calif., died suddenly in that city May 31.

Robert W. Leep, for some years a member of the engineering staff of the Eastern Oregon Light & Power Co., Baker, has resigned to accept the position of county engineer of Baker County, Oregon.

W. W. Hayes and Harry J. Oser, general contractors, operating under the firm name of Hayes-Oser Co., with headquarters in the Call Building, San Francisco, announce dissolution of partnership.

Geo. A. Schastey, Monadnock Bldg., and Jas. F. McGuinness, 488 Pine St., San Francisco, have been granted provisional certificates to practice architecture by the California State Board of Architectural Examiners, Northern District, it is announced by Albert J. Evers, secretary of the state board.

Julius B. Manthey, incumbent, county surveyor of San Joaquin County, will be a candidate for election to that office at the coming election. Manthey was appointed to the office by the San Joaquin County Supervisors on August 12, 1929, following the death of Fred E. Smith. No opposition to the incumbent has developed up to the present time.

Vincent K. Cates, manager of the Oakland office of the Summerbell Truss Co. and Trussless Roof Co., well known through his years of sales and engineering work in California, was married last week to Miss Margaret Cassidy of Los Angeles. Mr. and Mrs. Cates are now on a wedding trip through the East and will return to California late this month. Mr. and Mrs. Cates will reside in Oakland.

S. F. WILL VOTE ON BOND PROPOSALS IN AUGUST

Four bond issues totaling \$68,115,000, sufficient to purchase the Pacific Gas & Electric Company and Great Western Power Company systems, and place the city in the power business, will be voted on by San Francisco taxpayers at the August primary.

The board of supervisors voted 15 to 3 to refer the bond proposal to the citizens, upon recommendation of the finance committee.

The four bond issues are allotted as follows:

To acquire the local distributing system of the Pacific Gas & Electric Company, \$44,600,000.

To purchase the Great Western Power Company holdings, \$18,945,000.

To build a transmission line and "stepdown" transformers from Newark to San Francisco, \$3,525,000.

To build a power plant at Red Mountain Bar, \$1,045,000.

TRADE NOTES

Bakersfield Lumber Co. of Bakersfield, capitalized for \$150,000, has been incorporated. Incorporators are J. N. Harvey, Mary Harvey, S. T. Scofield, Vandalia Scofield and L. L. Davies.

Stormpruf Ventilator Co., manufacturers of steel and glass exterior window ventilators, recently established headquarters in San Francisco at 221 Natoma Street. Gilbert Gordon is in charge of the new concern.

Dissolution of the firm of Mattock & Feasy, general contractors, is announced. A. F. and C. W. Mattock, however, will continue in the general contracting business with headquarters at 212 Clara St., San Francisco.

Johns-Manville Corp., New York City, has purchased the assets and patents of the Stevens Sound Proofing Co., Chicago, manufacturer of products for sound insulation and for the deadening of vibration under machinery.

Aerated Block Cement Co. of San Francisco, capitalized for \$500,000, has been incorporated. Directors are: A. Tomel, A. Bianchi, P. Lippi, G. Facigalupo, P. Gargiulo, A. Barci, F. Santina, F. Nicolai, L. Bertucci, R. Francesconi and R. P. Giovannetti.

Motroni Mill and Lumber Co., Ltd., of Woodland, capitalized for \$200,000, has filed articles of incorporation with Frank C. Jordan, secretary of state. J. G. Motroni of Woodland, a general contractor, is president of the company. A permanent board of directors has not yet been named, only "dummy" directors being named in the articles filed.

Phoenix Manufacturing Co., Joliet, Ill., has purchased and taken over from the Graver Corp., its steel tank, water-treating and steel plate construction business, including the plant at East Chicago, Ind. This plant and business will be operated by a subsidiary company to be known as Graver Tank & Mfg. Corp., of which P. S. W. F. and H. S. Graver will be vice-presidents and Edward S. Goselin, president.

Phillip Carey Manufacturing Co., Lockland, Ohio, has recently become associated with the Aluminum Company of America in the production of a new high-temperature heat-insulating material to be manufactured under the trade name of Carey Aluminate. For this purpose the Carey Company is planning the erection of a \$500,000 manufacturing plant at East St. Louis, Ill., immediately adjacent to the present plant of the Aluminum company, from which it will receive processed material for the manufacture of insulating blocks, bricks and powder.

ATLAS MILL MANUFACTURING BUILT-IN FIXTURES

Atlas Mill and Lumber Company of Oakland is now manufacturing a complete line of kitchen built-in fixtures including ice boxes, cabinets and buffets and maintaining a large stock for prompt delivery to home owners and builders. It is announced by N. J. Lindale, who, associated with A. G. Air, operates the company at 3109 East 14th Street.

HERE — THERE — EVERYWHERE

After a career of 62 years of successful business in San Jose the firm of George B. McKee & Co., specializing in paints and wall paper, is retiring from business.

J. W. Turner & Sons, specializing in heating, plumbing and sheet metal work, have been admitted to membership in the Builders' Exchange of Santa Clara County, it is announced by W. L. Howe, secretary of the organization. Another new member of the exchange is the San Jose Heating and Ventilating Company.

National Lumber Manufacturers Association, Washington, D. C., received first honorable mention in the American Trade Association Executives award for constructive activities by trade associations of benefit to the public, the individual industry and industry as a whole. First prize was awarded to the National Automobile Chamber of Commerce.

Bids will be considered by the San Mateo County Supervisors on June 16 to construct the North Fair Oaks Sewer project, involving an expenditure of \$219,000. The work is provided for under the County Improvement Bond Act of 1921 and the Bond Act of 1915. Plans for the work are obtainable from the office of George A. Kneese, County Surveyor, at Redwood City.

A feature of the exhibit of the members of the Santa Barbara Chapter of the American Institute of Architects in the Architects Bldg., Los Angeles, July 7 to 13, will be a showing of the drawings, models and plans of homes designed by the late George Washington Smith, Santa Barbara architect who died recently. The works of other Santa Barbara architects will also be shown.

Arthur F. Larabee of Los Angeles, in a communication to the Oakland city council, warns that body against the proposed purchase of certain road machinery for the street department which is manufactured by Haines Manufacturing Company and which, it is said, is in violation of patent rights of the Standard Road Maintenance Company, clients of Larabee. The council is informed that the use of the machines mentioned is an infringement of patent rights and will be legally fought.

STATE LICENSE SUSPENDED

Refusal to take out a permit for the erection of a house and his conviction on the charge of violating a city ordinance of Oceanside requiring builders in that municipality to be licensed, resulted in the suspension for 30 days of the state contractor's license of E. L. Forney of Oceanside. It was contended by Forney that if he took out a state license it was not necessary to apply for a city license. He has taken an appeal to the superior court of San Diego county. The state license of a San Diego electrical firm was suspended for 30 days on charges that they had failed to solder and tape joints inside electrical conduits as required by city ordinance.

CENSUS OF CONSTRUCTION INDUSTRY NOW UNDER WAY

Designed to aid President Hoover's campaign to relieve unemployment throughout the United States and gather data on other problems of the building industries, a Census of the Construction Industry is being started by John W. Curry, Chief Special Supervisor in charge of the northern and central California district. Detailed information on the new census work was supplied to Curry by Chief D Field Supervisor E. K. Ellsworth, who spent yesterday in the local office in the Civic Auditorium before departing for Los Angeles last night.

The new building census, the first of its kind ever taken by the Census Bureau, will include information from all contractors doing a gross amount of business of \$25,000 and over during 1929. The term "contractors," Census Bureau directions point out, includes general contractors, sub-contractors, jobbing contractors, and all other persons or firms doing construction work, excepting railroads and public utility companies.

Not only will building construction work by contract be included, but in addition those building to sell must report, as well as highway, bridge, harbor and other builders.

"This canvass was recommended by the Advisory Committee on Distribution, which is composed of nationally known business men appointed by the Secretary of Commerce," states Curry. "As a result of the urgent request of national contractors associations and others prominent in the construction industry."

"The information when analyzed and made available should prove of much value in promoting the interests of the industry, resulting in a decrease of unemployment. Like the other forms of

census, all information supplied will be treated in strict confidence. All reports made will be grouped in such a manner that no information on any single firm can be ascertained," Curry continued.

Information to be secured in the Census of the Construction Industry includes the following: Description of establishment by ownership; if concern is a member of a contractors association; number of salaried employees; skilled and unskilled workmen; total wages paid out during 1929; amount expended for purchase or rental of equipment during past year; type of contract work performed; type and value of sub-contract work performed; number of structures erected, type and value; if work was performed as public work, private construction or quasi public organizations; total value of construction work done by the reporting firm during 1929; and the classes and value of materials used by the firm.

Although the personal canvass in the construction census is just being started, questionnaires were mailed from the Bureau of Census at Washington, D. C., some time ago. A record of all those who have returned their reports has been supplied to the local census office and those firms and persons will not be called upon. In some instances firms which have already made other reports will be asked to also supply reports segregating their construction work from other types of business.

Field enumerators will take the census in the Bay Region cities and the larger cities of central and northern California where mail replies have not yet been received.

chairman, Stockton, Calif.; L. H. Anderson, subchairman, Palo Alto, Calif.; Oscar Knecht, subchairman, San Diego, Calif.; C. D. Wallis, Jr., Long Beach, Calif.; James Barf, Victoria, B. C.; F. H. McMahon, Pomona, Calif.; E. S. Lueth, Yakima, Wash.; K. Sawyer, Yuma, Ariz.; P. W. Knights, El Centro, Calif.; W. S. Robbins, Manhattan Beach, Calif.; M. C. Woodruff, San Jose, Calif.

Committee No. 5, Subjects: General Regulation (including Plastering), (Chapters 32, 34, 35, 47). Grover L. Walters, chairman, Fullerton, Calif.; C. B. Pickett, subchairman, Coronado, Calif.; H. C. Vandewater, subchairman, Glendale, Calif.; A. R. Mills, Bell, Calif.; C. L. Baker, Modesto, Calif.; R. H. Hubbard, Bakersfield, Calif.; Carl V. F. Taylor, Claremont, Calif.; L. P. Keller, El Monte, Calif.; E. L. Lium, Grand Forks, N. D.; J. C. Nowell, Hillsborough, Calif.; G. J. Leftwich, Inglewood, Calif.; M. L. Hutchinson, Monrovia, Calif.

Committee No. 6, Subjects: Special Ordinances (including Refrigeration and Film Storage). A. J. Hurley, chairman, Richmond, Calif.; S. P. Koch, subchairman, Berkeley, Calif.; G. MacDuff, subchairman, Tacoma, Wash.; J. H. Park, Compton, Calif.; Ralph Nuboe, Anaheim, Calif.; J. C. Largent, Albuquerque, N. M.; E. H. Rogers, Alameda, Calif.; Henry Hansen, San Bernardino, Calif.; Don F. Runkle, San Fernando, Calif.; W. H. Richardson, Kelso, Wash.; L. E. Wright, Livermore, Calif.; O. C. Owens, Madera, Calif.; C. B. Ireland, National City, Calif.

Proposed changes for the Uniform Code to be discussed at the ninth annual meeting in Long Beach, Sept. 29 to Oct. 4, must be in conference headquarters before Aug. 1. These should be submitted in form suitable for inclusion in the code.

BUILDING OFFICIALS NAME COMMITTEES ON CODE CHANGES

The active membership personnel of six code changes committees which will function at the 9th annual meeting of the Pacific Coast Building Officials' Conference in Long Beach, Calif., Sept. 29 to Oct. 4, has just been announced by H. E. Plummer of Portland, president of the conference.

To these committees are assigned definite subjects and chapters of the Uniform Building Code with which they are to work. Assignments are made at this early date so that members may thoroughly familiarize themselves with the portions of the code to which they are assigned.

Each committee has two subchairmen in addition to the chairman, the plan being that if a committee assignment is heavy it will be possible to subdivide the committee, with the subchairmen acting as chairmen of the smaller groups.

It will be necessary for all suggested changes and additions for the Uniform Building Code to pass first through conference headquarters where they then refer them to the proper committee. The various building material groups are urged by President Plummer to co-operate fully in this regard so that misunderstandings may be avoided.

The active membership personnel of the six code changes committees is as follows:

Committee No. 1, Subjects: Definitions, Administration, Legality (Chapters 1, 2, 3, 4, 44, 45, 46). A. J. Bird, chairman, Vancouver, B. C.; O. Barnwell, subchairman, Beverly Hills, Calif.; J. R. Shields, subchairman, Sacramento, Calif.; John E. Leonard, San

Francisco, Calif.; F. H. Spangenberg, Boise, Idaho; C. Drathman, Redwood City, Calif.; Victor Becker, San Rafael, Calif.; C. M. Hoyt, South Pasadena, Calif.; C. R. Beatty, South San Francisco, Calif.; R. W. Rundlett, Eugene, Ore.; R. H. Barrett, Piedmont, Calif.; A. H. Ginsbach, Huntington Park, Calif.

Committee No. 2, Subjects: Occupancy (Exits, Theaters), Chapters 5 to 15, inc., and 33, 39, 40, 41. Robert Greig, chairman, San Francisco, Calif.; Arthur Veit, subchairman, Alhambra, Calif.; Geo. T. Grove, subchairman, Tucson, Ariz.; Theo. C. Combs, Upland, Calif.; M. E. Armstrong, Redlands, Calif.; J. T. Peasgood, Santa Monica, Calif.; Jos. W. Foster, Tujunga, Calif.; T. D. Kilkenny, Vallejo, Calif.; J. H. Woods, South Gate, Calif.; W. D. Finney, Salt Lake City, Utah; Harry Billings, Ontario, Calif.; E. Curtis Neal, Fresno, Calif.

Committee No. 3, Subjects: Types of Construction and Engineering Regulations (Chapters 17 to 21 inc. and 36). Walter Putnam, chairman, Pasadena, Calif.; G. S. Moore, subchairman, Austin, Texas; Geo. K. Fitch, subchairman, El Paso, Texas; C. A. Hutchinson, Colton, Calif.; C. E. Rogers, Prescott, Ariz.; H. A. Johnson, Ventura, Calif.; L. H. Gadsby, Visalia, Calif.; H. C. Weisenburger, Van Nuys, Calif.; Chas. H. Williams, Olympia, Wash.; Fred W. Sharkey, Wenatchee, Wash.; E. J. Austin, Hoquiam, Wash.; R. E. Nelkirk, San Leandro, Calif.

Committee No. 4, Subjects: Fire Resistance and Fire Hazards (Chapters 16, 37, 38, 42, 43). W. A. Curtis,

TRADE LITERATURE

Class "K" digging clamshell buckets and electric motor buckets are described in two recent bulletins of the Hayward Co., New York City. The electric motor bucket is a hook-up type opened and closed by an electric motor mounted within the bucket.

The Ball wagon grader, which combines the operations of digging, loading, transporting, dumping and spreading in one piece of equipment, is described in detail in a 16-page bulletin compiled by the Blaw-Knox Co., Pittsburgh, Pa.

Four sections of steel cross ties ranging in weight from 9.4 to 25 lb. per foot, manufactured by the Carnegie Steel Co., Pittsburgh, Pa., are described in a 38-page illustrated bulletin "Railway Steel Cross-ties," which also treats of track accessories and gives suggestions for concrete track construction.

PAGE MR. RIPLEY

When Lameuse Street in Biloxi was paved in 1896 the $2\frac{1}{2}'' \times 4\frac{1}{2}''$ brick were laid to a 4" depth. When it was relaid 28 years later when they were turned so that the thickness was $2\frac{1}{2}''$. Hence the increased surface area, the more than 100% salvage, and the new block of paving from the surplus brick! Credit was allowed private owners for the value of the new brick used on the additional block.

TWELVE STORY BUILDING FOR SACRAMENTO OUT FOR FIGURES

Bids are being received by Coffman, Sahlberg & Stafford, Sacramento architects, for the erection of a twelve-story Class A store and office building to be erected at the northeast corner of Eighth and J streets in the capital city. The structure will involve an expenditure of \$500,000 and will be financed by San Francisco interests whose names are not disclosed. Announcement of the project is made by the Robertson-Govan Company, Sacramento realtors.

The entrance is to be on Eighth street and will be trimmed with black granite leading into a pretentious lobby with a sixteen-foot high ceiling. The floor will be of marble and the walls of black and gold marble. There will be eleven floors of office space available with 2400 square feet of rentable area to the floor. Provision has been made for three stores on the ground floor. The building will be served with

Class "A" office building to be erected at Eighth and J Streets, Sacramento, for San Francisco Capitalists. Coffman, Sahlberg & Stafford of Sacramento, architects

The building will be one block from the new federal office and post office structure on I street and will occupy a site measuring forty feet on J street and 100 feet on Eighth street. It will be of Class A construction and of the modern style of architecture. It will have a structural steel frame and an exterior faced with pressed brick and terra cotta. Windows will have steel sash and there will be pressed metal spandrels between the windows.

two modern high-speed elevators with a speed of 600 feet per minute. They will be self-leveling at each floor and of the type giving no sensation of rise or fall. Thomas G. Mapel represented the Robertson-Govan Company in the transaction involving the sale of the site. This realty firm has been designated leasing agent for the structure and also the building manager. Edward S. Clarke, San Francisco promoter, represented the bay city interests.

N. Y. BUILDING COLLAPSE NOT "STEEL FRAME" JOB

In view of the numerous inaccurate reports which have appeared in the daily press regarding the collapse of the building under erection for the Gottfried Bakery in New York, the American Institute of Steel Construction has issued warnings to all editors to be careful not to describe this as a steel framed construction job. A true account of the accident is recorded in the bulletin issued by the engineering department of the Institute and is published herewith.

On the afternoon of May 22 last the framework of the above building, then under construction, collapsed, killing two men, and injuring nine others.

Newspapers in general referred to this accident as a failure of a "steel frame."

This was a reinforced concrete building, incorporating structural steel as reinforcement of the columns. At the time of the collapse all column reinforcements, which were one piece and four stories in height, were erected and in most cases tied together by extremely slender steel struts in which the 1/4" was in some instances over 500". These struts were used for the purpose of helping to hold the column reinforcement in position after same was plumbed. In dismantling the guy derrick the derrick boom fell against several of these slender struts with the result that same were badly buckled, pulling the adjacent columns together, and thus causing a general collapse.

By no stretch of the imagination can this type of building be called "a steel-frame structure," and the blame should rest upon a type of design which does not properly take care of erection hazards, and not upon structural steel. Had this been a steel frame structure, properly designed, little harm could have been caused through the dropping of a derrick boom against a girder tying two columns together. Until the concrete is placed in the columns and floor panels, this type of construction requires ample bracing to provide the necessary rigidity for safe erection.

COURT RULES ON FICTITIOUS NAME LAW

An individual doing business under his own name and initials, followed by the word "company," is not required to comply with the provisions of the so-called fictitious name statute, since the name is not fictitious, the supreme court of California recently ruled.

The statute, the opinion explains, provides that "every person transacting business in this state under fictitious name and every partnership transacting business in this state under a fictitious name or a designation not showing the names of the persons interested as partners in such business must file with the clerk of the county a certificate stating the name and place of residence of the person or persons interested in the business."

YUBA AND SUTTER COUNTIES ADOPT 5-DAY WEEK

Building trade crafts in Yuba and Sutter counties commenced operations on the 5-day week schedule last Monday. The plan has been adopted through an agreement with general and sub-contractors and the Yuba-Sutter Building Trades Council.

PARAFFINE COMPANIES, INC., GETS NEW CLAY BEDS

Paraffine Companies, Inc., has purchased 40 acres of land at Lompoc, Calif., containing deposits of diatomaceous earth, commercially known as Celite.

R. S. Shainwald, president of Paraffine, announces that no plans have been formulated yet as to the development of the property or the establishment of a plant. Engineers' reports show that the land contains the finest deposits of the insulating clay that have yet been discovered, Shainwald said.

The Paraffine properties are in the

AFFIDAVIT OF NON-COLLUSION ON OAKLAND PAVING BIDS

An "affidavit of non-collusion" will be required of all contractors who bid for Oakland street paving jobs in the future, according to a resolution adopted by the city council at the request of Commissioner Charles I. Anderson and City Engineer Walter Frickstad.

Anderson said that the affidavit is intended as an additional safeguard to insure honest paving jobs by honest contractors in the future.

According to Anderson's plan, each contractor bidding on a municipal paving job must accompany his bid with an affidavit which says: "that such bid is genuine and not sham or collusive, or made in the interest of any person not herein named."

The affidavit, says Anderson, is intended to act as a clamp upon all camouflaged contracting companies, or all contractors who are acting for hidden backers.

"The affidavit," said Anderson, "is intended as one more safeguard to insure better and more open conditions in Oakland paving jobs in the future."

READY-MIXED CONCRETE INTERESTS PLAN ASS'N.

Steps leading to the formation of a National Ready Mixed Concrete Association were taken at a meeting held in Chicago, Ill., on May 16, which was attended by fifteen of the more important operators in this field, as well as by representatives of several manufacturing concerns. Those present decided that a national association is greatly needed to promote the interests of the ready-mixed concrete industry. To further the formation of such an association, an executive committee of five was appointed to canvass all producers and the entire industry in the United States and Canada. Another general meeting, at which it is expected that the actual organization of the association will take place, is to be held within thirty days.

Members of the executive committee are: Chairman, J. E. Burke, Ready Mixed Concrete Co., Pittsburgh, Pa.; Alexander Foster, Jr., Charles E. Warner Co., Philadelphia, Pa.; Arthur Avril, Avril Tru-Batch Co., Cincinnati, O.; C. M. Cornell, Boston Ready Mixed Concrete Corp., Boston, Mass.; and Arthur A. Levison, Blaw-Knox Co., Pittsburgh, Pa.

SUPPORTING STRENGTH OF CONCRETE-INCASED PIPE

The supporting strength of concrete-incased clay pipe as determined by the Iowa Engineering Experiment Station, Iowa State College, Ames, Iowa, in co-operation with the Clay Products Association, Chicago, Ill., is reported in bulletin 93 of the experiment station.

It was found that the safe support-

ing strength of concrete-incased clay pipe is only slightly greater than the sum of the individual supporting strength of the clay pipe and of the concrete incasement. The supporting strength of the incased pipe was found to be higher at lower temperatures. The action of an incased pipe is very nearly that of two independent but concentric rings, results indicated.

Tests indicated that the strength of a concrete specimen is influenced to a marked degree by the temperature at which it is tested. Specimens tested at 1 deg. F. were found to have about double the ultimate strength of specimens made and cured under the same conditions but tested at 70 deg. F.

THIRTY STORY HOTEL FOR CHICAGO UNIVERSITY CAMPUS

A \$5,000,000 hospital, thirty stories tall, with kitchenette apartments for wealthy convalescents, will be built on Northwestern University's downtown Chicago campus.

Culminating eight years' of effort, trustees of the Wesley Memorial Hospital have decided to reaffiliate their institutions with the university and to erect "the finest 600-bed general hospital that can be built."

The hospital will adjoin and be operated in connection with the university's medical school. Both are Methodist institutions.

UNEMPLOYMENT SHOWS LITTLE IMPROVEMENT SAYS GREEN

The coming of warm spring weather, which usually brings a revival in the building trades and in out-of-doors work generally, has failed thus far to ease the unemployment situation according to figures made public by President William Green of the American Federation of Labor.

Green, in a statement issued last Tuesday, said one out of every five union laborers still lack steady work. Unemployment in union circles, he said, stood at 20 per cent in May as compared with 21 per cent in April.

Some casual laborers have found work farming and building roads, Green explained, and the breadlines no longer are necessary, but there has been "very little improvement" in the unemployment situation generally.

ARCHITECTS' FEE IS CUT BY APPELLATE COURT

The State District Court of Appeals (San Francisco) modified to \$26,500 the judgment awarded in superior court to the firm of Russell & Alpaugh, Long Beach Architects, against Charles H. and Fred C. Stillwell.

The suit arose over a disputed interpretation of the contract under which Russell & Alpaugh agreed to supervise construction of a large apartment building erected by the Stillwell brothers.

The builders had appealed from an original judgment awarding the architects fees in the amount of \$43,950.

TIME IS RIPE FOR BUILDING SAYS BRICK ASSOCIATION

"Now is a good time to build good buildings," says the monthly digest of the Common Brick Manufacturers' Association of America.

"Prices of masonry materials are lower than at any time since 1920. Building trades are not overworked and men keen for jobs, give their best production."

"The pick-up represented by in-

creased numbers of building permits and new contracts let is perhaps only seasonable, but it is an improvement over recent months. There are reasons for the general belief that the lowest point in construction has been passed and that by September a condition approaching normal will prevail.

"The brick manufacturer, while contending with all the competitive difficulties resulting from low volume, may congratulate himself upon the fact that a larger proportion of the construction dollar is being spent for his material than at any time within the past ten years. The application of engineering to the promotion of brick is regaining some old markets and creating new markets."

"The current reports from 152 manufacturing companies show a healthy increase in quantities of material moved from the yards and a corresponding improvement in orders on the books."

"The number of plants idle is still large, being fifty per cent of those reporting. The number is less than a month ago. Stocks on hand have been decreased. The price range shows the effect of over supply. In some districts the ruling price is actually below cost of production."

FIVE-DAY WEEK AT MERCED

A five-day week as a means of combating unemployment has been adopted by the Merced Carpenters' Union. The measure was passed by a large majority at a recent meeting of the Merced building trades workers, according to Claude Sellard, president of the Merced local.

BERKELEY CALLS \$2,690,000 BOND ISSUE

Berkeley Board of Education has set August 26 as the date to vote on the question of issuing and selling bonds of \$2,690,000 to finance the erection of new schools and additions to standing structures. Of the \$2,690,000, the Board plans to expend \$1,495,000 for elementary school improvements and \$1,195,000 for senior and junior high school development.

PARAFFINE COMPANIES, INC., SUED FOR DEATHS

Two suits for a total of \$81,000 damages for two deaths have been brought in the superior court at Madera against the Paraffine Companies, Inc. Mrs. Victoria M. Beffa sues \$56,000 for the death of her husband, Emile C. Beffa, and Daniel A. Beffa \$25,000 for that of his father, C. P. Beffa.

They charge that the deaths of the two men, Emile, the father, and C. P., the son, were due to asphyxiation by fumes from a paint manufactured by the company.

The men were engaged in painting the inside of a tank on the Mor-decai Ranch near Madera when they succumbed.

MILLS CURTAIL PRODUCTION

Colonel W. B. Greeley, secretary and manager of the West Coast Lumbermen's Association, in an official statement released by the association, declared that many lumber mills in the Douglas fir region of the Pacific Northwest had found it necessary to curtail production for an extended period.

Several mills that normally operate two shifts, the statement said, are planning to operate on a one-shift basis. Others, he said, will reduce cutting schedules to four and five days a week while many single-shift mills are now operating on a five day week basis.

OAKLAND, Calif..—U. S. Army Board
 of Engineers has recommended a chan-
 nel leading to the Oakland outer har-
 bor be practically doubled in width.
 The present channel starting at Goat
 Island shoal, is 400 feet wide for the
 entire distance of between 4000 and
 5000 feet. The new plan calls for a
 width of 800 feet at the outer en-
 trance, gradually narrowing to 600 at
 the outer harbor basin. The esti-
 mated cost of the work is placed at
 \$197,500, with a yearly maintenance
 cost of \$10,000, in addition to amount
 now required, according to Associated
 Press dispatches from Washington.

HAWTHORNE, Nevada.—Schuier &
 McDonald, Inc., Oakland, at \$32,491
 awarded contract by Bureau of Yards
 and Docks, Navy Department, under
 Specification No. 6112, for beach de-
 velopment, fence, etc., at Hawthorne
 Naval Ammunition Depot.

 be asked shortly by Bureau of Yards
 and Docks, Navy Department, Wash-
 ington, D. C., under Specification No.
 6162, for Fire Alarm System, at the
 Naval Ammunition Depot, Hawthorne,
 Nevada. The work consists of a fire
 alarm system consisting of call boxes,
 accessories, equipment and wiring.
 When available, plans and specifica-
 tions may be obtained from District
 Public Works Officer, Room 513, 100
 Harrison Street, San Francisco, on
 deposit of \$10.00, check or money order
 payable to the Chief of the Bureau
 of Yards and Docks.

MARE ISLAND, Calif.—McDonald
 & Kahn, Financial Center Bldg., San
 Francisco, awarded the excavation
 contract to D. McDonald, 1118 D. St.,
 Sacramento, in connection with the
 construction of shell houses and con-
 structing an extension to the railroad

Tile—Rigney Tile Co., 3012 Harrison
St., Oakland, and 666 Mission St.,
San Francisco.

Working Drawings Being Prepared.
ANNEX Cost, \$2,000.00
SAN FRANCISCO. Bush Street near
Montgomery St. (50x137-ft.).
Eighteen-story class A reinforced
concrete annex to building.
Owner—Mills Estate, Inc. (Curtis D.
O'Sullivan, president), Mills Bldg.,
San Francisco.
Architect—Lewis P. Hobart, Crocker
Building.
Plans will be ready for figures in
October.

Preparing Preliminary Plans.
OFFICES Cost, \$750,000
SACRAMENTO, Sacramento Co., Cal.
SW 7th & J Sts.
Eleven-story class A steel frame and
reinforced concrete office bldg.
Owner—Louis Lurie, 315 Montgomery
St., San Francisco.
Architect—O'Brien Bros. and W. D.
Peugh, 315 Montgomery Street, San
Francisco.
Present building on site is to be
razed.

Construction Indefinitely Postponed.
ALTERATIONS Cost approx. \$75,000
SAN FRANCISCO. 13th and Shotwell
Streets.
Alterations and additions for distrib-
uting office bldg. (reinforced con-
crete).
Owner—Pacific Gas and Electric Co.,
245 Market St.
Architect—Eng. Dept. of Owner.

Sub-Contracts Awarded.
OFFICES Cost, \$25,000
BERKELEY, Alameda Co., Cal. Shat-
truck Ave. near Center St.
One-story brick and terra cotta offices
(41 ft. footage).
Owner—Pacific States Savings & Loan
Association.
Architect—O'Brien Bros. and W. D.
Peugh, 315 Montgomery St., San
Francisco.
Contractor—Barrett & Hilp, 918 Har-
rison St., San Francisco.
Lumber—Tilden Lumber Co., foot of
University Ave., Berkeley.
Brick Work—P. C. Knudsen, 518 Bal-
four, Oakland.
Ornamental Iron—Michel and Pfeffer
Iron Works, Harrison and Tenth
Sts., San Francisco.
Roofing—H. C. Brown Roofing Co., 3267
San Pablo Ave., Oakland.
Sheet Metal—Morrison & Co., 74 Du-
boce Ave., San Francisco.
As previously reported, wrecking
awarded to Symon Bros. Wrecking Co.

Contract Awarded.
OFFICES Cost, \$—
LOS ANGELES, Cal. NW Fifth and
Hill Streets.
Limit height reinforced concrete
Class A offices.
Owner—Title Guarantee & Trust Co.
Architect—John and Donald Parkin-

son, Title Insurance Bldg., Los
Angeles.
Contractor—P. J. Walker, W. M.
Garland Bldg., Los Angeles.

Plans Being Figured.
STORE Cost approx. \$500,000
SAN JOSE, Santa Clara Co., Calif.
First and San Carlos Sts.
Three - story class C reinforced con-
crete department store.
Owner—Hale Bros., Fifth and Market
Sts., San Francisco.
Architect—Binder & Curtis, 35 W San
Carlos St., San Jose, and Swanson
& Lane, Chicago, Ill.

SAN FRANCISCO.—Haywood,
Wakefield Co., 737 Howard St., at \$5,-
555 submitted low bid to Board of Pub-
lic Works to furnish and install chairs
in the Park-Presidio High School with
alternate bids of \$652. Complete list
of bids follows:
Haywood, Wakefield Co., \$5,555; alt.,
\$652.
H. S. Crocker Co., \$5,805; \$680.
Spinner-Diest Corp., \$6,141; \$645.
R. Brandlein & Co., \$6,452; \$685.

Furniture Bids Wanted—Bids Close
June 18, 4 P. M.
FURNITURE Cost, \$—
HAYWARD, Alameda Co., Calif.
Miscellaneous school furniture (as
noted below).
Owner—Hayward School Dist., Jacob
Harder, Jr., clerk.
Catalog specifications.

Bids are wanted to furnish and in-
stall 502 auditorium chairs in the Bret
Harte school building and for furnish-
ing 200 Clarin folding chairs or equal
—20 American Steel Adjustable Desks
No. 132 Size A or equal, 2 Front Seats
(extra) same desk, 2 Back Seats (ex-
tra) same desk—130 American Steel
Adjustable Desks No. 132 Size B or
equal, 13 Front Seats (extra)—same
desk, 13 Back Seats (extra)—same
desk—4 C. F. Weber Co., Teachers'
Desks No. 900 or equal—4 C. F. Weber
Co. Desk Chairs No. 1221—oak or equal—
1 Office Table C. F. Weber & Co. No.
160 or equal—9 C. F. Weber Co. Of-
fice Chairs No. 1220 or equal. Bids
shall be in accordance with specifica-
tions on file in office of clerk.

SANTA ROSA, Sonoma Co., Cal.—
Directors of Chamber of Commerce
endorse proposal of Santa Rosa Dis-
trict to install flood-lighting system
at high school grounds.

THEATRES

Additional Contracts Awarded.
THEATRE Cost, \$75,000
WOODSIDE, San Mateo Co., Cal.
Whittell Estate.
One-story and basement Class C brick
auditorium and moving picture
theatre (Spanish type).
Owner—George Whittell Jr.
Architect—A. H. Knoll, Hearst Bldg.,
San Francisco.
Contractor—Chas. E. Mills, Mayfield.
Brick Work—Chas. E. Mills, Mayfield.
Steel—Schrader Iron Works, 1247
Harrison St., San Francisco.
Heating—Christenson & Anderson, 445
Florence St., Palo Alto.
As previously reported, waterproofing
and concrete work awarded to
L. Satorio, 1817 Filbert St., San Fran-
cisco, at \$4566.

Construction Indefinitely Postponed.
THEATRE Cost, \$100,000
HEALDSBURG, Sonoma Co., Cal.
One - story and mezzanine floor
concrete modern theatre (to seat ap-
proximately 1,000).
Owner—Redwood Theatres, Inc., Geo.
M. Mann and Chas. K. Koerner.
Architect—N. R. Coulter, 46 Kearny
St., San Francisco.

Preparing Working Drawings.
THEATRE Cost, \$350,000
PASADENA, Los Angeles Co., Cal.
Berkeley Ave. and E-Colorado St.
Two-story Class A theatre (French
type) (128x300 ft.; to seat 2500).
Owner—A. H. Chotiner, La Brea
Theatre Bldg., Los Angeles.
Architect—S. Charles Lee, 532 Petro-
leum Securities Bldg., Los An-
geles.

WHARVES AND DOCKS

Sub-Bids Being Taken.
PIER Cost, \$600,000
SAN FRANCISCO. Foot of Green St.
Steel frame and concrete pier (to be
known as Pier No. 15).
Owner—State of California.
Engineer—F. G. White, chief engineer,
State Harbor Commission, Ferry
Building.
Contractor—Healy-Tibbitts Const. Co.,
64 Pine St.

MISCELLANEOUS CONSTRUCTION

Planned
LOCKERS Cost, \$—
SOUTH SAN FRANCISCO, San Mateo
Co., Cal.
Furnish and install 300 steel lockers.
Owner—Pacific Coast Steel Co., 215
Market St., San Francisco.
Architect—None.
Bids will not be called for 60 or 90
days.

Bids Opened.
SAFETY ISLANDS Cost, \$—
SAN FRANCISCO, Bayshore Blvd. at
Silver and Paul Aves.
Safety Islands.
Owner—City and County of San Fran-
cisco.
Plans by Bureau of Engineering De-
partment of Public Works, Third
Floor, City Hall.
Project involves the construction of
4 safety islands and installation of 4
beacons. Bids received were:
R. Flatland \$2,988
N. J. Lynch 2,512

PASADENA, Los Angeles Co., Cal.
—Until 8:30 A. M., June 10th, bids
will be received by Pasadena Board
of City Directors for erection of ad-
ditional seats at Rose Bowl, concrete
press box and radio room. Work in-
volves 4500 cubic yards concrete; 260
tons reinforcing steel; 240,000 ft. B.
M. of cedar, spruce or cypress. The
seating capacity will be increased to
80,000, making 62,000 new seats. Plans
are available at the Pasadena build-
ing department. Walter Putnam is
the structural engineer. The estimat-
ed cost is \$135,000.

Bids Opened.
STATION Cost, \$4500
OAKLAND, Alameda Co., Cal. Foot
of Fifth Ave. (Corporation Yard).
Service station and Class C concrete
laboratory.
Owner—City of Oakland.
Plans by Owner.
(1) laboratory; (2) service station.
Following is a complete list of bids.
Prentice Constr. Co., 2063 Webster
St., Oakland, (1) \$3550; (2) \$3750.
Jacobs & Pattani, Oakland, (1)
\$5440; (2) \$4870.
J. B. Bishop, Oakland, (1) \$5662; (2)
\$5996.
Bids held under advisement.

MARYSVILLE, Yuba Co., Cal.—City
council has accepted a 100-acre tract,
the gift of the late Helman Chelm, on
which it is proposed to establish a
municipal airport.

Engineering News Section

BRIDGES

MONTEREY COUNTY, Calif.—Following bids received May 28 by State Highway Commission to construct bridge across Salinas river at Bradley, consisting of six 140-ft. steel deck truss spans with concrete deck on concrete piers with pile foundations and eighteen 45-ft. reinforced concrete girder spans on concrete bents with pile foundations:

H. E. Doering, Yreka.....	\$256,563
Rocca & Coletti, San Rafael.....	257,380
R. H. Travers, Los Angeles.....	262,915
Geo. Pollock Co., Sacramento.....	265,323
M. B. McGowan, San Francisco.....	267,967
Ward Eng. Co., San Francisco.....	268,897
J. F. Knapp, Oakland.....	269,216
Siems-Helmert, Inc., S. F.....	308,053
Healy-Thibblits Const. Co., S. F.....	314,267
Jasper-Stacy Co., S. F.....	336,178

COLUSA COUNTY, Calif.—Until June 25, 2 P. M., bids will be received by State Highway Commission to construct three concrete girder bridges; one over Salt Creek, 1 mile north of Williams, consisting of two 26-ft. 6-in. spans; one over Freshwater Creek, 1½ mile north of Williams, consisting of three 25-ft. spans; a third across Green Valley Slough, 4 miles north of Williams, consisting of two 21-ft. 6-in. spans.

See call for bids under official proposal section in this issue.

OAKLAND, Calif.—Until June 25, 8 P. M., bids will be received by East Bay Municipal Utility District to construct bridge over Upper San Leandro Creek. Plans obtainable from above office.

VALEJO, Solano Co., Calif.—Pacific Constr. Co., 2235 E. 7th St., Oakland, at \$15,475 awarded contract by city council to construct Sacramento St. overhead crossing over tracks of the San Francisco, Napa and Calistoga Railway.

SALINAS, Monterey Co., Calif.—M. J. Murphy, Inc., Carmel, at \$14,084.68 awarded contract by county supervisors to construct two reinf. concrete bridges on Pacific Grove-Carmel road in Supervisor District No. 5.

SALINAS, Monterey Co., Calif.—Jacobs & Pattiani, 337 17th St., Oakland, at \$114,990 submitted low bid to county supervisors to construct bridge over Salinas river, two miles from Gonzales in Supervisor District No. 2; steel and concrete construction; 24-ft. roadway. Bids taken under advisement until June 6. Followig is a complete list of bids received:

Jacobs & Pattiani, Oakland.....	\$114,990
B. C. Gerwick, S. F.....	117,114
M. E. McGowan, S. F.....	125,753
H. E. Doering, Yreka.....	128,691
Geo. Pollock Co., Sacramento.....	133,665
E. N. Thompson, San Jose.....	134,566
Pan-Pacific Piling and Const. Co., Richmond.....	136,247

SANTA BARBARA, Calif.—Merritt Chapman & Scott Corp., San Pedro, at \$38,853 (painted) and \$38,853 (galvanized iron) submitted low bid to county supervisors to construct

structural steel highway bridge with wood floor and rails, concrete footing and abutments over San Roque Creek on the Goleta Foothill Blvd., in 3rd Rd. Dist. Other bids, all taken under advisement, are: W. M. Ledbetter, \$39,825 and \$44,725; Lynch-Cannon Engineering Co., Los Angeles, \$42,486; \$44,986.

COLUSA COUNTY, Calif.—As previously reported, bids will be received June 25 by State Highway Commission to construct three concrete girder bridges near Williams, one over Salt Creek consisting of two 26-foot 6-in. spans, another over Freshwater Creek, consisting of three 25-ft. spans and a third across Green Valley Slough, consisting of two 21-ft. 6-in. spans. Project involves: 1040 cu. yds. structure excavation; 560 cu. yds. Class "A" cement concrete; 18 cu. yds. Class "C" cement concrete; 50,000 lbs. reinforcing steel; 870 lbs. bronze expansion plates; one lot, miscellaneous items of work.

WOODLAND, Yolo Co., Calif.—County supervisors reject proposal to purchase \$98,000 worth of bonds to provide for the immediate construction of a Sacramento river bridge at Knights Landing. The proposal was made by Arthur Coates, Sutter County District Attorney.

SHASTA COUNTY, Calif.—Following bids received June 4 by State Highway Commission to construct timber bridge over Salt Creek about 15 miles east of Redding, consisting of one 60-ft. pony truss span on concrete piers and six 19-ft. approach spans on frame bents with concrete pedestals:

R. B. McKenzie, Red Bluff.....	\$12,544
J. P. Brennan, Redding.....	13,454
Alturas Const. Co., Sacto.....	13,822
Smith Bros. Const. Co., Eureka.....	14,539
C. E. Force, Piedmont.....	14,921
H. C. Witty, Sanger.....	15,241

WOODLAND, Yolo Co., Calif.—County Surveyor Asa G. Proctor directed by county supervisors to consult with Sacramento county supervisors regarding the construction of another bridge to span the Sacramento river, between Sacramento and Yolo counties. The proposed bridge would span Sutter slough at Sutter Island to eliminate the Courtland Ferry. The Sacramento county supervisors contemplate construction of a combined railroad and vehicle bridge at Merritt Island which, if constructed, would be financed jointly by the Western Pacific Railroad and Sacramento County.

DREDGING, HARBOR WORKS & EXCAVATIONS

OAKLAND, Calif.—U. S. Army Board of Engineers recommends that channel leading to the Oakland outer harbor be practically doubled in width. The present channel starting at Goat Island shoal, is 400 feet wide for the entire distance of between 4000 and 5000 feet. The new plan calls for a width of 800 feet at the outer entrance, gradually narrowing to 600 at the outer harbor basin. The estimated cost of the work is placed at \$197,500, with a yearly maintenance

cost of \$10,000, in addition to amount now required, according to Associated Press dispatches from Washington.

LOS ANGELES, Calif.—Until June 11, 10 A. M., bids will be received by City Harbor Department, 112 City Hall, for dredging Fish Harbor and Fish Harbor entrance channel, involving 185,000 cu. yds. with harbor and 115,000 cu. yds. from entrance channel. Plans obtainable from above.

SAN RAFAEL, Marin Co., Calif.—City council has authorized immediate repairs to Bay Shore Levee, located near the Union Oil plant. Surveys are being made by H. K. Brainerd, city manager.

BAKERSFIELD, Kern Co., Calif.—Until June 10, 2 P. M., bids will be received by H. I. Tupman, secretary, Kern River Levee District, 4 Bank of Italy Bldg., for grading and surfacing portion of the present levee and the construction of new levees all on the south side of the Kern river extending from main line of S. P. R. R. in a S.W. direction to a point near Oak Street Bridge. Certified check or bidder's bond 10% payable to district required with bid. Plans obtainable from secretary.

FORT BRAGG, Mendocino Co., Calif. War Department has recommended to Senate Commerce Committee a modification of the existing project for the improvement of the Noyo river, about 1½ miles south of Fort Bragg. The change would provide an entrance channel and a river channel, 10 feet deep, at an estimated cost of \$180,000, with an additional 10,000 annually for maintenance. The channel would be 100 feet wide at the entrance and 150 wide thereafter extending to the highway bridge.

IRRIGATION PROJECTS

LINDEN, San Joaquin Co., Calif.—Linden Irrigation District will call election to vote bonds of \$140,000 to finance improvements in the district which includes an expenditure of \$44,880 for gates in the flood control dam of the city of Stockton.

TURLOCK, Stanislaus Co., Calif.—Aldrin & Anderson, Turlock, submitted low bid to Turlock Irrigation District for 6467 sq. ft. 2-in. canal lining at 12 ft. and 3 concrete structures involving 4 cu. yds. of concrete at \$14.50 cu. yds. Taken under advisement.

TURLOCK, Stanislaus Co., Calif.—Aldrin & Anderson, Turlock, awarded contract by Turlock Irrigation District for 6467 sq. ft. 2-in. canal lining at 12 ft. and 3 concrete structures, involving 4 cu. yds. of concrete at \$14.50 cu. yd.

STREET LIGHTING SYSTEMS

SAN FRANCISCO—E. J. Treacy, Call Bldg., at \$16,280 awarded contract by Board of Public Works, to install ornamental street lighting system in Hyde street, between Market and California Sts.

OAKLAND, Cal.—Butte Electric & Manufacturing Co., 956 Folsom St., San Francisco, at \$623 awarded contract by city council to install electric system in 17th St., bet. Harrison St. and San Pablo Ave.

SAN JOSE, Santa Clara Co., Cal.—City Council declares intention (\$125) to install electroliners with underground system in 3rd St., bet. St. John and San Antonio Sts., involving (San Jose Design) Duplex electroliners. 1911 Act. Hearing June 16. John J. Lynch, city clerk. William Popp, city engineer.

RICHMOND, Contra Costa Co., Cal.—Proceedings have been started by city council to create lighting district in Macdonald avenue, between First and Twenty-third street; bracket lights will be provided. E. A. Hoffman, city engineer.

MACHINERY AND EQUIPMENT

ALAMEDA, Alameda Co., Cal.—Fageol Bus Co., Oakland, awarded contract by city council to furnish motor busses for transportation in Bay Farm Island District.

TUPMAN, Kern Co., Calif.—Until June 13, 7 P. M., bids will be received by Earl McFarland, clerk, Elk Hills School District, to furnish and deliver the following equipment: Pickup roadster with enclosed cab and steel pickup box; 4-cylinder L-head motor; standard selective sliding gear transmission; single dry plate enclosed clutch; fully enclosed 4-wheel brakes; 5 steel spoke wheels; four 21x4.50 balloon tires and tubes; hydraulic shock absorbers; Triplex shatterproof windshield; three-quarter floating rear axle and torque tube drive. Further information obtainable from above.

SANTA CLARA, Santa Clara Co., Cal.—Until June 10, 8 P. M., bids will be received by H. A. Bowers, clerk, Jefferson Union High School District, to furnish and deliver school bus body, 54 passenger capacity of the following specifications: Cross sills to be No. 1 hickory or oak, 3"x5", spaced about 24" apart and braced to chassis with iron on each end; side sills, body posts, side rails, top carlines and frame work to be of No. 1 grade oak screwed, bolted and braced with steel braces at joints and other places where necessary; body underslung so will come in line with running board; rounded rear corners; top covered with best material, regular bus top covering, and padded; drip moldings of aluminum all around top—screwed on; steel oval heads 4" apart on body; body covered with No. 20 gauge auto body steel and padded to prevent rattles; seats longitudinal, one on each side, one across rear and crosswise seats in center; seat backs of vertical grain spruce; cushions of genuine leather with springs; headlining of imitation leather with two dome lights; adjustable drivers bucket-type seat; rear view mirror; safety glass in rear of bus. 1/4" plate glass in windshield; side curtains of disappearing type, steel frame and covered with fabric and heavy celluloid lights; special B & B safety turn signal, carrying light and light in rear, also the carrier and bumper. Gas tank in rear of body; door on right side at front controlled by driver, with safety lock; body finished in two-tone Dupont duco; inside of body stained and varnished natural finish; Name of school on each side of body, also number of school bus, "Be Care-

ful" on rear; body to be built under inspection of school board and to their entire satisfaction; body to be 21 feet long; 7' 6" wide; 54" inside height.

Certified check 10% payable to clerk required with bid. Further information obtainable from clerk.

SANTA CLARA, Santa Clara Co., Cal.—Until June 10, 8 P. M., bids will be received by H. A. Bowers, clerk, Jefferson Union Elementary School District, to furnish and deliver one Standard 1930 Reo bus chassis and cowl with double drop frame fish-plated with 10 inch boiler plate, 1/4" thick, 210 inch wheel base, overload springs and complete two-ton Reo rear axle. Tires—dual 32x6.75 balloons rear, 32x6.75 balloons singles front, Spare tire mounted at rear. Four speed transmission, Reo Cold Crown motor, 3 3/8 bore 5" stroke. Four wheel hydraulic brakes. Certified check 10% payable to clerk required with bid. Further information obtainable from above.

HAWTHORNE, Nevada—Until June 10, 10 A. M., bids will be received by Bureau of Supplies and Accounts, Navy Department, Washington, D. C., to furnish railway cars for Naval Ammunition Depot project at Hawthorne, Nev. Specifications and further information obtainable from Public Works Officer, Twelfth Naval District, 100 Harrison St., San Francisco

RED BLUFF, Tehama Co., Calif.—Until June 11, 7:30 P. M., bids will be received by Fred H. Weeks, clerk, Red Bluff Union High School District, to furnish and deliver 40-passenger and 50-passenger school busses. Specifications and further information obtainable from above.

SAN BRUNO, San Mateo Co., Cal.—Until June 11, 8 P. M., bids will be received by Emil A. Bohm, city clerk, to furnish one ton chassis (open specifications) and construct and mount a body equipment thereon. Certified check 10% required with bid. Further information obtainable from clerk.

COURTLAND, Sacramento Co., Cal.—Until June 20, 2 P. M., bids will be received by S. Mercer Runyon, secretary, Courtland Union High School District, to furnish and deliver a 2 1/2 ton chassis for school bus. Further information obtainable from Jos. Green at Courtland.

COURTLAND, Sacramento Co., Cal.—Until June 20, 2 P. M., bids will be received by S. Mercer Runyon, secretary, Courtland Joint Union High School District, to furnish and deliver a fifty-passenger body for school bus. Further information obtainable from Jos. Green at Courtland.

FIRE ALARM SYSTEMS

HAWTHORNE, Nevada—Bids will be asked shortly by Bureau of Yards and Docks, Navy Department, Washington, D. C., under Specification No. 6162, for Fire Alarm System, at the Naval Ammunition Depot, Hawthorne, Nevada. The work consists of a fire alarm system consisting of call boxes, accessories, equipment and wiring. When available, plans and specifications may be obtained from District Public Works Officer, Room 513, 100 Harrison Street, San Francisco, on deposit of \$10.00, check or money order payable to the Chief of the Bureau of Yards and Docks.

MISCELLANEOUS SUPPLIES AND MATERIALS

BERKELEY, Alameda Co., Cal.—Until June 16, 8 P. M., bids will be received by Clara F. Andrews, secretary, Board of Education, 2325 Milvia St., to furnish fuel oil for school year 1930-31. Specifications and further information obtainable from above.

OAKLAND, Cal.—Until June 12, noon, bids will be received by Frank C. Merritt, city clerk, to furnish and deliver miscellaneous supplies and materials for fiscal year ending June 30, 1931, as follows:

Automobile Tires and Tubes;
Asphalt—Road oil and emulsified;
Batteries; Brick; Brooms; Booths (election);

Cable (saturated paper insulated); Castings; Cement; Coal; Copper Wire; Corrugated Iron Pipe; Compression tests for Concrete Cylinders.

Distillate; Dry Concrete Mix. Fuel Oil; Fire Hose for Sewers; Gasoline.

Hardwood and Panels. Incandescent Lamps.

Laundry and Towel Service; Lubricating Oil; Lumber;

Material for Constructing Corrugated Iron Culverts.

Paints and Lacquer;

Refuse Containers; Repair of Pavements; Rock and Screenings; Rock 2nd grade; Road Oil; Rental Chairs, Lamps and Tables for election purposes;

Shovels; Signs (Boulevard stop, parking, speed limits, traffic); Steam Sewer Pipe;

Wet Concrete Mix. Specifications and further information obtainable from above.

PIPE LINES, WELLS, ETC.

TACOMA, Wash.—Birchfield Boiler Co., Tacoma, at \$91,074 awarded contract by City Board of Contracts to construct 10,898 feet of 42-inch steel pipe for gravity pipe line. The contract was awarded over the bid of the Steel Pipe and Tank Co., of Oakland, Calif., who bid \$85,648, the city commissioners favoring the award to the local bidder.

STOCKTON, San Joaquin Co., Cal.—George M. Clark, Stockton, at \$5400 awarded contract by State Department of Public Works, Division of Architecture, to drill test water wells at Stockton State Hospital.

MARTINEZ, Contra Costa Co., Cal.—Pacific Gas & Electric Co. seeks franchise from county supervisors to operate a natural gas pipe line via the Carquinez Straits bridge to serve fuel to communities of the north bay counties. The application will be considered July 21. The pipe line will be suspended to the bridge structure and will serve communities in Solano, Sonoma, Marin and other counties.

COALINGA, Fresno Co., Cal.—Bunting Iron Works, Coalinga, at \$1,029.71 awarded contract by city council to furnish 2,530 ft. of 7-in. lap-welded gas pipe with \$137 additional for coating.

SEWERS AND SEWAGE DISPOSAL PLANTS

RICHMOND, Contra Costa Co., Cal.—City council declares intention (479) to construct combined storm and sanitary sewers in Dock Ave. bet. 10th St. and east termination of Dock Ave.,

etc., involving salt glazed vitrified clay pipe; centrifugally cast reinforced concrete pipe; cast iron pipe; salt glazed vitrified clay sewer pipe in timber cradle on piles and in concrete pipe jacket on piles; centrifugally cast reinforced concrete pipe in reinforced concrete cradle on piles; manholes; overflow structure; storm water inlets, etc. Estimated cost \$117,000. 1911 Act. Hearing June 23. A. C. Faris, city clerk. Edw. A. Hoffman, city eng.

LODI, San Joaquin Co., Cal.—City starts proceedings for new storm sewer in Tokay St. Plans will be started shortly for enlargement of the sewer in alley between Elm, Pine, Sacramento and School Sts. A 4-inch pipe is now in place.

SANTA CRUZ, Santa Cruz Co., Cal.—Merritt Chapman and Scott, San Pedro, at \$14,750 submitted only bid to city council for repair and anchorage of existing outfall sewer in the Pacific Ocean, involving repair of the break in the east pipe line and construction of concrete foundation anchor blocks in the east and west outfall pipe lines. Taken under advisement until June 9. Roy Fowler, city engineer.

RENO, Nevada.—Until June 23, 5 P. M., (to be opened 7:30 P. M.) bids will be received by J. B. Reese, city clerk, to construct the trunk line sewers, sewage pumping station and sewage treatment plant. The trunk line sewers and sewage treatment plant comprise the construction, complete, of sewer lines from points of junction with the existing sewerage system to the treatment plant and a sewage pumping station; together with a sewage works comprising essentially a bar screen chamber, two clarifier tanks, a sludge digestion tank and sludge drying beds, all complete with corresponding equipment and appurtenant; a plant control building containing boiler and pumping rooms, chlorination room and laboratory, all complete with piping and miscellaneous equipment.

The following roughly approximate quantities are involved in the work:

Sewage treatment plant:
7,650 cu. yds. excav. for plant.
Trunk line sewers:
2,960 lin. ft. 39-in. pipe;
4,300 lin. ft. 33-in. pipe;
1,313 lin. ft. 30-in. pipe;
276 lin. ft. 24-in. pipe;
7,000 lin. ft. 18-in. pipe;
10,230 lin. ft. 15-in. pipe;
180 lin. ft. 12-in. pipe;
10,960 lin. ft. 10-in. pipe;
2,480 lin. ft. 8-in. pipe;
3 sewer river crossings;
99 sewer manholes.

Sewage pumping station:
1 sewage pumping station;
7,650 cu. yds. excav. for plant struc;
46,400 cu. ft. of concrete;
103 tons of reinforcing steel.

In addition to the above features, certain building construction and mechanical equipment are involved, including sewage measuring flume, inlet and outlet channels, cast iron pipe and special castings, gates and gate valves, heating apparatus, pumps and motors, mechanically cleaned bar screen, clarifier and digestion tank, mechanisms, gas collecting equipment, chlorine storage facilities and grading of plant site.

Certified check 10% payable to City of Reno required with bid. Bond of 75% of the contract price will be required of the successful bidder.

Plans and specifications obtainable from C. C. Kennedy, consulting engineer, Call Bldg., San Francisco, on deposit of \$15, which will be retained.

CONZALES, Monterey Co., Calif.—Burns-McDonnell-Smith Eng. Corp., 422 Western Pacific Bldg., Los Ange-

les, commissioned by Gonzales Sanitary District to prepare plans for sewer system. Preliminary estimates place cost at \$50,000.

HEALDSBURG, Sonoma Co., Cal.—A. W. Garrett, Healdsburg, at \$2640 awarded contract by city trustees to construct 3000 ft. of sewers in various streets.

VALLEJO, Solano Co., Cal.—Louis Tagnon, Vallejo, at \$6300 submitted low bid to city council to construct a 36-inch vitrified clay pipe sanitary outfall sewer with creosoted timber cradle and pile foundation on direct extension westerly of the center line of Ryder St. extending from City Bulkhead to Longitudinal Dyke of U. S. Govt. on east side of Mare Island Channel. M. J. Bevanda, Stockton, only other bidder at \$6600. Referred to City Engineer T. D. Kilkenny for recommendation.

MODESTO, Stanislaus Co., Cal.—City council rejects bids to furnish sludge pump and clarifier in connection with sewage disposal plant and new bids will be asked. Frank J. Rossi is city engineer.

DAVIS, Yolo Co., Cal.—A. F. Anderson, 1093 Longridge Road, Oakland, for corrugated iron building finish with sewers at \$10,505 awarded contract by city trustees to construct sewers for State Highway south for a distance of 3000 ft. and construct two pumps together with pumping apparatus and equipment for such pumps.

Project involves: Grading, 6-in. conc. base pave. with 2-in. asph. conc. surface; const. reinf. concrete bridge; con. conc. curbs and gutters; cem. walks; 8-in. and 4-in. vit. pipe lateral sewers; br. manholes; 10-in. cement conc. pipe storm water sewers; electroliter lighting with underground system.

OFFICIAL PROPOSALS

STATE OF CALIFORNIA

DEPARTMENT OF PUBLIC WORKS

DIVISION OF HIGHWAYS

NOTICE TO CONTRACTORS

SEALED PROPOSALS will be received at the office of the State Highway Engineer, Public Works Building, Sacramento, California, until 2 o'clock P. M. on June 25, 1930, at which time they will be publicly opened and read, for construction in accordance with specifications therefor, to which special reference is made, of portions of State Highways, as follows:

Colusa County (H1-Col-7-B), three concrete girder bridges; one across Salt Creek about 1 mile north of Williams, consisting of two 26'6" spans; one across Freshwater Creek about 1 1/2 miles north of Williams, consisting of three 25'0" spans; and one across Green Valley Slough about 4 miles north of Williams, consisting of two 21'6" spans.

Placer and Nevada Counties, between Airport and Yuba Pass (H1-Pla-Nev-7-E-A), about seven and two-tenths (7.2) miles in length, to be surfaced with crusher run base and untreated crushed gravel or stone surfacing.

Fresno County, between Fowler Switch Canal and Fancher Creek (V1-Fre-4-A & B), about seven and six-tenths (7.6) miles in length, to be graded and paved with asphalt concrete.

San Diego County, between Veljas Creek and Pine Valley (V11-S.D-12-D), about eleven and two-tenths (11.2) miles in length to be paved with Portland cement concrete.

Proposal forms will be issued only to those Contractors who have furnished a vettrified statement of experience and financial condition in accordance with the provisions of Chapter 644, Statutes of 1929, and whose statements so furnished are satisfactory to the Department of Public Works. Bids will not be accepted from a Contractor to whom a proposal form has not been issued by the Department of Public Works.

Plans may be seen, and forms of proposal bonds, contract and specifications may be obtained at the said office, and they may be seen at the offices of the District Engineers at Los Angeles and San Francisco, and at the office of the District Engineer of the district in which the work is situated. The District Engineers' offices are located at Eureka, Redding, Sacramento, San Francisco, San Luis Obispo, Fresno, Los Angeles, San Bernardino and Bishop.

A representative from the district office will be available to accompany

prospective bidders for an inspection of the work herein contemplated, and Contractors are urged to investigate the location, character and quantity of work to be done, with a representative of the Division of Highways. It is requested that arrangements for joint field inspection be made as far in advance as possible. Detailed information concerning the proposed work may be obtained from the district office.

No bid will be received unless it is made on a blank form furnished by the State Highway Engineer. The special attention of prospective bidders is called to the "Proposal Requirements and Conditions" annexed to the blank form of proposal, for full directions as to bidding, etc.

The Department of Public Works reserves the right to reject any or all bids or to accept the bid deemed for the best interests of the State.

DEPARTMENT OF PUBLIC WORKS
DIVISION OF HIGHWAYS.
C. H. PURCELL,
State Highway Engineer.
Dated May 28, 1930.

BUSINESS OPPORTUNITIES

SAN FRANCISCO.—Names and addresses of the individuals or firms concerned in these opportunities will be furnished on request to the Business Opportunity Department of Daily Pacific Builder, 545-547 Mission Street, Phone GARfield 8744.

20121—Testing Apparatus. Mannheim, Germany. Manufacturer of testing apparatus for iron and metal, rubber and paper, wants a connection locally.

20122—Clocks. Frankfurt, Germany. Manufacturer of electric - automatic control systems and clocks wishes connection with local firms.

20123—Representation. Elberfeld, Germany. Party is desirous of representing exporters of any kind of goods. References available.

20124—Safety Apparatus. Berlin, Germany. Concern manufacturing patent safety apparatus for cutting, welding, brazing, etc., using oxygen and oil fuels, wants connections.

20127—Representation. San Francisco, Calif. Party who is returning to Switzerland wishes to represent local houses in Europe, especially Switzerland, France, and Germany, either in a buying or a selling capacity. Is not interested in any particular line and would be willing to spend a training period here. Local references available.

20130—Showroom Facilities. Shanghai, China. Opportunity is offered to manufacturers to donate samples of products for display in commercial showroom of a public school.

20131—Representation. Harbin, Manchuria. Party desires to represent American firms in Manchuria, especially those handling steel, hardware, cooking utensils, canned goods, and foods products. Local reference.

20132—Representation. San Francisco, Calif. A local company having a representative in Manchuria is seeking new connections for this agent whom they recommend very highly. Party also has banking references.

20135—Green Houses. Honolulu, T. H. Party is in the market for green houses for his home, and wishes to have manufacturers send him catalogues.

20137—General Agency. Anvers, Belgium. Company wants to obtain the general European agency for a local firm.

20138—Lumber Agency. Ponce, P. R. Party wishes to secure the representation of Douglas fir exporters.

20144—Representation. San Francisco, Calif. Party who has had four years' experience as a representative in Holland is returning there in the early fall, and wishes to secure the agencies for local houses. Is particularly interested in radios, machinery, specialties.

20155—Representation. Havana, Cuba. Party wishes to make connections with manufacturers for the purpose of representing them.

A "Pittsburg" Automatic Water Heater installed in the Home indicates high quality throughout.

Of The NEW

Daily Pacific Builder

The only daily construction newspaper affording complete coverage of the construction activities in Central and Northern California, featuring work contemplated, bids wanted, bids opened, contracts awarded, sub-bids wanted and sub-contracts let on all types of building construction, bridges, dams and harbor works, irrigation projects; machinery and equipment; water works and supplies business opportunities, building permits, building contracts, mechanics' liens, acceptances, etc., etc.

Keep informed on construction developments in Central and Northern California and the major projects in Southern California, the states of Oregon, Washington, Nevada and Arizona.

The new DAILY PACIFIC BUILDER will afford a service that serves—both in Quality and Quantity. You, as a member of the construction fraternity, should not be without it.

Subscription price \$1.50 per month, or \$15.00 a year, payable in advance.

FIVE-DAY WEEK RULINGS AT SACRAMENTO

L. L. Patterson, secretary of the Sacramento Builders' Exchange, in his weekly bulletin, briefly outlines the details of the five-day week schedule recently adopted by that organization. Briefly the details are as follows:

Jurisdiction: Sacramento County and five miles into Yolo County.
Effective on: All buildings under construction, bridges, sheet metal shops, sidewalks, curbs and gutters, planing mills, and all other work except as follows:

Exceptions: Planing mills will be given the necessary men to make shipments and deliveries and will be given sufficient men to take care of lumber yard and custom work, highway and road work, dam and irrigation work, lumber yards, hardware and paint and glass stores, and such other mercantile establishments as come into direct contact with the buying public.

Jobbing: Plumbers, electricians, sheet metal shop, glass dealers and such other contractors as may later such other contractors as may later be designated and who do jobbing work shall work such men as may be required for protection of life and property on Saturday morning at straight time. No other work shall be done on Saturday or Sunday except that for which overtime is paid.

In Shops: Mechanics employed in shops Saturday morning for handling jobbing work may do other work necessary to keep themselves busy.

Pay Day: Shall be at or before quitting time on Friday.

Wages: There shall be no change in wages for two years from the date of the five-day week agreement, which is June 2, 1930.

FOLSOM DAM LEASE CONTRACT IS DISCLOSED

L. M. King, State Director of Finance, has made public the details of the final draft of the Folsom dam lease contract, which has been submitted to the American River Hydro-Electric Company of San Francisco, sponsors of the \$11,000,000 development on the American river near the prison.

In consideration for the fifty years' lease, King said, the State would receive: A cash payment of \$25,000; free power and water for irrigation and domestic uses at Folsom; flood control for North Sacramento at a nominal cost to the State; and salinity control of the lower Sacramento; fee simple title to the land in the dam reservoir; right of reapture for the State or any political subdivision at any time during the life of the lease, and absolute title to the entire project at the end of fifty years.

King said the State agrees in the contract to pay \$600,000 for building the flood control works in the dam. The dam would be 390 feet high and have a reservoir capacity of 355,000 acre feet, 175,000 of which would be reserved for flood control.

HOME BUILDERS FACE NEW TYPE OF COMPETITION

Home builders in the United States are faced with a new form of competition. Several of the larger departmental and mail order stores have entered into the construction field, and are undertaking to finance, erect and furnish homes in various parts of the country.

The proposition is not that of the old "ready cut house," but permits the choice of a local architect to prepare plans to suit the owners' tastes, the departmental and mail order stores then arranging mortgages and sending in materials and labor for actual construction.

Obviously, with the advantages in buying and in the labor market which they possess as important mercantile organizations, they constitute a serious threat to the individual builder.

According to opinions which have been expressed by leading authorities, his one hope of meeting the new competition is in establishing for himself a reputation for reliable work and in the adoption of modern methods.

The local material dealer and the local builder are better situated to meet the peculiar requirements of their immediate districts than the centralized house. By intelligent cooperation and use of the most improved equipment, they can also build homes at least as economically.—(Portland, Ore., Journal of Commerce).

STEEL WINDOWS WILL BE SUBJECT OF CODE REVISION

The simplified practice recommendation on solid steel windows is to be modified and submitted in its revised form to the industry for signed acceptance, according to a statement just issued by the division of simplified practice of the Bureau of Standards.

Full text of the statement follows:

The industry's standing committee on the simplification of solid section steel windows, at a recent meeting, unanimously decided to modify Simplified Practice Recommendation No. 72 and submit a revision of the simplified list of sizes to the industry for its signed acceptance, according to a statement recently made public by the division of simplified practice of the Bureau of Standards.

The most important changes incorporated in this revision are, the substitution of commodity products' nomenclature for that of dealer stock; the addition of several sizes in both the pivoted, and projected window groupings; adjustment of types in projected windows architectural; and the complete elimination of counter-balanced windows.

The revised simplified practice recommendation, subject to the approval of the industry, is to be effective July, 1930.

OBJECT TO INCREASE IN HEIGHTS LIMITS

A proposed change in the Chicago building code to increase the height limits of towers surmounting loop commercial and industrial buildings is meeting with opposition in the city, says the American Contractor. The proposed change has been turned over to the Corporation Counsel for drafting into amendment form, and will be presented to the City Council at once. Several architects and attorneys for building interests objected to the change on the ground that owners of buildings under the present limitations imposed by the building code would be placed at a disadvantage if the present tower heights are increased in favor of undeveloped properties.

It was said by others that such an amendment to the code would disturb the equalization of building values established under the present code. Others stated that there was no good economic reason for increasing tower heights. Buildings of sufficient height can be erected under the present regulations.

The proposed amendment contemplates two changes. One seeks to permit an increase in the tower heights from 25 per cent of the base of the building to 40 per cent. The other would permit an increase in the tower volume from one-sixth of the volume of the entire structure to one-fourth.

Harry T. Frost, architect, is reported to have stated that there is no need for the change, and that it would increase fire hazards unnecessarily.

ARIZONA LUMBERMEN ELECT

At the 13th annual meeting of the Lumbermen's Club of Arizona at Douglas, Joseph H. Tardy of Phoenix was elected president for the ensuing year. E. W. Edens of Cottonwood was chosen vice-president, and E. H. Wheat of Phoenix was re-elected secretary-manager. Directors elected are: Frank Tutt, Jerome; J. A. Mulcahy, Tucson; Irving Jennings, Douglas; Lincoln DeMund, Yuma; and J. C. Light, Miami. About 100 lumbermen, including many from California, were in attendance.

NOMINATE DIRECTORS

Candidates for the board of directors of the Richmond Builders' Exchange have been nominated and June 26 set for the election. The following candidates will be listed on the ballot: J. L. Eakle, F. A. Mero, James Walker, E. H. Higgins, P. M. Sanford, Carl Overaa, A. P. Nelson, R. J. Meyer, George Edwards, C. V. Mero, C. Pedersen, Henry Caplan, E. A. Marshall, Pryce Roberts, N. F. Plant, A. J. Hurley, Fred C. Hoakling, W. A. Hisslop, B. J. Ballantyne, J. E. George, George Tandy, N. P. Bush, C. E. Marshall, E. B. Stoddard.

TRADE ASSOCIATIONS AND THE U. S. DEPARTMENT OF JUSTICE

(By John Lord O'Brian)

Address delivered at the luncheon of the American Trade Association Executives, Mayflower Hotel, Washington, D. C., May 1, 1930.

Mr. O'Brian is assistant to the Attorney General of the United States in charge of Anti-Trust Prosecutions.

Trade Associations would like to obtain a better understanding of the attitude of the Department of Justice toward their activities. Every clear-headed lawyer understands the changing conditions which must constantly accompany progress in the world of business. Every experienced lawyer knows how much Trade Associations have contributed and are contributing to the development of a sound public opinion in the special fields of industry. No one understands this better than the law officers of the Department of Justice, and I can assure you that that department is not in the slightest degree hostile to the proper activities and healthy growth of Trade Associations.

The best service I can render you is to make clear the attitude of the Department of Justice and the legal limitations which encompass its activities and affect the exercise of its powers. There is nothing to be gained by indulging in vague generalities on an occasion like this.

The Attorney General of the United States is not and cannot be an arbiter in the field of economic interests. His powers and his duties relate solely to the enforcement of law. It is not within his power to change the legal standards of business conduct as defined by Congress and the Courts, and if you stop to reflect upon this you will not wish him either to have or to attempt to exercise any such power. The conduct of business should be guided by standards of law and not by the discretion or caprice of any official. All of us know only too well that difficulty and often danger arises when officials of Government undertake to regulate by their individual standards of discretion the intricate problems of the business world.

In dealing with the subject of monopoly and combination the powers of the Attorney General are clearly defined. He alone is vested with power to enforce the Sherman Act. It is his duty to act when practices unduly restrain or interfere with the free flow of interstate commerce. His powers in respect to the trust laws are limited to this special field of business activity. He has neither the express nor the implied power to interfere with or attempt to guide the internal affairs of business organizations or trade associations, nor has he any desire to do this.

The Department of Justice is, therefore, interested only in the acts and conduct of individuals and corporations. It deals with groups of individuals only in those cases where the individuals are alleged to have combined for some illegal purpose. It is not within the power of the Attorney General affirmatively to approve trade rules or practices. A practical reason for not attempting this is that neither he nor any other law officer can accurately forecast what individuals may undertake to do in a particular industry pursuant to trade rules. In short, the Department of Justice is not concerned with "Codes of Ethics" or Codes of "Trade Rules" or "Trade Plans" unless illegal practices result

from their operations or unless (as in rare cases) the rules on their face obviously contemplate action which if taken would be unlawful.

The Federal Trade Commission is in a somewhat different case. While it has no jurisdiction to enforce the Sherman Anti-Trust Act it has jurisdiction to investigate unlawful practices and to enforce provisions of the Clayton Act. In the exercise of its jurisdiction to deal with unfair practices the Commission has not confined its activities to investigations and prosecutions but in the desire to aid business has developed the practice of holding conferences. Out of this has come the Federal Trade Practice Conference which, started as an experiment, has now become recognized as a valuable institution. The Department of Justice has no hostility to the Federal Trade Practice Conferences. On the contrary, it approves these conferences and believes that within their legitimate field they afford valuable opportunity for education and for constructive progress in industry. It also recognizes that these conferences belong to the province of the Federal Trade Commission with whose activities the department has not interfered and with whose aims it is in harmony.

Trade Associations are, as you know better than others, the result of similar natural evolution and business necessity. The courts have long since recognized their legitimate functions and have fully appreciated their powerful influences in American trade and industry. As I have already stated, the law officers of the Department of Justice are well aware of these facts and they have no interest and no point of view adverse to the proper activities of trade associations. In fact they have no concern with the affairs of those associations except as individual members through the use of these associations or their rules may adopt practices which lead to violation of the anti-trust laws.

Perhaps it is only reasonable to expect that certain excesses of zeal are bound to occur in the experimentation with business practices which are a feature of the evolution of the trade association. Candor, however, compels the statement that here and there such illegal practices do come to light. Fortunately they are not characteristic of the work of the great body of trade associations. Some of these practices are unlawful because discriminatory or because they aim at monopolization of channels of distribution, or for other reasons. But the complaint most often made is that of price fixing and in certain quarters convincing evidence of this practice has been found by the Department of Justice.

For many, many years the fixing of arbitrary prices by the agreement of competitors has been viewed as contrary to sane public policy. The courts have long since declared it to be illegal. There is nothing vague, intangible or difficult to understand about this practice. Everyone knows that it is illegal. No one can be engaged in this practice without knowing it, and no one needs a lawyer to tell him whether he is in fact fixing prices by means of understandings or agreements with competitors.

On this as on similar questions, the Trade Commission and the Department of Justice are, so far as I know, entirely in harmony. Neither one has ever sanctioned or intended to sanc-

tion this practice. There have, nevertheless, been recent instances when this practice of price fixing has been attempted by the misuse of so-called Codes of Ethics or Trade Rules. Fortunately the number engaged in these practices is relatively inconsiderable and their conduct has not been imitated or approved by trade associations generally. In this one respect, any rate, when individuals violate the law they must not expect to justify excuse their illegal conduct by the adoption of formal resolutions or trade rule. Where these illegal practices exist the Attorney General intends to check them by appropriate legal action. That is his duty. Fairness to the other trade associations, and justice to other business interests as well as to the public generally require the duty be firmly and impartially performed.

But in all this there is not cause for anxiety or uncertainty in the business world. There are no revolutionary policies impending. The number who take chances are relatively few, and those who take chances should not complain of the consequences. You will agree that no legal proceeding aimed at price-fixing should give the slightest concern to the business world in general and you need have no fear that any conflict of interest exists between the Trade Commission and the Department of Justice. There is no divergence in their aims. The Federal Trade Commission as well as the Attorney General and his staff desire the same administration of law as well as stability in business conditions. Sure you have the same desire.

I have endeavored to make clear to you the attitude of the Attorney General and at the same time to point out the very distinct limitations which encompass his official activities. With this frank statement to you, we feel that we have a right to expect active cooperation from you. We ask of your numerous associations use the powerful influence to eliminate the business practices which result in price-fixing by agreement and other practices which lead to illegality. The Anti-Trust laws are primarily aimed to protect the economic opportunity of the individual and to promote steadily rising standards of fairness to justice. All of us believe this and surely both as lawyers and as business men we ought to work together to realize this purpose.

STIMULATING TRADE

In Chicago, to stimulate trade, electrical inspectors have been asked to search for and condemn installations in old buildings which do not conform with the city ordinance. The result has been a deluge of overhauling work for electricians. Now the Chicago Master Plumbers' Association has appointed a committee to tap with the city authorities the matter of having the city plumbing inspectors do similar work regarding defective plumbing in buildings and homes. Why not let Master Plumbers' Associations throughout the country get busy along similar lines? By working for and securing such an inspection they would not only be helping to safeguard the health of the community but would be developing a healthy lot of work, much of which would be on non-competitive basis. — (Weston Plumbing and Heating Journal).

THE OBSERVER

What He Hears and Sees on His Rounds

The corps of industrial and distribution census enumerators are rapidly completing their campaign to ascertain as accurately as possible what San Francisco and northern California manufacturers and distributors are doing, and to gather in all facts relative to manufacturing plants of all descriptions and just how the products of the plants are disposed of, according to John W. Curry, Chief Census Supervisor for northern California.

"Our enumerators have been making rapid progress as is possible in recording all essential information pertaining to products made and distributed in northern California. Once recorded, this information will be of value both to manufacturers and distributors and we therefore appeal for every possible assistance which those to be enumerated can give."

Schedules to be filled in by manufacturers, distributors, contractors, and hotels were mailed direct from the Census Bureau in Washington several months ago. Recipients of these schedules who have not yet mailed their schedules or who have not been called upon by enumerators are urged to send them as soon as possible to the San Francisco office, fourth floor, Civic Auditorium building, to be checked.

"Those firms who have so far failed to mail in their returns will be called upon in the next few days by enumerators. The enumerator will ask questions direct and under the law must have a direct answer. In some cases, firms have refused to make reports. There is no need for any firm to refuse to answer the questions. Answers are held confidential by the Census officials. There is no possibility for the income tax collector, the municipal or state tax collector, friends or competitors ever seeing any of this information. Census employees are sworn under penalty of severe punishment not to disclose information."

"When complete, the data accumulated by the various forms of distribution and manufacturers census will be arranged in groups totals in such a manner that no one may ascertain any definite information about any particular firm."

"I believe that when manufacturers, distributors, including retailers, wholesalers, contractors and others realize that the entire census is confidential, they will give us their hearty cooperation without withholding this information so essential to your business and industrial welfare," concluded Curry.

Protecting the safety of securities, that thought which ever since the stock market debacle has been uppermost in the minds of all investing folk from the purchaser of a one hundred dollar unit to the company which handles investment funds on a gigantic scale, will be discussed as applied to real estate securities before the members of the Mortgage and Finance Division of the National Association of Real Estate Boards at the Association's 23rd annual convention to be held in Toronto, Canada, July 9, 10, and 11. "How to Safeguard Real Estate Securities Through Proper Planning and Efficient Management," is the subject on which Walter S. Schmidt, Cincinnati, will address the mortgage brokers. Mr. Schmidt, who is a member of the National Association's board of directors, will tell what

the realtor specializing in the mortgage and finance field must do to operate his business with assurance of safety and protection under present day conditions.

Mortgage conditions throughout the country and the real estate loan methods which must be applied for successful business during the coming year will be microscopically scrutinized and explained by R. Graeme Smith, of the Connecticut General Life Insurance Company, Hartford, Connecticut, who will address the Division on "Problems of the Mortgage Banker in 1930 and Suggested Solutions." Mr. Smith outlines for his discussion the following four operating problems which the mortgage broker will find important during 1930: adjusting activities to the present volume of business; meeting obligations to lenders; foreclosure procedure, and managing and disposing of foreclosed property.

Determining the costs of a new project and the best procedure in handling these costs will be discussed by Victor Goggin, New York City, of Goggin and Ripley. Mr. Goggin will give practical hints for saving money in financing undertakings without injuring the quality of the project involved.

Sydney Middleton, Chicago, will tell what to do and what not to do in managing a mortgage business in his talk on "Policy Dangers in the Operation of a Mortgage Loan Bond Business." Mr. Middleton is vice-chairman of the executive committee of the Mortgage and Finance Division. He will draw on more than twenty years actual experience in the mortgage business in presenting practical suggestions to Division members.

Since 1925, a period of only four years, building and loan assets of this State have nearly tripled, increasing from \$100,000,000 to \$329,000,000, while the number of associations, including branches, has increased two-thirds, from 176 in 1926 to 295 in 1930, according to a report of Charles A. Whitmore, State Building and Loan Commissioner of the California Building-Loan League.

Keeping in step with economic business evolution, more recently emphasized by the need for curtailment of expense through volume operation there has been a veritable flood of mergers and grouping of associations in building companies. The movement began about 1927, when four mergers were consummated. In the fiscal year ending June 30, 1928, fifteen mergers were accomplished affecting \$15,600,000, of assets. The following year there were ten mergers, but from July 1, 1929, to April 30, 1930, a period of only ten months, there were 20 mergers representing assets of over \$2,000,000.

Since 1927 there has been a total of 49 mergers with assets of \$163,000,000. There is considerable significance in the spurt during the last ten months, and, according to reports reaching the division's office, there are many consolidations now in the making.

How to reduce the cost of the comfortable, convenient, and good looking family home so that its price will be within the reach of people of

limited incomes will occupy the attention of the nation's Realtors at the annual convention of the National Association of Real Estate Boards, to be held in Toronto, Canada, July 9, 10 and 11. The extent to which improved technique and mass production can effect this end will be explained by Ernest P. Goodrich, New York City, before the July 11 general convention session in his address on "Reducing Housing Costs by Improved Technique." Mr. Goodrich, who has for many years been active in all phases of housing research and is now president of the Research Institute for Economic Housing, is one of the country's outstanding consulting engineers. He has designed and erected buildings of all kinds, has acted as consultant to city planning commissions, and has been identified with the design and construction of some of the country's major dry docks and harbors.

Roger W. Babson recently pointed out in an article in the Philadelphia Bulletin, that while this country spent last year about \$2,000,000,000 in advertising, this was a prime force in moving about \$40,000,000,000 worth of goods, so the proportion did not seem large to him.

If there are any people who consider that money spent in advertising is partly or wholly wasted, they should consider what this noted economist says.

Also they should consider what would have happened if that \$2,000,000,000 had not been spent. Advertising has a general tendency to draw business away from inefficient and unsuccessful producers and distributors, to those who are doing business more effectively. If that advertising had not been printed, it seems likely that instead of paying \$40,000,000,000 for the production and distribution of these goods, the people might have been paying \$50,000,000,000 to \$30,000,000,000. Such a change could not of course occur in a single year, but if advertising had never developed as it has in recent years, it seems probable that the same products would have cost the larger sums named above.

Many of them would never have developed at all. They could not have been sold without advertising on a very generous scale. If there had never been much advertising of automobiles, for instance, there would not probably be today half as many automobiles as are now owned in the United States.

Advertising helps toward quantity production and distribution, which is one of the principal factors in the development of our prosperity and which brings luxuries that our fathers never dreamed of within the reach of the average citizen. — Vallejo Times-Herald.

Damages aggregating \$21,094.18 are sought in two suits filed in superior court in Santa Rosa against Petaluma Oil and Burner Company, and J. W. Dawson and F. L. Sandercock. The accident occurred through negligence in operation of an oil truck, so states the complaint filed.

The Weaver Lumber Company, Ltd., Los Angeles, and the T. A. Bennington Hardwood Flooring Co., Maywood, have been merged and will operate under the name of T. A. Bennington Commercial Company, according to O. A. Topham, president of the new concern.

John Joseph Brosnan, 87, Vallejo pioneer, passed away at his home June 8. He was at one time connected with the Pope and Talbot Lumber Co.

The brief of the Railroad Commission in support of the application of the Western Pacific California Railroad Company, a subsidiary of the Western Pacific Railroad Company, for a certificate of public convenience and necessity for the construction of a railroad line from Niles, Alameda County, to Redwood City, San Mateo County, for the purpose of affording a direct rail connection with San Francisco, has been forwarded to Washington for filing with the Interstate Commerce Commission, by Mr. Arthur T. George, attorney for the Commission.

The proposed line of railroad, connecting with the main line of the Western Pacific near Niles, will be approximately 40 miles in length, and will give to the Western Pacific an all rail entrance into San Francisco. The Railroad Commission is a party to the proceeding by virtue of filing a formal petition in intervention, and permission to intervene was granted by the Interstate Commerce Commission. The Railroad Commission offered testimony in support of the application, and placed Mr. A. G. Mott, its chief engineer on the witness stand at the hearing before the Federal body in support of its intervention.

The brief declares the belief of the Railroad Commission that the welfare of the state of California, and particularly of the city and county of San Francisco, and the San Francisco peninsula, will be greatly benefited by the granting of the application of the Western Pacific. It points out that the Western Pacific and the Southern Pacific companies are now in active competition for San Francisco traffic. The construction of the proposed line will enable the Western Pacific to strengthen its competitive position, in the opinion of the Railroad Commission.

San Francisco is now entered by the rails of but a single carrier, the Southern Pacific, the brief points out. It is inconceivable that the existing double track of the Southern Pacific will be adequate to meet the needs of San Francisco commerce indefinitely in the future, the brief declares.

Service of the Western Pacific to San Francisco and the San Francisco peninsula would be greatly improved by construction of the proposed line, it is pointed out. The proposed route of the connecting link of the Western Pacific is the only feasible low level route over which an additional railroad may enter San Francisco, the brief states.

Construction of the proposed line will not result in unnecessary duplication of facilities, and will make available to other trunk line carriers a rail entrance into San Francisco, it is stated. Construction of the proposed line will stimulate the industrial development of the San Francisco peninsula area, the Commission asserts. It is also contended that the offer of the Southern Pacific to act as a bridge carrier for traffic of the Western Pacific between Niles and San Francisco does not satisfy public convenience and necessity and would not be an adequate substitute for construction of the proposed line.

FIVE-DAY WEEK IN DENVER

The Journeymen Plumbers and Gasfitters' Local Union No. 3 has filed notice with the State Industrial Commission that it has adopted the five-day week, effective May 5, 1930. The Denver Master Plumbers Association has agreed to this five-day week program which applies to new work only. Union plumbers will be furnished for all emergency work on Saturdays. There will be no raise in wages. The present scale is \$11 per day.

PACIFIC COAST BUILDING IN MAY REGISTERS \$25,695,548

Following is a report of building permit activities in Pacific Coast cities for the month of May, in addition to those for the corresponding period in 1929, as reported by building department executives:

City	CALIFORNIA		May, 1929

CONTRACT METHOD CHEAPER THAN DAY LABOR, SAYS ENGINEER

Address of Major-General Lytle Brown, Chief, Corps of Engineers, U. S. Army, before National Executive Boards of the Associated General Contractors of America, at Washington, April 29, 1930

The branch of the government with which I am connected expends about \$100,000,000 a year for services, supplies and construction work. It has many contracts to make, though it may do a very substantial part of its construction work by government-owned plant and hired labor. The settled policy is to do as much construction work by contract as is possible. The reasons behind this policy are:

- (1) It is contrary to our principles to place the government into competition with private industry.
- (2) In the long run, contractors can, by all odds, do work much more economically than can any agency of the government, and with a highly skilled organization can do it better.

When Day Labor Is Used

There are occasions when the government must do work by hired labor. They are, in general:

- (1) Where it is apparent that bids to do the work will not be received.
- (2) Where bids that are received are unreasonably high.
- (3) In cases where the work is of emergency nature that will not permit of the formality of receiving bids and making contracts.

These three cases cause the government to have on hand considerable quantities of plant, much to the irritation of some who assume that this plant is held as a threat to them. The fact is that the plant is accumulated by virtue of the reasons that I have just given, and is maintained to meet similar cases in the future. It is held in idleness whenever none of these cases is existent. If those who object to its maintenance are of the belief that it is used as a threat to legitimate bidders, they are mistaken in their belief, and will be shown to be so whenever the question is raised and a fair hearing is given.

Estimates Versus Bids

The necessity of getting reasonable bids for government work is not only economic necessity, but, furthermore, is required by the law that prohibits the awarding of the contract to any bidder whose bid exceeds the government estimate by 25 per cent.

That provision of law has been the cause of much fault-finding with the contracting officer's estimate. Many claims are that the estimate is too low and that the work cannot be done at its figure. Of course, man is not infallible, and maybe most men

would be inclined to estimate a little low when the other fellow had to do the work. But the estimate will be revealed when the bids are opened, and the low bidder will be given a period of five days in which to question the correctness of the estimate.

There is a tendency on the part of some contractors to claim that the government estimate is a bid on the part of the government against them. Of course, the claim is not well founded, for the contractor's bid is expected to be well in advance of the government estimate in order to cover a reasonable profit. A bid that is obviously too low should be a source of regret to any right-thinking contracting officer rather than a pleasure for loss money. This will be to the ultimate injury of the government's work.

Rigid Impartiality

There is a certain amount of formality required in government contracts and in the bidding on the same. That is made necessary by virtue of competitive bidding. There must be rigid impartiality, and to that there is required absolute equality in the conditions that all bidders must face. Another breeder of formality is introduced by the great care taken to place matters of right in such an aspect that they will withstand the most rigid test of the courts, which are not always guided by reason, but by the technicalities of the law.

The specifications are the body of the contract, and in them are found most of the troubles that come in the execution of a contract, and there is found, if anywhere, the main cause of friction between contractor and contracting officer. Standard specifications have done much to eliminate disputes over the qualities of materials and supplies, but there is such a varied character in works that standard specifications are difficult to frame.

Greatest Fault in Specifications

The greatest general fault that I have noted in specifications is the same that is found in faulty military orders. They often devote too much effort to the way things are to be done and so lose sight of the results to be obtained. A clear statement of the results to be obtained and the leaving of the methods to the resourcefulness and initiative of the

contractor is the proper way to draft them. In many cases, the contractor is so bound by prescribed methods that all responsibility is taken from him, and failure is then chargeable to the man who drew the specifications and not to the contractor. I have recently seen specifications which leave too much to interpretation, and so give to the contracting officer the opportunity to be unduly severe. There should be possible but one interpretation to a specification, and that a reasonable one.

In all cases where matters are important, a timid and suspicious man is a curse. A man who is always afraid of criticism has no business as a party to a contract. He will adjust all things to his own safety and will lean over backward, and so, by his particularity, will destroy mutual trust as well as profits, all to no other purpose than to quiet his own fears.

Meaning of a Contract

A contract is a coming together in mutual agreement for the supposed purpose of mutual benefit. Too often that is all the coming together there is, for after that the parties seem to do all they can to pull apart. Each, immediately the work begins, regards the other as his enemy, to be watched and circumvented if possible. No contract can be possibly carried out in that spirit. There is not likely to be any mutual benefit from that contract, or in any future one that those same parties may make. There should be no objection to each living on the work and watching it in the closest interest every step, but there should be no watching of each other, no suspicion of any kind. The results will always tell the tale.

If a contractor's sole object in life is as large a profit in money as he can possibly make, I am sure that he will not be the successful man at contracting, not successful in the largest sense. There must be some other motive besides contractor's money profit; there must be an intense desire to do a fine piece of work for the work's sake. And this desire must be so strong that a workmanlike job will remain and remain for long to be an honor to the man who did it and joy forever to those who observe it when he has gone to his reward. Who thinks of the money that Chippendale got for his fine furniture? Or who meditates on the money profit of the contractor when he looks upon the wonderful works that stand out from the past? The thought is of the honor, the brain and the skill of the master workman. He shall take nothing of his labor which he may carry away in his hand.

HOLOPHANE INSTITUTE TO OPEN NEW QUARTERS

The San Francisco Division of the Holophane Company, Inc., will open new quarters in the Russ Building, June 9th, with approximately two-thirds of the space devoted to the Holophane Light & Vision Institute.

The purpose of the Institute is to demonstrate to users of illumination the fundamentals of light and vision and the application of specific light-control devices to the solution of various problems; also to provide a lighting laboratory for the professions, freely accessible, without obligation. Lecture facilities will be provided.

The scope of the Light and Vision Institute will be as broad as is practicable, so that it will be in effect, a contribution benefiting the building industry as a whole.

IN NEW QUARTERS

Chamberlin Weatherstrip Co., Inc., announces the removal of offices from 247 Minna street to larger quarters at 895 Post street. Increased business necessitated the opening of uptown office quarters.

BUNKERS COMPLETED

George Blanchard, operating the Luna Park Gravel Company on the Berryessa Road, San Jose, announces the completion of bunkers involving an expenditure of \$15,000. Equipment for the plant was installed by Edward R. Bacon Company of San Francisco.

ARCHITECTURAL PRIZE AWARD

Walter Louis Relchardt, of New York, 22, just graduated at the University of Pennsylvania, has been awarded the Prix de Rome for architecture students. He receives more than \$8,000 to cover expenses for three years of study at the American Academy in Rome.

WILLIS FROST CANDIDATE FOR COUNTY SURVEYOR

Willis G. Frost, civil engineer, residing in Redwood City, has announced himself a candidate for the office of county surveyor of San Mateo County a position now held by Geo. A. Kneese. James S. James, formerly city engineer of Burlingame, is also a candidate.

FORMING CORPORATION

Jesse Shay and Company, Ltd., a corporation, has taken over the business and assumed the liabilities of the business formerly conducted by Jesse Shay, individually. The corporation is now in process of formation. The concern will engage in a general plastering contracting business.

STARTS OPERATION

Laminated Panel Cabin Co., 1222 42nd Ave., Oakland, has started production of ready-cut mountain cabins and summer homes which will sell for prices ranging from \$150 to \$300. The concern is operated by E. A. Blackman.

ON ROUND-THE-WORLD TRIP

Architect Richard J. Neutra of Los Angeles, has sailed on a trip around the world, which will bring him back to California in the fall. He is now enroute to Japan on the Shinyo Maru. He will address Japanese architectural associations at Tokio, Kyoto and Osaka. He has speaking engagements in Europe at Frankfurt, Berlin, Zurich and other cities. He will attend the convention of Les Congres Internationaux d'Architecture at Brussels in October. Mr. Neutra studied architecture in Munich and Vienna.

STEEL WINDOW CONTRACT IS AWARDED

Michell & Pfeffer Iron Works of San Francisco has been awarded a contract to furnish Ariston steel windows for 107 buildings to be erected at Randolph Field in Texas, from plans prepared by Government architects. The contract price runs in the neighborhood of \$50,000.

The project involves the erection of 65 double houses for N. C. O. Quarters and 42 homes for Company Officers' Quarters, the former to be two stories in height and the latter, one-story. Construction will be of concrete with stucco exterior.

OPENS BRANCH OFFICES

Aroia Products, Inc., dealers in Neon electrical signs, recently established a branch office with stock in San Francisco at 311 California St. This firm plans in the near future to establish a manufacturing plant in this vicinity. E. P. Prescott is Manager.

TRAFFIC MANAGER NAMED

The Junior Chamber of Commerce of San Francisco announces the successful termination of a year old fight for the appointment of a traffic manager for the port of San Francisco by the State Harbor Board.

L. M. King, civil engineer and formerly commercial agent for the State Board of Harbor Commissioners, was named as traffic manager with the responsibility laid upon him to reach out and obtain for San Francisco more tonnage over the city wharves.

FORD PLANT AT RICHMOND BEING FIGURED

Bids are now being received for Ford Motor Company, Rouge Plant, Dearborn, Michigan, for a \$5,000,000 plant.

The plans provide for a modern factory building of steel and brick, and to be made as near as possible free from danger of fire. Provisions are also made for a very ornamental steel and wire fence that will surround the property, and also for the beautification of the grounds with lawns, plants and shrubbery.

It is understood that plans call for the driving of \$100 piles for the wharf and for the foundation of the buildings.

Albert Kahn, Inc., are the architects, and William Bremner, personal representative of the architects, is at the Carquinez Hotel, Richmond.

PAUL V. TUTTLE MOVES TO NEW QUARTERS

Paul V. Tuttle, architect, announces the removal of his offices from 337 Twelfth St., Oakland, to 1117 Pearl St., Alameda. Mr. Tuttle has fitted up a studio at the rear of his residence and will continue his practice there temporarily.

BUILDINGS CONDEMNED

The State Division of Housing and Sanitation, during April, made 631 original housing inspections, 46 re-inspections and checked 36 plans for apartment houses and hotels, according to Will J. French, state director of Industrial Relations. There were 13 buildings demolished or closed as unfit for human habitation. Only 10 per cent of the original inspections were found to comply with the State Housing Act.

DEPARTMENT OF CITY PLANNING URGED FOR NEW YORK

Mayor Walker of New York City, has introduced into the Board of Estimate and Apportionment a bill creating a department of city planning, under the control of a single commissioner, to advise on matters of building and zoning and all future developments in the metropolis.

Unsuccessful attempts have been made at the last two sessions of the state legislature to pass a bill creating such a department with arbitrary powers. Under the provisions of the present bill, the department would have merely advisory powers, but its advice would have to be sought before changes could be made in a model plan, which the department would set up.

MAINTAINS OFFICES

Alfred H. Feasey, formerly of Mattock and Peasey, which company recently effected a dissolution of partnership, is operating a contracting business and maintains offices at 210 Clara St., San Francisco.

LARGER QUARTERS

Flanagan Machinery Company, Inc., formerly of 321 Clay St., Oakland, has moved to larger quarters and now occupies the entire three-story building located at 522 Fourth St., according to Ben J. Flanagan, president. Sales and service are directed from the Oakland office for San Francisco and Eastbay Districts as well as Central and Northern California.

OAKLAND FIRM AWARDED SAN JOSE CONTRACT

The Pacific Heating & Ventilating Co. of Oakland, with offices in the Builders' Exchange Bldg., were awarded the heating contract for the Junior High School at San Jose, as was announced in Saturday's "Builder." This company is composed of L. J. Dolan, Richard Porter and A. P. Devincenzi and has no connection with any other heating company of similar name in California.

PHOENIX TO VOTE ON WATER AND SEWER BOND ISSUE

The city commissioners of Phoenix, Arizona, have formally set June 25 as the date for a special election on a \$3,422,000 bond issue for water and sewer improvements. The bond issued, if voted, is to be divided as follows: water system improvements \$2,364,000; sewer system, \$817,000; payment of notes covering loans for laying 5 miles of concrete pipe lines in 1927, \$200,000; payment of a loan from the Salt River Valley Water Users' Assn., \$41,000.

OAKLAND BARS PATENTED STREET PAVING

More than \$300,000 in street contracts specifying patented paving are to be cancelled and new proceedings will be started calling for bids under open specifications. C. Stanley Wood, assistant city attorney, has notified W. N. Frickstad, city engineer.

Frickstad stated that Wood had advised him that every street paving contractor awarded contracts had agreed to city council action abandoning them.

City Engineer Frickstad said: The contracts will be cancelled and resolutions adopting plans and intention to do the work will be rescinded. Bids will then be called for under open specifications and no patented paving will be considered.

PASADENA EXCHANGE ELECTS

Paul Schwenzfeier succeeds Wm. T. Loesch as president of the Pasadena Builders' Exchange. Geo. L. Throop succeeds H. O. Clarke as vice-president and H. O. Clarke was made treasurer for the ensuing year.

Directors of the organization are: H. O. Clarke, Thornton Hamlin, Lathrop Leishman, Wm. T. Loesch, H. M. Vaughan, Glenn I. Billheimer, Frank Lander, E. O. Nay, Geo. L. Throop, Herman C. Folts, Paul Schwenzfeier, H. E. Tabor, N. O. Duvall, G. O. Cypherd, Charles Otto.

BONDS

MANHATTAN BEACH, Los An-
 geles Co., Cal.—Manhattan Beach
 City School District defeated \$18-
 600 bond issue June 2. Proceeds
 were to be used for purchase of two
 new school sites and erection of
 eight-room school building in north
 section of city. Issue for smaller
 amount will probably be resubmitted
 to the voters next month.

ORANGE CENTER, Fresno Co., Cal.
 —Mass meeting has been called in the
 Orange Center School District to dis-
 cuss proposal to issue bonds of \$35-
 000 to finance erection of a new school
 building.

MOSS LANDING, Monterey Co., Cal.
 —An election will be held July 1 in
 Moss Landing School District to vote
 bonds of \$8000, to be used for altera-
 tions and improvement of schools. W.
 H. Weeks, Hunter-Dulin Bldg., San
 Francisco, 1736 Franklin St., Oakland,
 and Bank of Italy Bldg., San Jose, ar-
 chitect.

MARYSVILLE, Yuba Co., Calif.—Election will be held June 27 in the Linda School District to vote bonds of \$9,500 to finance school improvements. Trustees of the district are: M. S. Mitrovitch, A. R. Gledhill and Wm. Dinsmore.

CHICO, Butte Co., Calif.—Board of Education contemplates calling bond election to finance erection of new schools and additions to standing structures. The construction program provides for the erection of a high school auditorium, gymnasium and cafeteria and an amount toward the junior high school approximately proportional to the 9th grade students to be housed in the junior high school, a new junior high school on the high school property including the 9th and the 7th and 8th of the elementary district, a kindergarten room at Salem St. school and a new Chico Vecino school.

VISALIA, Tulare Co., Cal.—Visalia Union High School District approved bond issue of \$210,000. Previous issue defeated.

CHURCHES

Contract Awarded.

Bids held under advisement.

MENDOCINO COUNTY, Cal.—Following bids received June 5 by State Department of Public Works, Division of Water Resources, Sacramento, to construct rock jetty or dyke 170 ft. long and containing approximately 2,000 cu. yds. of quarry rock, at the mouth of the Navarro river, 20 miles south of Fort Bragg:

Christie & Allen, Ft. Bragg.....\$ 4,575
C. R. Perkins, Ft. Bragg.....7,490
Robt. Heaney, Hayward.....8,750
W. C. Colley, Berkeley.....11,555

IRRIGATION PROJECTS

CALIFORNIA.—Following permits were granted by the State Department of Public Works, Division of Water Resources, during the month of May 1930, authorizing appropriation of water:

Permit 3470, Application 6368 (Inyo Co.) Issued for Pacific Sulphur Corp., Bishop, for 0.11 c.f.s. from Last Chance Springs for mining, milling and domestic water will not be returned to stream.

Per. 3471, App. 6341 (Tuolumne Co.) Jos. Brown, Chinese Camp, Calif., for 0.25 c.f.s. from Smarts Gulch for domestic and stockwatering. Est. cost \$550.

Per. 3472, App. 6429 (Humboldt Co.) C. M. Salyer, Salyer, Calif., for 125 c.f.s. from Campbell Creek for mining. Est. cost \$91,000.

Per. 3473, App. 6566 (San Bernardino Co.) Christian Baumann, Phelan, Cal., for 0.035 c.f.s. from 4 unnamed springs for domestic and recreational uses. Est. cost \$2,500.

Per. 3474, App. 6520 (Los Angeles Co.) Candido Herrere, San Fernando, for 0.037 c.f.s. from Muerte Canyon (underground water) for irrigation and domestic use on 1 acre. Est. cost \$2,000.

Per. 3475, App. 6565 (Los Angeles Co.) I. A. Sharp, Palmdale, for 0.025 c.f.s. from Deer spring for irrigation and domestic use on 2 acres. Est. cost \$425.

Per. 3476, App. 6567 (Del Norte Co.) Frank Symms, Crescent City, for 0.91 c.f.s. from unnamed creek for domestic purposes. Est. cost \$200.

Per. 3477, App. 6549 (Eldorado Co.) L. T. Butts, Placerville, for 0.12 c.f.s. from Emigrant ravine creek for irrigation on 10 acres. Est. cost \$500.

Per. 3478, App. 6576 (Amador Co.) E. T. Bamert, Clements, Calif., for 1.25 c.f.s. from Mokelumne river, for irrigation on 100 acres. Est. cost \$4,000.

Per. 3479, App. 6587 (Contra Costa Co.) H. R. Vail, Oakland, for 37 c.f.s. from Old River, Dredger Cut and Italian Slough for irrigation on 253.90 acres. Est. cost \$10,000.

Per. 3480, App. 6406 (Los Angeles Co.) Big Rock Ranch Co., Los Angeles for 6,000 acre feet per annum from Big Rock Creek, surface and underground for irrigation and domestic use on 2520 acres. Est. cost \$150,000.

Per. 3481, App. 6583 (Eldorado Co.) Pacific Gas & Elec. Co., San Francisco for 1 c.f.s. from Alder Creek for power purposes. Est. cost \$25,000.

Per. 3482, App. 6588 (San Joaquin Co.) American Trust Co., San Francisco, for 1.75 c.f.s. from Stanislaus river for irrigation on 140 acres. Est. cost \$2500.

Per. 3483, App. 6539 (San Joaquin Co.) H. R. Russell, Modesto, for 1.91 c.f.s. from Drainage or waste ditch of Oakdale Irrigation District draining through natural depression for irrigation on 153 acres. Est. cost \$50.

Per. 3484, App. 4214 (Inyo Co.) Burnham Chemical Co., Westend, Calif., for 0.02 cu. ft. per sec. from 2 springs for domestic and mining use. Est. cost \$50,000.

Per. 3485, App. 4498 (Inyo Co.) Burnham Chemical Co., Westend, Calif., for 0.09 c.f.s. from Homewood Spring for domestic and mining use. Est. cost \$35,000.

Per. 3486, App. 5555 (Inyo Co.) Burnham Chemical Co., Westend, Calif., for 0.065 c.f.s. from 2 springs and 12 underground water developments in Farns and Burnett Canyon for domestic and mining use. Est. cost \$10,000.

Per. 3487, App. 5932 (Inyo Co.) American Potash & Chemical Corp., Trona, Calif., for 0.0337 c.f.s. from Avalon Springs for industrial, domestic and mining use. Est. cost \$10,800.

Per. 3488, App. 5933 (Inyo Co.) American Potash & Chemical Corp., Trona, Calif., for 0.11 c.f.s. from Avalon Wash for industrial, domestic and mining use. Est. cost \$960.

Per. 3489, App. 5934 (Inyo Co.) American Potash & Chemical Corp., Trona, Calif., for .011 c.f.s. from Pot Hole Spring, for industrial, domestic and mining use. Est. cost \$840.

Per. 3490, App. 4973 (Inyo Co.) Engineers Exploration Corp., Los Angeles, for .006 c.f.s. from Bainter Spring, for domestic and mining use. Est. cost \$1500.

Per. 3491, App. 5998 (Inyo Co.) Nelle E. Dean, Pasadena, for .025 c.f.s. from Sweepstakes Spring for mining and domestic use. Est. cost \$3,000.

CALIFORNIA—Following is a list of applications filed with the State Department of Public Works, Division of Water Resources, during the month of May, 1930, seeking permits to appropriate water:

Appl. 6665 (Modoc Co.) Cedarville Civic Club, % Mrs. Ray Hill, Pres., Cedarville, Calif., for 0.75 c. f. s. from Quail Creek Spring tributary to Deep Creek for domestic and municipal purposes. Est. cost \$10,000.

Appl. 6666 (Trinity Co.) Morris Group Gold Mining Co., % H. W. Brannan, Burnt Ranch, Calif., for 10 c. f. s. from Clark Creek tributary to Etterpoom Creek, S. Fork Trinity River, for mining and domestic purposes. Est. cost, \$2500.

Appl. 6667 (San Diego Co.) Hallam C. Stone, Box 534, El Cajon, Calif., for 0.5 c. f. s. from Campo Creek, also underground water tributary to Tecate River for irrigation and domestic purposes on 70 acres. Est. cost, \$5000

Appl. 6668 (El Dorado Co.) A. Carlson, Camino, Calif., for 0.5 c. f. s. from waste and seepage water

CALIFORNIA—Following is a list tributary to North Canyon, tributary to South Fork American River for irrigation and domestic purposes on 70 acres. Est. cost \$2000.

Appl. 6669 (San Bernardino Co.) Geneva Catherine Baxter, Victorville, Lucerne Valley, Calif., for 0.26 or approximately 104 miners inches from Deep Creek Canyon and six unnamed springs tributary to Mojave Desert for irrigation and domestic purposes on 20 acres.

Appl. 6670 (Sutter Co.) H. S. Fasig and W. H. Saylor, Knights Landing, Calif., for 3.46 c. f. s. from Sacramento River tributary to Suisun Bay, for irrigation purposes on 276.81 acres. Est. cost, \$4000.

Appl. 6671 (Butte Co.) Charles M. Lee, Rt. 1, Box 197A, Oroville, Calif., for .5 c. f. s. from Cottonwood Creek tributary to Sacramento River for domestic and recreational purposes. Est. cost \$25.

Appl. 6672 (Colusa Co.) Colusa Development Co., A corporation, % Thos. Rutledge, Colusa, Calif., for 9.87 c. f. s. from Sacramento River, tributary to Suisun Bay for irrigation and domestic purposes on 787.7 acres. Est. cost \$20,000.

Appl. 6673 (Riverside Co.) Motor Transit Terminal Corns. 1005 S. Mateo St., Los Angeles, Calif., 0.75 c. f. s. from a pond for irrigation purposes on 30 acres. Est. cost \$200.

Appl. 6674 (Mono Co.) L. L. Alauzet, 3925 W. 23rd St., Los Angeles, Calif., for 200 gallons per day from Lower Rock Creek tributary to Owens River for domestic purposes. Est. cost, \$250.

Appl. 6675 (Sierra Co.) Charles E. Herron, % Geo. F. Taylor, Downville, Calif., for 25 c. f. s. from Good-year Creek tributary to North Fork of Yuba River for mining purposes.

Appl. 6676 (San Bernardino Co.) The Mojave River Irrigation District, % Meserve, Mumper, Hughes & Robertson, 615 Richfield Bldg., Los Angeles, for 30,000 acre feet per annum from Deep Creek and West Fork Mojave River, tributary to Mojave River for irrigation purposes on 26,873.36 acres.

Appl. 6677 (Modoc Co.) Russell M. Bushey, Calby, Calif., for .12 c. f. s. from an unnamed stream tributary to Pit River watershed for irrigation and domestic purposes on 10 acres. Est. cost \$5.

Appl. 6678 (Sacramento Co.) G. H. Moreland, Rt. 6, Box 4320, Sacramento, for 0.3 c. f. s. from Dry Creek tributary to Sacramento River for irrigation purposes on 24.4 acres. Est. cost \$500.

Appl. 6679 (El Dorado Co.) Sierra Camps, Inc., Frank Kleiberger, Pres., of University of Calif., Berkeley, for 0.1 c. f. s. from Ralston Creek (tributary to Upper Echo Lake for recreational and domestic use. Est. cost \$200.

Appl. 6680 (El Dorado Co.) H. V. Madden, Placerville, .25 c. f. s. and 3 acre feet per annum, from Emigrant Ravine tributary to Hangtown Creek and S. F. & K. American River for irrigation purposes on 35 acres. Est. cost \$2000.

Appl. 6681 (Modoc Co.) C. C. Jones, Cedarville, Calif., for 1.63 c. f. s. from Steamboat Creek tributary to Middle Alkali Lake for irrigation purposes on 130 acres.

Appl. 6682 (Lake Co.) Martin Judge Jr., and Company, Crocker First National Bank Bldg., San Francisco, for 250 c. f. s. and 175,000 acre feet per annum from North Fork Cache Creek, tributary to Cache Creek for industrial and domestic purposes. Est. cost, \$3,000,000.

Appl. 6683 (Lake Co.) Martin Judge Jr. & Co., Crocker First National Bank Bldg., San Francisco, for 175,000 acre feet per annum, from North Fork of Cache Creek tributary to Cache Creek, for irrigation purposes on 50,000 acres. Est. cost \$1,000,000.

Appl. 6684 (Fresno Co.) Sherley De Vine, Dunlap, for .01 c. f. s. from an unnamed spring tributary to Mill Creek thence Kings River for irrigation and domestic purposes on 1 acre. Est. cost \$250.

Appl. 6685 (El Dorado Co.) J. S. Goldie, 1600 39th St., Sacramento, for 400 gallons per day from an unnamed creek tributary to South Fork of American River for domestic purposes. Est. cost \$200.

Appl. 6686 (Mono Co.) Clifford E. Brodie, 750 Central Ave., Los Angeles, for 200 gallons per day from Rock Creek tributary to Owens River for domestic purposes. Est. cost \$175.

Appl. 6687 (San Bernardino Co.) Stanley Visel, 145 N. Broadway, Suite 200, Los Angeles, for 446 gallons per day, from an unnamed spring for domestic purposes. Est. cost, \$300.

Appl. 6688 (Mono Co.) E. A. Montgomery, % Fred S. Smith, Bishop, for 0.065 c. f. s. from an unnamed spring, tributary to an unnamed watershed, thence Hammit Valley, thence Owens River, for mining, milling and domestic purposes.

Appl. 6689 (Nevada Co.) South Yuba Company, Ltd., 552 Holbrook Bldg., San Francisco, 50 c. f. s. from South Yuba River tributary to Yuba River for mining purposes. Est. cost \$10,000.

STREET LIGHTING SYSTEMS

FRESNO, Fresno Co., Cal.—Walker & Martin, Los Angeles, awarded contract at \$16,144 by city (102-D) to install lighting system in Fresno St. bet. O and Divisadero Sts.; Howard St. bet. Fresno and Divisadero Sts.; portions of Divisadero and Fresno Sts., involving installation of 76 electric lights, together with underground system.

Standards of combination steel and cast iron, single lamp. Engineer's estimate \$19,590.

SANTA CRUZ, Santa Cruz Co., Cal.—Proceedings have been started by city council to widen and install electric lighting system on Pacific Ave.

MACHINERY AND EQUIPMENT

EUREKA, Humboldt Co., Cal.—Merced-Braser Company, Eureka, at \$3,000 awarded contract by city council to furnish and deliver a portable asphalt plant for street department.

EUREKA, Humboldt Co., Cal.—Jewett-Rhodes Co., Eureka, at \$650, less \$100 for truck no longer required, awarded contract by city council to furnish Chevrolet dump truck for street department.

POMONA, Cal.—Until June 24, 12 noon, bids will be received by H. A. Leigh, city clerk, to furnish one steel dump body truck with 3-ton chassis. Further information obtainable from clerk.

KING CITY, Monterey Co., Cal.—Following bids received by city trustees to furnish and deliver truck for street department:

Cornell Tractor Co., Red Super-Tonner, with 1½ yard bed, steel dump body and hydraulic hoist, \$1,788.30. Model F D Red Super-Tonner speed wagon with 1½ yard steel dump body and hand hoist with two-speed gear for light or heavy body, \$1,575.

El Camino Garage, Model AA yard truck chassis with closed cab and wood 1½ to 2 yard dump body, equipped with hydraulic hoist, \$1,055.

King City Mercantile Co., International Harvester six-speed special 1-ton truck; equipped with St. Paul un-derbody, hydraulic hoist, 1½ yard combined steel body, \$1,575; same equipped with dual rear tires, \$1,710.

Bids taken under advisement.

BIGGS, Butte Co., Cal.—Until June 18, noon, bids will be received by L. E. Reynolds, clerk, Biggs Union High School District, to furnish new motor school bus, 30 to 36 passenger. Specifications and further information obtainable from above.

MARICOPA, Kern Co., Cal.—Until June 30, 7:30 P. M., bids will be received by C. B. Warner, clerk, Maricopa High School District, to furnish a two-ton truck chassis with body, capacity 36 to 40 passengers. Bidders to consider truck now in use. Specifications obtainable from above.

RAILROADS

SACRAMENTO, Calif.—Sacramento Northern Railway has applied to Interstate Commerce Commission to construct extension to "Holland Line" from point 0.6-mile north from the south boundary of Yolo county SE and south to point near town of Ryde on Grand Island, a distance of approximately 8.30-miles, all in Yolo and Sacramento counties.

FIRE EQUIPMENT

MARYSVILLE, Yuba Co., Calif.—American-LaFrance Fire Engine Co. awarded contract at \$10,500 by city council to build and deliver a 750-gallon pumper and hose body fire engine for Fire Department. An allowance of \$2000 has been made for the old chemical rig now in use.

CARMEL, Monterey Co., Cal.—Until July 2 bids will be received by City Council to deliver 750-gallon combination fire engine and pumper, fully equipped, to be delivered within 120 days. Further information obtainable from above.

MISCELLANEOUS SUPPLIES AND MATERIALS

SAN LEANDRO, Alameda Co., Cal.—Until July 2, 8 P. M., bids will be received by E. F. Hutchings, city clerk for supplying city with rock and screenings for year ending June 30, 1931. Specifications obtainable from city engineer. Certified check of \$1,000 payable to city of San Leandro, required.

OAKLAND, Alameda Co., Cal.—Bids are being received by J. E. Hazard, secretary, City of Oakland Port Commission, for 660 ft. of 4 ft. wire fencing, to be furnished at the Oakland Airport.

SANTA ANA, Orange Co., Cal.—Until June 23, 7:30 P. M., bids will be received by E. L. Vegely, city clerk, to furnish gasoline for one year from July 1. Certified check of 10% required with bid.

LOS ANGELES, Cal.—Until 2 P. M., June 30, bids will be received by the county supervisors for supplying re-inforced steel for Marshall Canyon Storm Drain bed. Foothill Blvd. and Base Line Road, near La Verne, involving 64,200 lbs. reinf. steel, f.o.b. site of work in vicinity of Foothill Blvd., near Flery Ave., near La Verne, involving: 1000 lbs. ¾-in. sq. deformed; 100 lbs. 5-8-in. sq. deformed; 40,000 lbs. ½-in. and 23,000 lbs. ¾-in. sq. deformed; 100 lbs. 1-4-in. sq. deformed. Mame B. Beatty, 303 Hall of Records, clerk of the board.

NEVADA COUNTY, Cal.—Until June 25, 10 A. M., bids will be received by State Department of Public Works, 502 State Office Bldg., Sacramento, to furnish 7820 lineal feet of laminated timber guard rail at various locations between one and one-half (1.5) miles West of Boca and Iceland, (III-Nev-38-A-B).

See call for bids under official proposal section this issue.

FRESNO, Fresno Co., Cal.—Until June 19, 1030 A. M., bids will be received by H. S. Foster, city clerk, to furnish Mazda Incandescent Lamps for term beginning July 1, 1930 to June 30, 1930. Certified check of \$500 payable to city required with bid. Further information obtainable from above.

LOS ANGELES, Cal.—Consolidated Rock Products Co., 656 S Los Angeles submitted only bid to the county supervisors June 9, at \$2.20 per ton for furnishing and delivering rock for flood control mattress as follows:

(1) 5000 tons rock, delivered as required at any point on Los Angeles river or tributaries between Glendale-Hypocrite St. bridge and the foot of the mountains;

(2) 5000 tons rock, delivered as required on San Gabriel River or tributaries between Whittier Blvd. and the mountains. E. C. Eaton is the chief engineer.

PIPE LINES, WELLS, ETC.

EUREKA, Humboldt Co., Calif.—W. S. Salvage, Eureka, at \$770 awarded contract by city council to sink three new wells at Hawthorne and Broadway streets in connection with municipal water system; approx. 80 ft. depth.

SEWERS AND SEWAGE DISPOSAL PLANTS

UKIAH, Mendocino Co., Cal.—Following list of bids submitted to city council to construct sewers in Cypress Avenue and Clay Street involving 5,500 feet of sewer. Bidders are: Oakland Construction Company, \$3,393; J. J. Angaro, Fairfax, \$3,730; H. E. Conner, Redwood City, \$4,495; H. H. Salls, Ukiah, \$5,138; Y. Di Zillo, Oakland, \$5,133; Ukiah Plumbing and Heating Company, \$5,430; C. W. Crowden, San Francisco, \$5,523; Gladding - McBean Company, San Francisco, \$1,122 (pipe only).

MODESTO, Stanislaus Co., Calif.—Until June 25, 7:30 P. M., bids will be received by H. E. Gragg, city clerk, to furnish and deliver one sewage clarifier and one sludge pump, as follows:

(1) One sewage clarifier mechanism shall be Dorr, Hardinge or equal, suitable to fit a substantially square or circular reservoir having a surface area of not less than 2950 square feet and a side solution depth of 70-ft., 0-inch when filled and provide a minimum solution capacity of 20650 cubic feet. The bottom slope shall not be less than 1:12. The clarifier mechanism shall be provided with an automatic scum skimmer which will operate continuously in such a manner to keep the tank surface free of greases and floating matter. Clarifier mechanism and scum skimmer must be of an approved type.

(2) One Duplex sewage sludge pump shall be either diaphragm or plunger type constant displacement sludge pump of an approved type. It shall be capable of delivering not less than 80 g.p.m. of thick sewage sludge against a maximum pressure of 20 lbs. per sq. in.

Certified check 10% payable to Mayor or required with bid. Further information obtainable from Frank J. Rossi city engineer.

GLENDALE, Los Angeles Co., Cal.—Until June 19, 10 A. M., bids will be received by city council to construct an ornamental street lighting system in Arden Ave., Burchett St. and Patterson Ave., Estelle Ave. and other streets, involving single-light concrete standards. 1911 Act. C. E. Chapman, city clerk.

LOS ANGELES, Cal.—Until 10 A. M. June 25, bids will be received by the board of public works for constructing a vitrified clay pipe sanitary sewer in right of way south of Cove Ave. between Apex Ave. and Silver Lake Blvd., and certain streets in right of way south of Cove Ave. and right of way south of Ewing St.

STOCKTON, San Joaquin Co., Cal.—City Council declares intention (\$45) to construct sewer system in East Main Street involving sanitary sewer system; wye branches; manhole with automatic flush tank; manholes without automatic flush tanks. Improvement Act 1911—Hearing June 23. M. E. Page, city clerk.

PALO ALTO, San Mateo Co., Cal. City Council has started proceedings to improve California Avenue from Alma Street to El Camino Real, involving widening of roadway 66 feet between curbs, sidewalks, and an electroliner system.

WATER WORKS

SUNNYSIDE, Santa Clara Co., Cal.—E. J. Mattocks, San Jose, awarded contract by city trustees to drill well for municipal water sys-

tem. Bids to furnish and install pump were rejected.

SAN FRANCISCO—Food Machinery Company submitted low bid at \$344 to city purchasing agent to furnish and deliver 16 deep well turbine pumps for Municipal Water Department. The three low bidders were: Food Machinery Company (J. Bean Co.) \$344; Woodin & Little, \$913; Hubbard Ma. chinery Co., \$359.

SAN FRANCISCO.—Following bids received under Proposal No. 599 to furnish and deliver 2,200 ft. 16-in. and 3,100 ft. 12-in. cast iron pipe, cement lined, for Municipal Water Department; Central Foundry Co., (1) \$254; (2) \$153; American Cast Iron Co., (1) \$.....; (2) \$149; National Cast Iron Co., (1) \$264; (2) \$155; U. S. Pipe Co., (1) \$.....; (2) \$246.

PLAYGROUNDS & PARKS

OROVILLE, Butte Co., Cal.—Until June 20, 4 P. M., bids will be received by H. S. Hills, president, Board of Education, for furnishing miscellaneous school supplies. Separate bids will be received for janitors' and playground supplies. Specifications obtainable from above. Certified check of 25% must accompany bid.

STREETS AND HIGHWAYS

SAN RAFAEL, Marin Co., Calif.—Highway Builders, 640 Redhill Ave., San Anselmo, awarded contract at 2c sq. ft. by county supervisors to improve two sections of Lower Novato-Black Point Road; Section 1, beginning ½ mile east of Railroad Ave. and extending east 1 mile; Section 2, beginning at Black Point Cut-Off and extending north 1.4 miles, involving: 230,000 sq. ft. emulsified asphalt and screenings in place.

CHANDLER, Arizona—Until June 18, bids will be received by city council for paving ten blocks of city streets involving: About 21,245 sq. yds. Bids will be called on five alternative types: 4-in and 6-in. Bitumel asphalt; 4-in and 6-in. Warrentite-bitulithic; 6-in. concrete. Gutters and curbs are included. F. V. Munro is representing the engineers, Welland Engineering Company of Pueblo, Colo.

SONOMA COUNTY, Cal.—A. Teichert & Son, Sacramento, awarded contract at \$2280 by State Highway Commission to furnish and apply asphaltic road oil on 3.9 miles between Beltane and Shellville.

WILLOW GLEN, Santa Clara Co., Cal.—San Jose Paving Co., San Jose, awarded contract at \$13,190 by City Council (53) to improve portions of Bird Ave. involving grading; 1½-in. Durite asph. conc. surf. p/ave on 3-in. asph. conc. base; cem. conc. walks, curbs, gutters; corr. galv. iron culverts; cem. conc. pipe culverts.

SONOMA AND MENDOCINO COUNTIES, Cal.—A. Teichert & Son, Sacramento, awarded contract at \$6975 by State Highway Commission to furnish and apply asphaltic road oil on 12.5 miles between Cloverdale and Hopland.

CARSON CITY, Nevada—Until 2:30 P. M., June 18, bids will be received by the Department of Highways, State of Nevada, Heroes Memorial

Bldg., Carson City, for furnishing of asphaltic fuel oil and applying it to a crushed rock or crushed gravel surface on a portion of the state highway system in Nevada. The work will consist of furnishing, heating and applying asphaltic fuel oil on a portion of the state highway system in Douglas County from Minden to 3.4 miles north, Rte. 3, Section C-1, a length of 3.4 miles. Certified check, 5%. Plans may be obtained from the state highway engineer, S. C. Durkee. The work involves: 63,623 gals. asphaltic fuel oil applied to roadway surface.

SAN FRANCISCO.—Following bids received under Proposal No. 600 by City Purchasing Agent to furnish and deliver welded steel pipe (or cast iron pipe of equal strength as an alternate) size 20-in. for Municipal Water Department, 5000-ft. made from ¾-in. plates; 5300-ft. made from 3/16-in. plates. Bidders are Western Pipe & Machinery Company (1) \$2.65; (2) \$2.24 Montague Pipe & Steel Co., (1) \$2.90, (2) \$2.32; Alternate-National Cast Iron Pipe Co., (1) \$4.12, (2) \$3.33; Central Foundry Co., (1) \$3.92, (2) \$3.72; U. S. Pipe & Steel Co., (1) \$3.73; (2) \$3.46.

PLUMAS COUNTY, Calif.—Isabella Const. Co., Fresno, submitted low bid at \$74,469 to U. S. Bureau of Public Roads, 461 Market St., San Francisco, to grade and surface 3.35 miles on Sections C and D of Route 23, Quincy-Beech with National Forest Highway.

List of bidders follows:

Isabella Const. Co., Fresno.....	\$ 74,469
Tiffany-McReynolds & Folling,	
San Jose	76,451
Finnell Co., Inc., Sacramento.....	85,521
G. Pollock Co., Sacramento.....	85,806
Hemstreet & Bell, Marysville.....	87,570
Charles Harlowe, Jr., Oakland.....	91,249
Tiesla Bros., Berkeley.....	93,219
O. A. Lindberg, Stockton.....	103,599
Engineer's estimate	98,737

NAPA, Napa Co., Cal.—R. E. Errington awarded contract by city council (534) to construct cement concrete sidewalks in portions of Georgia St. The only other bid submitted was from F. Gaggero.

SAN LEANDRO, Alameda Co., Cal.—Until July 2, 8 P. M., bids will be received by E. F. Hutchings, city clerk for supplying city with rock and screenings for year ending June 30, 1931. Specifications obtainable from city engineer. Certified check of \$1,000 payable to city of San Leandro, required.

SANTA CRUZ, Santa Cruz Co., Cal.—Proceedings have been started by city council to widen and install electrolight lighting system on Pacific Ave.

RICHMOND, Contra Costa Co., Cal.—Proceedings have been started by city council to create lighting district on Tenth St. from Lucas to Cutting Blvd.

SAN RAFAEL, Marin Co., Cal.—S. J. Harless, San Rafael, awarded contract at \$4,030.12 by city council (496) to improve Sixth St. bet. Cottage Ave. and E St., etc., involving: 13,552 sq. ft. 4-in. stone sub-base; 13,552 sq. ft. 4-in. asph. conc. pave.; 1,212 lin. ft. 3x6-in. r.w. header board; 52 lin. ft. conc. curb and gutter; 2 catchbasins.

LOS ANGELES, Cal.—Until 2 P. M., June 30, bids will be received by county supervisors for improving Anaheim-Telegraph Road from 9th St. to

Atlantic Ave. A. & I. No. 202, near Belvedere, 5800 lin. ft. or 1.10 miles, involving: 13,913 cu. yds. excav.; 10,258 ft. 6x10x18-in. curb; 62,636 sq. ft. walk; 15,766 sq. ft. 6-in. gutter; 100 sq. ft. 8-in. gutter; 190,190 sq. ft. 10-7-7-10-in. conc. pave.; 58,985 sq. ft. 8-in. conc. pave.; 249,175 sq. ft. 6-in. D. R. sub-base; one catchbasin, No. 2; 2 catchbasins, No. 3; 13 catchbasins, No. 6; 2 junction chambers, No. 2; manhole frame No. 3 with cover No. 4 and remodel basin; 575 ft. 16-in. heavy reinf. conc. pipe; light system complete; 1290 ft. 8-in. cem. sewer; 2330 ft. 8-in. cem. sewer with cradle; 1450 ft. 6-in. cem. hse. sewers; one flushing manhole; 12 manholes; one special manhole; one junction chamber; 16 ft. ¾-in. red brass pipe extension to water main. Est. contract price, \$146,785.

BUTTE COUNTY, Calif.—Granfield, Farrar and Carlin, San Francisco, awarded contract by State Highway Commission at \$248,528 to grade 1.8 miles between Eardees Creek and Pul. ga. 23

SHASTA & LASSEN COUNTIES, Cal.—Mathews Const. Co., Sacramento awarded contract by State Highway Commission at \$278,251 to grade and surface with untreated crushed gravel or stone 17.9 miles between Fall River Mills and Big Valley. 23

SANTA CLARA COUNTY, Cal.—Following bids received June 11 by State Highway Commission to grade and pave 4.9 miles between San Antonio Ave. and Sunnyvale with Portland cement concrete and asphalt concrete:

Hanrahan Co., S. F.	\$204,904
Union Paving Co., S. F.	208,986
A. J. Raisch, San Jose.	213,751
N. M. Ball, Porterville.	210,045
Central California Roads Co., Oakland	233,386

ELDORADO COUNTY, Calif.—Until July 8, 2 P. M., bids will be received by C. H. Sweetser, district engineer, U. S. Bureau of Public Roads, 461 Market St., San Francisco, to grade 2.82 miles and surface 5.14 miles of Section C, Route 22, Placerville-Lake Tahoe National Forest Highway, Eldorado National Forest, in Eldorado county, involving:

- 21 acres clearing;
- 61,194 cu. yds. unclass. excav.;
- 700 cu. yds. struc. excav.;
- 26,000 sta. yds. overhaul;
- 2.32 ml. fine grading, subgrade and shoulder;
- 14,000 cu. yds. crushed rock surf.;
- 700 cu. yds. supplemental crushed rock;
- 107 cu. yds. cem. rubble masonry;
- 1,950 lin. ft. C. M. pipe in place;
- 200 lin. ft. 6-in. porous tile under-drain in place;
- 1.04 miles move and reset fence;
- 53 night of way monuments;
- 2,550 cu. yds. coarse screenings;
- 1,050 cu. yds. fine screenings;
- maintenance of detours, estimated cost, \$2,000.

Plans obtainable from above office on deposit of \$10, checks for same to be made payable to Federal Reserve Bank of San Francisco.

HUMBOLDT COUNTY, Calif.—As previously reported, bids will be received July 2 by State Highway Commission to grade and pave with cem. concrete 0.6-mil. bet. $\frac{1}{2}$ -mile south of Eureka and Eureka. Project involves: 5600 cu. yds. rdwy. excav. without class.; 62,00 sta. yds. overhaul; 25 cu. yds. struc. excav.; 410 cu. yds. cushion course; 1500 sq. yds. prepare subgrade; 1200 cu. yds. class A Port. cem. conc. (pave.); 2 cu. yds. class A Port. cem. conc. (struc.); 30,600 lbs. bar reinf. steel (pave. and struc.); 114 lin. ft. 18-in. and 40 lin. ft. 24-in. corr. metal pipe; 370 cu. yds. screened gravel shoulders and road approaches; 90 cu. yds. remove existing conc. pave.; 30 sta. finish rdwy.; 6 each, monuments complete in place. State will furnish corr. metal pipe.

MARIN COUNTY, Calif.—Granfield, Farrar and Carlin, San Francisco, at \$94,892 awarded contract by State Highway Commission to surface with bituminous macadam 4.4 miles bet. San Rafael and Alto, involving 4000

cu. yds. roadway excavation without class.; 28,900 tons crusher run base; 100,000 sta. yds. overhaul; 9450 tons broken stone; 650 tons emulsified asphalt; 5085 lin. ft. laminated timber guard rail; 225 sta. finishing roadway.

SHASTA COUNTY, Calif.—As previously reported, bids will be received July 2 by State Highway Commission for seal coat and bituminous surface treatment on 35.3-miles in Shasta County. Project involves: 4500 cu. yds. screenings, placing; 432 tons asphalt road oil; 213 bbls. fuel oil. State will furnish screenings.

SAN JOSE, Santa Clara Co., Cal.—A. J. Raisch, 46 Kearny St., San Francisco, awarded contract by city (4725) to imp. Vendome Ave., bet. Lenzen Ave. and Hobson St., involving grade; $1\frac{1}{2}$ -in. asph. conc. surface on $2\frac{1}{2}$ -in. asph. conc. base pave.; 4-in. vit. pipe sewer laterals; cem. conc. walks; conc. curb, gutter.

PERSHING COUNTY, Nevada.—As previously reported, bids will be received by State Highway Commission to furnish and apply asphaltic fuel oil with crushed rock or gravel on 22.4 miles from Woolsey to two miles south of Humboldt House, involving: 443,484 gals. asph. fuel oil applied to roadway surface; 22.4 miles mixing oil with crushed rock or crushed gravel surface; 22.4 miles rebuilding and finishing shoulders.

GILROY, Santa Clara Co., Calif.—City Council declares intention (31) to improve Hanna St., First St., Alexander St., Forest St. and Dowdy St., involving grading; asphaltic concrete pavement; cement concrete curbs, gutters, and sidewalks; storm water sewer. Imp. Act 1915. Bond Act 1911. Hearing July 7. E. F. Rogers, city clerk. Raymond W. Fisher, city eng.

SALINAS, Monterey Co., Cal.—Until July 7, 2 P. M., bids will be received by C. F. Joy, County Clerk, to surface portion of Mud Flat Road beginning at Watsonville-Salinas Rd. in Supervisor District No. 1. Specifications obtainable from Howard Cozzens, county surveyor, on deposit of \$20, returnable

MONTEREY COUNTY, Cal.—Granite Constr. Co., Watsonville, awarded contract at \$257,532.74 by Board of Supervisors to grade and pave the Salinas-Watsonville Rd. from Salinas to Old Toll Road near Watsonville Junction, in Supervisor Districts 1 and 2. Other bids received were: Peninsula Paving Co., \$258,822; W. A. Dotanville, Salinas, \$253,869.

SANTA CRUZ, Santa Cruz Co., Cal.—J. L. Connor awarded contract by county supervisors to grade and pave

Mount Herman Road. Previously reported being done by day's work under supervision of County Surveyor Lloyd Bowman.

MANHATTAN BEACH, Los Angeles Co., Cal.—Eltzinger T. Brown, 300 Petroleum Securities Bldg., Los Angeles, awarded contract by city council at \$26,967.58 for improving E Railroad Drive bet. 15th St. and Pacific Ave., under 1911 Act, involving: 20,596 cu. yds. excavation; 106,954 sq. ft. 4-inch macadam pave.; 9877 ft. 2x12-in. R. W. headers; L. C. Hull, city engineer, 1127 W. Washington St., Los Angeles.

MANHATTAN BEACH, Los Angeles Co., Cal.—John R. Davies, Santee St., was awarded contract by the city council for constructing a lighting system in 26th St., Highland Ave. and other streets, under 1911 Act. L. C. Hull, city engineer, 1127 W. Washington St., Los Angeles.

SALINAS, Monterey Co., Cal.—Until July 7, 2 P. M., bids will be received by C. F. Joy, County Clerk, to surface portion of San Miguel Canyon Road from Lake School to intersection of Aromas and Watsonville-San Juan Roads in Supervisor District No. 1. Specifications obtainable from Howard Cozzens, County Surveyor, on deposit of \$20, returnable

LOS ANGELES, Cal.—Geo. H. Oswald, 846 E. East 53th St., at \$426,100 submitted low bid to Board of Public Works to improve streets in Main St. and 90th St. Imp. District, involving in the main, grading, \$25,000; 966,971 sq. ft. 6-in. conc. pave., \$1215 sq. ft.; 376,858 sq. ft. 8-in. conc. pave., \$165 sq. ft.; storm drains, \$44,000; sanitary sewer, \$100,000; curbs, walks, etc.

LOS ANGELES, Cal.—W. F. Crawford, 6900 Washington Blvd., Culver City, at \$563,690 submitted low bid to Board of Public Works to improve Sunset Blvd. bet. Normandie Ave. and Hayvenhurst Drive, involving in the main, grading, \$39,200; 1,246,973 sq. ft. 8-in. Warrenite pavement, comprising 2-in. surface with 6-in. base, \$1,193 sq. ft.; storm drain, culverts, etc., \$66,000; sanitary sewers, \$77,000; water system, \$4,868; ornamental lighting system, \$23,400; curbs, walks, gutters, etc.

SACRAMENTO, Cal.—City council declares intention (2304) to improve north half of Stockton Blvd. opposite 32nd St. and portion of 32nd St. at n. w. corner of its intersection with Stockton Blvd., involving construction of concrete curbs and gutters; c. i. gutter drain; vit. sewers; reconstruct manhole; conc. walks; grading; asph. conc. pavement with seal coat 1911 Act. Bond Act 1915. Hearing June 19. H. G. Denton, city clerk. Fred J. Klaus, city engineer.

SALINAS, Monterey Co., Cal.—City Council declares intention (90) to improve portions of Archer St., Homestead Ave., Buena Vista St., Central Ave., involving grading; hydraulic cement concrete curbs; 5-in. hydraulic cement concrete pavement; 3½-in. hydraulic cement concrete sidewalks. Bond Act 1915. Imp. Act 1911. Hearing July 7. M. R. Keef, city clerk. Howard Cozzens, city engineer.

SAN JOSE, Santa Clara Co., Cal.—City Council declares intention (5138) to improve Stockton Ave. from Emory to Newhall St., involving grading; pave with 1½-in. asphaltic concrete wearing surface with 3-in. asphaltic concrete foundation; cem. conc. curbs, gutters and walks; 6-in. vit. pipe main sewer; 4-in. vit. pipe house laterals; 6-in. vit. pipe sanitary sewer drains. Imp. Act 1911. Hearing June 23. J. J. Lynch, city clerk. Wm. Popp, city

YUBA CITY, Sutter Co., Cal.—Until July 1, 2 P. M., bids will be received by J. E. Hilsken, secretary, Joint Highway District No. 12, to improve sections of Woodland-Yuba City Cut-off bet. Knights Landing Ridge Cut in Yolo county and the Garden Highway ½-mile west of Tudor in Sutter county, being sections 9.9 miles in length between Robbins in Sutter county and Garden Highway, involving:

36,000 cu. yds. excav. and subgrade;
17,000 tons crusher run base;
21,500 cu. yds. pavement (for which alternative bids will be received on the following types):

Class A Portland cement concrete;
Asphalt concrete base and surface;
Asphalt concrete base and Warrentite surface;

Asphalt concrete base and "Willite" surface.

Plans on file in office of Edward von Geldern, engineer, 2nd and C Streets,

Yuba City and obtainable on deposit of \$12, not returnable.

BUSINESS OPPORTUNITIES

SAN FRANCISCO—Names and addresses of the individuals or firms concerned in these opportunities will be furnished on request to the Business Opportunity Department of Daily Pacific Builder, 545-547 Mission Street. Phone Garfield 8744.

2072—Export Department Service. New York, N. Y. An old established New York firm is prepared to act as the export department for San Francisco manufacturers who may not be equipped for export trade. The New York house will assume credit risk responsibility. Local references.

2075—Copper Scraps. Los Angeles, Cal. Party wishes to establish connections with an exporter of old copper who exports to Germany.

2076—Ice Boxes. San Francisco, Cal. French manufacturer of very cheap ice boxes seeks an agent in San Francisco.

2078—Tools. Wuertemberg, Germany. Manufacturer of tools for metal industry wishes representative.

2079—Cooking Utensils. Mettmann, Germany. Manufacturer of aluminum cooking utensils desire san agent.

2083—Wire & Manila Ropes. Landsberg, Germany. Wire and manila rope manufacturer is seeking connections with local importers.

2086—General Trade. Tielingao, China. General export-import firm wants to make local connections. List of articles imported and exported is on file, also bank references.

2092—Mineral Colors. Parral, Mexico. Party wishes to find a market for mineral colors. Sample on file.

D-3491—Machine Shop. Chicago, Illinois. Eastern concern manufacturing speed reducers (installed between motors and power-driven machines) desires to make contact with local machine shop so that product can be assembled, stocked, ship-

ped and serviced. Will consider purchase of machine shop if terms can be satisfactorily arranged to handle product.

D-3493—Agency. Boston, Mass. Manufacturers agents desirous of making connections with concerns interested in representation in New England.

D-3494—Representative. Los Angeles, Cal. Party is desirous of securing agency of any staple line. Prefer territory of Salt Lake City and surrounding communities.

D-3495—Distributor. New York City. Party anxious in securing agency or distribution quarters for the sale of any product. Qualifications as to integrity and character on file.

D-3496—Water Boilers. Watertown, Wisconsin. Executive of a concern that specializes in the conditioning of water is anxious to make connections with San Francisco firm. Also wants a reliable firm who would be interested in the manufacture and sales of a newly-devised boiler.

31

TUCSON, Ariz.—Until 4 P. M., June 18, bids will be received by the city of Tucson for furnishing three pressure filters and one solution feed chlorinator in connection with construction of South Side swimming pool. Capacity of each filter shall be 100 gallons per minute, based on three gallons per minute per sq. ft. of filter area. Piping necessary to connect filters together as a unit, gauges, valves, etc., must be included in bid price. Chlorinator to have capacity range from one-half to ten pounds of chlorine per 24 hours. Lump sum bids are desired separately on filters and chlorinator. Bid must include freight paid to Tucson and services of factory representative to supervise installation of equipment.

A "Pittsburg" Automatic Water Heater installed in the Home indicates high quality throughout.

Recommended and specified by all the leading architects, plumbers and builders.

Consider the high merit of the Pittsburg coupled with "Pittsburg Perfect Service."

OFFICIAL PROPOSALS

STATE OF CALIFORNIA
DEPARTMENT OF PUBLIC WORKS
DIVISION OF HIGHWAYS
NOTICE TO CONTRACTORS

SEALED PROPOSALS will be received at the office of the State Highway Engineer, Public Works Building, Sacramento, California, until 2 o'clock P. M. on July 2, 1930, at which time they will be publicly opened and read, for construction in accordance with the specifications therefor, to which special reference is made, of portions of State Highway, as follows: Humboldt County, between one-half mile south of Eureka and Eureka (I-Hum-1-G), about six-tenths (0.6) mile in length, to be graded and paved with Portland cement concrete.

Shasta County, between Lamoiné and the northerly boundary (II-Sha-3-D), about eighteen and eight-tenths (18.8) miles in length, and between Montgomery Creek and Haynes Ranch (II-Sha-28-C), about seventeen (17) miles in length; a total distance of about thirty-five and eight-tenths (35.8) miles, seal coat and bituminous surface treatment to be applied.

Siskiyou County, a reinforced concrete girder bridge across Klamath River about 10 miles north of Yreka (II-Sis-3-C), consisting of four 80-foot spans and two 72-foot spans on concrete piers.

Siskiyou County, a reinforced concrete girder bridge across Shasta River about 7½ miles north of Yreka (II-Sis-3-C), consisting of two 200-foot open spandrel arch spans, two 40-foot girder spans and two 22-foot girder spans.

Colusa County, a reinforced concrete girder bridge across Bear Creek about 25 miles west of Williams (III-Col-15-D), consisting of seven 31-foot spans on concrete bents.

San Mateo County, between South San Francisco and Burlingame (IV-SM-68-B), about five and two-tenths (5.2) miles in length, to be graded and paved with Portland cement concrete.

San Bernardino County, between six miles east of Amboy and one and one-half miles east of Essex (VIII-S.Bd-58-K.L), about twenty-eight and seven-tenths (28.7) miles in length, to be graded and surfaced with oil treated crushed gravel or stone.

Proposal forms will be issued to only those Contractors who have furnished verified statement of experience and financial condition in accordance with the provisions of Chapter 644, Statutes 1929, and whose statements so furnished are satisfactory to the Department of Public Works. Bids will not be accepted from a Contractor to whom a proposal form has not been issued by the Department of Public Works.

Plans may be seen, and forms of proposal, bonds, contract and specifications may be obtained at the said office, and they may be seen at the offices of the District Engineers at Los Angeles and San Francisco, and at the office of the District Engineer of the district in which the work is situated. The District Engineers' offices are located at Eureka, Redding, Sacramento, San Francisco, San Luis Obispo, Los Angeles, San Bernardino and Bishop.

A representative from the district office will be available to accompany prospective bidders for an inspection of the work herein contemplated, and Contractors are urged to investigate the location, character and quantity of work to be done, with a representative of the Division of Highways. It is requested that arrangements for

joint field inspection be made as far in advance as possible. Detailed information concerning the proposed work may be obtained from the district office.

No bid will be received unless it is made on a blank form furnished by the State Highway Engineer. The special attention of prospective bidders is called to the "Proposal Requirements and Conditions" annexed to the blank form of proposal, for full directions as to bidding, etc.

The Department of Public Works reserves the right to reject any or all bids or to accept the bid deemed for the best interests of the State.

DEPARTMENT OF PUBLIC WORKS
DIVISION OF HIGHWAYS
C. H. PURCELL,
State Highway Engineer.
Dated June 4, 1930.

NOTICE TO CONTRACTORS
GENERAL WORK

SEALED BIDS will be received by Geo. B. McDougall, State Architect, Public Works Building, 11th and P Streets, Sacramento, California, up to 2 o'clock P. M., Tuesday, July 8, 1930, thereafter on said day to be publicly opened and read for the erection and completion of the General Work for the Annex to School Building and Annex to Residence for Boys, California School for the Blind, Berkeley, California, in accordance with plans and specifications therefor.

The Annex to the School Building is a two-story reinforced concrete structure with tile partitions, wood roof construction and tile roof. It is attached to the present school building and the total floor area is approximately 10,000 square feet.

The Annex to the Residence for Boys is a one-story frame structure with reinforced concrete foundations, stucco exterior, tile roof, and a total floor area of approximately 2900 square feet.

Plans and specifications are on file for examination in the office of the Division of Architecture, Public Works Building, Sacramento, California, and also at Room 1025 Associated Realty Building, Los Angeles, and at the principal California Cities Builders' Exchange Offices.

Plans, specifications, and proposal forms may be secured by licensed General Contractors who have qualified or who will qualify by furnishing a verified statement of experience and financial condition as required by the provisions of Chapter 644, Statutes 1929, and whose statements so furnished are satisfactory to the Department of Public Works. Questionnaire forms may be secured from the Division of Architecture.

Bids will not be accepted from a Contractor to whom a proposal form has not been issued, and all bids must be on proposal forms supplied by the State.

Requests for plans shall be accompanied by a deposit of twenty-five (\$25.00) dollars. Check shall be made payable to the Department of Public Works, Division of Architecture. Deposit will be returned upon receipt of the set in good condition, at Sacramento Office of the Division within 30 days after opening bids, otherwise it will be forfeited to the State.

All bids must be filed at the office of the State Architect on or before the time heretofore stated and in accordance with the "Rules for Bidding" accompanying the proposal form.

No bid will be considered unless cash, a bidder's bond made payable to the State of California, or a certified check made payable to the "State Engineer, Department of Public Works," in the sum of at least ten

per centum (10%) of the amount of the bid is enclosed with the bid.

The Division of Architecture, State Department of Public Works, reserves the right to reject any or all bids and to waive any informality in any bid received.

STATE DEPARTMENT OF PUBLIC WORKS
DIVISION OF ARCHITECTURE
GEO. B. McDOUGALL,
State Architect.
B. B. MEEK,
Director of Public Works.

NOTICE TO CONTRACTORS
MECHANICAL WORK

SEALED BIDS will be received by Geo. B. McDougall, State Architect, Public Works Building, 11th and P Streets, Sacramento, California, up to 2 o'clock P. M., Tuesday, July 8, 1930, said bids thereafter on said day to be publicly opened and read, for the installation and completion of the Mechanical Work for the Annex to School Building and Annex to Residence for Boys, California School for the Blind, Berkeley, California, in accordance with plans and specifications therefor.

Mechanical Work includes Plumbing, Heating, and Electrical Work. Separate bids will be received for "Electrical Work" and for "Plumbing and Heating Work." Combined bids will also be received covering all three branches of the work.

Plans and specifications are on file for examination in the office of the Division of Architecture, Public Works Building, Sacramento, and also at Room 1025 Associated Realty Building, Los Angeles, and at the principal California Cities Builders' Exchange Offices.

Plans, specifications, and proposal forms may be secured by licensed Contractors who have qualified or who will qualify by furnishing a verified statement of experience and financial condition as required by the provisions of Chapter 644, Statutes 1929, and whose statements so furnished are satisfactory to the Department of Public Works. Questionnaire forms may be secured from the Division of Architecture.

Bids will not be accepted from a Contractor to whom a proposal form has not been issued and all bids must be on proposal forms supplied by the State.

Requests for plans shall be accompanied by a deposit of twenty-five (\$25.00) dollars. Check shall be made payable to the Department of Public Works, Division of Architecture. Deposit will be returned upon receipt of the set in good condition at Sacramento Office of the Division within 30 days after opening bids, otherwise it will be forfeited to the State.

All bids must be filed at the office of the State Architect on or before the time heretofore stated and in accordance with the "Rules for Bidding" accompanying the proposal form.

No bid will be considered unless cash, a bidder's bond made payable to the State of California, or a certified check made payable to the "State Engineer, Department of Public Works," in the sum of at least ten per centum (10%) of the amount of the bid is enclosed with the bid.

The Division of Architecture, State Department of Public Works, reserves the right to reject any or all bids and to waive any informality in any bid received.

FISHER MILL AT STOCKTON SUFFERS FIRE LOSS

Plant of Fisher Bros Planing Mill
at Stockton was partially destroyed
by fire yesterday morning. The loss
is estimated at \$50,000 and is covered
by insurance. The mill will be rebuilt
at once, according to Frank T.
Fisher, president of the company.

SEEKS TO RETAIN OFFICE

T. Hayne Switzer, county surveyor
of Tulare county, has announced his
intention to succeed himself in that
position at the coming election. Swit-
zer was appointed by the board of su-
pervisors last year.

The City Council of Los Angeles
is discussing the advisability of open-
ing a city free employment agency
to devote its efforts to finding pos-
itions for residents over 50 years
of age.

NEW WINDOW GLASS ANNOUNCE- ED BY THE AMERICAN COMPANY

Announcement that it has begun the manufacture of a new flat-drawn window glass known as "Lustraglass" is made by the American Window Glass Company of Pittsburgh, Pa. This product is said to be superior to anything of the kind heretofore made, being much clearer, "whiter," and more lustrous than ordinary window glass. The greenish cast noticeable in most window glass has been almost entirely eliminated, which makes it more desirable, it is said. It has an advantage in that it can be glazed with either side out.

An improved process of glass-making has made Lustraglass possible, according to the manufacturers. For many years ordinary window glass was made by mechanically drawing and blowing the glass into huge cylinders which were later split and flattened. Lustraglass is drawn vertically in flat sheets. The process is continuous, the raw materials entering at one end of a huge tank machine and coming out at the other end as a perfectly flat and continuous ribbon of glass. This is cut off at intervals into great sheets. This improved process produces a perfectly flat sheet of uniform thickness, which it was impossible to attain by the old process.

Another important advantage claimed for Lustraglass by the manufacturers is that it will transmit 15 to 20 per cent of the ultra-violet rays of sunshine at 313 mu. Scientific research has disclosed that ultra-violet rays are the health-giving rays of sunlight. It is desirable, therefore, that the greatest possible amount of these rays should find their way into the home. It is claimed that ordinary window glass does not transmit any appreciable volume of ultra-violet rays below 313 mu. Lustraglass, the manufacturers assert, submits a substantial volume of these vital rays at 310 as well as 313.

The new glass is not for any special window, it is stated, but for all windows because the cost is no greater than that of ordinary window glass. It is labeled, the manufacturers state, and is also packed with paper between the lights to insure it reaching the purchaser in perfect condition.

Bulletin 101, issued by the Stroudsburg, Pa., gives a complete description of all products of the company and includes information on the installation of proper sewage-disposal equipment to care for needs varying from that of a single residence to industrial villages and manufacturing plants. The bulletin contains 24 pages and is well illustrated.

THE CONSTRUCTION INDUSTRY SHOULD BE CONSOLIDATED

When Rossell Edward Mitchell, architect of Washington, D. C., proposed a joint meeting of representatives from all elements in the building industry for the purpose of placing all of the problems of groups and localities before the industry as a solid unit, he gave expression to an idea which has been growing in the minds of all of the progressive factors and individuals concerned with building, says the American Contractor. The suggestion involves nothing of a revolutionary nature. It is entirely in accord with what other industries have done, and it is the logical consequence of evolution to a higher plane of business standards that is taking place in the building industry.

It is quite natural that organization and co-operation should have been taken place in most other industries before either was even proposed for builders. A majority of American industries are composed of a relatively small group of producers who manufacture and distribute articles which are similar. Such industries are easily isolated and identified as natural industrial groups having common problems. The building industry, on the other hand, is not so easily identified. It consists of innumerable groups. There is a large number of major groups, many of which are composed of innumerable minor classifications. They produce everything from intangible but nevertheless essential service to solid commodities. Hosts of manufacturing industries contribute a wide diversification of products. All of the service and material groups are marshaled and a building results. Positive identity of these groups as definite factors in the building industry is difficult. The condition is further confused by age old methods of letting contracts. There is overlapping of functions and wasteful competition.

Very recently contractors, architects and engineers have come to realize that their difficulties can be minimized through cooperation. Many of the problems presented to these groups are now recognized as mutual. In the several insufficient attempts that have been made to "get together" it has become further realized that these problems extend to other groups, the material men, manufacturers, realtors, banks, mortgage houses and others.

Now it seems that the elements in the industry are fairly well isolated and that the identity of the industry is established. With recognition of the factors as a possible unit, the next obvious step is to consolidate and reap the benefits of unified effort.

Mr. Mitchell has suggested that the National Building Survey Conference be used as a nucleus for the organization he proposes. The Conference includes on its role representatives from all branches of the industry. It has done some meritorious work during the building slump from which the country is beginning to emerge. It has proved conclusively that otherwise insurmountable obstacles can be over-

come by unified action. Perhaps the National Building Survey Conference should assume the initiative.

VALIDITY OF MULTIPLE DWELL- INGS LAW ATTACKED IN NEW YORK

Arguments challenging the constitutionality of section 300 of the New York State multiple dwellings law were made on May 14 before the state Court of Appeals. A year ago the court upheld the validity of the law as a whole. The section now under attack provides that plans for alterations costing more than \$10,000, or for a new tenement house, must be filed by the owner or a registered architect.

Oscar Goldschlag for sixteen years a professional engineer in New York City, filed plans for a new tenement house. The department rejected the plans on the ground that Goldschlag was not an architect. This is the test case the court is asked to pass upon and comes to the highest court on appeal from the decision of Justice Mullan, who, in special term, held that the act does not "transcend the limits of the police power of the state."

"Legislation framed in the exercise of the police power," Justice Mullan said, "must be reasonable in the sense that it must be based on reason as distinct from being wholly arbitrary or capricious, but when the legislature has power to legislate on a subject the courts may look into its enactment for enough to see whether it is in any view adapted to the end attained. If it is, the courts must give it effect, however much they might, if given the choice, prefer some other measure as more fit and appropriate."

In his argument, the attorney for Goldschlag declared that the refusal of the department to receive his plans "destroys one of the most important powers and privileges inherent to the practice of the appellant's profession as an engineer, limits and circumscribes the appellant's rights of fulfilling contracts with his employers, and hampers his means of earning a livelihood."

He insisted that section 300 is "not a proper exercise of police power, but is an unreasonable and arbitrary enactment aimed at no real evil or, if there be an evil, said section has no logical approximation to end the evil to be remedied; that it creates a monopoly in a certain field of employment in favor of one profession, namely the architect, at the expense of the engineer—a profession as well or better qualified than the architects to function in the field from which it is excluded."

National Committee of Wood Utilization, Washington, D. C., has appointed E. Mark Ferree a member of its staff. Mr. Ferree was formerly connected with the Southern Pine Association, New Orleans, La. He will be chiefly occupied with the promotion of committee projects in the consumer field.

DEVELOPMENT AND RECENT TENDENCIES IN DISTRICT HEATING

(By Prof. C. H. B. Hotchkiss)

The business of supplying heat to buildings as a utility enterprise has reached its present status through a gradual development over a long period of years. During this period there have been times of activity and expansion as well as times of retrogression. Ideas, inventions, changes in ownership, changing ideas of management, and changes in the general life of communities have all been reflected just as truly in this business as in most others. Out of it all has come the business as it exists at present. In view of this, probably the best way to get a clear picture of things as they are, is to glance briefly at some of the more outstanding features as revealed by the past.

First Central Heating Plant

The actual beginning of the practice of supplying heat from a central plant antedates the supplying of electricity from such plants. The first heating plant started operating in the '70's. It was a steam plant and steam heating was used in the buildings. Naturally, it was a purely heating plant and was not connected with electric generation in any way. It is also interesting to note that it employed a pressure which at that time was moderately high. Steam was carried underground from the generating plant to the buildings. For some years following the successful operation of this plant, a considerable boom developed in the extension of such plants. These were operated with varying degrees of success.

In the late '80's, the first installation using hot water underground made its appearance. The argument in favor of this method was that of utilizing the heat in the exhaust steam from engines to heat hot water in the generating plant. This hot water was then pumped to, and through, the buildings to be heated. The point of most interest in connection with this method is not that it used the heat of exhaust steam—for a steam system would do the same—but that in its actual usage it served to ally the supplying of heat very closely with the supplying of electric service. It served to draw the attention of the rapidly expanding electrical industry to the close relationship between central station heating and central station electric service.

Relation Between Power and Heating Realized

Here began one of the features which has greatly influenced the course of development of central station heating. As soon as the close relationship between the two services was fully realized, they began to develop together. Many electric utilities installed a heating service operating on the heat contained in the exhaust from their engines. Rates for such heat were ridiculously low, long-term contracts to supply heat at set figures were entered into, and the heating service was often used as a means of securing electrical business. In general, the business of supplying utility heat was linked to the business of supplying utility electricity.

Growth of Utility Heating Checked

Scarcely had this taken place before the growth of utility heating was noticeably checked. So long as reciprocating engines were used for electrical generation, and so long as the generating plants were located close to a heating load, the combination of electric generation and exhaust steam heating lived rather peacefully to-

gether. Soon, however, the turbine made its appearance and the use of high vacuums was developed. The turbine was most attractive when installed in large units and when operated at high vacuums. This required the extraction of the heat of vaporization at the generating station, and made it necessary to transfer the heat formerly used for heating to the condenser cooling water. This cooling water was often at too low a temperature to be useful as a means of heating buildings.

Moreover, the tendency was to build the generating stations at points distant from the heating load. As a result of these, and other conditions, the growth of electric generating plants with exhaust-steam heating was checked. In many cases the existing plants were, however, operated and continued to furnish heat. Very often, though, the electrical load developed so rapidly and furnished so attractive a return that attention was turned to it, almost to the exclusion of heating. The low rates charged for heating, and the long-time contracts also conspired to throw the heating function into disfavor.

This period may be said to represent one of stagnation and even of decline of utility heating. This period, generally speaking, ended some ten to fifteen years ago.

Recent Tendencies

Since that time there has been a marked revival of interest and of growth in district heating. This later period has been marked by several noteworthy features.

First of all, there has been a fairly general realization that the supplying of a building-heating service can be made to pay for itself when reasonably well planned and conducted. The realization of this fact has tended to make the managements of electric utilities disposed to consider the heating as something other than a nuisance.

Another notable point is that the use of hot water as a carrier of the heat has greatly declined. Not only have hot-water systems not been built in recent years but a sizeable number of those in existence has been changed to steam, although the use of hot water has much to recommend it from the utility standpoint. Perhaps this general decline of district hot-water heating has been the most clear-cut feature of the new period. It has not been universal, however.

Heating Divorced from Electric Generation

During the past ten years there has been a tendency to divorce the heating entirely from electric generation. As a result, many of the newer plants have been built as purely steam-generating plants delivering their fire heat output into the heating lines as steam. Where district heating is conducted by a corporation independent of the electric utility, its generating plant is often, indeed nearly always, of this type. This practice represents a considerable swing away from that which originally brought the two services into contact. It is interesting to note, that such plants were used when district heating first started, and that consequently the idea of steam-generating plants apart from electric generation is not a new one. Like their predecessors these plants operate on what may be called moderate pressures. Recent examples of plants of

this type are those in New York and Philadelphia.

Electric Generation Incidental

We have already noted the fact that early use was made of the idea of extracting both electric energy and heat from steam. This practice is still in use but the newer plants are arranged with an important change in their design. The older plants were intended to be primarily electric stations which used the exhaust for heating purposes. The newer plants are intended to be primarily heating plants which use some of their heat to produce electricity. In the new type of plant, the electrical generation is quite incidental to the primary purpose of furnishing steam for heating. In these plants, the basis of the load is the demand for steam for heating and not the demand for electrical energy. The turbines essentially act as reducing valves. They deliver their electrical output to the electric distribution system. On occasion, the turbines can be cut out entirely and the plant would then operate essentially as a heating plant. Recent examples of such plants are those in Rochester, N. Y., and Pittsburgh.

At the present time, then, we have a demand and tendency toward development in utility district heating with hot water dropping out of use and with the steam being generated in plants of one of two general types. Many of the older systems are still in operation, however.

The recent growth of district heating has also been marked by at least two other features which differ from its earlier expansion. In the first expansion in the early '80's, many of the developments were in small towns and in residential districts. During the growth which has marked the past ten years, the expansion has been greatest in the business districts of the larger cities, with the load being furnished largely by hotels, theaters, office buildings, apartments, and retail stores. Heating services operating in the downtown districts of the large cities are able to secure customers whose demands are heavy and to reach whom it is not necessary to install distribution lines of excessive length. Loads such as these probably represent the most highly desirable ones possible to reach with a heating service. The fact that these concentrated load areas account for much of the recent growth of utility heating does not mean that such services for small communities are unprofitable, or likely to disappear. It merely means that those operating in these areas have grown and have been financially successful. Many of the smaller plants are located in less rapidly growing districts and consequently their loads have not developed so rapidly.

Interesting developments have taken place in "block" or community systems. Apparently the general tendency is to treat the furnishing of a heating service to a scattered residential district in a somewhat different fashion, and by other interests, from that or those used in dense, downtown business centers. Probably such a policy has much to recommend it and we may look for it to continue.

Supplying Demand for Process Steam
The recent success and growth of the heating services of some of the utility companies probably has had considerable to do with the beginning of a movement which is just appear-

ing. For some time the tendency has been to generate electricity in huge central turbine-driven steam stations. Increasingly large plants have been built and increasingly large turbine units have been operated. All have been operated condensing and almost invariably the condenser cooling water containing much heat has been wasted. Recently attention has been turned once more to the problem of securing some use of this heat, while still getting good economies from the turbines. The problem is of long standing, but is now being approached from a rather new angle. The idea is to locate utility generating plants at or

near industrial plants which have a heavy demand for hot water and process steam. If such plans work out successfully, the value of a steam generating plant which utilizes the latent heat may be better demonstrated and the utility heating plant with electrical by-product generation may be re-appraised at higher values than have been assigned to it in the past. This tendency, now just starting, holds much of hope for the future development of building-heating services by utility companies. Far from being merely temporary, the rapid growth of district heating bids fair to be long sustained.

quicker turnovers of our stock and reduces the necessary capital that otherwise would be tied up in special machinery for manufacturing different size products."

"We think we are perfectly conservative in saying that the adoption of uniform-size face brick effects an annual saving of at least \$15,000 to \$20,000, which, of course, would have to be based on to the consumer with no gain from an architectural standpoint," wrote the president of a large brick manufacturing plant.

A member of a firm of consulting engineers, located in the northwest, said: "We think that it is a fine movement, and one which is sure to bring great results in years to come. You can count on our hearty cooperation."

BRICK STANDARDS SAID TO REDUCE PRODUCTION COST

(By J. F. McNeil, National Bureau of Standards)

Brick is one of the oldest of building materials. Excavation of the ruins of ancient Chaldean and Egyptian cities has unearthed crumbled brick structures, together with inscriptions dating back more than 6,000 years. In America, the manufacture of brick commenced about the year 1650. The development of this industry was very slow, however, because the producers were dependent, almost entirely, upon hand labor and upon the location of clay deposits.

Mechanical equipment for the manufacture of brick and other clay products made its appearance in England about the middle of the 19th century. A short time later, it was introduced into the United States, where the increase in production of brick thereafter was commensurate with the expansion of building and construction operations. In the year 1922, when a simplified practice recommendation was initiated in this field, the Bureau of Census reported that a production of more than 5,800,000,000 common brick and more than 1,400,000,000 face brick. Large production, such as is shown in this instance, is generally accompanied by diversification in sizes and types. Such variation starts with the birth of an industry and oftentimes continues to increase over a long period of years.

Survey Shows Many Varieties

A survey of production, in the rough and smooth face brick and common brick industry, conducted in 1922, showed 39 sizes of rough face brick, ranging in length from 7 3/4 to 8 1/2 inches, in thickness from 2 1/4 to 2 3/4 inches, and in width from 3 3/16 to 4 1/2 inches. In the manufacture of smooth face brick there were found to be 36 variations in size. Forty-four sizes of common brick were also in existence at that time. The established recommendation reduced the variety of rough and smooth face brick from 75 sizes and types to 2; and of common brick from 44 to 1. A check, following the development of the recommendation, has revealed the fact that 93 per cent of the face brick and 85 per cent of the common brick is made in accordance with the simplified schedule.

After the recommendation had been in effect for several years the Bureau of Standards made a survey to evaluate the benefits derived by the acceptors through its operation. Letters were sent to all signed acceptors requesting that they give the bureau a statement of their experience with this simplification program. Excerpts from these replies, which follow, are indicative of the fact that much benefit is being derived from the application of this recommendation. The outstanding benefits cited are smaller inventories, lower production cost, ne-

cessity for less yard space, quicker turnover, and a more satisfactory condition regarding competition.

Excerpts of Replies

"Previous to this change," replied a manufacturer whose plant is located in Ohio, "our brick were 1/2-in. oversize over all, and their weight averaged 5 pounds. Now the weight averaged by the Interstate Shipping Bureau is 4.5 pounds, which means a saving in freight. Also more tonnage can be shipped per car. The savings in a standard-size common brick are as follows: Less clay, shorter time in drying, easier for the men to handle, kilns formerly holding 400,000 bricks will now average 460,000, less hours in burning brick which means less fuel."

Another manufacturer said: "We believe that our experience justifies us in saying that we have enjoyed a saving to ourselves or to the trade of 10 per cent."

"We find that it works to advantage in smaller inventories and in convenience of supplying brick for alterations and additions to buildings. As this practice is continued, it will result in more saving and convenience," wrote the manager of a large eastern brickyard.

"Simplified practice in the brick industry," said another executive, "has produced its objective. It gets its deserved praise when mentioned among brickmakers. In our own business, it has enabled us to concentrate on one style of product which has lowered our production cost, saved yard space, lowered inventory, and given us more time to continually improve our product."

"In our particular case, replied a Virginia brickmaker, "it has increased our cost as we are making a brick that was not up to the size recommended, but we are pleased to advise that in changing to the standard size we find it is very satisfactory, since the majority of our competitors in this particular district are now manufacturing this standard size brick, and this naturally puts competition on an even basis and contractors know exactly what to expect in a brick so far as size is concerned."

Sales Manager Pleaded

"From our past experience," said the sales manager of a large manufacturing, "we find that for our business it is to be a great advantage to standardize on the manufacture of one size of face brick, as this enables us to handle our markets more efficiently, and at the same time architects and contractors readily familiarize themselves with the size of the product manufactured by us. In addition to the benefits received from the handling of our markets, it enables us to do a large volume of business on a smaller inventory, which permits

The Mount Hope Bridge, erected last year by McClintic-Marshall Company across Mount Hope Bay, between Bristol and Portsmouth, R. I., has been selected to receive the annual award of the American Institute of Steel Construction as the most beautiful long-span steel bridge built last year. The bridge was designed by Robinson & Steinman, Engineers, of New York, for the Mount Hope Bridge Company. It was opened to traffic October 24, 1929.

The American Institute of Steel Construction made two first prize awards, the first going to the most artistic long-span bridge and the other to the most artistic short-span bridge. The Mount Pleasant Bridge, constructed by the Bethlehem Steel Company over the Harlem Division of the New York Central Railroad at Mt. Pleasant, N. Y., for the Westchester County Park Commission, was judged to be the most beautiful short-span bridge of the year. Jay Downer, chief engineer for the Westchester County Park Commission, designed the bridge, which was opened to traffic in March, 1929.

Honorable mention as a most aesthetic solution of a long-span bridge problem was given the Lake Champlain Bridge, built by the American Bridge Company across Lake Champlain between Crown Point, N. Y., and Addison, Vt., which was opened to traffic November 30, 1929. Fay, Spofford & Thorndike, Engineers, of Boston, designed the structure for the Lake Champlain Bridge Commission.

The jury of award making these selections consisted of Gustav Lindenthal, consulting engineer of Jersey City; Arthur Loomis Harmon, architect of New York; Hugh Ferriss, architect of New York; William H. Burr, consulting engineer of New York; Philip A. Cusachs, architect of New York, and Dr. J. Horace McFarland, president of the Pennsylvania Art Commission.

URGE OPEN COMPETITION FOR PUBLIC WORKS

Open competition for contracts for public works is urged by the Master Builders' Association of Iowa, and resolutions to that effect unanimously adopted. The resolutions specifically criticize action of the Board of Waterworks Trustees for its recent action in awarding a contract for a water tower on a fee and non-competitive basis. The resolution explained that "the board states in making this award it acted upon advice of engineers employed by it to design the tower; that we protest such action on the part of any board or any public body in following such procedure whereby competent contractors are barred from competition for public improvements financed by public funds."

THE OBSERVER

What He Hears and Sees on His Rounds

Directors of the Retail Lumbermen's Association of California have decided to make a survey of the credit situation throughout the state.

Charles W. Fairbanks, general contractor, was elected as temporary president at the meeting of the newly organized Builders' Exchange in San Luis Obispo last Friday.

The Division of Simplified Practice of the Bureau of Standards, Department of commerce, announced the availability of Simplified Practice Wheelbarrows.

Approximate relations between Brinell, Rockwell and Shore hardnesses and the tensile strengths of structural alloy steels are given in chart and tabular form in a 4-page bulletin of the International Nickel Co., Inc., New York City.

T. L. Butcher, formerly connected with the lumber industry in the Pacific Northwest, has purchased the business of the T. G. Hersum Lumber Company at Chula Vista, San Diego County, and it will be conducted under the name of South Bay Lumber Company, Ltd.

June 24 has been set by the Auburn City Council as the date for the bond election to determine if the city shall vote \$40,000 for the erection of a new City Hall. Plans for the new building will be prepared by W. H. Weeks, San Francisco architect.

John Gregg, pioneer builder, passed away in Oakland last Friday. He was a partner of the firm of Holt & Gregg, builders. Also at one time owned and operated the Anderson Brickyard at Kennett.

Carlton H. Rose, San Francisco, spoke on "The Trend of Paint Technology" at the western zone session of the National Paint, Oil and Varnish Association held at Del Monte. Another speaker, also at San Francisco, spoke on "Mergers and Consolidations."

Announcement was made yesterday by I. Weinstein, president of Weinstein Department Stores, of the purchase of the east wing of the old O'Connor-Moffatt building, 131 Post St., at a cost of \$225,000. Alterations to the extent of \$35,000 will begin at once.

Maurice M. Daubin, manager of Sterling Lumber Company of Roseville has resigned his position to accept a more lucrative offer with Redwood Manufacturing Company with headquarters at Turlock. He has accepted the position of manager of the Turlock Lumber Company and the Hilmar Lumber Company.

Memphis, Tenn., was selected as the meeting place for the Ninth Annual National Asphalt Paving Conference to be held this year. Fifteen hundred engineers, technologists, public officials, contractors and asphalt producers are expected to be in attendance. An effort this year will be made to break all previous records.

Steel Founders' Society of America, Inc., New York City, has recently adopted and issued a standard sales agreement, order acceptance, quotation sheet, and a set of standard trade customs for that industry. The purpose is to clarify and simplify the many questions arising between buyers and sellers in order to give a more equitable understanding of contractual relations.

The National Lumber Manufacturers Association has just received a revised Safety Code for Woodworking Plants, recently published by the U. S. Department of Labor and approved by the American Standards Association. This Code, designed to insure, as far as possible, safety to life, limb and health of woodworkers in plants, carries recommendations and requirements based upon the widest and most recently available experience data.

The ratio of operations to capacity of American portland cement mills continues to be under that of a year ago as indicated by the figures for the 12 months' period ending May 31. According to statistics released by the Bureau of Mines of the Department of Commerce, the ratio of operations to capacity for the last 12 months was 66.2 per cent. The ratio percentage for 12 months period ending May 31, 1929, was 70.2 per cent.

During the month 17,271,000 barrels were produced, 17,210,000 barrels were shipped, and stocks on hand at the end of the month were 30,928,000 barrels. Production in May, 1930, was 6.9 per cent more and shipments 3.0 per cent more than May, 1929. Stocks at the mills were 4.4 per cent more than a year ago.

An increase in the exports of softwoods from foreign countries to the United States during March is reported to the lumber division of the Department of Commerce by the chief of the section of customs statistics, New York.

These receipts from foreign countries, which include boards, planks and deals of softwoods—pine, spruce, cedar, hemlock, fir and others—totalled 100,039,000 board feet, with a value of \$2,425,090, for March, 1930, as compared with \$6,996,000 board feet with value of \$2,033,195 for February.

Canada shipped to the United States during March 95,211,000 board feet of softwoods valued at \$2,401,160. The remainder of the shipments for the month were from Germany, Poland, Yugoslavia and Mexico.

Orders for lumber, both hardwood and softwood, showed some improvement over recent weeks in their relation to production, during the week ended May 31, according to reports from 556 mills to the National Lumber Manufacturers Association. Total production to these mills amounted to 334,764,000 feet, and orders were reported 10 per cent and shipments 4 per cent less than this figure. A week earlier 598 mills reported production of 376,494,000 feet with orders 81 per cent and shipments 88 per cent of that amount. Unfilled orders

at 481 softwood mills on May 31 were the equivalent of 18 days' production, the same equivalent reported by 521 mills a week earlier. As compared with last year, 457 identical softwood mills gave production as 3 per cent less, shipments 20 per cent less and orders 16 per cent less than for the same week in 1929; for hardwoods, 197 identical mills reported production 20 per cent less, shipments 35 per cent less and orders 25 per cent under the volume for the week a year ago.

A survey of production plans, district by district, at a meeting of the West Coast Lumber Industry, held at Tacoma, Washington, recently brought out the forecast that lumber production in the Douglas fir region is expected to be at from 55 to 60 per cent of capacity during the coming two or three months, and unlikely to rise much above the higher figure during the remainder of the year. Reports were given of the operating plans of more than 80 per cent of the industry's capacity. Many mills were reported as down indefinitely and practically all others as operating on reduced schedules.

Colonel W. B. Greeley, secretary-manager of the West Coast Lumbermen's Association, reported that orders since the first of the year were 61 per cent of capacity and 20 per cent below new business in the same period of last year. The industry, he stated, had produced approximately 500,000,000 feet less lumber this year than last and sold about 900,000,000 feet less. The excess lumber going in inventories had demoralized the industry and its markets, Colonel Greeley said.

An event which deserves to be remembered as one of the great milestones in the progress of public health, according to the New York department of health, occurred a century ago, James Simpson, engineer of the Chelsea Water Company, constructed at London, in 1829, the first filter for a public water supply. The purification of water supplies, probably the most valuable single measure ever developed for the protection of health, has been the chief factor in the great reduction in typhoid in the United States, and its general adoption throughout the world has saved many thousands of lives.

In 1829 the germ theory of disease was still unknown and Simpson's filter was built to perform the office of a mechanical strainer for the purpose of removing turbidity from the water. This filter is still in service and is doing work of a nature far exceeding the purpose for which it was intended.

As a result of the generosity of the people of California in voting the state building bond issue of 1926, the University of California Museum of Vertebrate Zoology, containing the largest collection of material found west of Chicago, is now out of the temporary quarters it has occupied for twenty-two years and is housed in earthquake and fireproof rooms of the new Life Sciences Building.

Professor Joseph Grinnell, curator of the museum, reports that the process of moving the more than 500,000 specimens owned by the University is now practically completed, and that for the first time in his long period of service he is able to go home with the feeling that the invaluable collection will be safe until morning.

The removal of the material from an old wood-frame and corrugated-iron building on one side of the campus to the new Life Science

Building on another side of the campus, was accomplished by the superintendent of grounds and buildings, E. A. Huggill, and his staff, without the loss or damage of a single specimen and without the serious disarrangement of any of the thousands of trays of bird and mammal skins.

The removal of the museum to permanent quarters not only assures the safety of a vast collection of material from all parts of the world which has taken twenty-two years to accumulate, but protects much material which is irreplaceable. A considerable number of the specimens represent birds or animals which are now extinct.

Every effort has been made to include facilities for the preservation of the most valuable material for all time. The University can now say that its museum is the only one in the United States boasting constant-temperature rooms for the storage of furs and skeletons of animals which have a tendency to deteriorate when subjected to light or change of temperature occurring in ordinary rooms. The constant-temperature vaults maintain a temperature of 40 degrees Fahrenheit, which slows down or stops the chemical deterioration of material, and prevents its destruction by insects or bacteria. The vaults are not only kept within one degree of this constant temperature, automatically, but are also kept perfectly dry.

In the large fur room, the pelts of thousands of animals, including such rare or extinct species as the sea otter, marten, glacier bear, etc., are hung on specially designed steel racks which make each pelt instantly available for study. Under these conditions, Professor Grinnell states, these furs, which under ordinary circumstances would last only a few years, may be kept, to all intents and purposes, forever.

On the main floor and galleries of the museum room, are some 343 zinc cases, containing thousands of shallow trays packed with bird and mammal skins, skulls and skeletons. The cases are almost airtight, yet are rather fragile, and their safe removal is considered by Professor Grinnell to have been an outstanding feat. While these zinc cases are not adapted to public display of the museum material, they also help to preserve the specimens for research work.

With the principal aims of training young men for work in forestry, lumbering and range management, the conduct of research in these fields and the dissemination of this knowledge and the enlightenment of the citizens to an understanding of the objects of forestry, the University of California Division of Forestry has published its annual announcement. This announcement, says Prof. Walter Mulford, head of the division, may be secured free from the College of Agriculture at Berkeley.

The courses offered by the University of California relate to the growing, harvesting and utilization of timber crops; the influence exerted by the forest; recreational uses of the forest; forest economics; forest management; wood technology; the lumber industry; and the management of forage resources.

The headquarters for the California Forest Experiment Station, the research branch of the United States Forest Service in California, are located in the same building at the University as the Division of Forestry, and close cooperation exists between these two agencies. Members of the

Experiment Station are available for lectures, it is pointed out, giving students an unusual opportunity for education.

The headquarters of the California District of the United States Forest Service are in San Francisco and officers there also cooperate actively with the University. The educational work of the National Park Service is likewise centered on the campus and cooperation of its officers adds materially to many courses in the study of forestry.

A group representative of the Affiliated Builders, the chapter and the associate building division of the Associated General Contractors, Portland Chapter, as well as of architect, loan and surety men, realtors, material dealers and sub-contractors and others interested in furthering the construction industry in the Pacific Northwest, met recently at the Multnomah Hotel, Portland, to discuss plans of further home building activities.

The outcome of the gathering was a unanimous vote to form committees to compile, raise funds for and distribute a booklet that is to adequately inform the prospective or wish-to-be home owner of the pitfalls on home building and the best methods of financing, of employing a dependable architect and builder, of taking precautions in selecting building materials and other suggestions pertaining to the new home or the reconstruction of the old house.

W. M. Chandler of the Chandler Construction Company, and chairman of the meeting, opened the session by briefly describing the purpose of the gathering, saying that due to the suffering of the building industry in Portland as in other portions of the country, the builders division wished to stimulate the home building business. This would bring relief to many types of business and would help the unemployment situation, said Chandler.

A general discussion was held during the evening, suggestions relative to encouraging better constructed and arranged homes, better building materials, and less old homes pushed on a stagnant market by mortgage and loan firms being prevalent.

Two petitions that are to be presented to the city council soon, under instigation of various contractors, were placed before the meeting for more signatures.

One was a petition to amend section 43 of the housing code to allow rear yard for a building located on a corner lot to be opposite either of the streets on which the lots front regardless of the location of the entrance to the building, and the other was a petition to revise section 146 of the building code to permit use of stud bearing construction in class 6 buildings not exceeding four stories in height.

Proposal of the railroads to increase the classification rating on less-than-carload shipments of paints from fourth to third class in official, southern and western classification territories, has been approved by the Interstate Commerce Commission over the protest of paint manufacturers throughout the country, it has been announced by report and order in Investigation and Suspension Docket No. 3323, according to the United States Daily.

By schedules filed with the commission the railroads proposed both increases and reductions in the carload and less-than-carload ratings in the territories involved on paints, lacquers and varnishes. The schedules become effective June 15, 1930.

No question was raised by the protesting manufacturers as to the lawfulness of the proposed reduced ratings, and little significance was attached to the other changes, due to the fact that the greater portion of their traffic is paints in less-than-carload shipments, upon which "substantial increased freight charges will apply if the proposed ratings become effective."

James McClure, 88, retired contractor, died at his home in Burlingame. Mr. McClure was formerly a well known builder of Los Angeles.

Production of 215 West Coast mills for the week ended May 31 was 151,102,000 ft. Shipments for the same period were 153,236,000 ft. and new orders totaled 152,494,000 ft.

Fourteen California redwood mills reported a cut of 5,614,000 ft. for the week ended May 31. Shipments for the week were 6,925,000 ft. and new business amounted to 5,178,000 ft.

The Soviet Union in Europe continued to be the second most important market for American construction machinery and equipment during the last calendar year, ranking after Canada, according to "Commerce Reports" for May 5, 1930. Last year shipments valued at \$1,181,558 were made to the U. S. S. R., seven per cent of the total American exports of such equipment, and an increase of \$140,000 over last year and of \$768,000 over 1927. The exports to the Soviet Union last year were mainly excavators and power shovels, and parts and accessories for these machines.

Methods of preparing and displaying safety advertising material to obtain co-operation from the man on the job are given in "Safety Advertising," a 15-page booklet issued by the Policyholders Service Bureau of the Metropolitan Life Insurance Co., New York City. The publication discusses the principles, form, appeal and media to be used in this type of publicity and is illustrated with photographs of effective bulletin board and blackboard displays.

Effective methods used for priming centrifugal pumps manually are illustrated and described in a series of bulletins bound together in loose-leaf form which may be obtained from Barrett, Haentjens & Co., Hazleton, Pa. The subject discussed in clear and non-technical language include the theory of priming, submerged pumps, the use of foot valves, air, steam and water ejectors, hand- and motor-operated priming pumps and the arrangement of intake piping.

Le Roy Building Service, 354 Hobart St., Oakland, has been commissioned by the Board of Trustees of the San Francisco War Memorial to prepare a "double take-off" quantity survey for the War Memorial Buildings to be erected in the San Francisco Civic Center.

"This marks the beginning of the use of the Quantity Survey by San Francisco architects," says Albert Le Roy, president of the Le Roy Service. The "Double take-off" assures accuracy which is the point reached in the Quantity Survey system and which is fast being recognized as a decided improvement over the present system of competitive bidding.

USE JUDGMENT IN THE PURCHASE OF EQUIPMENT

There seems to be a great tendency on the part of certain contractors to over equip themselves, particularly when undertaking a new type of work. In fairness to himself, the contractor who is contemplating the purchase of additional equipment would be well advised to ask himself these questions:

1. Do I really need this equipment?
2. Can't I get along without it?
3. Can I use it to advantage?
4. Will it justify the investment of the capital involved?

Some contractors apparently think that the more equipment they have on the job, the more efficiently will their work progress and that they will have a larger profit in the job. They consequently invest vast sums in unnecessary equipment and eventually find themselves equipment poor.

Having satisfied themselves as to the advisability and necessity for the purchase, the next thing to be considered is the design and quality of the product. He should carefully investigate the quality of the material and the workmanship entered into the fabrication of the machine. He should study the manufacturer's specifications and inform himself fully in this respect.

Of course, he will make a thorough inquiry into the performances of the machine on work similar to that for which he wants to use it. It is quite generally agreed that a certain type of equipment may give excellent service on one class of work and be far from efficient on another.

Avoid Novelties

He would do well to ascertain whether the equipment is of standard design or a novelty made up along purely theoretical lines.

Next in importance is the service the contractor may expect from the manufacturer or his authorized agent. He must remember that no machine is fool-proof and that even those built according to the most rigid specifications and inspection are liable to develop defects which are undetectable during the process of manufacture. He should make certain that the firm from whom he purchases can furnish necessary replacements without delay, as the loss of an hour's work of time will cost him many times the value of the broken part which caused the delay. Therefore, the speed with which replacements can be made is a most important consideration. The distributor should be in a position to furnish intelligent and efficient service men quick and without quibbling if the service feature is to be complete.

For his own protection, the contractor should take into consideration the general reputation of both the manufacturer and distributor. They should have a high standing in the industry for honesty and fair dealing.

Price and Value

Having satisfied himself as to these features, the all important matter of price can be given intelligent consideration. Naturally enough, the tendency will be to place the order with the manufacturer who offers the greatest value from the standpoint of quality and service at the lowest price. There will, of course, be strong inclination to buy at the lowest figure, but too much cannot be said to warn against the purchase of equipment which is sold on the basis of price only. A man seldom gets more than he pays for, though he may congratulate himself on his ability to buy at a close figure. There can be no question, however, that there is often too great a disparity between selling prices of commodities of the same or slightly

different quality. Only sound business judgment will enable the contractor to evaluate the various machines and gage their true value. It is to be expected that all but the successful salesman will question the judgment or even the sanity of the buyer but as he is the man who pays the bill, it is his undeniable privilege to buy what he pleases and from whom he pleases.

From the standpoint of the contractor to the manufacturer and distributor, the following suggestions would be in order:

Radical changes in models, which are not made as a result of thorough, practical tests should be discouraged. In the final analysis, a great portion of the loss resulting from changes in design, due to unsatisfactory service or obsolescence, is borne by the contractor. Changes of this kind are not in keeping with the trend towards standardization and the elimination of unnecessary sizes and capacities.

New models should be subjected to thorough, practical tests by the manufacturer before being offered for sale to the contractor. Otherwise the construction job is made the experimental laboratory for the manufacturer.

It would greatly facilitate the contractor's operations if the manufacturer would furnish him with a complete list of parts conveniently arranged and identified. To the manufacturer the sale of the parts themselves is but a small matter, but to the contractor the prompt receipt of replacements is of most vital importance in keeping down overhead costs. In fact, it is so very important as to warrant the suggestion that every order for parts be given precedence over routine business and be dispatched to its destination with the greatest possible speed.

It would be difficult to estimate the enormous sums spent annually by manufacturers in the preparation and distribution of advertising literature, catalogues and the like. In the interests of the contractor, such pamphlets should contain the greatest amount of information concerning the specifications, weights, sizes and other pertinent data regarding the equipment described. Contractors, as a rule, are extremely poor correspondents and will not write to the manufacturer for detailed information in which they would be interested if it was contained in the advertising.

The manufacturer should use the greatest discretion of his salesmen and distributors. There are some so-called "high powered" salesmen who are doing more to injure their employer's standing with the contractors than they are doing good. The manufacturer will better serve his own ends if he will thoroughly investigate the qualifications and reputation of his distributors before granting them agency privileges.

Fair Practice

It is usually the man who aspires a meteoric rise to contractor, who has neither the equipment, capital nor often the ability, to seek extremely long terms on his equipment purchases and it is he who usually underbids the established contractor by such a wide margin that he can scarcely break even on the job thereby preventing the responsible man from getting work at a legitimate profit. He must make some pretense of meeting his obligations and in desperation will take work far below his responsible contract. By granting unlimited terms of payment, the equipment industry contributes to the instability of his contracting business.

Instances come to light when equip-

ment salesmen have gone so far in their pursuit of business as to encourage material dealers, contractors and others, to become engaged in street and highway construction. Needless to say, the equipment distributor who goes to such ends to effect a sale incurs the illwill of the legitimate contractor, as well as, in the end, the victim he misled.

An increase in the number of contractors will not necessarily mean an increased volume of construction, and consequently, in the end will not mean an increased sale of construction equipment. Responsible contractors must have equipment to carry on their work and if they are to be deprived of that work by the irresponsible fly-by-night contractors, encouraged and financed by manufacturers or dealers, it is logical that they will not purchase equipment which they would otherwise buy.

The equipment industry gains nothing if such tactics are allowed to prevail.—(Western Canada Contractor).

14 PER CENT OF ALL LUMBER CUT IN U. S. GOES INTO BOXES

Nearly 14 per cent of all the lumber cut each year in the United States goes into the manufacture of boxes and crates, and 7 per cent of the wood pulp produced is used in the manufacture of fiber containers, according to a statement issued by the Department of Agriculture.

"The importance of the demand for boxes, crates and composition containers," says the statement, "has led to a long and detailed study of the subject by the Forest Service of the United States Department of Agriculture. In the Forest Products Laboratory at Madison, Wis., the department has been building boxes and crates and then breaking them and straining them to get exact facts on which to base plans for truly economical construction."

"A box or crate ought to be strong enough to withstand the risks of transportation to which it will be subjected and should have an ample margin of safety. But once a safe minimum standard is determined, the cheaper the lumber and the cheaper the construction costs the more economical the box will be. Box-making offers a good market for a great quantity of low-grade lumber not suitable for other purposes."

TALLEST CONCRETE BUILDING IN THE WORLD AT CHICAGO

With the completion of the Trustees System Building, Chicago, this country, may again lay claim to the tallest reinforced concrete structure in the world. This newest of Chicago skyscrapers will be 29 stories high—one story higher than the present tallest structure of this kind, located at Montevideo, Uruguay.

The new building is of concrete joist floor construction. Floor construction was started August 22 and completed November 5. The contractors are the McLennan Construction Company of Chicago.

An interesting feature in connection with the job was the framing of two floors at one time, pouring concrete to be placed on two floors consecutively. It is estimated that this plan of operation saved at least one day per floor, or a total of 29 days' time.

The Concrete Engineering Company installed and removed 232,570 square feet of Steelforms. The architects are Thielbar & Fugard; the engineer, James B. Black.

REALTORS RECOMMEND RADICAL LENGTHENING OF CITY BLOCKS

Radical lengthening of our present typical city blocks is strongly advised as a measure for cutting down the costs of home ownership in a resolution which was adopted by the board of directors of the National Association of Real Estate Boards at their quarterly meeting held in Chicago May 9 and 10.

The resolution puts the Realtors of the country on record as favoring residential blocks 1000 feet or more in length. The general use of the motor car now permits a radical lengthening of blocks in residential areas in keeping with present day convenience and economy, the resolution points out, and goes on to give the following reasons which make advisable this increased length in laying out blocks in residential districts:

1. Substantial economies in the use of the land can be obtained. Longer blocks mean reduced street area in relation to total area.

2. Frequent crossings invite personal accidents, delay traffic, and increase the problem of traffic and pedestrian supervision.

3. Longer blocks not only aid in speeding up traffic movement but also contribute a semi-suburban effect of beauty.

4. Reduction of the number of side streets results in savings to both the home buyer and subdivider. The burden of side street paving and utilities costs is decreased by fewer side streets and more land is utilisable as a result of such planning.

5. Maintenance and lighting costs of

streets can be reduced. Less frequent stops will expedite transportation service by an amount of time more than sufficient to compensate the average party for the extra walking distance.

The Association commends the suggestions for longer blocks to the consideration of local real estate boards, city planning commissions and city planning engineers. It further recommends that local member boards secure the cooperation of city planning commissions and engineers in permitting and adopting larger residential blocks in keeping with present day convenience and economy. The resolution is to be sent to all city planning commissions throughout the country.

In its resolution the Association recommends that the long block be platted parallel to prevailing traffic directions. Provisions may be made for cross walks or pedestrian ways in the center of extremely long blocks. Hazards to patrons of transit or bus lines may be reduced by locating stops at the middle of blocks.

The Association points out practical provisions which should be made to insure adequate fire protection and adequate provision for the collection of waste and garbage.

The resolution is adopted by the board of directors was brought before that body by the Home Builders and Subdividers Division of the Association which had previously adopted the recommendation. The resolution as adopted has also been understood by the city planning committee of the Association.

Sometimes contracts are awarded to the low inexperienced bidder when the second low bidder is but a few dollars higher with the result that the work is long delayed and the contractor fails, whereas the second low bidder could have completed the work on time or at a profit.

What is the cure for irresponsible bidding? The other bidders, the materialmen, the bankers, the bondsmen all put it up to the public official saying that he should reject the bid. This might be done; but why should a public official refuse to award the contract and take abuse of a political nature on the one hand and from dissatisfied persons shouting graft on the other? Even to reject the irresponsible would not eliminate the plunger. We have seen old, well established firms taking severe losses and sometimes failing; often they take an unnecessary and unreasonable length of time to complete their work. Bidding against the other fellow's costs or bidding without knowing and figuring costs have brought losses and sometimes failure to firms that had done a contracting business for years.

Determine Qualifications

The State of Illinois has worked out a system by means of which they determine what they believe to be the qualifications of the bidder. If the bidder does not qualify for the job, his bid is rejected. The plan is reported to be working successfully. However, it seems to us that they have taken the place of the bonding company and the banker, either of whom could and most certainly both should examine the bidder's financial condition and qualifications most carefully. We can see no reason why the bonding companies and the bankers cannot adopt a system such as the Illinois system and apply the same to the business to their own profit and in the interests of their clients. We have known of cases where the banker and bonding company have extended credit and written bonds for bidders who had no qualification other than the nerve to bid and ask for service. And then all of them complain when they lose their money. It is a marvel that they hadn't lost their money long ago if that is the careless way in which their businesses are conducted.

The question is up to the bankers and the bonding companies for solution and it can be solved by them with a material reduction in their own losses and a reduction in contractors' losses and failures.—(Western Canada Contractor).

THE SPIRIT OF MICHEL AND PFEFFER IRON WORKS

A portion of the main office of Michel & Pfeffer Iron Works, Harrison, at 10th Street, San Francisco, was burned out Thursday night. Yesterday, the scene, as far as the entire working personnel was concerned was one of business as usual. With firemen still there, sweeping up charred fragments and broken glass, the office force, salesmen, mechanics and executives were all organized and re-located in a portion of the main building which remained undamaged. This was accomplished before 8:30 in the morning. Such is the spirit of the heads of this business which has grown to national proportions from modest beginnings back in 1912. Being in a business which deals and manufactures entirely in metals, there was nothing to burn in the shops and stock rooms. The fire was confined entirely to the general offices. Telephone communication lines were re-established immediately.

YOU CANNOT AFFORD TO WORK CHEAPER THAN YOUR COMPETITOR

At times it seems that the most careless people in the world are bidding on contracts. One will omit to place a bid opposite an item of work; another will forget his certified check; another will have a check, but it is less than the required amount. And the next fellow is over-cautious and writes a clause or two to keep himself in the clear.

We have heard a lot about the irresponsible bidder in the last few years. This term or description does not refer so much to the fellow who forgets or who is careless as it does to the bidder who seeks a contract, although he is absolutely unqualified in one or more of the essentials for the class of work for which a contract is sought. They are not perennials, for they never come back for a second contract.

Irresponsible bidders are those who are novices, who have had no experience; those who have insufficient funds or equipment for the particular class and volume of work sought; those who are plungers; gamblers who size up the field of bidders, their previous bids on other work and make up a bid without knowing or figuring costs. We are rather convinced that some of you often are irresponsible bidders in that you bid against the field without knowing or actually studying the work and figuring costs. Gamblers, bidding against this or that man or firm instead of the actual costs of the work plus a fair profit.

Where The Mistake Comes

We do not criticize you unduly for slizing up the bidders; to do so is natural. But we do criticize you for

thinking that you can do any class of work as cheap or cheaper than the other fellow. Some people can do a good many things well and some people cannot; however, as a general rule there is some one line that a particular person can do better than the other fellow. Each of you, perhaps, have a particular line of work that you can do exceptionally well. But don't think that you can do all or many lines of work better than the other fellows, for we know that some firms do paving work unusually well, others handle team work or shovel work for less than their competitors and others build bridges or crush rock for less money than do other contractors. We know that this is true and we know that the bidder who figures he can do a kind of work as cheap as the other fellow and bids on the other fellow's costs and not his own is headed for trouble. We repeat; there are contractors who can do a particular kind of highway construction cheaper than the balance of contractors in the same line of business. Therefore, we recommend that you bid on your own costs—and study the other fellow's methods.

To get back to the other irresponsible—the novice and the plunger. These classes of bidders make up the bulk of contract failures. The loss is not alone their loss, but generally their incompetence causes losses to those who deal with them and to the public through less use of the highway, the cost of the upkeep of the detours made necessary by reason of the work, the loss of time to the traffic and many other items such as increased cost of engineering.

NEW YORK COURT OF APPEALS UPHOLDS ARBITRATOR'S AWARD

The New York State Court of Appeals, in a far reaching decision rendered May 6, 1939, in the matter of the arbitration between Finsilver, Still & Moss, Inc. (in whose favor the award had been rendered and who was represented on the appeal by Joseph Dannenberg, counsel) and Goldberg, Maas & Co., Inc. (represented by C. S. Rosenberg, counsel) held that a party to an agreement providing for arbitration under the rules of the American Arbitration Association may proceed with the arbitration and to a valid award, even though the other party refuses to participate, without first obtaining a preliminary court order directing the objecting party to proceed.

The Appellate Division, First Department, had held that Section 4-A of the New York Arbitration law authorizing such procedure was unconstitutional. Because of the fundamental question involved affecting practically all agreements to arbitrate future disputes in which a definite procedure is provided, the American Arbitration Association petitioned the Court for leave to intervene and filed a brief in support of constitutionality prepared by former Federal Judge Edwin L. Garvin and Wallace T. Stock, members of the law firm of Lewis, Garvin and Kelsey. The law was held valid.

Under this decision, if a party ignores the various notices received and fails or refuses to appoint arbitrators or attend hearings, he does so at his own risk. The arbitration may then proceed in his absence, and the arbitrator may render an award upon hearing the complaining party only. Judgment may then be entered on this award unless the defaulting party can establish that there was no arbitration agreement, or that he had not defaulted or that the arbitrators were not appointed in accordance with the method provided in the agreement.

The defaulting party's failure to proceed with the arbitration, will have lost for him, however, the opportunity to present his defense on the merits.

The Court suggests that a party who may later wish to question the existence of the agreement or whether there was proper compliance with the procedure agreed upon, may nevertheless safeguard his defense on the merits of the controversy, either by submitting his evidence at the hearing under protest and with the understanding that he reserves such rights, or by applying to the court for a stay of the proceedings pending the determination of such rights. In this connection Chief Justice Cardozo writes in a long opinion in which the entire court concurred:

"We hold that a party who joins in an arbitration after seasonable protest has the right, none the less to contest by appropriate forms of challenge the jurisdiction of the arbitrators, and that this right has not been taken away by reasonable implication through the concession of a particular remedy to a party who stays out."

The significance of the decision, according to the American Arbitration Association, is that by reversing the Appellate Division and upholding the provisions of law under which the Association had proceeded in accordance with its rules to designate the arbitrator and arrange for the hearing, the highest Court of the State has definitely relieved a party complying with his arbitration agreement from the necessity of enlisting the aid of the courts to direct a recalcitrant party to proceed and has placed upon the latter the responsibility for undertaking court action to prevent the arbitration from proceeding and, if he fails to do so, to assume the risks of his own default."

CITY MUST PAY FOR FAILURE TO DISCLOSE TRUE CONDITIONS ON PROJECT, IS COURT RULING

A contractor may recover for losses sustained by reason of misrepresentation or failure to disclose the true conditions under which certain work is to be done, according to a verdict in the Federal Court at Seattle in favor of Jahn & Bressi, engineers and contractors of Los Angeles, in their suit against the city of Seattle on a contract for construction of a tunnel and pipe line and control works for the Lake Youngs water project, says Southwest Builder and Contractor.

The case is one of great interest and importance to contractors, and particularly those engaged in engineering construction, because it establishes the responsibility of the engineer and the contractor awarding body for the exercise of due diligence in ascertaining the actual conditions under which work is to be performed as a basis for estimating the cost and protects the contractor against imposition of hazards of which he is given no inkling and which he has no reason to believe will be encountered.

News of the court victory just received by Jahn & Bressi, discloses that the judgment in their favor was for \$94,596.02. A jury was selected by the city of Seattle to try the case and ten of the twelve members were residents of that city. It would appear,

therefore, that the claims of the contractors were fully supported and that the responsibility of the city was very clearly defined.

The contract in question was awarded to Jahn & Bressi in 1924 on their bid of \$1,270,759 in competition with 5 other well known construction firms. Their price was only \$16,712 below the next low bidder. The tunnel section of the project on which great difficulty was encountered because of excessive ground water was 8 ft. net internal diameter with a concrete shell 14 inches thick. This was described in the specifications as a "pressure conduit" in which the water flowing through would be under a pressure greater than the ground water on the outside. Specifications further called for pressed steel lagging to support the earth in the tunnel while excavating.

In July, 1925, the contractors filed with the board of public works of Seattle a claim for \$210,556.14 for extra work due to the fact that a portion of the tunnel had to be constructed under air pressure because of excessive ground water which was not indicated either by plans or specifications or any of the test borings disclosed by the city prior to the award of the contract. In their complaint they informed the board that if the

claim was not allowed they could not proceed. The board elected to take over the work and it was completed by another contractor, J. M. Clapp.

In their claim filed with the board of public works Jahn & Bressi set forth that methods of construction other than those provided for in the plans and specifications had to be followed "because of circumstances and physical conditions radically different from those represented by the plans and specifications upon which the contract was entered into, which could not be anticipated, were not open to observation and could not be discovered until the specific work under the contract actually had been undertaken, and because of the inherent insufficiency of the design, plan of construction and method of work adopted by said plans and specifications, as applied to such unforeseen and different circumstances and conditions," all of which rendered their contract oppressive.

Attention of the board was directed to the fact that whereas in the specifications it was stated the tunnel section would be under a pressure greater than the groundwater on the outside, when the excavation was started at Station 20 "it became manifest that the conditions thus represented to exist were not true in fact, and the pressure of the ground water and the earth above the tunnel was so great that the plan of driving the tunnel to full size and lagging it as driven with pressed steel plates placed in direct contact with the earth, became impossible." It became necessary therefore to drive the tunnel under compressed air, a construction feature which was not contemplated by the contractors. Conditions becoming still more aggravated as work progressed it became necessary for the contractors, with the approval of and under the express direction of the city engineer, to adopt still another form of construction at Station 22, and from that point for a distance of 631 ft. "the tunnel was driven by the method of timbering with heavy timber lagging, which was also installed under compressed air at pressures ranging from 20 to 35 lbs. per sq. in."

It was further stated by the contractors that in those portions of the tunnel driven under compressed air it was also necessary to install the concrete lining under the same conditions at a greatly increased expense. Additional concrete was required for the lining and additional quantities of cement were required for grouting. These three features of construction not contemplated by the contractors from the plans and specifications were the basis for their claim for extra expenditures totaling \$210,556.14.

A detailed statement of the extra cost for construction discloses that the expense of driving the tunnel under compressed air was very heavy. For example in the 631 ft. which had to be timbered the excess cost for excavation above the normal cost of \$77 per cu. yd. under expected conditions was \$30.63, while the excess cost of placing concrete lining about the normal cost of \$8 per cu. yd. was \$16.60 per cu. yd. These prices do not include materials, timbering or rental of compressors and other special equipment, their installation and operation, power and incidentals.

In celebration of the centennial anniversary of the invention of the airplane shown by Thaddeus Fairbanks, Fairbanks, McCormack & Chicago, Ill., has issued a 20-page booklet, illustrated in color, which gives the history of the development of weighing machines and tells something of the accomplishments, aims and aspirations of the company. It is entitled "Beginning the Second Century."

Building News Section

APARTMENTS

Preliminary Plans Being Prepared.
APARTMENTS Cost, \$250,000
SAN MATEO, San Mateo Co., Calif.

Location Withheld.
Six-story and basement class C steel frame, brick and concrete apts. (21 2-3-4-5-6-7- and 8-room apts.)

Owner—Name Withheld.
Architect—Willis Lowe, 354 Hobart St. Oakland.

Sub-Bids Wanted.
APARTMENTS Cost, \$165,000
LOS ANGELES, Cal. Hayward Ave.
Seven-story and basement Class A reinforced concrete apartments (80x190 ft.)

Owner and Builder—W. I. Moffett, Pacific National Bldg., Los Angeles.
Architect—Leland A. Bryant, 6313 Hollywood Blvd., Los Angeles.

Additional Sub-Contracts Awarded.
APARTMENTS Cost, \$200,000
SAN FRANCISCO. SE O'Farrell and Franklin Sts.

Six-story steel frame and reinforced concrete class C apartments (42 2- and 3-room apts.)

Owner and Builder—C. S. Hoffman, 1541 Howard St.
Elevator—Spencer Elevator Co., 166 Seventh St.

Plastering—G. Boni, 2652 Lombard St.
Roofing—Alta Roofing Co., 976 Indiana Street.

Concrete—Bay Concrete Company, 365 Ocean Ave.

Sheet Metal—Western Furnace and Sheet Metal Works, 1143 Golden Gate Ave.

Reinforcing Steel—W. C. Hauck, 280 San Bruno Ave.

Mill Work—Holmes Planing Mill Co., 5th and Channel Sts.

Lumber—Pope & Talbot, Russ Bldg.
As previously reported, Frigidaire awarded to Frigidaire Corp., 18th and Harrison Sts.; Incinerator to Badt-Falk & Co., 557 Market St. (Heimbach 20th Century); electric work to Aetna Elec. Co., 1337 Webster St.; plumbing and heating to J. Gibbs Sons, 1706 Geary St.; structural steel to Golden Gate Iron Works, 1541 Howard St.; grading to G. Bianchini, 750 Silver Avenue.

Construction Started.
APARTMENTS Cost, \$75,000
BURLINGAME, San Mateo Co., Cal.

El Camino Real.
Three-story and basement frame and stucco apartments.

Owner—Philip Webster, 2401 Fulton Ave., Berkeley.

Architect—Edwards and Schary, 605 Market St., San Francisco.

Contractor—Daly Bros., Burlingame.

Architects are taking sub-bids.
Concrete—J. J. Morey, Menlo Park.

Plans Being Prepared.
APARTMENTS Cost, \$1,500,000
SAN FRANCISCO. W. Gough St. bet. Washington and Sacramento Sts.

Class A community apts. (height of structure not decided).

Owner—Coast Bay Co., care contractors.

Architect—Geo. K. Lham, Sharon Bldg. Excavation—Lindgren and Swinerton, Inc., 225 Bush St.

Proposed project is in a very preliminary stage. Further information will be given in about two months.

To Be Done By Day's Work.
APARTMENTS Cost, \$15,000
SAN MATEO, San Mateo Co., Calif.
502 9th Ave.

Two-story frame apts. and garage.
Owner and Builder—A. Powers, 515 S Humboldt St., San Mateo.

Contract Awarded—Sub-Bids Being Taken.

APARTMENTS Cost, \$40,000
SAN FRANCISCO. S Greenwich St. near Franklin St.

Three-story frame and stucco apts. (35 rooms).

Owner—Mrs. Sarah Schwalbe.
Private Plans—Kerner Incinerator Co., 450 Clementina St., San Francisco

Contractor—Laughlin Const. Co., 1770 Pine Street.

Incinerator Contract Awarded.
APARTMENTS Cost, \$525,000
OAKLAND, Alameda Co., Cal.

Jackson St., back of Women's City Club.

Fourteen-story Class A reinforced concrete apartment building (145 apts.; 8-room bungalow on roof, and 60-car garage in basement).

Owner—Mr. and Mrs. Henry G. Hill, 1428 Alice St., Oakland.

Architect—Miller & Warnecke, Financial Center Bldg., Oakland.

Contractor—Chas. S. Mabrey, 730 1st National Bank Bldg., Oakland.

Incinerator—Kerner Incinerator Co., 450 Clementina St., San Francisco

As previously reported, masonry awarded to Mutual Constr. Co., South San Francisco; structural steel, to Herrick Iron Works, 18th and Campbell Sts., Oakland; rough and finish, general ornamental iron and glazing to R. W. Littlefield, 537 17th St., Oakland; tile, marble and roofing to Mallett & Peterson, 3221 20th St., S. F.; plastering to Wm. and A. Gilmour, 666 Mission St., S. F.; painting to Raphael Co., 270 Tehama St., S. F.; electric wiring to Matson-Sashbrooke Co., 4115 Broadway, Oakland; heating, plumbing and sheet metal to George Schuster, 4712 Grove St., Oakland.

Site is 85x130 feet. Plans call for ten rooms, dining room and lounge on the ground floor.

Plans Completed.
ADDITION Cost, \$5000
SAN FRANCISCO. 2265 Broadway.

One-story hollow tile addition to present 5-story apartments.

A Demonstration of the
SKILSAW PORTABLE ELECTRIC HAND SAW

Will solve your cutting problems.
(Four Models, 1/2 to 1 h. p.)

ELECTRIC HAMMERS
ELECTRIC DRILLS
GRINDERS, BUFFERS

PETER H. NELSON

Labor Saving Portable Electric Tools.

1222 Mission St. Underhill
San Francisco 1267

Owner—Mrs. M. H. Gnecco, 2265 Broadway.

Architect—E. E. Young, 2002 California St.

Bids are in and will be awarded shortly.

Completing Plans
APARTMENTS Cost, \$85,000
LOS ANGELES, Cal. No. 6398 Cochrane Avenue.

Four-story and basement brick apartments (60x130 feet).

Architect—Rudolph Falkenrath, Jr., Owner—A. Dutz and M. A. Williams, Chamber of Commerce Bldg., Los Angeles.

Planned.
APARTMENTS Cost, \$—
SANTA BARBARA, Santa Barbara Co., Cal. Ocean front.

Large apartments (height and type of structure not determined).

Owner—Samuel E. Kramer (owner of Los Patios Apts.), Santa Barbara.

Architect—Wm. Mooser, Monadnock Bldg., San Francisco.

Preliminary Plans Being Prepared.
APARTMENTS Cost, Approx \$200,000
SAN FRANCISCO. Pacific Avenue.

Seven-story steel frame and brick apartment.

Owner—Withheld.

Architect—W. E. Schirmer, 700 21st St., Oakland.

BONDS

AUBURN, Placer Co., Cal.—Election will be called June 24th by city council to vote bonds of \$40,000 to finance erection of a new city hall, preliminary plans for which have been prepared by Architect W. H. Weeks, 111 Sutter St., San Francisco.

WESTLEY, Stanislaus Co., Calif.—Bond election will be held July 7 in the Westley Grammar School District to vote bonds in the amount of \$21,000 to finance construction of one-story class C elementary school. Davis-Pearce Co., Grant and Weber Sts., Stockton, are the architects.

CONCORD, Contra Costa Co., Cal.—Bond election is being held in Oak Grove School District July 13 to vote bonds in the amount of \$20,000 to finance construction of an addition to the present school. Work involves addition of an auditorium and one classroom, etc. W. E. Milwahn, Pacific Bldg., Oakland, is the architect.

ALPAUGH, Tulare Co., Cal.—Bond election will be held July 1, 1 P. M. in the Alpaugh School District to vote bonds in the amount of \$18,000 to finance construction of alterations and additions to present school in Alpaugh. E. W. Petersen, Mason Bldg., Fresno, is the architect.

MONTEREY, Monterey Co., Cal.—Bonds in the amount of \$225,000 were voted by the Monterey Union High School District to finance improvements and additions at the High School grounds. Preliminary plans are being prepared by Architects Swartz & Ryland, Spazier Bldg., Monterey, 373 Main St., Salinas, and Brix Bldg., Fresno.

LINDSAY, Tulare Co., Cal.—Bond election will be held shortly by City of Lindsay to vote bonds in the amount of \$75,000 to finance construction of a new civic center.

CHURCHES

Completing Plans.

CHURCH, ETC. Cost, \$660,000
LOS ANGELES, Cal. Sixth St. bet. Commonwealth and Hoover Sts.
Class A reinforced concrete and steel church, chapel and education building (to seat 1600).

Owner—First Congregational Church of Los Angeles.
Architect—Allison & Allison, California Reserve Bldg., Los Angeles

Plans Prepared.

CHURCH Cost, \$50,000
SAN BERNARDINO, San Bernardino Co., Cal. Ninth and F Streets.
Two-story reinforced concrete church (120x92 ft. (auditorium with stage, pipe organ, etc.))

Owner—Church of Jesus Christ of Latter Day Saints.
Architect and Supt. of Constr.—T. W. Harber, 479 23rd St., San Bernardino.

Plans To Be Prepared.

CHURCH Cost, \$15,000
SANTA CRUZ, Santa Cruz Co., Cal.
One-story frame and stucco church (1st unit).

Owner—Church of the Nazarene (Rev. E. F. Dunn, Pastor), 51 Cayuga St., Santa Cruz.
Architect—Not Selected.

Architect will be selected within one week.

Additional Sub-Contracts Awarded.

CHURCH Cost, \$359,000
SAN FRANCISCO, NE Ellis St. and Taylor St.

Six-story and basement reinforced concrete, steel and terra cotta church, hotel apts. and stores.
Owner—Glide Foundation (Mrs. L. H. Glide), 162 Uplands Ave., Berkeley (Rev. F. W. Robbins, pastor).

Architect—James Phacey, Mercantile Bank Bldg., Berkeley.
Contractor—Monson Brothers, 475 6th Street.

Electrical Work—Radelfinger Bros. 234 Fourth St.

Lumber—J. H. McCallum Lumber Co., 748 Bryant St.

Sheet Metal—Fire Protection Products Co., 1101 16th St.

As previously reported, structural steel awarded to McClintic-Marshall Co., 2050 Bryant St.; reinforcing steel to Gunn, Carle & Co., 444 Market St.; excavating to Meyer Rosenberg, 12 Oak Grove; heating to J. H. Pinkerton, 927 Howard St.; plumbing to Gilley Schmid Co., 198 Otis St.; mill work to Acme Mill Co., 6th and Channel Sts.; terra cotta to Gladding-McBean, 660 Market St.; miscellaneous iron to Fair Mfg. Co., 617 Bryant St.; tile work to Art Tile & Mantel Co., 221 Oak St.

Plans Being Prepared.

CHURCH Cost, \$30,000
NORTH OAKLAND, Alameda Co.
Two-story frame and brick veneer church (auditorium to seat 570)
Owner—Colored Baptist Church.
Architect—Chas. W. McCall, 1404 Franklin St., Oakland.

FACTORIES AND WAREHOUSES

To Be Done By Day's Work By Owner.

WAREHOUSE Cost, \$15,000
SAN JOSE, Santa Clara Co., Cal. San Fernando and Bush Streets.
Frame & corrugated iron warehouse.

Owner—Western Pacific Railroad Co., 40 N-San Carlos St., San Jose.
Architect—Eng. Dept. of Owner.

Contract Awarded.

CLEANING PLANT Cost, \$30,000
OAKLAND, Alameda Co., Cal. West Telegraph Ave. S 55th St.
One-story brick and concrete cleaning plant and 1-story brick and concrete dyeing plant.

Owner—Marshall Steel, Center Street, Berkeley.
Architect—Alben Froberg, Ray Bldg., Oakland.

Contractor—H. J. Christensen, Ray Bldg., Oakland.

Site Being Cleared.

WAREHOUSE Cost, \$—
SAN FRANCISCO, W Third St. from Mariposa to 16th St.

Four huge warehouses (assembling, storage, etc.)
Owner—Pacific Coast Steel Co., 111 Sutter St.

Engineer—Eng. Dept. of Bethlehem Steel Corp., New York.
Plans are being prepared and bids will be taken at a later date. More definite information will be given shortly.

Sub-Contracts Awarded.
WAREHOUSE Cost, \$30,000
OAKLAND, Alameda Co., Cal. Second and Harrison Sts.

One-story steel and brick warehouse (100x200-ft.)

Owner—Safeway Stores, 1th and Jackson Sts., Oakland.

Engineers—Couchot & Rosenwald, Underwood Bldg., San Francisco, and Chas. Roeth, 1404 Franklin Street, Oakland.

Contractor—Charles Heyer, Jr., Mills Bldg., San Francisco.

Structural Steel—Herrick Iron Works, 18th and Campbell Sts., Oakland.

Reinforcing Steel—Gunn, Carle & Co., 444 Market St., San Francisco.

Finish Hardware—Marshall Newell Co., Spear and Mission Sts., San Francisco.

Painting—Jos. J. Burdon, Stockton.

Glass—Type Bros., 666 Townsend St., San Francisco.

Bureau of Public Roads, 461 Market St., San Francisco, to surface 4.20 miles of Section B, Strawberry-Phillips, of Route No. 32, Placerville—Lake Tahoe National Forest Highway, involving:

4,000 cu. yds. unclass. excavaton for borrow;
4.20 miles fine grading subgrade and shoulders;
10,300 cu. yds. crushed rock surf.;
800 cu. yds. crushed rock (supplemental);
700 M. gals. watering;
provide and maintain water plant;
maintenance of existing road and sections accepted for traffic (extra work, estimated cost \$1,000);

1,060 cu. yds. coarse screenings;
560 cu. yds. fine screenings;
60 light-of-way monuments (in place).

Complete list of bids follow:

Tiffany, McReynolds, Tiffany & Failing, San Jose	\$39,745
Montfor & Armstrong, Sacto.	44,599
Hein Bros. Bysalt & Rock Co., Petaluma	46,687
Hemstreet & Bell, Marysville	47,425
Harold Smith, St. Helena	48,972
Engineer's estimate	46,520
Bids taken under advisement.	

VALLEJO, Solano Co., Cal.—City Council declares intention (171) to improve Indiana Street from Colusa to Amador Street involving: Grading; 5-in. cement concrete pavement; 6 ft. wide and 4-inch thickness cement concrete sidewalks; 4-in. vitrified clay sewer; sewer lateral; cement concrete curbs and gutters. Improvement Act 1915. Hearing July — A. E. Edgecumbe, city clerk. T. D. Kilkinney, city engineer.

SAN JOAQUIN COUNTY, Cal.—Following bids received June 18 by State Highway Commission to grade and widen about 3.3 miles bet. Houston School and Forest Lake with cement concrete and crusher run base:

Larsen Bros., Galt	\$42,828
Lilly, Ward & Besotti, Stockton	43,055
George Pollock, Sacramento	43,201
C. W. Wood, Stockton	46,183
Pieria & Reed, Tracy	47,144
R. G. Letourneau, Stockton	49,464
Frederickson & Watson & Frederickson Bros., Oakland	50,236

Gannon & McCarty, Stockton	53,629
D. McDonald, Sacramento	54,086
A. Teichert & Son, Sacramento	55,831
Kennedy Bayless Constr. Co., Biggs	64,030
Bids held under advisement.	

TEHAMA COUNTY, Cal.—Until July 17, 2 P. M., bids will be received by C. W. Sweetser, District Engineer, 461 Market St., San Francisco, to grade Section A Route #21, Deer Creek National Forest Highway, in Lassen National Forest, a length of 3.4 miles involving:

25.32 acres clearing;
127,500 cu. yds. unclass excavation;
325 c. yds. structural excavation;
14,045 sta. yds. overhaul;
3.4 miles finish;
140 sq. ft. crib face in place;
62 lin. ft. culvert in place;
1,386 lin. ft. corr. metal pipe in place;
344 cu. yds. hand laid rock embankment;
103 right-of-way monuments.

Specifications obtainable from above on deposit of \$10, returnable. Certified check of 5% required payable to Federal Reserve Bank of San Francisco.

SAN JOAQUIN COUNTY, Cal.—Following bids received June 18 by State Highway Commission to grade and surface about 1.8 miles bet. French Camp and Stockton with crushed gravel or stone:

Larsen Bros., Galt	\$38,726
C. W. Wood, Stockton	38,900
C. W. Morgan Paving Co., L. A.	43,487
Healy-Moore Co., Oakland	49,390
Bids held under advisement.	

SANTA CRUZ COUNTY, Cal.—Following bids received June 18 by State Highway Commission to grade and surface about 2.6 miles bet. Waterman Switch-back and Saratoga Gap with bituminous treated waterbound macadam:

O. A. Lindberg, Stockton	\$127,220
E. C. Coates, Sacramento	132,253
J. F. Holland, Inc., S. F.	139,641
E. H. Travers, Los Angeles	144,043
Ariss-Knapp Co., Oakland	153,484
M. J. Bevanda & Son, Stockton	156,052
Granfield, Farrar & Carlin, San Francisco	157,201
C. R. Johnson, S. F.	166,729
Geo. Pollock Co., Sacramento	167,964
W. A. Dontanville, Salinas	178,053
Bids held under advisement.	

CARSON CITY, Nev.—Nevada Rock & Sand Co., Reno, was awarded contract by the Nevada Highway Department June 11 at \$134,533.14 for reconstruction of a portion of the state highway system in Elko County from Elko to Deeth, Route 1, Sections B and C, a length of 31.44 miles. Engineer's estimate, \$165,939.

NOTICE TO CONTRACTORS

SEALED PROPOSALS will be received at the office of the State Highway Engineer, Public Works Building, Sacramento, California, until 2 o'clock P. M. on July 9, 1930, at which time they will be publicly opened and read, for construction in accordance with the specifications therefor, to which special reference is made, of portions of State Highway, as follows:

Del Norte County, between Southerly boundary and Wilson Creek (I-D. N-1-A), about twelve and seven-tenths (12½) miles in length, to be surfaced with oil treated crushed gravel or stone (road mixed).

Trinity County, a bridge across Trinity River near Douglas City (II-Tri-20-F and A), consisting of two 125-foot steel deck truss spans with concrete deck, four 56-foot reinforced concrete girder spans and two 30-foot reinforced concrete girder spans.

Yolo County, between Bretona and Dunnigan (III-Yol-7-C), about five and eight-tenths (5.8) miles in length, to be graded and paved with asphalt concrete.

Los Angeles County, between 1.3 miles and 13.9 miles north of Castaic School (VII-LA-4-B), about twelve and six-tenths (12.6) miles in length, portions to be surfaced with bituminous macadam.

Riverside County, between northerly boundary and one mile west of Beaumont (VIII-Riv-26-A), about six and two-tenths (6.2) miles of existing roadbed to be widened.

Sacramento County, between one mile south of Arno and Cosummes River (X-Sac-4-A), about two and six-tenths (2.6) miles in length, to be graded and paved with Portland cement concrete.

Proposal forms will be issued to only those Contractors who have furnished verified statement of experience and financial condition in accordance with the provisions of Chapter 44, Statutes 1929, and whose statements so furnished are satisfactory to the Department of Public Works. Bids will not be accepted from a Contractor to whom a proposal form has not been issued by the Department of Public Works.

Plans may be seen, and forms of proposal, bonds, contract and specifications may be obtained at the said office, and they may be seen at the offices of the District Engineers at Los Angeles and San Francisco, and at the office of the District Engineer of

the district in which the work is situated. The District Engineer's offices are located at Eureka, Redding, Sacramento, San Francisco, San Luis Obispo, Fresno, Los Angeles, San Bernardino and Bishop.

A representative from the district office will be available to accompany prospective bidders for an inspection of the work herein contemplated, and Contractors are urged to investigate the location, character and quantity of work to be done, with a representative of the Division of Highways. It is requested that arrangements for joint field inspection be made as far in advance as possible. Detailed information concerning the proposed work may be obtained from the district office.

No bid will be received unless it is made on a blank form furnished by the State Highway Engineer. The special attention of prospective bidders is called to the "Proposal Requirements and Conditions" annexed to the blank form of proposal, for full directions as to bidding, etc.

The Department of Public Works reserves the right to reject any or all bids or to accept the bid deemed for the best interests of the State.
DEPARTMENT OF PUBLIC WORKS,
DIVISION OF HIGHWAYS.

C. H. PURCELL,

State Highway Engineer.

Dated June 11, 1930.

MISCELLANEOUS CONSTRUCTION

(Continued from Page 18)

Structural Steel Contract Awarded. FIELD HOUSE Cont. Price, \$64,126 SAN FRANCISCO. Portola Playground, Felton and Hamilton Sts. One-story playground field house (steel frame, wood and plaster construction).

Owner—City and County of San Francisco (Playground Commission). Architect—Gardner Dailey, Room 610, 425 Mason St., San Francisco.

Contractor—Jacks & Irvine, 74 New Montgomery St., San Francisco.

Structural Steel—Judson Pacific Co., 609 Mission St., San Francisco.

Other awards will be made shortly.

LODI, San Joaquin Co., Cal.—Hieb Bros. awarded contract at \$1,169 by city council to construct comfort station in Lawrence Park. Other bids were E. T. Wisner, \$1,300; A. T. Schlunk & Son, \$1,225.

Working Drawings Being Prepared. MAUSOLEUM Cost, \$50,000 GRASS VALLEY, Nevada Co., Calif. Greenwood Park.

Reinforced concrete mausoleum. Owner—North American Mausoleum Co., Sacramento.

Architect—Jens C. Petersen, 812 26th St., Sacramento.

Marble interior, tile floors, bronze sash and doors and copper set glass.

WEST LOS ANGELES, Cal.—Fox Film Corporation will move its entire Western Avenue plant to Westwood studio located on Santa Monica Blvd., West Los Angeles, where a number of new buildings will be erected during next six months. Among new buildings proposed are a four-story administration building, sound-proof stages, greenhouse, vaults and scene docks. They will be fireproof structures and will cost, including landscaping, approximately \$5,000,000. W. Asa Hudson, 1323 Santa Monica Blvd., Beverly Hills, architect for buildings

and G. H. Muldorfer, of the Fox Studios, chief consultant. Arthur Taylor, of Salisbury, Bradshaw & Taylor, will be in charge of grading, paving, and other engineering work.

BAKERSFIELD, Kern Co., Cal.—C. L. Stanley awarded contract at \$3365 by city council to construct two comfort stations, one in Central Park and one East Side Park.

June 19, 1930
WRECKING CONTRACT AWARDED S A N FRANCISCO.—California Wrecking Co., 565 Mission St., awarded contract for clearing the site of the Pope & Talbot Lumber Yard, which was destroyed by fire about two weeks ago.

BUSINESS OPPORTUNITIES

SAN FRANCISCO.—Names and addresses of the individuals or firms concerned in these opportunities will be furnished on request to the Business Opportunity Department of Daily Pacific Builder, 545-547 Mission Street, Phone C-Arfield 3744.

O-3501—Agency. Carmel-by-the-Sea, Calif. Party wishes to secure agency direct from manufacturer, of modern household articles, kitchen utensils, specialties, etc. Bank references.

O-3502—Distributor. Chicago, Ill. Well-established concern ready to handle the marketing of any product for companies wishing to secure distribution.

RULING ON ATTORNEYS' FEES IN STREET BOND COLLECTION

Attorneys' fees in a suit to foreclose a street bond issued prior to July, 1927, cannot be collected unless a personal demand has been made on the owner of the property, according to a ruling of the Third District Court of Appeals affirming a decision in the superior court of Los Angeles County in the case of J. H. Sammons vs. Chas. A. Wing.

Suit was brought to foreclose the lien of a street improvement bond issued in Santa Monica in 1926, under the Act of 1911. The case was heard before Judge Engs in the superior court. After elaborate arguments and a consideration of written briefs he decided that since the complaint contained no allegation of a personal demand upon the owner of the lot no allowance could be made for attorneys' fees.

The basis of his ruling was that Sec. 76, which provides for the foreclosure of delinquent street bonds, is controlled in connection with the matter of attorneys' fees by Sec. 27 providing for the foreclosure of street improvement liens, because in Sec. 76 it is provided that the bonds shall be foreclosed in the same manner as provided for the foreclosure of the lien of delinquent assessments. No attorneys' fees can be collected in the foreclosure of a lien of delinquent assessments unless there has been a personal demand.

The bond holder appealed from the decision of Judge Engs and the District Court of Appeals of the Third District announced its decision thru Presiding Justice Finch affirming the decision of the superior court in favor of the property owner.

American Rolling Mill Co., Middle-town, Ohio, has effected a combination with the Sheffield Steel Corp., East Kansas City, Mo., which will add approximately 200,000 tons annually to its production. This action represents the adoption of a new diversification policy by the American Rolling Mill Company.

DIFFICULT FOUNDATION PROBLEMS SOLVED FOR LONDON BUILDING

In placing foundation piers for the new building erected as headquarters for the London Underground Railways at Westminster, it was necessary to use cross-girders, spanning a subway which traverses a portion of the site, says Engineering News-Record. The cross-girders, 4 ft. long with a maximum weight of 82 tons, rested on groups of piles at each side of the railroad. The 39,000-ton weight of the building is carried on 700 vibracore reinforced concrete, cast-in-place piles, 17 in. in diameter. An existing egg-shaped sewer 7 ft. below street level, was isolated with sheet piling before driving of the bearing piles was started. Complaints arising from the noise of the piling hammer were minimized by fitting a specially designed silencer on the winch exhaust, and by using a dolly of rock elm with a steel plate cap to deaden the blow of the pile hammer. These dillies were short lived and somewhat costly, 111 of them being used on the job at a cost of 23 per. foot of piling driven.

A "Pittsburg" Automatic Water Heater installed in the Home indicates high quality throughout.

Recommended and specified by all the leading architects, plumbers and builders.

Consider the high merit of the "Pittsburg" coupled with "Pittsburg Perfect Service."

"Hot water quick as a wink."

Pittsburg Water Heater Co.

Makers of "Pittsburg Automatic"—"Bungalow Automatic" Storage Systems and "Lyon" Tank Water Heaters.

BUILDERS EXCHANGE BLDG**

Send For a Sample Copy
Of The NEW
Daily Pacific Builder

The only daily construction newspaper affording complete coverage of the construction activities in Central and Northern California, featuring work contemplated, bids wanted, bids opened, contracts awarded, sub-bids wanted and sub-contracts let on all types of building construction, bridges, dams and harbor works, irrigation projects; machinery and equipment; water works and supplies business opportunities, building permits, building contracts, mechanics' liens, acceptances, etc., etc.

Keep informed on construction developments in Central and Northern California and the major projects in Southern California, the states of Oregon, Washington, Nevada and Arizona.

The new DAILY PACIFIC BUILDER will afford a service that serves—both in Quality and Quantity. You, as a member of the construction fraternity, should not be without it.

Subscription price \$1.50 per month, or \$15.00 a year, payable in advance.

Send for free sample copy today.

R. C. PHILLIPS SEEKS COUNTY SURVEYOR POST AT FRESNO

Seeking to oust Chris. P. Jensen, Fresno county surveyor, because of his determined stand against the use of any patented type of paving on the roads of Fresno County, J. T. Degnan, representative of the Permanite Company, a patented paving concern, filed the nominating petition of Roswell C. Phillips, Sanger surveyor. Phillips is seeking election to the office now occupied by Jensen.

Degnan was one of the two verification deputies who circulated Phillips' petition. The other deputy was James Burns, Fresno attorney.

Degnan admitted to County Clerk D. M. Barnwell and Deputy County Clerk T. E. Prior, in charge of registrations, that he and his company were opposing Jensen because of his stand on patented paving.

"We want a toe hold in Fresno County," Barnwell and Prior said Degnan told them. "We are going to get into this county and get business. If we can't do it one way we will another."

Jensen vigorously opposed efforts of Degnan to have Permanite used on county roads. He publicly informed Degnan that "so long as I have anything to say about Fresno County roads there will be no Permanite or any other type of patented paving used on them. We have a paving of our own which is just as good or superior to any of the patented types, and Fresno County refuses to pay royalty on any paving."

Several years ago Fresno County laid a type of paving perfected by

Jensen, and called Jensenite. It approximated a type patented by Warren Brothers, and the latter endeavored to force the county to pay royalties. Extended litigation resulted with Jensen contending that his perfected paving was no infringement on the Warren patent. The county was successful in its legal battle.

The Permanite Company was successful in recently having the supervisors vote to use their paving in the city of Riverdale, which had petitioned for its use in a road improvement district.

PUBLIC CONSTRUCTION REPORT IS DUE

According to a recent announcement by Edward Eyre Hunt, secretary of President Hoover's conference on unemployment, a complete report on the public construction situation in this country is expected soon. The report will set forth the results of a survey which has been in process since July, 1929. Both the analytical report and the interpretative statement of the committee will emphasize the importance of speeding construction programs as a means of offsetting general business depressions and the spread of unemployment.

The National Bureau of Economic Research conducted the survey on which the report is based. The Bureau was assisted by the United States Chamber of Commerce. The forthcoming report was compiled by Dr. Leo Wolman and will contain a large fund of statistical information dealing particularly with the period since 1921. It will show in detail the volume of expenditure on public improvements, programs for the future, important

administrative features involved in the execution of public construction work and an examination of the theory and practice of prepared programs of control and the prevailing methods of planning and procedure.

Estimates of total expenditures set forth in the report are based on the statistics of contracts awarded and not on the financial reports of public agencies. These estimates of expenditures will be supplemented by detailed descriptions of the activities of typical state and municipal governments, of the federal government and of the bureaus of public highways.

SAN JOSE MAYOR FIGHTS HIGH PAVING COSTS

Unless paving prices are "sliced to the bone" there will be no more paving in San Jose.

This threat, voiced by Acting Mayor A. M. Meyers, came at the conclusion of a hectic council meeting at which paving contractors were scored for excessive costs in San Jose.

Several small paving jobs, now pending, were tabled, pending investigation of prices by the city council.

"We've been severely criticized by the public," Meyers said, "for the high cost of paving, whereas the fault lies with the paving contractors."

Meyers said he could see no reason why San Jose should pay more for paving than other cities of the same class.

Tom Clark of the Raichs Paving Company and Dan Morrison, representing the Prentiss Company, replied to criticism of the acting mayor by declaring that excessive costs are due to the fact that the companies are required to "sell the work" to the public after winning the bid from the city council.

Books of both companies are open for inspection, the two declared.

Meyers advocated "no more paving" until prices are lowered.

SUIT OF 17 YEARS STANDING COMES TO TRIAL

After 17 years of court delays thru legal maneuvers, technicalities, appeals, Supreme court reversals and changes of venues, the contract suit of the Bedford Stone and Construction Company against the Washington Hotel Realty Company, owners of the Washington Hotel in Indianapolis, will come to trial shortly in superior court in Indianapolis. A special venire of 60 jurors has been called to try the case.

The suit, filed in 1913, asks judgment of \$70,000 from the realty company, alleged to be due as part of the money the company was to have received as contractors for the construction of the Washington Hotel. The original judgment, plus interest, will bring the amount asked to nearly \$125,000.

WAIVER, RELEASE AND FORFEITURE OF LIEN

(By Harry C. Westover, Attorney-at-Law)

This is the last of a series of articles which have appeared in this paper, written by Harry C. Westover, attorney-at-law.—Editor.

After a claimant has filed a lien he has ninety days in which to start foreclosure proceedings on the lien, and if such proceedings are not started in the appropriate court within the ninety day period the lien automatically becomes outlawed.

After a lien has been filed it may be released, waived or forfeited. A lien is forfeited by failure to commence the proper foreclosure proceedings. A lien claimant at any time except where the lien has been assigned and then the assignee can release or waive the claim of lien. A claim of lien may be assigned, but inasmuch as the lien is a matter of public record, waiver or assignment must be made in writing and in the same manner as the claim was filed. If the claim is released the release must be in writing, signed by the claimant or his assignee, verified and filed for record.

Some time it is desirable for lien claimants to take additional security for their claim. A material man does not lose his lien by taking additional security from the contractor, if the security is taken as collateral only and not with the purpose of releasing the lien. However, if a claimant takes from the owner or contractor security in place of the lien he loses the lien. If a claimant takes any additional security he should be very careful to see to it that there is some memorandum in writing showing that the security is taken as collateral security and not for the purpose of releasing or satisfying the lien. If one takes a note from the contractor or owner for the amount of his lien the presumption will be that the note is given in payment of the lien unless there is evidence showing that the note was given as collateral security only.

Any number of persons claiming liens may join in the same action and where separate actions are commenced the court may consolidate them for the purpose of trial. Every claimant must file his own lien. However, if a lien has been filed the lien may be assigned. The right to file a lien cannot be assigned but the lien itself can be assigned. In the event suit is brought on a number of liens, all liens may be assigned to one party for the purpose of suit or all parties may join as party plaintiffs. Regardless of whether the action is commenced by all claimants or whether various actions are consolidated for the purpose

of trial all interested parties become parties in the suit against each other as well as against the owner, and each is entitled to reduce or void the lien of the other claimants and if the fund should turn out to be insufficient to meet all claims each party occupies a position adverse to all others.

Interest is allowed in actions to foreclose mechanics liens where any is payable under a contract. Interest may be allowed from the day of payment up to the day of entering judgment, but if the contract provides no time of payment such interest runs from the time of the filing of the complaint of foreclosure.

The Court must allow as part of the costs, the money paid or verifying and recording the lien, also all costs incurred in the filing of the complaint, service of summons and other court costs.

There is no mode of enforcing a judgment foreclosing a mechanics lien other than by a sale of the property and docketing a deficiency judgment against the one personally liable, and no execution therefrom may issue unless by direction of the court upon a showing that the property upon which the lien was adjudged is no longer available. A personal judgment can be rendered against the one ordering the work done or the materials to be furnished but no personal judgment can be rendered against the owner of the property, unless the owner personally orders the work done or personally orders the materials. As far as the owner is concerned, unless the owner is also the contractor, the property is responsible for the claims of lien and if the property cannot satisfy the claims then there is no personal responsibility.

Lien claimants may take any action they see fit to protect their rights. Section 1197 of the California Code of Procedure provides "Nothing contained in this chapter shall be construed to impair or effect the right of any person to whom any debt may be due for work done or materials furnished to maintain a personal action to recover said debt against the person liable therefor and persons bringing such personal action may take out an attachment therefore notwithstanding his lien."

Up until the last session of the legislature it was impossible to obtain a writ of attachment in a mechanics lien case. However, at the last session of the legislature the law was amended so that now it is possible to have issued a writ of attachment in the case filed for the foreclosure of the lien.

COMMITTEE ON AIRPORT DRAINAGE AND SURFACING ORGANIZED

The technical resources of the American Engineering Council, the American Road Builders Association and the Aeronautics Branch of the Department of Commerce, insofar as they relate to airport engineering and construction, have joined into one group to undertake the solution of the problems involved in one of the most urgent needs of airport development and air transportation—a adequate drainage and surfacing for airports.

The absence of uniform and thorough applications of adequate drainage and surfacing for airports has been responsible for accidents to planes in landing and taking off from airports and landing fields; for delays and in-

terruptions in departures and arrivals of aircraft and has involved the wastage of thousands of dollars in time and money in connection with airport or landing field projects.

The three organizations have designated representatives to serve on a committee organized by Clarence M. Young, Assistant Secretary of Commerce for Aeronautics, and known as the "Committee on Airport Drainage and Surfacing," which will undertake, at once, a comprehensive and thorough study of the problems involved; collect and correlate available information and experience and present its findings and recommendations in a report that will serve as a working-

tool in the hands of engineers engaged in the development of air terminals, and also will meet the constantly increasing demand for information on this subject. The committee is under the chairmanship of Harry H. Blee, Director of Aeronautics Development, Department of Commerce.

"As a result of the strides that are being made in the advancement of air transportation," said a statement issued today by the three organizations, "progressive cities throughout the United States are realizing that they must provide themselves with adequate air terminal facilities if they are to have a place in this new transportation system that is rapidly extending throughout the country and reaching out to the other countries of the world. At present, there are almost 1,600 airports and landing fields in various stages of completion and some 1,380 airports are proposed for early development.

"With the advent of larger and larger transport planes and with the imperative need for reliability and continuity of operations coupled with the maximum degree of safety, the importance of suitable drainage and surfacing for airports cannot be emphasized too strongly. This phase of airport development presents a number of interesting problems, the solution of which depends upon many variable factors difficult to solve under conditions encountered in various parts of the country. In addition to calling for the application of the established principles of highway and drainage engineering, the solution of these problems involves a number of considerations more or less peculiar to aircraft operation."

From the engineering viewpoint alone, the committee represents thousands of experts on drainage and surfacing and years of experience in this particular type of work.

The American Engineering Council represents 24 member organizations, and the membership of the latter is placed at 57,600 professional engineers. The object of the Council is to further the public welfare wherever technical and engineering knowledge are involved and to consider and act upon matters of common concern to the engineering and allied technical professions. In keeping with this object, the Council has given a large measure of special attention to the engineering activities of the Federal Government and has been engaged in close cooperation with such departments as War, Interior, Treasury, Agriculture, Commerce and Labor and also with the Congress of the United States.

The American Road Builders' Association for scientific and technical purposes, has pioneered in the development of good roads for 25 years. Strictly non-commercial in character, it includes every interest identified with road and street construction in this country and abroad and is recognized as an authority on highway matters. Every section of the United States and every phase of the road building industry is represented on the association roster. Since many of the problems in the field of airport drainage and surfacing are practically the same as those which have been handled successfully by highway engineers and officials, the Association offers the benefit of this experience to aeronautics.

The Aeronautics Branch of the Department of Commerce has been closely identified with the development of airports since its organization under the Air Commerce Act of 1926. In addition to its activities of fostering and encouraging the establishment and development of airports throughout the United States, it has been carrying on extensive studies of the various problems encountered in their design, construction and operation.

ZONING AGAINST RESTAURANT IN RESIDENCE FOR PUPILS OF SCHOOL HELD VALID BY COURT

A zoning ordinance construed to prohibit the use of a basement in a dwelling in a residential district across the street from a junior high school as a restaurant for the school children is a valid under the police power, according to a decision of the Nebraska supreme court, printed in the U. S. Daily.

The city brought an action to enjoin the owners of the dwelling from using the basement of the building for such purpose. The building had been constructed for residential purposes and was used mainly as a residence, and the owners claimed that the operation of the restaurant in the basement did not constitute a violation of the ordinance, that the ordinance if it prohibited the use of the basement for such was void, and that the city had no standing in a court of equity by reason of its operation of a cafeteria in the school building.

The lower court granted the injunction, and the supreme court affirmed its judgment, holding that the city was not precluded for want of equity, from seeking an injunction; that the defendants by operation of such restaurant were violating the ordinance, and that the ordinance, construed to prohibit the use of the basement for such purpose in the residential district, was valid.

The case was styled City of Lincoln vs. Ferdinand J. Foss et al, Nebraska supreme court, No. 21196.

"The city has a real interest in the enforcement of all proper ordinances regulating building and zoning of property within the corporate limits," the court says in its opinion. "We see no good reason why it may not act to further the interests of any citizen or legal entity whose interests coincide so vitally with its own. If, on the other hand, the board of education is violating the zoning ordinance by maintaining a cafeteria within an area restricted against such an activity, the city could not join it with the appellants.

"Moreover, the ordinance does not prohibit schools within a residence district. The school property was purchased by the board of education years before appellants purchased theirs and

six years before the property was zoned. There may be presented good reason and authority for saying that among the progressive things of this age the serving of lunches to pupils by the school authorities is a proper function of a board of education. It affords proper food and time to eat it to those pupils whose homes are too remote to allow them to go there for the usual midday meal. It fits into the subject of education on the line of home economics. It assists the spirit of social democracy in a way that was unknown a generation ago. We have always had in our public schools, to a greater or less extent, the democracy of study and of play. Now we have the democracy that comes from the meeting of pupils of all classes at the lunch table.

"We do not undertake to decide a case in which a party is not before the court. While we do not decide the ultimate merits of any future controversy between the city and board of education over the right to operate a cafeteria in a public school, yet it is proper here, in view of the issues raised by the appellants, to refer briefly to the law in other jurisdictions. In Harvard College v. Cambridge, 175 Mass. 145, it was held that the use of real estate owned and furnished rent free by the college for the use of students who club together for the purpose of obtaining, with the assistance of the college, food at cost does not subject the real estate to taxes when the revenue laws exempt property used for college purposes.

"In Chicago v. University of Chicago, 28 Ill. 605, it was held that dormitories, dining halls and clubhouses located upon a college campus, used for conducting the educational work of the university, and not for gain, are well within the meaning of an ordinance remitting water rates to all buildings used for educational purposes. In a case relating to a zoning ordinance, Western Theological Seminary v. Evanston, 325 Ill. 511, it was held that a provision allowing schools and colleges to be erected in a residence district permitted the erection of dormitories where students would use a students' common or dining-room."

often untair methods used by overzealous inventors to get their products on the market. Using structural welding as an example of new methods, he urged that its promoters move slowly in requesting approval of the method and advanced the opinion that the public will eventually get the benefit of welded structures.

"It is the obligation of building officials," said Miller, "to acquaint the public with the formulation of a new regulation or the investigation of a new product or design. An open hearing should be held and when approval is obtained publication should be made of the results and the conditions of use." He stated that the building laws are never complete, but details should be avoided lest the code become an encyclopedia that would never be read. The building official should be the judge in fixing working stresses for ordinary materials, allowances for higher stresses should be given when justified and satisfactory evidence is given to justify them.

FORESTERS ADVOCATE TESTING OF TROPICAL AMERICAN WOODS

"Wood and other forest products are important objects of international trade; supplies and the demand are not limited by international boundaries," declares Major R. Y. Stuart, chief of the Forest Service, United States Department of Agriculture, in a statement dealing with the importance of adequate forest surveys.

Forest surveys are essential, Major Stuart says, to determine the present and potential supplies of timber and other forest products as a basis for meeting needs in the wood-using industries. What is true of the United States in this regard, he adds, is true also of the other American countries "which must know the facts regarding their own resources and requirements in order to develop a constructive, long-term policy of forestry and land utilization."

The importance and value of such forest research will be emphasized at the first Inter-American Conference on Agriculture, Forestry and Animal Industry which will meet in Washington next September and at which Major Stuart will present a detailed report on fact-finding activities in forestry.

Arthur Koehler, in charge of silviculture relations at the Forest Products Laboratory, Madison, Wisconsin, will give a report on tropical woods at the conference.

"Within the next twenty years," Mr. Koehler says, "the markets of the United States undoubtedly will open to foreign woods on a greatly increasing scale, and especially to high-grade hardwoods such as are rapidly becoming scarce in this country. Timbers of the American tropics because of their abundance, variety and relative nearness offer a logical supply for this potential market. Little is known, however, about the characteristics of even the more abundant tropical American species. Before they can be marketed on a large scale, both the manufacturer and the consumer will have to be convinced that they will give satisfactory service."

The best method by which to determine the value of new woods, Mr. Koehler says, is through laboratory tests which will develop exact information as to their various properties. Some work has been done in this direction, but Mr. Koehler calls attention to ways in which the Latin American countries interested can cooperate by encouraging standard testing of their woods with a view to finding suitable uses for them in American industries. Cooperation in research is needed, he points out, to open up these new sources of supply for the American markets.

ENGINEER STRESSES IMPORTANCE OF ECONOMY IN BUILDING INDUSTRY

Speaking before the Credit Association of the Building Trades of New York, Rudolph P. Miller, former superintendent of building in that city, stressed the importance of effecting greater economy in the industry. The reduction of building costs was the theme of his talk. He pointed out that the cost of building has risen steadily during the past 12 years. He stated that there appeared to be little hope of a reduction in labor costs, and no hope of relief from money lenders who, he claimed, obtain more than their legal six per cent by collecting bonuses, fees and other expenses. There is also a small hope of property owners reducing the cost of land.

"The only hope," he said, "seems to lie in cheapening the materials which go into construction . . . and in improvements in the methods of construction."

Miller pointed out the many obstacles in the way of introducing new materials. These included the natural resistance to anything new and the

ESTIMATED NUMBER OF CONTRACTORS

Approximately 175,000 report-blanks already have been distributed in the Census of Construction canvass and Dr. Alanson D. Morehouse, Chief of the Construction Section, Distribution Division, Bureau of the Census, is of the opinion that the number of contractors and builders who did at least \$25,000 worth of construction work last year will range from 75,000 to 100,000.

Undoubtedly questionnaires were sent to contractors who did not do that much business last year, and many contractors were missed, but all those errors will be eliminated by the personal canvass now under way. The Construction Census canvass was conducted entirely by mail until recently, when, in all cities of more than 10,000 population, it was turned over to the supervisors and enumerators for completion through personal visits. Both general and subcontracting work are included in the census.

THE OBSERVER

What He Hears and Sees on His Rounds

Closer co-operation with the building industry was a feature at the 63rd convention of the American Institute of Architects in Washington May 21-24. Better building codes, safety in construction, buildings more applicable to conditions, and the development of new materials were included in the program. Progress was reported in plans toward the preservation of national monuments and historic spots.

That construction accidents are increasing rather than declining under modern methods was brought out by one report. Speed in demolition and erection with resultant carelessness was cited as the proximate cause. This is due, the report stated, both to economic pressure necessitating quick completion, especially of larger buildings, and to the propensity of foremen and superintendents to push the work to make a satisfactory personal showing. A case was cited where 54 accidents occurred in the demolition of a large New York building. Injuries caused by falling objects are largely preventable, the report declared. Corporations are creating a stimulus toward more rigid safety codes such as are being developed by the National Safety Council and by the A.I.A.

At the jointly held meeting of the producers' Council, representing 60 building-materials groups, convening for the seventh year, the development of new materials better suited to use in modern architecture, together with the future application in design of such materials, formed a major topic of discussion. Several new sets of building codes were submitted. These were drawn with the hope that as some 25 cities are now revising their codes some of the plans suggested might be suitable to form an integral part of such systems in accordance with the plans of the A.I.A. to push unified building regulations throughout the country. No definite approval of the codes so far formulated was made at this time.

Although lumber shipments continued relatively high, orders for both hardwood and softwood lumber averaged only 82 per cent of production for the work ended June 14, it appears from reports of 891 leading mills to the National Lumber Manufacturers' Association. Shipments of these mills averaged 93 per cent of production, which totaled 336,257,000 feet. A week earlier 908 mills gave shipments 87 per cent and orders 84 per cent of a total production of 356,658,000 feet. While the relation between shipments and orders has varied considerably from week to week, shipments have maintained a relative advantage for many weeks passed. Unfilled softwood orders at 504 mills on June 14 were the equivalent of 17 days' production, the same equivalent reported a week earlier by 521 mills. As compared with last year, 478 identical softwood mills gave production 21 per cent less, shipments 22 per cent less, and orders 29 per cent less than for the same week in 1929; for hardwoods, 203 identical mills reported production 12 per cent less, shipments 42 per cent less, and orders 48 per cent under the volume for the same week a year ago.

Under the caption "An Engineer's Public Service," Engineering News-Record of New York, says:

"The quality of our municipal governments depends upon the collective efforts of the individual. It is good or poor depending upon whether the majority of those who direct its affairs are well trained or are uneducated in such matters.

"Civil engineers by their training are peculiarly fitted to advise cities upon many municipal matters and to take part in the direction of city affairs. But few of them do. Too many sit by and decry the fact that their qualifications in that respect are unappreciated. In this the fault lies with them rather than with the public; if they are to be appreciated they must take the initiative and so let the public know what they can do.

"The late Louis R. Ash was a splendid example of how effective engineers can become in municipal affairs if they make it their business to take more than a passive interest in civil problems. Of him the Kansas City Star said at the time of his death:

"Louis R. Ash was a type of citizen that every city needs. His profession of engineering may have had something to do with his high regard for system, efficiency and order and with his intolerance toward things haphazard, including city government. He was assertively public-spirited. He recognized the obstructive effect of pernicious partisanship in city affairs. He helped to procure the adoption of the new charter after he had helped to frame it.

"Every genuine movement for municipal progress had his support. Some have been successful and some have failed, but Mr. Ash never lost his zeal for better standards of government. In his death the city loses an individual factor in courageous civic effort. Even those who disagreed with him or lacked his faith in ultimate accomplishment acknowledged his sincerity and respected his motives."

"This country needs more such engineers. They may not be right at all times; they are sure to be misunderstood and abused frequently; but in the long run they will make an impression that will be felt and will be appreciated as Mr. Ash's service to Kansas City is appreciated.

A pronounced drop in the general level of wholesale prices from April to May is shown by information collected in leading markets of the country by the Bureau of Labor Statistics of the United States Department of Labor. The bureau's weighted index number, based on average prices in 1926 as 100.0 stands at 89.1 for May compared with 90.7 for April, a decrease of 1 3/4 per cent. Compared with May, 1929, with an index number of 95.8, a decrease of 7 per cent is shown. Based on these figures the purchasing power of the 1926 dollar was \$1.04 in May, 1929, and \$1.122 in May, 1930. Building materials also averaged lower than in April, lumber, brick, paint materials, and others sharing in the price decline.

Highway construction throughout the country has been speeded up fully 100 per cent as compared with the first three months of 1929. Contracts awarded for the first three months of 1930, in 35 states amounted to \$114,101,383 as compared to \$50-, \$10,133 for the same period in 1929 a net increase of more than 124 per cent.

The Libby-Owens Glass Co., through its Los Angeles district manager, J. F. Gehring, twelfth floor, Architects' Bldg., announces the amalgamation of that company with the Ford Plate Glass Company of Toledo, O. The new firm will be known as the Libby-Owens Ford Glass Co. and will continue the manufacture of flat drawn sheet glass as well as the added line of plate and non-shatterable glass. General offices of the firm will remain in Toledo.

Because of lack of jurisdiction the Federal Trade Commission has dismissed its complaint charging the Portland Cement Association, its board of directors, officers and members with practicing unfair methods of competition. It had been charged that the association, composed of close to 100 manufacturers who make and sell about ninety-five per cent of the cement produced in this country, circulated statements disparaging to the Vibrolithic method of road construction.

Only when called upon in a specific instance will the newly created Board of Examiners and Appeals, provided for in the Uniform Building Code as adopted recently by Long Beach, function to interpret the code or to consider the inclusion of material in authorized construction that is not specifically provided for by the code. This announcement was made by R. D. Van Alstine, former city engineer, now in private practice as a consulting engineer, who, at an organization meeting of the board was named chairman.

A new research in the field of acoustics is about to be undertaken by Dr. Vern O. Knudsen, Associate Professor of Physics at the University of California at Los Angeles, it has just become known following the granting to him by the Regents of a leave of absence for the fall semester this year. He will undertake a study of the acoustical requirements of concert halls and auditoriums, and will depart from Los Angeles on June 21, the day following commencement, for Europe where he will conduct the first part of his research.

Dr. Knudsen, already known as one of the leading American authorities upon acoustics, has just completed a research on the hearing of speech in auditoriums. This study has required several years and his findings have been published in scientific magazines in this country and abroad.

While in Europe Dr. Knudsen will attend the twelfth annual meeting of the International Congress of Architects, which meets in Budapest. He will read a paper before the congress upon the subject of "Architectural Acoustics." The congress meets for a week beginning September 7.

While abroad he will visit the famous, outstanding concert halls and opera houses in Vienna, Budapest, Berlin, Paris and London and other centers seeking the facts in connection with their acoustical accomplishments. He will be gone from Los Angeles for about five months.

HERE — THERE — EVERYWHERE

National Association of Paris Transit Mixed Concrete Manufacturers was formed at a convention held recently in Chicago, Ill. Officers elected at that time include: President, Porter W. Yett, of Swigert, Hart & Yett, Portland, Ore.; secretary, Chas. P. Maloney, Maloney Paving Co., Washington, D. C.; treasurer, Bruner R. Penniman, Penniman Gravel & Materials Co., Dallas, Tex. Executive offices have been established in Portland, Oregon.

Annual convention of the American Water Works Association, California Section, will be held at Pasadena, October 29 to November 1, inclusive. Papers will be read by William Mulholland, Chester A. Smith, Ira F. Van Gieson, F. W. Hanna, F. M. Foudy, Ray F. Goudey, W. G. Irving, E. T. Vail, Fred Randlett, F. D. Weymouth, and others.

Suit for more than \$100,000 was brought by the Atlas Rock Company of Stockton in the Superior Court against the Bay Counties District Council of Carpenters. The plaintiff charges the defendant with breach of contract dated July 7, 1926, for the purchase of sand, gravel and rock to be paid for in instalments. Amounts sought are \$74,284 for manufacture and storage, \$30,000 general damages, and \$11,566 for securing the contract.

By a unanimous decision the New York Court of Appeals has decided that plans for multiple dwellings in New York City must be filed by the owner in person or by a registered architect. The case was brought to the highest court on appeal by Oscar Goldschlag, who attacked the validity of section 300 of the multiple-dwelling act. Goldschlag, for sixteen years a professional engineer in New York, claimed that rejection of plans filed by him with the tenement house commissioner constituted an invasion of his constitutional rights. Without opinion, the court rejected the contention.

L. H. Weir of New York, national field representative of the Playground and Recreational Association of America, predicts that America will eventually have a four-day week and a six-hour working day. In the days when Greece was at its height of power, the nobility had an average of three servants," says Weir. "Today we have machines equivalent to five slaves for every man, woman, and child in the United States. With the extra time these 'mechanical slaves' allow us we will be able to turn toward music, recreation and art as part of our everyday life in the future."

Ferrous Magnetic Corp., New York City, has been formed to act as an independent organization for research in the iron and steel industry. It will conduct research on its own account and will also co-operate with existing firms in designing, building and leasing production magnetic equipment for inspection purposes.

Chicago Pneumatic Tool Co., New York City, has elected W. L. Lewis vice-president, secretary and treasurer, succeeding J. G. Grimshaw, resigned. Mr. Lewis was formerly assistant comptroller for the Bethlehem Steel Corp.

TRADE NOTES

Square D Co., Detroit, Mich., and Diamond Electrical Manufacturing Co., Los Angeles, have merged their interests. Hereafter the Diamond company will operate as a subsidiary of Square D. Sales in the West will be handled by the Diamond organization, while those in the East will be taken care of through the office of the Square D Co.

Davis Emergency Equipment Company, Ltd., with headquarters at New York City, manufacturer of emergency equipment, has established Western headquarters in San Francisco at 1268 Mission St., where one floor is occupied. A complete stock of safety equipment is carried and the eleven Western states will be served from this new branch. The concern was formerly represented here by the Bullard-Davis Company of California, and products of the company have a nationwide distribution. Herbert Brendlen, vice president, will be in charge of the Western headquarters.

GYPSON INTERESTS ORGANIZE FOR PROMOTIONAL WORK

The Gypsum Association recently organized an association of gypsum manufacturers, numbering among its membership the principal gypsum producers in the United States and announces the opening of its offices at 221 West Wacker Drive, Chicago.

The activities of the Association will be largely promotional work with architects, engineers and builders on the uses of the various gypsum products entering into the building construction.

An Engineering Department will be maintained that will co-operate with building commissioners in the preparation of building codes.

Henry J. Schwein, Development Engineer of the United States Gypsum Company has been appointed Acting-Secretary and Chief Engineer, and W. J. Fitzgerald, Traffic Manager of the former Gypsum Institute, will serve in the same capacity in the new organization.

PAVING OF ROADS PROCEEDING FASTER

Building of paved roads is proceeding faster than ever before, W. M. Kinney, general manager of Portland Cement Assn., Chicago, declared recently.

Insofar as hard surfacing is concerned, 1930 is likely to set a new world's record in road building, Mr. Kinney asserts. In 1928, when a high record was established, awards for the construction of 64,289,500 square yards of concrete were made during the first five months. This is the equivalent of 6088 miles of 18-foot pavement. Awards so far this year are the equivalent of 6123 miles.

Mr. Kinney stated that although fewer streets and alleys are being paved as yet, the contracts awarded for concrete rural roads have been great enough to bring the total awards for all concrete pavement to more than 64,666,000 square yards for the first five months of the year. This is a gain of one-eighth over the same period in 1929.

ALONG THE LINE

Architect W. W. Hastings announces the removal of his offices from the Tyler Bldg., Monterey, to the Pryor Bldg., Monterey.

The third annual convention of the California Sewage Works Association will be held at Long Beach in conjunction with the meeting of the League of California Municipalities, scheduled for October 6 to 11 inclusive.

Chad F. Calhoun, formerly engineer for Fisher-Ross-MacDonald & Kahn, Inc., contractor for the San Gabriel dam, Los Angeles County, has been made general manager and chief engineer of that firm.

William J. Dodd, well-known Los Angeles architect and member of the firm of Dodd & Richards, died June 14 at a hospital in Los Angeles. Mr. Dodd and his wife were making a tour of Europe when he became ill and decided to return home, arriving in Los Angeles about three weeks ago.

OPPORTUNITY TO MAKE RECORD IN ROAD BUILDING NOW AT HAND

"Estimates tabulated to date show that if present plans are carried out expenditures totaling in excess of \$1,700,000,000 will be made for roads during 1930, and if city street work is included, \$7,500,000,000 will be spent," says the Highway Magazine. "This represents an increase of 25 per cent over 1929, the previous record road-building year."

"The natural question in the minds of the taxpayer and public official alike is: How can so greatly an increased expenditure be made safely and without waste within a single year. There are definite limitations on what can be accomplished in any one year, chief among which is a construction season noted for its non-elasticality."

"Since 1918 when our era of mass production of roads began the road-building industry has been increasing its output year by year and for several years it has been producing virtually at capacity. On top of this the industry is now pledged to increase its past record by a substantial margin. How can it be done?"

"In 1930 the road-building industry has an opportunity to establish a production record that will stand for years, perhaps for all time. The record will not be achieved unless the road builder possesses all the elements that make for personal efficiency—desire to improve, self-discipline, the will to do, freedom from obsolete tradition."

REPORTS SHOW UPWARD TREND

Building projects at a cost of over \$10,300,660 were progressing in San Francisco during May. Plans also were being prepared for many large buildings. These included at \$2,000,000 hotel, a \$2,650,000 terminal building at the waterfront, a \$2,000,000 club building, a \$2,000,000 war memorial and a \$1,500,000 opera house.

Substantial building programs were progressing in the East Bay district. Abundant crops throughout the interior valleys were beginning to call for man power in harvesting.

TRADE LITERATURE

"Successful Canadian Pumping Stations" are illustrated, described and listed in a 25-page leaflet, issued by the DeLaval Steam Turbine Co., Trenton, N. J.

A 4-page leaflet on the Nuveyor pneumatic ash conveyor, applicable to power plants handling from 5 to 100 tons of ashes per day, may be obtained from the United Conveyor Corporation, Chicago, Ill.

"Haynes Stellite Products in the Oil Fields," a 32-page illustrated booklet, is the fourth of a series issued by the Haynes Stellite Co., Kokomo, Ind., describing the uses and methods of application of its products.

Master Builders Co., Cleveland, Ohio, has issued a series of four folders giving data and specifications for hardening, dustproofing, waterproofing, dampproofing and coloring concrete.

Macomber Steel Co., Canton, Ohio, has issued a simplified loading table to aid the designer in the proper selection of Massillon bar joists. Standard sizes of the Steel Joist Institute are used in the table.

Vortex Sureflo horizontal and vertical sewage pumps for use in sewage-pumping stations, disposal plants, leather factories and for other industrial uses are described in bulletin D-35 of the Lawrence Pump & Engine Co., Lawrence, Mass.

A new catalog covering practically the entire line of equipment produced by the Heltzel Steel Form & Iron Co., Warren, Ohio, is now being distributed. The products described include forms, batchers, steel bins, utility bridges, mixing boxes and many others.

Of special interest to those who need chain of maximum strength with minimum weight will be a small folder just issued by American Chain Company, Inc., Bridgeport, Conn., showing a table of specifications of the various sizes of Ajax Steel Loading Chain. This chain is particularly adaptable for use in the lumbering and petroleum fields but has also been found ideal to meet the needs of many other industrial applications.

DRAFTSMEN, ATTENTION!

"Few draftsmen know that the parallel straight-edge attachment, now in general use, can be easily be adjusted for drawing views or projections at an angle," says Morton Schwam of Philadelphia, Pa., in Engineering News-Record. "Ordinarily, the draftsman does this work with triangles, which are not very accurate and which require more time than when working from a horizontal line. The parallel straight-edge can be pulled around to any angle from 1 to 30 deg. When this is done, the cord which extends along the top of the drawing board moves laterally. An indicating scale can easily be scribed on the board so that, when occasion arises to show a view at an inclination, the draftsman can pull the straight-edge around to the desired angle as determined by the scale and hold the cord in position with a thumbtack, working in the same manner as if from a horizontal line."

NATIONAL FOREST ROAD
BUILDING TO BE SPEEDED

Recognition by Congress of the need for more rapid progress in road construction within the national forests, as shown by the passage of the Colton-Oddie bill recently signed by the President, is hailed by officers of the U. S. Forest Service as another important step in the needed development of the Federal forests in California.

The Colton-Oddie bill authorizes an annual expenditure of \$12,500,000 for national forest roads and trails, for each of the fiscal years 1931, 1932 and 1933, an increase of \$5,000,000 a year over previous appropriations. The California Region of the U. S. Forest Service will receive approximately \$1,837,600 under this new bill for expenditure in 26 counties located in the national forests of the State, or an annual increase of \$750,000 over previous allotments. Some \$1,428,000 of this amount will be spent on the construction of major roads and the remaining \$409,500 on minor roads and trails.

According to S. E. Shaw, Regional Forester in charge of the national forests in California and southwestern Nevada, the entire \$5,000,000 additional authorization under the Colton-Oddie bill will be applied in improving national forest roads of primary importance to the State, counties and communities, known as the forest highway system. The passage of the bill by Congress was somewhat delayed because of conflicting opinion regarding a preferential clause which was inserted in the early bills for the purpose of diverting the greater portion of the money for improvement of only the main State and Federal road systems. A compromise was effected by which the preferential clause would apply only to the \$5,000,000 increase in authorization and such preference is left to the discretion of the Secretary of Agriculture.

Congress has not as yet given the Secretary of Agriculture authority to obligate any of the increase in Forest Road funds. On May 29, 1930, the Secretary, however, approved expenditures for Forest roads in California from a previous authorization of \$7,500,000 as follows:

Quincy Beckwith—Plumas National Forest. Grading, surfacing and oiling from Quincy to Blairsden, in cooperation with Plumas county, \$56,000.

Deer Creek Meadows—Lassen National Forest. In cooperation with Butte county, grading about 3 1/2 miles from Cold Springs northward, \$55,000.

Topaz—Mono National Forest. Grading 2 7/10 miles and surfacing 11 1/10 miles from Coleville to state line in Mono county, \$95,000.

Mt. Lassen—Lassen National Forest. Surfacing about 5 miles in Tehama county from Morgan Summit to Lassen National Park boundary, \$40,000.

U. S. Highway No. 50—Eldorado National Forest. Grading 2 1/2 miles and surfacing 4 1/2 miles between Riverton and Kyburz and surfacing about four miles between Strawberry and Phillips in Eldorado county, \$142,500.

Northfork—Sierra National Forest. Continuation of betterment work from North Fork northward in Madera county, \$10,000.

Oakhurst—Sierra National Forest. Grading about 3 miles from Four Mile to Fish Camp, \$65,000.

Maricopa—Ventura—Santa Barbara National Forest. Grading from Ojai Valley northward toward Ortega Hill, Ventura county, \$100,000.

Some of the more important national forest development roads approved by Regional Forester Shaw for con-

struction this season are as follows: **Twain Lakes—Mono National Forest.** In Mono county, new construction, extension of present recreation road, \$4,000.

Oak Knoll—Klamath National Forest. In Siskiyou county, completion of present road, \$6,000.

Orleans-Cedar Camp—Klamath National Forest. In Siskiyou county, 18 miles new construction, \$30,000.

Sugarloaf—Sequoia National Forest. In Tulare county, completion of present road, \$7,000.

Tobias Peak—Sequoia National Forest. In Tulare county, new construction, to meet Camp Nelson road, \$18,000.

Dinkey Creek—Sierra National Forest. In Fresno county, continuation of present road, \$15,000.

Clavey River—Stanislaus National Forest. In Tuolumne county, new construction, \$28,000.

Buckhorn—Santa Barbara National Forest. In Santa Barbara county, new construction from Oso creek to Cuyama river, \$40,000.

The remaining forest development road money will be expended on low standard roads and trails for the protection of the national forests against

CROWN-ZELLERBACH SEEKS
RIGHTS IN ALASKA

Launching of an approximate \$20,000,000 project linking San Francisco interests with vast timber resources in Alaska was foreseen. Final application for license to construct six power dams was filed with the federal power commission in Washington by the Crown-Zellerbach Corporation, with headquarters in San Francisco.

Five power plants, according to tentative plans, would be build, generating 80,000 horsepower for a big paper mill. Dams would be constructed on Mirror, Ella, Swan, Grace, Orchard and Manzanita lakes, in Alaska, under the proposal.

In April, 1927, the Zellerbach Paper Company was awarded timber rights in the southeastern section of the Tongass national forest, near Ketchikan, containing 835,000,000 cubic feet of spruce and hemlock.

PLANE CONTRACTS AWARDED
BY U. S. GOVERNMENT

Award of contracts for nearly \$6,000,000 worth of airplanes, engines and accessories was announced by the war department.

A total of 402 new airplanes and 128 new engines, both with spare parts will be added to the air corps force under these contracts. The engines to be supplied by the Wright Aeronautical Corporation of Paterson, New Jersey, at a cost of \$742,643.13, are to be used in bombardment planes already contracted for, while the new planes are to be powered with Pratt and Whitney air-cooled engines, purchase of which is still being negotiated.

The Douglas Company of Santa Monica, Calif., received a \$2,221,623.60 contract for 146 basic training planes and forty-four pursuit planes. A \$1,543,183.90 contract for 131 pursuit planes was awarded the Boeing Airplane Company of Seattle; the Thomas-Morse Aircraft Corporation of Buffalo is to construct seventy-one observation planes at a cost of \$1,015,126.20.

REGIONAL PLAN SUGGESTED TO SOLVE TRAFFIC CONGESTION

Regional planning is shown to be the ultimate solution of traffic congestion in a comprehensive study of its causes, its costs, and its remedies made by the traffic committee of the American Road Builders' Association. Results of the study are announced by Dan R. Lamson, committee engineer.

Among the principal causes shown are:

1. Highway registration (local vehicles).
 2. Outside registration using highways in the area.
 3. Lack of parking restrictions.
 4. Narrow and poorly planned highway systems.
 5. Lack of adequate entrances and exits to cities.
 6. The larger cities geographically hemmed in by waterways.
- Thirty miles from the heart of the central city of a regional area is the maximum distance of local influence. The New York area, even, could be included within these limits. This distance scales down some ten miles around the smaller cities.

It is in these areas that are found traffic conditions which set the maximum standards of right-of-way, surface width and pavement design. Here occur the most expensive construction projects, the highest costs of additional right-of-way, and the greatest obstacles to successful completion of a highway improvement program. This is especially true of the central sections of cities where insufficient right-of-way was set aside originally for highway purposes.

Obviously there is a certain amount of "through" long-distance traffic in any area which travels beyond the 30-mile zone, but these amounts are very small when compared with the local traffic operating within such a zone.

In the Cleveland area, only 1 1/2% of the passenger car traffic on the through trunk highways crosses the regional area between outside points. Over 95% of the daily passenger car traffic entering or leaving the city does not travel beyond the regional area limits, 30 miles from the center of Cleveland.

The cost of traffic congestion is estimated at \$81,000 per day in Boston, was \$600,000 a day in Chicago prior to the inauguration of the regional improvement program, and is estimated at \$1,000,000 a day in New York.

The loss of time because of traffic congestion in some instances in large cities is making transportation by horse-drawn trucks more economical than by motor driven vehicles.

Lack of highway facilities has retarded the purchase of automobiles, notably in New York, Chicago, Philadelphia and Boston. Per capita comparisons of registration figures were made with such cities as Detroit and Los Angeles which have an abundance of wide exits and high speed arteries. Using the Detroit ratio of 3.5 persons to the automobile, the four cities should have a total increase in registration of 1,950,000 automobiles, but they do not.

Grade crossings at highways and railroads contribute an ever-increasing item to the cost of traffic congestion. A study of one of Cleveland's principal streets over a 12-hour period shows that, of the 5,955 vehicles passing over a grade crossing intersection during that time, 1,867 or 31.4 per cent were delayed there. In other words, the thoroughfare could be said to be only 68.6 per cent efficient.

Remedies advances for reducing congestion are:

That a model regional planning organization be drawn up for use of smaller cities; that state legislatures authorize and control regional planning in congested areas; that equitable methods of financing, planning and construction be studied and recommended.

That in locating highways state highway departments build trunk lines around cities; that a minimum right-of-way width be adopted, of 100 feet for primary and secondary trunk lines, and of 66 feet with a two-lane roadway, for rural roads.

That the authority for the location of grade crossings should be vested in the state highway commission or some state public utility commission. That immediate financing and construction is favored of specific projects in regional areas as recommended by the commission in charge.

That state and county highways having an average daily present traffic in excess of 4,000 vehicles shall be designed with more than two traffic lanes of pavement; those with between 1,200 and 4,000 vehicles, not more than 10% of which is truck traffic, to have two traffic lanes, generally paved; roads with less than 1,200 vehicles daily, not more than 10% truck traffic, shall have two traffic lanes with some type of all-weather surfacing.

EXTENSIVE IMPROVEMENTS PLANNED

The Atlas Smelting & Refining Co. has announced that extensive improvements are planned for the Stone Canyon Mines, 30 miles east of San Miguel. Company will expend probably \$3,000,000 on a 7500-ft. tunnel, electric installations, bridges and other necessary operations to provide access to the mine.

SIMPLIFY MASONRY OPENING SIZES FOR METAL WINDOWS

Development of masonry opening sizes for metal windows will be the first undertaking of the Committee on Masonry Opening Sizes held at the Bureau of Standards in Washington, D. C. The function of this committee, which is made up of representatives of the manufacturers of masonry materials, as well as windows and trim, is to make a study of the possibilities of simplifying masonry opening sizes based on a constant variation in height and width.

The committee discussed the recommendations of the American Face Brick Association, the Common Brick Manufacturers' Association, and the Sand Lime Brick Association, which recommendations were presented by the representatives of these groups on the committee.

It was decided that the initial efforts of this committee be confined to the development of masonry opening sizes for metal windows. A subcommittee, composed of manufacturers of steel and copper and bronze windows, was created by the meeting. This subcommittee will draft a tentative simplified practice recommendation covering masonry openings for metal windows and present it to the Division of Simplified Practice, with the request that a general conference of all interests be held with a view to securing national approval of the proposal. The American Institute of Architects was requested to co-operate in the survey which the metal window

manufacturers expect to make among the architectural profession in the country with regard to the increment of variation in opening sizes.

It was further decided that the Committee on Masonry Opening Sizes be continued but that it hold in abeyance the development of its major purpose pending the completion of this initial step.

ROAD CONTRACTS DOUBLE FIRST THREE MONTHS

Contracts for highway construction, awarded during the first three months of this year, more than doubled the awards for the same period last year, and reached a total of more than \$114,000,000, according to a statement on May 10, by the Department of Commerce.

Increases reported by 30 states more than made up for reductions in five; Ohio and Idaho led in percentage of increase, while Pennsylvania's was the greatest in dollar value.

The figures, which cover almost 75 per cent of the country, show contracts awarded during the first quarter of this year valued at \$114,101,833 against \$50,810,123 for the corresponding period of last year, a net increase of slightly over 124 per cent for the group of states which have reported so far.

Three states, West Virginia, New Mexico and South Dakota, which awarded no highway contracts during the first three months of 1929, report awards totaling \$4,367,075 for the first quarter of 1930.

The greatest relative increases are shown in Ohio and Idaho. In the former state the awards for the first three months of this year were approximately 11 times greater than the corresponding quarter a year ago, while Idaho shows increased awards over 30 times larger than last year.

Pennsylvania with contracts awarded valued at \$15,469,853 for the first quarter of 1930 against \$2,282,813 for the same period of 1929 has the greatest dollar value. This is an increase of 577 per cent.

Contracts for highway construction in New Hampshire during the first quarter of this year increased 755 per cent; Washington, 650 per cent, and Colorado, 455 per cent.

Other substantial increases were Oregon, 230 per cent; Maryland, 225 per cent; Iowa, 207 per cent; Wisconsin, 202 per cent; California, 181 per cent; Indiana, 165 per cent; North Carolina, 153 per cent; Missouri, 144 per cent; Florida, 109 per cent, and Virginia, 100 per cent.

CONTRACTOR LIABLE FOR BOND PREMIUM

A contractor who enters into a contract with a municipality for construction work with the advance knowledge that he is required to furnish a bond is bound to pay the premium although the municipal officials may pay it by mistake or otherwise.

For instance, in *Bliddeford vs. Bennett*, 147 A.2. 151, the testimony proved that a municipality advertised in a local paper for bids from contractors who must furnish bond of a surety company satisfactory to the finance committee.

A bonding company which was familiar with the contract wrote the contractor's bond and mailed the bill to the city. The city paid the bill and then sued the contractor to recover the amount. The latter attempted to avoid liability because the city had voluntarily paid the premium. The court held the contractor bound to pay the amount of the premium and said:

"Upon the evidence, the payment by the city was voluntary. There was no express request of the defendant (contractor) for payment by the city."

CREDIT AND BUILDING

Events of recent times bring out rather clearly the failure of our business credit system, the banking system, to provide ready means for financing house construction. From the important position given to this question of financing at the recent international building congress in London it appears that the difficulty is not confined to the United States but that all countries suffer from a similar misadjustment. Its reasons have never been sought out, unfortunately, although regulated house-building conditions are important to the entire community. House building is one of the major industries, and its ups and downs—consider only the past two years!—impress themselves on business activity in general. Doubtless the banking system is partly responsible for the shortcomings of building finance, but much blame must be placed on the technical and industrial phases of house construction. As brought out in a discussion in a later column, the art suffers from lack of modernization. It also suffers from the lack of indexes or guarantees of value. House value is not truly measured by cost but may be reduced by effect of location, planning, and quality of construction—or, in rare instances, may be increased by them. Excellence and efficiency of construction would seem to be matters for engineering industry to control. Modernization of method is one direction of advance; standardization and guarantee of quality is another. When these are taken care of, the way will be clearer for setting up suitable financing facilities—a badly needed improvement.—(Engineering News-Record).

ROAD CONSTRUCTION IN THE UNITED STATES INCREASES

Highway construction in this country shows a large increase in contract awards for the first quarter of 1930, according to reports of governors of 35 states to Secretary of Commerce Lamont. The figures show contracts awarded during the first quarter of this year valued at \$114,101,383, against \$50,910,133 for the similar period of last year.

Pennsylvania leads in dollar total increase, with contracts awarded valued at \$15,469,853 for the first quarter 1930, against \$2,282,813 for the same period of 1929. Other large totals were: Iowa, \$11,232,268; Missouri, \$10,699,657; and Virginia \$9,000,000. These four states provided more than 40 per cent of the total value of contracts awarded.

COMBINED REFRIGERATOR-RANGE PERFECTED BY FRIGIDAIRE

Smaller and more compact apartment house kitchenettes are now made possible by the latest development in the electric refrigeration field—an electric refrigerator and electric range combined, which occupies only a fraction more than four square feet of floor space.

Consisting of an oven equipped, two-burner electric range, fitted snugly over the top of a compact electric refrigerator, the combination was designed by Frigidaire engineers especially for the New York type apartment, the kitchenette of which under the building code must not exceed 30 inches in depth and 10 feet in width.

Developers of the refrigerator-range, the first of its kind, are preparing to supply a heavy demand in all large cities of the United States,

where apartment-dwelling is becoming a common mode of living.

Overall dimensions of the refrigerator-range, which derives current for heat and for cold from a single electric outlet, are 55½ inches high by 26½ inches wide by 23 inches deep. The cooking top of the range is at a convenient height, 43 inches above the floor. The oven, which is at the right of the cooking top unless otherwise specified, is 12½ inches wide by 13½ inches high by 17 inches deep. The range is finished in gray and white porcelain.

The refrigerator, finished either in cream white ducor in gray and white porcelain-on-steel, has a food storage capacity of 3 cubic feet and shelf space of 5½ square feet. Two ice trays, with a capacity of 24 cubes, 2½ pounds at freezing, are provided.

Temperatures within the refrigerator are not affected by the heat of the range, as three inches of special insulation separate the two.

DISPLACEMENT FLOOR WORK OF MALOTT & PETERSON

The "M & P" Roller Displacement Floor used as a sidewalk at 130 Montgomery Street in front of the new Title Insurance Building is of interest to the entire building industry.

Picture a Portland cement floor with the beauty of marble or tile. A concrete so dense no dusting can take place. A floor that actually looks like tile or marble at far less cost. A floor that can be had in any color or shade and that will stay the same color.

The patented process is quite new to San Francisco, although used in the East and at Los Angeles for some time. The base is put in in the usual manner. Then a ¼ or 1" topping of properly mixed and proportioned Portland cement and aggregates is placed and rolled with heavy rollers. This brings all air, laitance, and everything objectionable in cement to the surface. This is squeezed off. This is continued until all excess moisture is done away with. Another layer of dry Portland cement and aggregates is laid and this is rolled with another set of heavier rollers, forcing this aggregate into the lower mass. There can be no voids in an "M & P" Roller Displacement Floor. The color can be put in the full depth, or only on the surface. The finish can be controlled from a smooth promenade finish to a polished marble finish. The surface can be cut into any design using straight lines, such as squares, diagonals, basket weaves, etc. The cuts can be ¼" to ½" or wider—1/64" in depth to any depth desired.

LISTING OF BUILDING SECURITIES DISCUSSED BY L. A. CONTRACTORS

Listing of real estate and building securities was the subject of discussion at a recent meeting of the building division of Southern California Chapter, Associated General Contractors. Desirability of some plan to stimulate public interest and inspire greater confidence in such securities has long been recognized. It is the belief of many persons that if an established market for such securities was available at this time it would be a great advantage in the promotion of construction. Flotation of bond and stock issues on building projects would be much easier if investors knew there was a public market for them and they did not have to depend on the

good will of the issuing bankers to convert them into cash when desired.

It was brought out in the discussion that in New York City the real estate board has established its own exchange for listing of real estate and building securities but the enterprise has been handicapped by starting on too big a scale. Chicago real estate board, instead of following New York's lead, has arranged with the Chicago Curb Exchange for listing of real estate securities in that city. Los Angeles' real estate board has been approached on the subject, it was stated by Melville Dozier, Jr., manager of Southern California Chapter, A. G. C., and has given it some consideration but does not believe the present is a propitious time to take any action. Development of the movement in New York and Chicago will be followed closely, however, and the Chicago plan works out successfully an effort will be made to put it over in Los Angeles.

Some time was also given by the Chapter to the joint control method of handling building construction in which a trustee acts as the representative of the owner and those concerned in financing the project. Further consideration will be given to this subject by a committee to be appointed by President Harold Crowell.

STATE WELL STOCKED WITH DOUGLAS FIR

Reporting the yields of well stocked, even-aged stands of the species in the state, Francis X. Schumacher has written University of California College of Agricultural Bulletin 491, entitled, "Yield, Stand and Volume Tables for Douglas Fir in California." Schumacher is assistant professor in the university. The publication is free, and may be obtained from the college at Berkeley.

"The United States Forest Service has recently completed a study of the yields of Douglas fir for even-aged stands of Oregon and Washington," explains Professor Schumacher. "The work was not extended to stands south of the Willamette—Umpqua divide in Oregon because from observation it is believed that this line roughly divides the Douglas fir forest into two types of decided difference in stand characteristics."

"But the commercial range of the species on the Pacific slope extends into California about as far as Yosemite National Park in the Sierra and about San Francisco Bay along the coast. That there are significant differences in certain stand characteristics between the two general regions seems established from the work presented in the bulletin."

"The growth of the species is shown by tables which state the yield of even-aged stands over a period of years. Age, timber productive quality of the area, and stand density are the most important growth determining factors of a stand. As there is no satisfactory way of expressing stand density in absolute terms, normal-yield tables based on the ideal density which produces maximum volume are presented."

Western headquarters has been established in San Francisco at 469 Bryant Street, by Aeroll Burner Company, Inc., with head office and factory in West New York, New Jersey. A complete stock of products of the company, which includes asphalt and lead melting kettles, tool heaters, asphalt surface heaters, heating torches, oil burners, spray machines for curing concrete, hand spraying attachments, etc., will be carried at the San Francisco headquarters. R. M. Starnes, formerly San Francisco representative for the company, is Pacific Coast manager.

NATION - WIDE PROGRAM OF REBUILDING SLUM DISTRICTS

The American Construction Council, in a summary report made public today, announces its preliminary findings on the recent proposal for a nation-wide program on the rebuilding of slum districts, following the national conference on the subject held under the auspices of the American Construction Council at the Hotel Biltmore in New York on April 25th, 1930. This report, prepared by a special committee of the Council appointed as a result of that conference to make a general survey of the field and report its findings to the public represents views of persons from many civic, professional and business pursuits, and is as follows:

1. A nation-wide program embracing a constructive plan for the rebuilding of slum districts throughout the country offers one of the largest and most important potential fields of building and engineering construction available for the coming decade.

2. Such a program should furnish many billions of dollars of new construction and employment to many thousands of workers in building and allied lines, which spread over a ten year period should contribute very substantially to the maintenance of the nation's prosperity.

3. In some instances modernizing or the rehabilitation of the buildings themselves and their surroundings, rather than entire new construction, may be found desirable.

4. In addition to the more strictly economic benefits in stabilizing the construction industry itself and business generally, the social aspects for the promotion of health, recreation and living comfort as well as eliminating breeding places of crime are of prime importance.

5. These slum and semi-slum districts should not necessarily be rebuilt for housing purposes, but this rebuilding should follow a careful and comprehensive plan for each locality that will meet the purposes for which each district in question is best adapted for the future as well as for the present.

6. Just what districts should be rebuilt for housing purposes should be determined only after the most careful regional planning and zoning provisions that will take into consideration all pertinent factors such as the desirability of the particular area for industrial, commercial or residential purposes and the development of specific requirements for the particular purpose decided upon as most desirable for a given district.

7. When the rebuilding is for residential purposes ample consideration must be given to adequate facilities for parks, playgrounds, streets, light, air, etc.

8. The influence of these districts on child life, as well as low cost buildings of the proper structural design and standards, needs to be considered.

9. The rebuilding of such districts and the purpose for which they are to be utilized must be properly articulated with traffic and transportation conditions in their various aspects.

10. The relation of present day large scale erection of commercial and industrial buildings in congested metropolitan areas to the desirability of adequate housing facilities in close proximity thereto as compared with the more remote residential districts should receive careful consideration including the cost of commuting in terms of both time and money for workers of modest incomes as well as special attention to the growing problem of congestion of commuter traffic.

11. The building of new slum districts in metropolitan areas now de-

veloping in some places and in the outlying districts, and the consequent development of new focal points of infection in housing, should be prevented.

12. The so-called natural depopulation of congested residential areas in the metropolitan districts caused by people moving elsewhere will not automatically solve the slum and semi-slum problem either in the old areas or in the new outlying areas that in many instances are springing up without proper plan or constructive purpose.

13. Proper state co-operation and aid must be provided, which usually can be found to take the form of permissive legislation and sympathetic support by the state, i. e., necessary legal power for proper condemnation proceedings with due recognition of property rights, and also perhaps relief from taxation over a limited time of years for non-speculative housing projects in these districts; also necessary zoning laws and building codes should be given the proper legislative action.

14. Proper aid on the part of municipalities is also necessary, including permissive municipal action with respect to zoning and building codes and acquisition of land under proper terms and conditions, as well as the active and wholehearted support of municipal authorities and their co-operation in working out a constructive local plan.

15. Local and regional plan bodies, representing both business, professional and civic organizations as well as the public, with adequate municipal backing, should give general direction to the local projects.

16. The districts rebuilt for housing purposes may not always best be designed for the habitation of the lowest rental classes, but must be properly adapted to the basic and proper land values and construction costs.

17. These districts should be rebuilt essentially by private business enterprise as the primary agency, with financing on a non-speculative basis, and there must be the necessary local financing agencies and ownership corporations to carry out the specific projects.

18. Any program, to be successful in the solution of this problem, must embrace local enterprise both on the part of the appropriate groups within the construction industry, such as local building congresses and builders' exchanges as well as the individual professions and trades within the construction industry, and also on the part of related civic and other public-spirited agencies.

It is essential, therefore, that every community should lay down a definite program embracing all these and related factors looking toward the proper re-building of its slum and semi-slum districts. Commendable examples of individual projects already under way or completed in some localities are to be noted, but even in some of these instances the benefits have been partially lost because of the lack of an adequate and comprehensive regional plan and safeguards for the entire community. The American Construction Council fully recognizes that the solution of this problem presents certain difficulties, but it is believed that the initiative and statesmanship so characteristic of

American traditions and business enterprise can find a reasonable solution, if national stimulus combined with local effort are given proper applications.

The American Construction Council having in mind the great economic and social benefits that will accrue from a nation-wide program, therefore expects to devote its fullest energies in a co-operative movement directed toward the solution of this problem.

ANCIENT CODE SAYS BUILDER MUST BE PAID FOR LABOR

L. B. Tuckerman, assistant chief of the Division of Mechanics and Sound, U. S. Bureau of Standards, calls attention to the building code included in the Code of Hammurabi, King of Babylon, about 2250 B. C., which provides that the builder shall be paid for his labor.

Sections of the code, as taken from a book by Robert Francis Harper, Ph. D., University of Chicago Press, 1904, are as follows:

228—If a builder build a house for a man and complete it, (that man) shall give him two shekels of silver per sar (approx. 12 sq ft.) of house as his wage.

229—If a builder build a house for a man and do not make its construction firm, and the house which he has built collapse and cause the death of the owner of the house, that builder shall be put to death.

230—If it cause the death of a son of the owner of the house, they shall put to death a son of that builder.

231—If it cause the death of a slave of the owner of the house, he shall give to the owner of the house a slave of equal value.

232—If it destroy property, he shall restore whatever it destroyed, and because he did not make the house which he built firm and it collapsed he shall rebuild the house which collapsed from his own property (i. e., at his own expense).

233—If a builder build a house for a man and do not make its construction meet the requirements and a wall fall in, that builder shall strengthen that wall at his own expense.

HOME TOWN LABOR IS PLAN OF SAN LUIS OBISPO

The San Luis Obispo County Supervisors have passed an ordinance giving preference to local labor on construction to be financed by the county.

The ordinance is the result of agitation arising after county hospital construction and other improvement works done for the county were alleged to have been completed with labor brought in from the outside, while many local workmen were unemployed.

A fine of \$500 or imprisonment in the county jail for six months, or both, are maximum penalties for contractors who disregard the labor ordinance.

In addition to the local labor clause, the ordinance specifies that eight hours shall constitute a working day on public jobs and pay shall be at least equal to that offered on private contracts.

Furthermore, every workman must be a citizen of the United States.

Labor leaders have promised to see that the ordinance is enforced.

Building News Section

APARTMENTS

Contract Awarded.

APARTMENTS Cost, \$300,000
LOS ANGELES, Cal. San Marino St.
and Serrano Ave.
Seven-story and basement Class A
reinforced concrete apartments.
Owner—Withheld.

Architect — F. A. Brown, 1489 W.
Washington Blvd., Los Angeles.
Contractor—Weeks Constr. Co., Paci-
fic National Bank Bldg., L. A.

Sub-Contracts Awarded.

APARTMENTS Cost, \$75,000
EURLINGAME, San Mateo Co., Cal.
El Camino Real.
Three-story and basement frame and
stucco apartments.
Owner—Philip Webster, 2401 Fulton
Ave., Berkeley.

Architect — Edwards & Schary, 605
Market St., San Francisco.
Contractor—Daly Bros., Burlingame
Concrete Materials—H. E. Casey, 207
B St., San Mateo.

Reinforced Concrete—W. C. Hauck,
230 San Bruno Ave., San Francisco
Lumber—San Mateo Planing Mill, 501
Fifth St., San Mateo.

Plumbing—Morrison & Blair, 415 Villa
Terrace, San Mateo.

Heating—P. H. Phillips.

Steel Sash—Michel & Pfeffer Iron
Works, Harrison and Tenth Sts.,
San Francisco.

Sub-bids are wanted on roofing, tile
roofing, flooring and electrical work.

LOS ANGELES, Cal.—Architect H.
E. Werner, 257½ N Beverly Drive,
Beverly Hills, preparing plans for 3-
story store and apartment building
to be erected on Beverly Blvd. near
Union Ave. for Lincoln Leasehold Co.
Cost, \$55,000. Lincoln Leasehold Co.
also secured a long term lease on the
property at the SW corner of 8th and
Stewart Sts. as site for a 6-story class
A bachelor apartment and shop bldg.
Cost, \$200,000.

Architect Taking Sub-Bids.

ALTERATIONS Cost, \$16,000
SAN FRANCISCO, N 8th St. W Guer-
rero Street.

Alterations to three-story and garage
basement frame and stucco apts.
(12 apts.)

Owner and Builders—A. M. McLean
and Mrs. Isabella McLean, care
architect.

Architect—G. A. Berger, 309 Valen-
tia Street.

Plumbing and Heating Bids Wanted.
APARTMENTS Cost, \$25,000
MILBRAE HIGHLANDS, San Mateo
Co., Cal.

Two-story frame and stucco apart-
ments and store building.

Owner—Milbrae Highlands, Inc.
Architect—Chas. Strothoff, 2274 15th
St., San Francisco.

Contractor—Schultz Construction Co.,
Milbrae Highlands.

Roofing and tiling bids will be
taken shortly.

Plans Being Completed.

APARTMENTS Cost, \$200,000
BERKELEY, Alameda Co., Cal. Sacra-
mento St. and University Ave.
Three-story Class C brick apartments
(56 2, 3 and 4-room apts.)

Owner—Davis-Pearce Co., Grant and
Weber Sts., Stockton.

Architect — Davis-Pearce Co., Grant
and Weber Sts., Stockton.

Bids will be taken in about two
weeks.

BONDS

BERKELEY, Alameda Co., Cal.—
Board of Education voted to ask
Board of Supervisors for permission
to consolidate bond election seeking
\$2,690,000 for schools with regular
primary election on August 26.

ALPAUGH, Tulare Co., Cal.—Al-
paugh School District will hold an
election on July 1 at which time it is
proposed to vote bonds in the sum
of \$18,000 to finance alterations and
additions to present school. E. W.
Petersen, Mason Bldg., architect,
Fresno.

Preparing Working Drawings.

SCHOOL Cost, \$20,000
WESTLEY, Stanislaus Co., Cal.
One-story Class C brick or concrete
elementary school (Spanish type).

Owner—Grayson School District.
Architect — Davis-Pearce Co., Grant
and Weber Sts., Stockton.

Election is being held July 7 to
vote bonds to finance construction.

CERES, Stanislaus Co., Calif.—Until
July 15, bids will be received by coun-
ty supervisors for purchase of the \$75-
000 bond issue of the Ceres Grammar
School District; proceeds of the sale
to finance erection of a new school
building.

CHURCHES

Plans To Be Prepared.

HOUSE Cost, \$75,000
FRESNO, Fresno Co., Cal.
Cathedral House.

Owner—St. James Cathedral (Dean A.
W. Farlander).

Architect Not Selected.

Mr. C. M. McCann, sales manager, Crawford Door Co., 7881 Conant Ave., Detroit, Michigan, wishes to establish sales and installation agency in San Francisco.

Mr. T. J. Keefe, sales manager, Detroit Metal Specialty Corp., 1651-1671 Beard Ave., Detroit, Mich., manufacturers of metal stampings, wish to make connections with an experienced stampings salesman in San Francisco.

AGRICULTURE USING MORE ELECTRICITY AS POWER SOURCE

Of the 1,299,095 users of electricity for all purposes in California last year, 4.1 per cent were listed as using current for agricultural power purposes. The number of farmers thus using electricity was 53,401, a gain of 3.8 per cent over 1928. These figures are announced by Prof. B. D. Moses, of the University of California Agricultural Engineering Division, and secretary of the California Committee on the Relation of Electricity to Agriculture.

The total of kilowatt hours used in the state for all purposes in 1929 was 6,158,954,901; the total for agricultural power was 1,118,845,023, or 18.1 per cent. This is a gain of 17 per cent over the previous year.

Revenue received by power companies for current sold for agricultural power showed a gain of 10.6 per cent last year over the year before. Farmers paid \$15,825,570.74 for electricity for power purposes, which is 14.1 per cent of the total paid by all users in the state, \$112,637,742.28.

RECORD PAVEMENT AWARDS FEATURE OF CONSTRUCTION

Reflecting the new high record of concrete surface pavement awards established in April, the volume of construction performed during May increased 30 points above the level of the former month, reaching an index figure of 176, the Associated General Contractors of America announce in a statistical compilation just completed.

The record-breaking pavement awards, which for the first four months of 1930 totaled 45,750,000 square yards, and were running 37 per cent above those for the same period last year, together with the unprecedented large volume of long-term state and municipal bond issues are taken by E. J. Harding, assistant general manager of the Associated General Contractors, as a trust-worthy barometer of the new high levels which public works and engineering construction are certain to reach in 1930.

MILL VALLEY, Marin Co., Cal.—City Council declares intention (740) to improve Summit Ave., Lovell Ave. and Cornelia St. and various other streets, involving vitrified pipe sewer; hydraulic concrete manholes; lamp-holes; wye branches and lateral; hydraulic concrete retaining wall; arch culverts; hydraulic conduit inlet. Bond Act 1991. Improvement Ace 1915. Hearing July 1. Wm. Falley, city clerk. F. H. Lacey, city engineer.

GLENDALE, Los Angeles Co., Cal.—Until 10 A. M., June 30, bids will be received by the city council for the laying of cast iron pipe sewer, together with manholes, junction chambers, frames and covers, wyes, plugs, etc., and otherwise improving Niordara Drive, Collina Drive, and Canada Blvd. G. E. Chapman, city clerk.

RENO, Washoe Co., Nevada—Rocco & Colletti, San Rafael, submitted low bid at \$310,743 to city council to construct the trunk line sewer, sewage pumping station and sewage treatment plant. The trunk line sewers and sewage treatment plant comprise the construction, complete, of sewer lines from points of junction with the existing sewerage system to the treatment plant and a sewage pumping station; together with a sewage works comprising essentially a bar screen chamber, two clarifier tanks, a sludge digestion tank and sludge drying beds, all complete with corresponding equipment and appurtenant; a plant control building containing boiler and pumping rooms, chlorination room and laboratory, all complete with piping and miscellaneous equipment.

The following roughly approximate quantities are involved in the work.

7,650 cu. yds. excav. for plant.

Trunk line sewers:

2,960 lin. ft. 30-in. pipe;

4,300 lin. ft. 33-in. pipe;

933 lin. ft. 30-in. pipe;

276 lin. ft. 24-in. pipe;

7,000 lin. ft. 18-in. pipe;

10,230 lin. ft. 15-in. pipe;

150 lin. ft. 12-in. pipe;

10,900 lin. ft. 10-in. pipe;

2,480 lin. ft. 8-in. pipe;

3 sewer river crossings;

99 sewer manholes.

Sewage pumping station:

1 sewage pumping station;

7,650 cu. yds. excav. for plant struc.;

Sewage treatment plant:

16,400 cu. ft. of concrete;

103 tons of reinforcing steel.

Following is a complete list of bids:

Rocco & Colletti, San Rafael \$310,743

Bond Act 191. Improvement Act 1915. Hearing July 7. D. McSweeney, city clerk.

PACIFIC GROVE, Monterey Co., Cal.—City Council declares preliminary intention (3211) to improve Junipero Ave., between Forest and Pacific Grove, involving cement concrete gutters and curbs; 2-in. asphaltic concrete wearing surface pavement; 3-in. crushed rock base; storm drains. Bond Act 1911. Improvement Act 1915. Hearing July 3. W. G. Stubbs, city clerk.

BRENTWOOD, Contra Costa Co., Cal.—Until July 21, bids will be received by J. H. Wells, county clerk, to improve with pavement 1.4 miles in length Brentwood road beginning 1.5 miles east of town of Brentwood. Specifications obtainable from above. Certified check of 10% required, payable to clerk of board.

See call for bids under official proposal section this issue.

SAN JOSE, Santa Clara Co., Cal.—San Jose Paving Company awarded contract at \$11,500 by County Board of Supervisors to improve San Felipe road in Supervisor District No. 2.

SANTA CLARA, Santa Clara Co., Cal.—Union Paving Company awarded contract at \$31,309 by City Council (20-G) to improve portions of Union Ave. and Bellomy St., involving grading; asphaltic concrete pavements on quarry waste base; cement concrete curbs; drop curbs; gutters; sidewalks, driveway approaches; vit. clay pipe main sanitary sewers, wye branches; laterals; manholes.

SAN JOSE, Santa Clara Co., Cal.—San Jose Paving Company awarded contract at \$7396 by Board of Supervisors to improve Martin, Flint and Kohler Aves. in Supervisor District No. 2. Engineer's estimate \$9500.

COMPTON, Los Angeles Co., Cal.—Until July 15, 8 P. M., bids will be received by city council for improving streets in the northwest section of the city in what is known as the Kemp Street Project. City Engineer Glen Rood has estimated the cost at \$75,000. Streets to be improved are: Kemp St., from Main St. to Rosecrans Ave. and School St.; Palmer Ave., Brazil St., Arbutus St., Poplar St., Elm St., Cedar St., Maple St., Spruce St., Cherry St., Plum St. and Rosecrans Ave. from Compton Ave. to the west city limits. Improvements will consist of five-inch cement concrete paving and cast iron water mains and fire hydrants.

SAN MATEO, San Mateo Co., Cal.—Until July 7, 8 P. M., bids will be received by E. W. Foster, city clerk, (30-5) to improve Glendale Rd. from

Hillsborough town limits to present pavement at intersection of Poplar Ave., portions of Edgewood Rd. and Fulton Rd., involving grading; combined conc. curbs and gutters; 4-in. asphalt. conc. base pavement with 2-inch concrete surface; 6-inch vitrified clay pipe San. sewers; 4-in. vit. clay pipe lateral sewers; 12-inch concrete pipe storm water sewers and 2 circular concrete pipe catchbasins. Specifications obtainable from above. Certified check of 10% required, payable to City. E. P. Wilsey, city engineer.

OFFICIAL PROPOSALS

STATE OF CALIFORNIA

DEPARTMENT OF PUBLIC WORKS

DIVISION OF HIGHWAYS

NOTICE TO CONTRACTORS

SEALED PROPOSALS will be received at the office of the State Highway Engineer, Public Works Building, Sacramento, California, until 2 o'clock P. M. on July 16, 1930, at which time they will be publicly opened and read, for construction in accordance with the specifications therefor, to which special reference is made, of portions of State Highway, as follows: Modoc County, between 3 miles and 4.4 miles east of Alturas (11-M-23-C), about one and four-tenths (1.4) miles in length, to be graded and surfaced with untreated crushed gravel or stone.

El Dorado County, a reinforced concrete girder bridge across South Fork of American River at Riverton (111-E-D-11-P); composed of one 60-foot span and two 54-foot spans on concrete piers and bents, and grading and surfacing approaches with untreated crushed gravel or stone.

Kern County, between 1 1/4 miles east of Cottonwood Creek and Democrat Springs Vi-Ker-57-F & G), about thirteen and nine-tenths (13.9) miles in length, to be surfaced with oil treated crushed gravel or stone.

San Joaquin County, between Forest Lake and the northerly boundary (X-S-J-4-D), about one and four-tenths (1.4) miles in length, to be graded and paved with asphalt concrete.

Proposal forms will be issued to only those Contractors who have furnished verified statement of experience and financial condition in accordance with the provisions of Chapter 644, Statutes 1929, and whose statements so furnished are satisfactory to the Department of Public Works. Bids will not be accepted from a Contractor to whom a proposal form has not been issued by the Department of Public Works.

Plans may be seen, and forms of proposal, bonds, contract and specifications may be obtained at the said office, and they may be seen at the offices of the District Engineers at Los Angeles and San Francisco, and at the office of the District Engineer of the district in which the work is situated. The District Engineers' offices are located at Eureka, Redding, Sacramento, San Francisco, San Luis Obispo, Los Angeles, San Bernardino and Bishop.

A representative from the district office will be available to accompany prospective bidders for an inspection of the work herein contemplated, and Contractors are urged to investigate the location, character and quantity of work to be done, with a representative of the Division of Highways. It is requested that arrangements for

joint field inspection be made as far in advance as possible. Detailed information concerning the proposed work may be obtained from the district office.

No bid will be received unless it is made on a blank form furnished by the State Highway Engineer. The special attention of prospective bidders is called to the "Proposal Requirements and Conditions" annexed to the blank form of proposal, for full directions as to bidding, etc.

The Department of Public Works reserves the right to reject any or all bids or to accept the bid deemed for the best interests of the State.
DEPARTMENT OF PUBLIC WORKS
DIVISION OF HIGHWAYS
C. H. PURCELL,
State Highway Engineer.
Dated June 13, 1930.

NOTICE TO CONTRACTORS

SEALED BIDS will be received by Geo. B. McDougall, State Architect, Public Works Building, 11th and P Sts. Sacramento, California, up until 2 o'clock P. M., Tuesday, July 22, 1930, thereafter on said day to be publicly opened and read for the construction of a reinforced concrete dam for the Preston School of Industry, near Lone, California.

The dam will measure 192'-0" at the crest and approximately 25'-0" at the highest point and involves approximately 600 cubic yards of reinforced concrete.

Plans and specifications are on file for examination in the office of the Division of Architecture, Public Works Building, Sacramento, and also at Room 1025 Associated Realty Building, Los Angeles, and at the principal California Cities Builders' Exchange Offices.

Plans, specifications, and proposal forms may be secured by licensed Contractors who have qualified or who will qualify by furnishing a verified statement of experience and financial condition as required by the provisions of Chapter 644, Statutes 1929, and whose statements so furnished are satisfactory to the Department of Public Works. Questionnaire forms may be secured from the Division of Architecture.

Bids will not be accepted from a Contractor to whom a proposal form has not been issued and all bids must be on proposal forms supplied by the State.

Requests for plans shall be accompanied by a deposit of twenty-five (\$25.00) dollars. Check shall be made payable to the Department of Public Works, Division of Architecture. Deposit will be returned upon receipt of the work in good condition, at Sacramento Office of the Division within 30 days after opening bids, otherwise it will be forfeited to the State.

All bids must be filed at the office of the State Architect on or before the time heretofore stated and in accordance with the "Rules for Bidding" accompanying the proposal form.

No bid will be considered unless cash, a bidder's bond made payable to the State of California, or a certified check made payable to the "State Engineer, Department of Public Works," in the sum of at least ten per centum (10%) of the amount of the bid is enclosed with the bid.

The Division of Architecture, State Department of Public Works, reserves the right to reject any or all bids and to waive any informality in any bid received.

STATE DEPARTMENT OF PUBLIC WORKS
